Hull and East Riding School of Medicine, and spending some time in travel, he went to Rugby in 1817, for the education of his sons in the school under Dr. Tait (afterwards Archbishop of Canterbury), and has resided there ever since. He has ventured outside his profession only twice—once in Bradford, by a course of lectures on Science (which was followed by the formation of a Philosophical Society in 1839, of which he was elected first President, and the main design of which was to form a Local Museum, limited to objects of interest belonging to the town and neighbourhood), and in 1839, at the meeting in Birmingham of the British Association for the advancement of Science, where he read a paper recommending such local museums; this was so favourably received, that few, if any, large towns in England are now without their museums; and for this the Fellowship of the Royal Society was conferred upon him in 1840. The second time was in Rugby, by suggesting to Dr. Tait the introduction of the teaching of physical science into the school; the suggestion was acted upon, and Dr. Shaw was the first "Reader in Natural Philosophy," in 1849 and 1850; all the other public schools in the kingdom have since followed this example. This being set on foot he resigned his post, that he might henceforward give his whole time and thought to the improvement of the medical treatment of the sick. This has been uninterruptedly continued for forty years, has involved an investigation of the various systems of medicine, including Homoeopathy, and has resulted in the discovery, as he thinks, of laws of nature—law-facts he calls them—which may form for medicine a scientific basis, a foundation it has never yet had, and lead to a very great improvement in the art of healing. The details of these inquiries have been given in a series of "Essays on Medicine," published at irregular intervals since 1851, and now numbering fifty-eight.

**SHAW, Captain Eyre Massey, C.B.,** Chief of the Metropolitan Fire Brigade, is the son of the late Bernard Robert Shaw, Esq., of Monkstown, co. Cork, and was born in 1830, and educated at Dr. Coghlan's School, Queenstown, and at Trinity College, Dublin, where he took his B.A. and M.A. degrees. He entered the army, but retired in 1860, and became Superintendent of the Borough Forces of Belfast, including Police and Fire Brigade. On the death of Mr. Braidwood in 1861, he was appointed Chief Officer of the Metropolitan Fire Brigade, which,

from being originally supported by the Insurance Companies, was taken in charge by the Metropolitan Board of Works, and under Captain Shaw's able guidance has become the most efficient brigade in the world. Captain Shaw was in 1879 made C.B., and has published various books connected with Fires and Fire Protection, besides Annual Reports on the work of the Brigade.

**SHAW-LEFEVRE, The Right Hon. George John, M.P.,** son of Sir John George Shaw-Lefevre, K.C.B., by Rachel Emily, daughter of Mr. Ichabod Wright, of Mapperley Hall, Nottingham, was born in 1832, and received his education at Eton and at Trinity College, Cambridge. He was called to the Bar at the Inner Temple in 1856. In 1863 he was first elected M.P. for Reading, in the Liberal interest, and he continued to be one of the representatives of that borough down to 1885, when he was defeated by Mr. Murdoch. He was a Lord of the Admiralty from May to July, 1866; Secretary to the Board of Trade from Dec., 1868, to Jan., 1871; Secretary to the Admiralty from the last date to Feb., 1873, and again from April, 1880, to the following November, when he was appointed First Commissioner of Works and Buildings in succession to Mr. Adam, who had resigned that office on being appointed Governor of Madras. As First Commissioner, Mr. Shaw-Lefevre introduced great improvements in the streets of London, notably at Westminster and at Hyde Park Corner. On the death of Mr. Fawcett he was appointed Postmaster-General (Nov., 1881), and his tenure of this office was marked by the introduction of sixpenny telegrams. Mr. Shaw-Lefevre was elected a Benchor of the Inner Temple in Nov., 1882. He is the author of an important article on "Public Works in London," in the *Nineteenth Century* (Nov., 1882). After his defeat at Reading in Nov., 1885, he was without a seat until, at a bye election, April, 1886, he successfully stood for Bradford, vacant by the death of the Right Hon. W. E. Forster. At the General Election of 1886 he was again elected as a Gladstonian Liberal. He has published several useful works, some of a statistical kind, on the English and Irish Land Question. One of his sisters, Miss Madeleine Shaw-Lefevre, is Principal of Somerville Hall, Oxford.

**SHEA, Sir Ambrose, K.C.M.G.,** was born in Newfoundland in 1820, received his education there, and for over thirty years occupied a foremost place in the public

affairs of that Colony. For six years he was Speaker of the Assembly, and subsequently for five years was an unofficial Member of the Council of Government. He was one of the two Delegates from the Colony at the celebrated Quebec Conference at which the Constitution of the Canadian Dominion was framed. In 1838 Sir Ambrose was delegated to London to urge the right of the Colony to enforce restrictions on French fishing operations on the Newfoundland coasts, but owing to some Imperial Cabinet difficulties at the moment nothing could be done. The Legislature of the Island, however, renewed their efforts, and he was again sent, in conjunction with the Premier, Sir Robert Thorburn, to press the question, and this time with success. Soon afterwards Lord Knutsford offered Sir Ambrose the Governorship of the Bahamas, on the acceptance of which he retired from commercial pursuits. This post he assumed at the end of 1837, and it would be difficult to parallel the record he has made in that Colony during the short period of two and a half years. On his arrival the place was in a state of impending bankruptcy. The precarious resources, fruit, and sponge-fishing, were declining, and those having means were unwilling to invest a shilling in any untried adventure. The population were thinning by emigration to the Southern States, and no one thought of the future without misgiving. The prospect for a new Governor was cheerless in the extreme; but Sir Ambrose is of the "nil desperandum" class, and he betook himself at once to an examination of the situation. He had not been a month in his position before he felt that he had lighted on a solution of the difficulties. His attention was attracted to a bold-looking plant of the aloo order, and he found on inspecting it that it held a fibre similar to Manila; and his experience enabled him to see that this had a stable commercial value, though he was not encouraged when he explained what he thought of the capabilities of this plant. He was told that attempts had before been made in the direction he proposed, but without any success, and that the plant was now universally regarded as a noxious weed, which defied all efforts to eradicate it. This was the prevailing feeling; but Sir Ambrose had formed a strong opinion, and gradually he gained assent to his views. The growth seems to set all ordinary adverse or disappointing influences at defiance; and the product is all but, if not quite, equal to the celebrated Manila hemp. The exports of the Colony have hitherto averaged about

£125,000 a year, but no one on the spot, who knows on what grounds the calculations rest, has a doubt that within a very few years the value of the exports will be quadrupled, and an output of a million is within range of the most reasonable contemplation. Land has gone up to four times its former value, and already the revenue responds to the industrial activity that prevails. These results are by common consent due solely to the ability and unflagging energy of the Governor. Sir Ambrose is the first Colonist who ever held the Post of Imperial Governor, and his splendid success will be hailed with great satisfaction by Colonists everywhere, for there are few to whom his name as a prominent Colonist has not been long familiar.

SHEDD, William Greenough Thayer, D.D., LL.D., was born at Acton, Massachusetts, June 21, 1820. He graduated at the University of Vermont in 1839, and at Andover Theological Seminary in 1843. He was pastor of the Congregational Church in Brandon, Vermont, 1843-15; Professor of English Literature in the University of Vermont, 1845-52; Professor of Sacred Rhetoric and Pastoral Theology in the Auburn Theological Seminary, 1852-51; Professor of Ecclesiastical History and Lecturer on Pastoral Theology in the Andover Theological Seminary, 1854-62; pastor of the Presbyterian Brick Church in New York, 1862-63; and Professor of Biblical Literature in the Union Theological Seminary, New York, 1863-71, when he was transferred to the Chair of Systematic Theology, which he resigned in 1890. He has published a "Translation of Turretin's Rhetoric," 1850; edited "Coleridge's Works with Introductory Essay," 7 vols., 1853; published "Translation of Guericke's Church History," 2 vols., 1857, 1863; edited "Augustine's Confessions with Introductory Essay," 1860; published a "History of Christian Doctrine," 2 vols., 1868; "Homilies and Pastoral Theology," 1867; "Sermons to the Natural Man," 1870; "Theological Essays," 1877; "Literary Essays," 1878; "Commentary on St. Paul's Epistle to the Romans," 1879; "Sermons to the Spiritual Man," 1884; "Doctrine of Endless Punishment," 1886; "Dogmatic Theology," 1888; and "Revision of the Westminster Standards," 1890.

SHEPSTONE, Sir Theophilus, K.C.M.G., was appointed, in Jan. 1885, head-quarters interpreter of the Kaffir language at the Cape of Good Hope, and served on

the staff during the Kaffir war of that year. He was also employed in various services on the frontier of the Cape Colony; was appointed Captain-in-Chief of the native forces in Natal in 1818; Judicial Assessor at Natal in 1855; Secretary for Native Affairs in 1856; member of the Executive and Legislative Councils of that Colony the same year; proceeded on a special mission in 1873 to crown the King of Zululand; returned to England in Aug. 1874; and proceeded once more to Natal in Sept. 1876 to conduct negotiations between the Transvaal States and the Zulus, which resulted in his annexing the country of the Transvaal to the British Crown by proclamation, dated April 12, 1877. He was nominated a Commander of the Order of St. Michael and George in 1860, and a Knight Commander of the same Order in 1876.

**SHERBROOKE** (Viscount), The Right Hon. Robert Lowe, C.B., LL.D., D.C.L., son of the late Rev. Robert Lowe, rector of Bingham, Notts, by Ellen, daughter of the late Rev. Reginald Pyndar, rector of Madresfield, Worcestershire, was born at Bingham in Dec. 1811, and educated at Winchester, and at University College, Oxford, where he graduated in high honours in 1833; was elected Fellow of Magdalen in 1831, and became a private tutor at Oxford. He was called to the Bar by the Hon. Society of Lincoln's Inn in Jan. 1842, went the same year to Australia, where he practised with much success as a barrister, and sat in the council of that colony from 1843 to 1850; was afterwards elected member for Sydney, and returned to England in 1851. He was one of the joint secretaries of the Board of Control from Dec. 1852 till Feb. 1855; was appointed Vice-President of the Board of Trade and Paymaster-General in Aug. 1855, retiring on the return of Lord Derby to power in 1858; was appointed Vice-President of the Education Board in June, 1859, and resigned in April, 1864. He has been a member of the Senate of the University of London since 1860, was returned member for Kidderminster in July, 1862, and represented that borough till April, 1869, when he was elected for Calne. During the sessions of 1866 and 1867 Mr. Lowe was one of the most strenuous opponents of the Reform Bill, and a collected edition of his speeches on the question appeared in 1867. In Dec. 1868 he was elected the first representative in the House of Commons of the University of London, and in the same month, on the formation of Mr. Gladstone's administration, he was appointed Chancellor of

the Exchequer and a member of the Council on Education. He resigned the Chancellorship of the Exchequer in Aug. 1873, and was appointed to succeed Mr. Bruce at the Home Office. At the same time Mr. Gladstone assumed the Chancellorship of the Exchequer, in addition to his office of First Lord of the Treasury. Mr. Lowe of course went out of office with his party in Feb. 1871. On the return of the Liberals to office, in May, 1880, he was raised to the peerage by the title of Viscount Sherbrooke. He was created honorary LL.D. of Edinburgh in 1867, and honorary D.C.L. of Oxford in 1870. He published, in 1881, a volume of poems, mostly written in early life. He married, in 1836, Georgiana, second daughter of Mr. George Orred, of Aigburth House, Liverpool; she died on Nov. 3, 1881. In 1845 he married Caroline, daughter of the late Thomas Sneyd, of Ashcombe Park, Sheffield, and the same year received the order of the Grand Cross of the Bath.

**SHERMAN**, The Hon. John, brother of the late Gen. W. T. Sherman, was born at Lancaster, Ohio, May 10, 1823. He received an academic education, studied law, and began its practice in 1844. He was a delegate to the National Whig Conventions of 1848 and 1852; and a Member of Congress from 1855 to 1861. He entered the Republican party soon after its formation, and has since acted with it. In 1861 he was elected to the U.S. Senate and re-elected in 1866 and 1872. On the accession to the presidency of Mr. Hayes in 1877, Senator Sherman was appointed Secretary of the Treasury, a position retained by him until the close of President Hayes's administration in 1881, when he re-entered the Senate, of which he is still a member (and chairman of the Committee on Foreign Relations), his present term expiring in 1898. It was due to his management while at the head of the Treasury that the resumption of specie payments (in 1879) was effected without disturbance to the financial or commercial interests of the country. Senator Sherman was a prominent candidate for the Republican presidential nomination in 1880 and 1888, and was the presiding officer of the Senate, 1885-87. He published in 1879 a volume of his "Selected Speeches and Reports on Finance and Taxation," 1859-78.

**SHIPLEY**, Orby, M.A., was born July 1, 1832, at Twyford House, in the county of Southampton, and educated at Jesus College, Cambridge. For twenty-three

years he worked as a clergyman of the Church of England; and on Oct. 26, 1878, was received into the Roman Catholic Church. He was the editor, prior to 1878, of many ascetic and devotional works, translated from Catholic sources; of three volumes of Religious poetry from all sources, "Lyra Eucharistica," "Messianica," and "Mystica;" and of several volumes of essays, by various authors, "The Church and the World," "Tracts for the Day," "Ecclesiastical Reform," and "Studies in Modern Problems." He is an occasional contributor to periodical literature—amongst other reviews, to the *Nineteenth Century*, the *Fortnightly*, the *Contemporary*, and *Dublin Reviews*. As a Roman Catholic, he has edited "Annus Sanctus, hymns of the Church for the Ecclesiastical year," and a series of old English ascetical books. He is engaged in the compilation of an "Anthology" of sacred verse in honour of the Blessed Virgin Mary, from English, Irish and American Sources, but chiefly of printed poetry, and from all sources and of all dates, original and translated.

"SHIRLEY." See SKELTON, JOHN, LL.D., C.B.

SHORE, The Rev. Thomas Teignmouth, M.A., born in Dublin in 1841, was educated at Trinity College, Dublin, where he graduated in 1861, having obtained distinguished honours in English composition and in divinity, and he afterwards proceeded to the degree of M.A. (*comitatus causam*) at Oxford. He was ordained in 1865 by the Bishop of London (Dr. Tait), and having held successively the curacies of Chelsea and of Kensington, and been for two years incumbent of St. Mildred's Lee, he was appointed in 1878 to the incumbency of Berkeley Chapel, Mayfair, which he still holds, and of which the special feature is the children's service, always largely attended. He has published two volumes, entitled "Some Difficulties of Belief," and "The Life of the World to Come," and a volume of sermons to children, "St. George for England." He is one of the contributors selected by the Bishop of Gloucester and Bristol for his lordship's New Testament Commentary. He has also edited a series of volumes, entitled "Hints to Belief," and has written the one on "Prayer" in that series. Mr. Shore was appointed one of Her Majesty's chaplains in July, 1878, in succession to Dr. MacLagan, Bishop of Lichfield. He prepared the daughters of the Prince and Princess of Wales for their Confirmation and officiated at the mar-

riages of the Princess Louise of Wales with the Duke of Fife in 1889; and was made Canon of Worcester in Dec. 1890.

SHORTHOUSE, Joseph Henry, was born in 1834, in Great Charles Street, Birmingham, and educated at private schools. He is the author of the celebrated romance "John Inglesant," which was first privately printed and afterwards published in 1881, and excited a great amount of interest; "The Platonism of Wordsworth," 1881; the preface to George Herbert's "Temple," 1882, a preface to "The Spiritual Guide" of Miguel Molinos, 1883, "The Little Schoolmaster Mark, a Spiritual Romance," 1885; "Sir Percival," 1886; "A Teacher of the Violin, and other Tales," and "The Countess Eve," 1888.

SHREWSBURY, Bishop of. See STAMER, THE RIGHT REV. SIR LOVELACE T.

SIDGWICK, Professor Henry, LL.D., D.C.L., Oxford, born at Skipton, Yorkshire, May 31, 1838, was educated at Rugby and Trinity College, Cambridge. He was Fellow of Trinity College from 1859 to 1860; and Lecturer of Trinity College from 1859 to 1875, when he was appointed Prælector of Moral and Political Philosophy. He was elected an honorary Fellow of Trinity College, April 16, 1881; and was appointed Knightbridge Professor of Moral Philosophy in 1883. Prof. Sidgwick is the author of "The Methods of Ethics," "Outlines of the History of Ethics," the "Principles of Political Economy," and of several articles on philosophical and literary subjects. He took a prominent part in the promotion of the Higher Education of Women at Cambridge, especially in the foundation and management of Newnham College. Professor Sidgwick is LL.D. of Edinburgh, Glasgow, and St. Andrews, and was made a D.C.L. of Oxford in 1890.

SIEMENS, Dr. Werner, Hon. Member of the Institution of Electrical Engineers, was born at Lenthé, in Hanover, in 1816; and educated at the Lüneburg Gymnasium. Dr. Siemens joined the Prussian Artillery in 1834, where his eminent talents soon attracted notice and—having passed through the Military schools—gained him the rank of lieutenant in 1837. While still holding this appointment in the army, he applied himself with great zeal to the study of practical chemistry and the physical sciences, and became the inventor of the process of electro-gilding, of the differential governor, and of the electric automatic recording telegraph,

As member of a Commission of the Prussian General Staff for the introduction of the electric telegraph system in place of the optical telegraphs, he proposed, in 1847, the application of subterranean conductors, insulated by gutta-percha; and he executed successfully experimental lines coated with gutta-percha, by means of a press invented by him for that purpose, which is still being used in the manufacture of cables. With the help of these insulated wires he succeeded, in the spring of 1848, together with Professor Himly, in laying the first submarine mines with electric ignition, for the protection of the harbour of Kiel from the Danish fleet. In the same year he carried out the first great telegraph line in Germany between Berlin and Frankfurt-on-Main; and, in the following year, the subterranean line between Berlin and Cologne. Dr. Siemens left the Government service in 1850, and devoted himself afterwards entirely to scientific studies and to private enterprises. In 1847 he had already laid the foundation of the telegraph works carried on afterwards by him under the firm of Siemens and Halske, in Berlin, the celebrated establishment which was destined to become, and at present is, one of the chief centres for the application of electricity to the industrial arts. Its world-wide reputation, acquired within a short time, led him to open branch works in London and St. Petersburg, which also rapidly developed into entirely independent large concerns, under the management of his younger brothers, William and Charles. Dr. Siemens' personal achievements are to be found in the fields of science as well as in those of the technical arts. His scientific merits enabled the University of Berlin to confer on him the dignity of Doctor of Philosophy, *honoris causa*, in 1860; they opened likewise for him the doors of the Academy of Sciences in Berlin in 1874; and, subsequently, of many other academies and societies. Amongst his many and various achievements in matters relating to science and the technical arts must be mentioned as particularly noteworthy, the invention and practical application of the quicksilver unit (Siemens' unit), by means of which exact and comparative measurements became possible for the first time; further, that of the gutta-percha press already referred to; that of the development of methods for testing underground and submarine cables, and determining the position of faults in them; the invention of polarised relays; of the so-called Siemens Armature; and of the dynamo-electric machine, the principle of which

he published first at the meeting of the Berlin Academy of Sciences, on Jan. 17, 1867; the electric railway; and of numerous other inventions, such as the pneumatic despatch tube system; and the Siemens alcoholimeter for registering the quantity of absolute alcohol contained in any alcoholic liquid passing through the instrument. Dr. Siemens has been created a Member of the Prussian Order "Pour le Mérite." The late Emperor Frederick III. of Germany conferred upon him the Patent of Nobility. He has also become the recipient of many other distinctions and honours. Dr. Siemens' numerous lectures and papers have been published in the Transactions of different learned and scientific societies, and in various periodicals, especially the following:—"Sitzungsberichte der Königl. Preussischen Academie der Wissenschaften zu Berlin," "Poggendorff's Annalen der Physik und Chemie," Dingler's "Polytechnisches Journal," and others. A collection of these lectures and papers was published under the title: "Gesammelte Abhandlungen und Vorträge," Berlin, 1881, Verlag von Julius Springer. A second and enlarged edition of this work was printed 1889; and a second and a third volume are to follow in course of time.

SIEVEKING, Sir Edward Henry, M.D., LL.D., Physician in Ordinary to Her Majesty the Queen, and LL.D., the Prince of Wales, was born in London, within the sound of Bow bells, in 1816. He is descended from an old North German family, still flourishing in Hamburg; and was partly educated in England and partly in Germany. He was in Bonn at the University, and subsequently at University College, London, and the University of Edinburgh, where he took his degree of M.D. in 1811. He travelled abroad, studying in Paris, Vienna, and Berlin. He practised among the English colony at Hamburg for four years; and while there, contributed to *Oppenheim's Medical Journal*; wrote a treatise on Ventilation, a previously unconsidered subject in Germany, and built a Children's Hospital. In 1847 he returned to London; became a Member of the Royal College of Physicians, and four years later, Fellow. After serving as Physician to the Northern Dispensary in 1851, he was appointed to St. Mary's Hospital, with which he remained actively associated for 35 years, and is now Consulting Physician. He has been President of the Harveian, and President of the Royal Medical Chirurgical Society. His first publication in England was in 1840, and was a pamphlet

let on Nursing; in which the provision of Nurses for the Poor, as part of a perfect system of state sanitation, was strongly urged. A paper on the same subject by Dr. Sieveking was subsequently read before the Epidemiological Society; and this led to the formation of a committee, which for a series of years sought to carry out the views advocated by him. Lord Shaftesbury on two different occasions introduced the committee to the Poor Law Board, which gave its official support; but nothing came of it. The present appreciation of nursing, as an aid to curative medicine may, in a great measure, be attributed to the work done by the committee. Dr. Sieveking was a co-translator of Rokitauský's great work on Pathology for the Sydenham Society; and subsequently translated from the German for the same Society, Romberg's work on Nervous Diseases. In 1854, with his colleague at St. Mary's, Dr. Handfield Jones, he published a work on pathological Anatomy, of which a second edition has since been edited by Dr. Payne. From 1855 to 1860 Dr. Sieveking was editor of the *British and Foreign Medical and Surgical Review*, founded, and long carried on, by his friend Sir John Forbes. In 1863, at the recommendation of Sir J. Clark, the position of Physician in Ordinary to H.R.H. the Prince of Wales was offered to, and accepted by, Dr. Sieveking. In 1873 he was made Physician Extraordinary, and in 1888 Physician in Ordinary, to Her Majesty the Queen. He was knighted in 1886; made Honorary LL.D., Edinburgh, at the Tercentenary of Edinburgh University; wrote a work on Epilepsy, two editions; a work on Medical advice in Life Assurance; and has delivered frequent addresses of various kinds. He was Croonian Lecturer at the Royal College of Physicians; and delivered the Harveyian oration there in 1877; in consequence of which the Colleges of Physicians and Surgeons materially aided Sir E. H. Sieveking in producing an auto-type publication of the MS. of W. Harvey's original Physiological Lecture, delivered in 1616, *et seq.* Sir E. H. Sieveking has filled many offices at the Royal College of Physicians. He was the Founder of the Edinburgh University Club, and is a member of the Athenæum. He married, in 1819, Miss Jane Ray, youngest daughter of J. Ray, Esq., of Finchley, J.P., and has five sons and three daughters.

**SIMEONI, Giovanni**, an Italian Cardinal, was born at Paliana, in the diocese of Palestrina, July 28, 1816, and having been ordained priest, he was, on account

of his learning, employed in offices of importance. In 1847 he was Auditor of the nunciature of Madrid. After some years we find him in Rome, Prefect of Studies in the Pontifical Lyceum of the Roman Seminary, and attached to the Secretary's office for Extraordinary Ecclesiastical Affairs. In the year 1857 he was appointed Domestic Prelate to the Pope, and sent again to Spain in the quality of Envoy for the affairs of the Sea in order to renew the connections with Rome, which had been interrupted by the revolution. In the year 1858 he was made Pro-nuncius Apostolic in full. For eight years he was Secretary to the Congregation of the Propaganda for the affairs of the Oriental Rite, and in 1868 he became Secretary of the Latin Rite and advisor to the Roman Inquisition, and also adviser for the affairs of the Oriental Rite to the congregation of the council for the revision of the provincial councils and to the congregation for Extraordinary Ecclesiastical affairs. When the Ecumenical Council of the Vatican was convoked Mgr. Simeoni was one of the Advisors for the Commission of Oriental Churches and Missions and for Ecclesiastical Discipline. The diplomatic relations between Rome and the Court of Spain having been re-established in 1875 Pope Pius IX. sent Mgr. Simeoni as Nuncio to Madrid, having just recognized him Archbishop of Chalcedonia. In the Consistory of March 15, 1875, Pius IX. created him Cardinal, reserving him *in petto*, and on Sept. 17 the same year he published him in Consistory. Mgr. Simeoni, having been created Cardinal, remained in the nunciature in Madrid as Pro-nuncio, and on the death of Cardinal Antonelli, in 1876, he was appointed Secretary of State to Pope Pius IX.—an office which he retained until the death of that Pontiff—and Prefect of the Sacred Apostolic Palaces and the Sacred Lauretan Congregation. He was afterwards made a member of the Roman Universal Inquisition and of other ecclesiastical congregations. He was succeeded as Secretary of State by Cardinal Franchi in March, 1878, when Pope Leo XIII. appointed Cardinal Simeoni Prefect-General of the Propaganda.

**SIMMONDS - LUND, Peter**, F.R.S., F.E.C.I., author and journalist, was born July 24, 1814, at Aarhus, Denmark, and is the eldest son of the late Lieutenant George Simmonds, R.N. Mr. Simmonds entered the navy as a midshipman at the age of twelve, on board the *Cygnet*, one of the ten-gun brigs then carrying the mails from Falmouth, commanded by his

uncle, Captain Gording. In Oct., 1831, Mr. Simmonds was sent out by his uncle to Jamaica, as a sugar planter, and remained there three years, having thus the opportunity of witnessing the several stages of slavery, apprenticeship and freedom. Being invited to give a lecture before the Literary and Philosophical Society at Portsmouth, he incidentally compared the condition of the negro in the West Indies with that of the poor at home, in favour of the former. Subsequently he wrote a series of articles on Life and Slavery in the West Indies, compiled a "History of the Rise and Progress of the Newspaper Press of all Countries," and published an abstract of his researches in the Journal of the Statistical Society for 1841. In that year he became Secretary to Mr. Shaw, the originator of the Royal Agricultural Society and the Farmers' Insurance Office, editor of the *Mark Lane Express*, &c. Mr. Simmonds contributed largely on Agricultural subjects to the *Farmers' Magazine*, and leaders to the *Mark Lane Express*; and was engaged, as sub-editor, by Mr. C. M. Johnson, F.R.S., in bringing out the "Farmer's Encyclopedia," in 1842. After carrying on the *Colonial Magazine* for several years Mr. Simmonds, in 1853, brought out his first important work, "The Commercial Products of the Vegetable Kingdom," a volume of 668 pages, which has in subsequent years been issued in two large editions under the title of "Tropical Agriculture," and has become a standard book. In 1857 Messrs. Routledge brought out a condensed work of his on "Arctic Discoveries," which has gone through many editions; and in the following year a "Commercial Dictionary of Trade Products and Technical Terms" (Routledge & Co.), which is a useful work of reference, and containing more than 22,000 definitions of new words, has been a mine of wealth for various subsequent lexicographers. Mr. Simmonds having published more than fifty volumes during his long literary career, it would be impossible to enumerate them all. Among the most important may be mentioned: "The Curiosities of Food," 1859; "Waste Products and Undeveloped Substances," 1862, which has gone through several editions; new and enlarged editions of "Ure's Philosophy of Manufactures," "Ure's Cotton Manufactures," 1861; and "Waterston's Cyclopædia," 1863; "The Technologist," 6 vols., 1861-66; "The Journal of Applied Science," 12 vols., 1870-1881; "The Commercial Products of the Sea," 1879; "Animal Food Resources of different Nations," 1885; "Science and Com-

merce," a series of essays, 1872; "Animal Products," 1877; "The Popular Beverages of various Countries," 1888; "The British Roll of Honour," 1887; and many others. Besides this special literary work, Mr. Simmonds has been an active contributor to periodical literature as leader-writer for many years for the *Shipping Gazette*, the *Mark Lane Express*, and City Editor of the *Globe*; a contributor of articles to the *Mining Journal*, *Cassell's Magazine*, *Chambers's Journal*, the *Art Journal*, the *London Review*, the *Quarterly Journal of Agriculture*, the *Nautical Magazine*, the *Paper-makers' Journal*, *Leather*, the *Gardeners' Chronicle*, and the *Journal of the Society of Arts*. To the latter journal he has been a constant contributor of lectures and articles for the last thirty-five years. So highly were these contributions appreciated that the Council of the Society, under one of their rules, made him a Life Member without payment, in consideration of being "eminent in the application of Abstract Science to the Arts, Manufactures, and Commerce." He was made a Knight of the Legion of Honour of France, and of the Crown of Italy in 1878. He is Honorary and Corresponding Member of the Geographical Societies of Marseilles and Paris, of the Industrial Society of Mulhouse, the Imperial Austrian Agricultural Society of Vienna, the Society for promoting Industry of Holland, of the Literary and Historical Society of Quebec, and various other Foreign Societies. He is also Vice-President of the City of London College, and Honorary President for England of the Académie Nationale of Paris.

**SIMMONS**, Field-Marshal Sir John Linton, (I.C.B., G.C.M.G., son of Captain Thomas Frederick Simmons, R.A., was born at Langford, Somerset, in 1821, and educated at Elizabeth College, Exeter, and at the Military Academy, Woolwich. He entered the Royal Engineers in 1837, and after serving for several years in North America was appointed Inspector of Railways, Dec. 1846, and in 1850 Secretary to the Railway Commissioners. Upon the dissolution of that Commission he was transferred to the Board of Trade as Secretary to the Railway Department. In 1853, being in Turkey, he was specially employed by the late Viscount Stratford de Redcliffe on several important missions, and became Her Majesty's Commissioner with the Turkish Army under the command of Omar Pasha, in which position he served on the Danube. In Dec. 1854, he went to the Crimea to concert with the allied Commanders-in-Chief. He took

part in the Battle of Eupatoria, in the Siege of Sebastopol, and was present at the forced passage of the Ingur, where he commanded the division which crossed the river and turned the enemy's position, capturing his works and guns. He was the British Commissioner for the regulation of the Turco-Russian Boundary in Asia, in 1857; Consul-General at Warsaw from 1858 to 1860; Commanding Royal Engineer at Aldershot, 1860 to 1863; Director of the School of Military Engineering at Chatham, 1865 to 1867; appointed Lieutenant-Governor of the Royal Military Academy, Woolwich, March 18, 1869, and Governor the succeeding year, which appointment he held till June, 1876. He then became Inspector-General of Fortifications, which post he held until 1880. He was attached to the Special Embassy during the Congress in Berlin, and was appointed to assist Lord Ampthill at the Conference in Berlin on the Greek Frontier Question. He has received the Crimean Medal and Clasp, the Turkish Gold Medal for the Danubian Campaign, a Sword of Honour from the Turkish Government, the Grand Cordon of the Order of the Medjidieh, and the Fourth Class of the Legion of Honour. He was made C.B. in 1863; K.C.B. in 1869; G.C.B. in 1878; G.C.M.G., in 1887. He was Governor of Malta from June 1884 to Sept. 1888, and has since been sent as Envoy Extraordinary and Minister Plenipotentiary to Pope Leo XIII.

**SIMON, Sir John, K.C.B.; D.C.L., Oxon.; LL.D., Cantab. and Edin.; M.D. Dublin; F.R.S.;** was born in 1816, became an Honorary Fellow of the Royal College of Surgeons in 1844; was for many years Surgeon to St. Thomas's Hospital, and was the first appointed Officer of Health to the City of London. From 1855 to 1876, he was Medical Officer to the Board of Health, to the Privy Council, and to the Local Government Board. He is the author of several papers on Physiology, Pathology, and Surgery, and of reports and other official papers relating to the sanitary state of the people of England. The University of Munich, at its 400th anniversary in 1872, conferred upon him the honorary diploma of Doctor of Medicine "propter præclarissimam de sanitate publicâ tuendâ atque augendâ meritâ." He was nominated a Companion of the Bath in May, 1876, and K.C.B. in 1887. He is one of the Crown Members of the General Medical Council.

**SIMON, Jules, a French statesman,** was born at Lorient (Morbihan) Dec. 31, 1814. The name given to him by his parents

was Jules François Simon Suisse, but he adopted the name of Simon only, and has never been known by any other. He studied first at the little college in Lorient, and at another similar one at Vannes, after which he entered, as an assistant teacher, the Lycée at Rennes. He remained at the Normal School for some time, was received as Fellow of Philosophy in 1835, and taught that science successively at Caen and Versailles. At the latter place he achieved a brilliant success. Victor Cousin, whose earnest disciple he was, called him to Paris, and secured for him a charge at the Normal School in that city. For a time he was a supplementary lecturer on the History of Philosophy, but a year after his arrival in Paris he became the principal lecturer. In 1839 he succeeded M. Cousin, at the request of the latter, in the philosophy course, and for twelve years had a brilliant career as one of the most promising University men in France. In 1845 he was made a Knight of the Legion of Honour. The next year he presented himself to the electors of Lannion (Côtes-du-Nord) as the candidate of the Constitutional Left, but he was defeated. In Dec. 1847, he founded in Paris, in conjunction with his University colleague, M. Amédée Jacques, a political philosophical review called *La Liberté de Penser*. M. Simon edited the political department of this publication. After the revolution of Feb. 1848, he was elected to the Constituent Assembly from the department of the Côtes-du-Nord. He classed himself with the Moderate Left in the Assembly, and was appointed a member of the committee on the organization of labour. In March, 1849, he was elected a member of the Council of State, and he resigned his seat as representative (April); but on the reconstitution, on the 29th of June, by the Legislative Assembly, of the first half of that Council, he was not retained on it, and consequently he found himself removed from public life. After the *coup d'état*, M. Simon's course of lectures on philosophy at the Sorbonne was suspended, and as he refused to take the oath of allegiance to the Empire, it was assumed that he had resigned his professorship. In 1863 he was sent to the Corps Législatif from the 8th circonscription of the Seine. He was returned by that circonscription and also by the 2nd circonscription of the Gironde in 1869, when he elected to represent the latter constituency. M. Simon soon became the chief of the Republican party. He ranked high as an orator, and in the discussions on treaties of commerce he proved himself to be an able political economist and an

earnest advocate of Free Trade. On the formation of the Government of National Defence he took the post of Minister of Public Instruction, Public Worship, and Fine Arts. After the armistice he was sent to Bordeaux to see that the decrees relating to the elections were carried out in their integrity, and not with the modifications introduced by M. Gambetta. At the elections of Feb. 8, 1871, M. Simon's candidature failed in Paris, but he was re-elected a representative of the department of the Marne in the National Assembly. He classed himself among the members of the Left, and was chosen by M. Thiers to take, in the Cabinet of Conciliation formed Feb. 19, 1871, the portfolio of Public Instruction. He held it till May, 1873, when he resumed his seat among the members of the Left, who made him their President. On Dec. 16, 1875, he was elected a Senator for life. In Dec. 1876, M. Dufaure resigned, and a new Ministry had to be formed, which, according to constitutional principles, must rest upon a Parliamentary majority. The President sent for M. Jules Simon, who became Premier, holding, with the Presidency of the Council, the portfolio of the Interior. The cabinet lasted till May 16, 1877, when Marshal MacMahon sent M. Simon a letter which was, in fact, nothing less than a dismissal from office. M. Simon went immediately to the Marshal and tendered his resignation, which was accepted. M. Simon was elected a member of the French Academy in Nov. 1875, in the place of the Comte de Rémusat, and was formally received into that learned body June 22, 1876. M. Jules Simon vigorously opposed the Bill introduced by M. Ferry in 1879 for the suppression of the non-authorized religious congregations. In April, 1880, the French Academy elected him a member of the new Supreme Educational Council, and on Nov. 11, 1882, he was elected permanent Secretary of the Academy of Moral and Political Science, in the place of M. Mignet. In 1890, at the Labour Conference held in Berlin, the German Emperor sent to M. Jules Simon, as a souvenir, the musical works of Frederick the Great. Among M. Jules Simon's works are:—"Du Commentaire de Proclus sur le Timée de Platon," 1839, one of his two theses for the degree of doctor; "Étude sur la Théodicée de Platon et d'Aristote," 1840; "Histoire de l'École d'Alexandrie," 2 vols., 1844-45, 2nd edit. 1861; "Le Devoir," 1854; "La Religion Naturelle," 1856; "La Liberté de Conscience," and "La Liberté," 2 vols., 1859; "L'Ouvrière," 1863; "L'École," 1864; "Le Travail," 1866; "L'Ouvrier de huit ans," 1867;

"La Politique Radicale," 1868; "La Peine de Mort," 1869; "Le Libre-Echange," 1870; "Souvenirs du 4 Septembre," 1874; "Le Gouvernement de M. Thiers, 8 février, 1871—24 mai, 1873," Paris, 1878; "Dieu, Patrie, Liberté," 1883; and "Une Académie sous le Directoire," 1885; and three volumes since the publication of the last edition of this work; viz., "Thiers, Guizot, Remorlat," "Mignet, Michelet, Henri Martin," and "Victor Cousin." He has also brought out editions, with important introductions, of the philosophical works of Descartes, Bossuet, Malebranche, and Antoine Arnauld, and has contributed to the *Revue des Deux Mondes* and other periodicals.

**SIMPSON, Maxwell, M.D., LL.D., D.Sc., F.R.S.**, born in 1815, in the city of Armagh, Ireland, is the youngest and 3th child of the late Thomas Simpson, Esq., of Beechhill, co. Armagh, and was educated at Newry School, and Trinity College, Dublin, and is A.B. and M.B. of Dublin University. The degree of M.D. (*Honoris Causa*) was conferred on him by the Dublin University in 1861; and that of LL.D. (*Honoris Causa*) in 1878—and the degree of D.Sc. by the Queen's University in 1880. He was appointed Examiner in Materie Medice in the Queen's University in 1860, and Professor of Chemistry in Queen's College, Cork, in 1872. He is the author of papers on several chemical researches, which appeared in the *Comptes Rendus*, the *Annalen der Chemie*, and the *Proceedings and Transactions of the Royal Society*, and were afterwards copied into most of the scientific journals in Europe. The following is a list of some of the most important of the papers:—"On two new Methods for the determination of Nitrogen in Organic and Inorganic Compounds;" "Sur une Base nouvelle obtenue par l'action de l'Ammoniaque sur le Trihydro-mure d'Allyle;" "On the Action of Acids on Glycol;" "On the Synthesis of Succinic and Pyrotartaric Acids;" "On the action of Chloride of Iodine on Iodide of Ethylene and Propylene Gas;" "On the Synthesis of Tribasic Acids." Dr. Maxwell Simpson became a Fellow of the Royal Society in 1862; is Honorary Fellow of the King and Queen's College of Physicians; a Fellow of the Chemical Society, and of the Institute of Chemistry. He was a member of the Senate of the Queen's University; and, on its extinction, became a Fellow of the Royal University of Ireland.

**SIMPSON, William**, was born in Glas-

gow, Oct. 28, 1823. He began life as an architect, and turned from that to art. He went through the war in the Crimea as an artist, and published sketches in two volumes, entitled "Campaign in the East," 1855-56. Mr. Simpson travelled in India from 1859 to 1862. The result was published in a work entitled "India, Ancient and Modern," 1867. Since 1866 he has travelled in Russia, Palestine, Abyssinia, China, Japan, America, India, Afghanistan, Central Asia, with the Afghan Boundary Commission, and other places as special artist of the *Illustrated London News*. In addition to the works already mentioned, he has published, "Meeting the Sun, a Journey all round the World," 1873; "Shikare and Tamasha," 1876; "Photographs from Drawings of the Prince of Wales's Visit to India," "Picturesque People," 1876; and numerous archaeological papers at various times. Mr. Simpson is a member of the Royal Institute of Painters in Water Colours; an Hon. Associate of the Royal Institute of British Architects; a Member of the Royal Asiatic Society; and a Fellow of the Royal Geographical and other societies.

SIMS, George Robert, was born in London, Sept. 2, 1847, and educated at Hanwell College, and afterwards at Bonn. He first joined the staff of *Fun* on the death of Tom Hood the younger in 1874; and the *Weekly Dispatch* the same year. Since 1877 he has been a contributor to the *Referee* under the pseudonym of "Dagonet." In that newspaper his "Dagonet Ballads" first appeared. To the *Dispatch* Mr. Sims contributed "Social Kaleidoscope," "Three Brass Balls," and "Theatro of Life." These have been translated into German, French and Danish. He edited *One and All* in 1879. He produced his first play, "Crutch and Toothpick," at the Royalty Theatre in April, 1879; "Mother-in-Law," and "Member for Sloom," 1881. These were followed by "The Gay City," and "Half-Way House," "The Lights o' London" (Princess's, Sept. 10, 1881), which ran nearly 250 nights. It was followed by "The Romany Rye," and "The Merry Duchess," a comic opera. "In the Ranks" (of which Mr. Sims was part author) was produced at the Adelphi in 1883, and ran 457 consecutive nights. His other plays are, "The Golden Ring," 1888; and "Jack in the Box" and "The Harbour Lights," written in collaboration, in 1885, ran for 513 consecutive nights. Mr. Sims has since written in collaboration the following plays: "The Golden Ladder," produced at the Globe Theatre

in 1887; "The Silver Falls" and "London Day by Day," at the Adelphi; "Master and Man," at the Princess's, and "Faust Up to Date," a burlesque, at the Gaiety. The novels he has published include "Rogues and Vagabonds," "The Ring o' Belle," "Memoirs of Mary Jane," "Mary Jane Married," "Tales of To-day," "Dramas of Life," and "The Case of George Candlemas," and his revelations of the condition of the poor in "How the Poor Live," and "Horrible London," a series of letters to the *Daily News*, helped to focus public attention on the housing of the working classes and to bring about the Royal Commission.

SIMS, Richard, born at Oxford, in 1816, was educated at New College School in that University, and, at the recommendation of the late Rev. Dr. Bliss, of Oxford, entered the public service in 1841 as an attendant in the Manuscript Department at the British Museum. In 1859 he became a Transcriber, and subsequently a Junior Assistant. On the accession of Mr. Bond to the Keepership of Manuscripts, in 1868, he was further promoted to the class of Senior Assistants in the same department. In 1849 he published an "Index to the Herald's Visitations;" in 1851 "A Handbook to the Library of the British Museum;" in 1856, "A Manual for the Genealogist, Topographer, Antiquary, and Legal Professor;" in 1855, in conjunction with Mr. F. Netherclift, jun., the "Autograph Miscellany;" in 1860-61, "The Handbook to Autographs: being a Ready Guide to the Handwriting of Distinguished Men and Women of every Nation;" and in 1861-63, "The Autograph Souvenir." Mr. Sims has been for some time engaged in preparing for the press "A Classical Catalogue of Manuscripts relating to British Heraldry and Topography, deposited in the Public and many of the Private Libraries of the Kingdom," as well as a second edition of the afore-mentioned "Index to the Herald's Visitations."

SKEAT, Professor The Rev. Walter William, M.A., born in London, Nov. 21, 1835, was educated at King's College School; at Sir R. Cholmeley's School, Highgate; and at Christ's College, Cambridge, where he graduated B.A. in 1858, being 14th Wrangler. He was elected Fellow of his college in July, 1860; became Curate of East Dereham, Norfolk, in Dec., 1860; Curate of Godalming, Surrey, in Dec., 1862; and Mathematical Lecturer at Christ's College in Oct., 1864. He was elected to the recently founded Elrington and Bosworth Professorship of

Anglo-Saxon at Cambridge, May 15, 1878; and re-elected to a Fellowship at Christ's College in Jan., 1883. Mr. Skeat, who has chiefly devoted his attention to Early English literature and English etymology has published: "The Songs and Ballads of Uhland, translated from the German," 1864; "A Tale of Ludlow Castle: a Poem," 1866; and "A Maso-Gothic Glossary," printed by the Philological Society, 1868. For the Early English Text Society he has edited "Lancelot of the Laik: a Scotch Metrical Romance," 1865; "Parallel Extracts from twenty-nine MSS. of Piers the Plowman," 1866; "The Romans of Partenay or Lusignan; otherwise known as the Tale of Melusine," 1866; "The Vision of William concerning Piers the Plowman," five parts, 1867-85; "Piers the Plowman's Crede," 1867; "The Romance of William of Palerne; or, William and the Werwolf," 1867; "The Lay of Havolok the Dane," 1868; "The Bruce; by Master John Barbour," 3 Parts, 1870-77; "Joseph of Arimathea; or, the Romance of the Saint Graal, or Holy Grail; with other Lives of Joseph of Arimathea," 1871; "Chaucer's Treatise on the Astrolabo," &c. In a new edition of Chatterton's Poems, he has finally settled the question of the authenticity of the so-called Rowley Poems, by showing the precise sources whence Chatterton obtained the old words which abound in them. Mr. Skeat was chosen by the Syndics of the Cambridge University Press to continue and complete the work of the well-known Anglo-Saxon scholar, the late J. M. Kemble, who died before his edition of the Anglo-Saxon Gospels was finished. In 1873, with the help of others, Mr. Skeat started the English Dialect Society, for the record and preservation of provincial English words, of which Society he was the Director for four years. In the course of 1873 and 1874, six works were published for this Society, five of which were edited by him. For the Oxford press, he has edited several of Chaucer's Canterbury Tales, a portion of "Piers the Plowman," and three volumes of Specimens of English Literature; two of them in conjunction with Dr. Morris; also, for the same press, the "Gospel of St. Mark in Gothic," an "Etymological English Dictionary" (his chief work), and an abridgment of the same, entitled a "Concise Etymological Dictionary." He has since completed a two-volume edition of "Piers the Plowman," showing all three texts, with notes, &c.; and, in 1890, undertook a complete edition of Chaucer's Canterbury Tales. A Scottish Text Society having been

founded in 1883, Mr. Skeat edited the Society's first volume, viz., an edition of the King's Quair, by King James the First of Scotland. His various works have greatly contributed to the increased interest which is now taken in the intelligent study of our older literature.

SKELTON, John, LL.D., C.B., born in Edinburgh in 1831, is the son of the late James Skelton, Esq., W.S., of Sandford Newton, and was educated at St. Andrews and Edinburgh Universities. He received from the University of Edinburgh the degree of LL.D. in 1878; and was created C.B. in 1887. He was called to the Scotch Bar in 1854; and was appointed Secretary of the Board of Supervisions (Local Government Board for Scotland) in 1868. Since 1854 he has been a frequent contributor to *Blackwood*, *Fraser*, and other magazines under the *nom de plume* of "Shirley," some of these papers being re-published separately in "Migore Critique," 1862; a "Cautionner al Home," 1865; "The Impeachment of Mary Stuart," 1870; "Essays in Romance," 1878; "The Crookit Meg," 1880. His latest historical work is "Maitland of Lothington and the Scotland of Mary Stuart," in two volumes, 1887. In connection with his official duties he has also published, "Panperism and the Boarding out of Pauper Children," 1876; "Public Health and the Local Government Act," 1889; and the "Handbook of Public Health," 1890.

SKENE, William Forbes, LL.D., D.C.L., second son of James Skene, of Rubislaw, Aberdeenshire, by his wife, Jane, daughter of Sir William Forbes of Pitligo, Baronet, was born at Inverie, Kincairdineshire, June 7, 1800, and educated at the High School of Edinburgh. He then studied for a year and a half in Germany, and a session at each of the Universities of Edinburgh and St. Andrews. He afterwards entered the legal profession as a Writer to the Signet. Mr. Skene is Secretary to the Royal Institution for the Promotion of the Fine Arts; has filled the office of Vice-President of the Royal Society of Edinburgh, of the Cambrian Archaeological Society, and of the Society of Antiquaries of Edinburgh, and had the honorary degree of LL.D. conferred upon him by the University of Edinburgh, and that of D.C.L. by the University of Oxford (1879). In 1881 he was appointed Her Majesty's Historiographer for Scotland in the room of the late Dr. Hill Burton. He has written the following works, besides papers read to the above societies, and published in their Proceedings:

"The Highlanders of Scotland, their Origin, History, and Antiquities," 2 vols., 1837; "The Doan of Lismore's Book, with Introduction and Notes, Ancient Gaelic Poetry," 1862; "Chronicles of the Picts and Scots, and other early Memorials of Scottish History," edited for the Lord Clerk Register, 1868; "The Four Ancient Books of Wales, containing the Cynurio Poems of the 6th Century," 2 vols., 1869; "The Coronation Stone," 1869; "John of Fordun's Chronicles of the Scottish Nation," 2 vols., 1871; "Celtic Scotland, a History of Ancient Alban," — vol. i., "History and Ethnology," 1876; vol. ii., "Church and Culture," 1877; vol. iii., "Land and People," 1880; and "The Gospel History for the Young, being Lessons on the Life of Christ, adapted for use in Families and Sunday Schools," 3 vols., 1883-84.

**SLADEN**, Professor Douglas, LL.B., an Australian poet, but an Englishman by birth and education. He took open classical scholarships at Cheltenham College and Trinity College, Oxford, and graduated B.A. with a first class in modern history. He then, 1870, emigrated to Melbourne, where he graduated B.A. and LL.B., and in 1882 was appointed to the Chair of History in the University of Sydney. This he resigned in 1884, and returned to England. He has published "Frithjof and Ingebjorg," 1881; "Australian Lyrics" (Melbourne, 1882, London, 1885); "Poetry of Exiles" (Sydney, 1883, London, 1886); "A Summer Christmas," 1884; "In Cornwall and Across the Sea," 1885; and "Edward the Black Prince," 1887; also two novels, "Dick Stalwart, an Oxonian," and "Seized by a Shadow." More recently he has edited the pretty and interesting "Australian Ballads and Rhymes" in William Sharp's Canterbury Poets Series, published in London and in New York, and a larger anthology called "Australian Poets," London, 1888.

**SMART**, John, R.S.A., R.S.W., R.B.A., landscape painter—oil and water-colour—was born in Edinburgh, Oct. 16, 1838, and is the son of Robert Campbell Smart and Emily Margaret Morton. He was educated at the High School, Leith, and began art studies in the Schools of The Board of Trustees in Edinburgh in 1851, as a designer and engraver. He studied painting under Horatio MacCulloch in 1860; was elected Associate of the Royal Scottish Academy in 1871, and Academician in 1877. He was one of the founders of the Royal Scottish Water-Colour Society. He received a second-class

Diploma from the Melbourne Exhibition, 1880-81; a Gold Medal Diploma from the Edinburgh Exhibition, 1886, for oil painting "Where Silence Reigns." His other works in oil are "Gloom of Glen Ogle," "The Graves of our ain Folk," "The Crofter's Moss," "The Land of Macgregor," "A Glen without a Name," "The Cradle of Argyll." Water Colours: "Among the Silent Hills," "The Green Island Lock Shiel," "The Pass of Brauder," and "The Golf Greens of Scotland." In general, his pictures are Highland subjects.

**SMILES**, Samuel, LL.D., born at Haddington, Scotland, in 1812, was educated for the medical profession, and practiced for some time as a surgeon at Haddington; but abandoning medicine, he succeeded the late Mr. Robert Nicoll as editor of the *Leeds Times*. He became, in 1845, secretary of the Leeds and Thirsk Railway, and after ten years (on the amalgamation of the railway with the North-Eastern) he transferred his services, at the end of 1854, to the South-Eastern Railway, from which he retired in 1866. The University of Edinburgh conferred on him the honorary degree of LL.D. in 1878. He has written "Physical Education; or, Nurture and Management of Children," 1838; "History of Ireland," published whilst he was at Leeds; "Railway Property, its Conditions and Prospects," 1849; "Life of George Stephenson," 1857, of which the fifth edition appeared in 1858; "Self Help; with illustrations of Character and Conduct," 1859; "Workmen's Earnings, Strikes, and Wages," and "Lives of Engineers, with an account of their Works," 1861; "Industrial Biography," 1863; "Lives of Boulton and Watt," 1865; "The Huguenots: their Settlements, Churches, and Industries in England and Ireland," 1868, 3rd edit. 1869; "Character," a companion volume to "Self-Help," 1871; "The Huguenots in France after the Revocation of the Edict of Nantes: with a Visit to the Country of the Vaudois," 1874; "Life of a Scotch Naturalist," 1876; "George Moore, Merchant and Philanthropist," 1878; "Life of Robert Dick (Baker of Thurso), Geologist and Botanist," 1878; "Duty, with illustrations of Courage, Patience, and Endurance," 1880; "Men of Invention and Industry," 1884, "Life and Labour; or Characteristics of Men of Industry, Culture, and Genius." He also edited the Autobiography of Mr. James Nasmyth, 1883, and has been a constant contributor to the *Quarterly Review* and other periodicals.

**SMITH, The Hon. Sir Archibald Levin**, a Judge of the Queen's Bench Division of the High Court of Justice, was born in 1836; and called to the Bar in 1860. He was Junior Counsel of the Treasury from 1863 to 1868, and from 1870 to 1883, when he was elevated to the Bench. In 1888 he was one of the three Judges appointed on the Parnell Commission.

**SMITH, Benjamin Leigh**, was born March 12, 1828, and educated at Jesus College, Cambridge, where he graduated as a Wrangler in 1852. He was called to the Bar by the Inner Temple in 1856. Mr. Smith has made five voyages to the Arctic regions. He visited them first in 1871, in the *Samson*, when he sailed to the north-east of Spitzbergen; reached latitude  $81^{\circ} 21'$ , and added greatly to the knowledge of land in that direction; secondly, in 1872, in the *Samson*, to the north of Spitzbergen; thirdly, in 1873, with the *Diana* steamer and *Samson*, again to Spitzbergen, when he relieved the Swedish Expedition, for which he received the Order of the North Star from the King of Sweden. In these three voyages he took deep-sea temperatures, which added much to the knowledge of the Gulf Stream, and established the fact of warm undercurrents flowing beneath surface-water of a much lower temperature. In 1880 he built the steamer *Eira*, and again went north. After attempting to reach the east coast of Greenland, and to pass to the north-east of Spitzbergen, he returned to the south of Spitzbergen; and steaming east, and then north, through much ice, reached Franz Josef Land, on Aug. 14; then, going to the west, he discovered many islands, and over 200 miles of new coast line. In 1881 he again started in the *Eira* for Franz Josef Land, which he reached on July 24, but unfortunately the *Eira* was crushed in the ice on Aug. 21, and sunk before many stores were saved. The crew built a hut of turf and stones, where they wintered, living mostly on bears and walrus. On June 21, 1882, they left in four boats, and reached Nova Zembla on Aug. 2. The next day they fell in with the *Willem Barents* and the *Hope*, which had been sent to their relief, and they arrived at Aberdeen on board the *Hope* on Aug. 20. Mr. Smith received a Gold Medal of the Paris Geographical Society in 1880; and a Gold Medal of the Royal Geographical Society in 1881.

**SMITH, Sir Cecil Clementi, K.C.M.G.**, was born in London, Dec. 23, 1840, and is the son of the Rev. John Smith, M.A., and of Cecilia, daughter of the celebrated

composer, Muzio Clementi. He was educated at St. Paul's School, and Corpus Christi College, Cambridge; B.A. 1862, M.A. 1868. He entered the Colonial Civil Service on appointment, after competitive examination, as a Student Interpreter, Hong Kong, in 1862; filled the office of Police Magistrate, Registrar-General, Treasurer, and City Colonial Secretary in that Colony. In 1878 he was appointed Colonial Secretary of the Straits Settlements. From 1881 to 1885 he acted as Governor, and was appointed Lieutenant-Governor and Colonial Secretary, Ceylon, 1885. He was promoted to be Governor and Commander-in-Chief of the Straits Settlements in 1887. He is also Governor of Christian Island, and Governor of the Cocos-Keeling Islands, and was appointed H.M. High Commissioner and Consul-General for Borneo, 1890; and was created C.M.G. 1880, K.C.M.G. 1888. He went on a special mission to the Government of the Philippine Islands to settle certain British Marine claims, and received the thanks of H.M. Government. He also received the thanks of H.M. Government for the settlement of the "Nisero" case.

**SMITH, George Barnett**, was born at Ovenden, near Halifax, Yorkshire, May 17, 1811, and educated at the British Lancasterian School, Halifax. In March, 1861, he came to London for the purpose of pursuing a journalistic and literary career. He was first engaged on the staff of the *Globe* newspaper, and afterwards for eight years on that of the *Echo*. He contributed to the *Edinburgh Review* articles on "The Works of Thackeray," "Recent Editions of Molière," "English Fugitive Poetry," and other subjects. Mr. Smith has contributed a great number of literary, critical, and biographical articles to the *Cornhill Magazine*, and has likewise contributed to the "Encyclopædia Britannica," the *Fortnightly* and *British Quarterly Reviews*, and *Fraser's* and *Macmillan's Magazines*. He is also a contributor to the *Times* and the *Academy*, and has written many biographical and other articles for the *Dictionary of National Biography* and the new edition of *Chambers's Encyclopædia*. His first published work was a volume of poems, 1860; followed by "Poets and Novelists," a series of literary studies, 1875; and "Shelley: a critical Biography," 1877. In 1879 was published his "Life of Mr. Gladstone." Two years afterwards appeared the companion work, "The Life of Mr. Bright." Mr. Barnett Smith has edited, with introductions and notes, a work entitled "Illustrated British

Ballads," in two volumes. He is also the author of "The Prime Ministers of Queen Victoria," and of "The Life of Queen Victoria;" likewise "Victor Hugo; His Life and Work;" this appeared in 1885; and his "William I. and the German Empire," in 1887. Mr. Barnett Smith is a Fellow of the Royal Geographical, Royal Historical, and other societies.

**SMITH, George Vance, B.A., Philos. and Theol. Doct.,** was educated for the Nonconformist ministry, at Manchester New College, and was afterwards Professor of Theology in the same College. Subsequently he was minister of St. Saviourgate Chapel, York, and later, for twelve years, terminating in 1888, Principal of the Presbyterian College, Carmarthen. He is the author of various works, including "The Prophecies relating to Nineveh and the Assyrians," from the Hebrew, with notes, &c., 1857; "The Prophets and their Interpreters," 1878; "Texts and Margins of the Revised New Testament affecting Theological Doctrines," 1881; "Eternal Punishment," in reply to Dr. Pusey, 5th edit. 1877; "The Bible and Popular Theology," 3rd edit. 1871; "The Spirit and the Word of Christ," 2nd edit. 1874; "Chapters on Job for Young Readers," 1887; is also joint author of "The Holy Scriptures of the Old Covenant, in a Revised Translation," 3 vols., 8vo., 1864, and is the writer of various articles in the *Nineteenth Century* and other periodicals. He was a member of the Company for the revision of the New Testament from the formation of the company, in May 1870, till the conclusion of the work, and is now (1890) resident at Bath.

**SMITH, Professor Goldwin, D.C.L., LL.D.,** was born at Reading, Berkshire, Aug. 13, 1823, and educated at Eton and Oxford. He gained, in 1842, the Hertford Scholarship, and in 1845 the scholarship founded by Dean Ireland. In the latter year he graduated B.A. as first-class in Classics, and subsequently he proceeded to the degree of M.A. He gained the Chancellor's prizes for Latin Verse, 1845; for the Latin Essay, 1846; and for the English Essay, 1847. In 1847 he was elected a Fellow of University College; and in the same year he was called to the Bar at Lincoln's Inn, but he has never practised law. He is also an honorary Fellow of Oriel College. In 1850 he was appointed, by the Government, Assistant-Secretary of the Royal Commission on the state of the Uni-

versity of Oxford. He was also Secretary to the second Oxford Commission, and was a member of the Popular Education Commission appointed in 1859. The same year he was appointed to the Regius Professorship of Modern History at Oxford, and he held that chair till 1860. Professor Goldwin Smith was a prominent champion of the north during the Civil War, when he wrote "Does the Bible sanction American Slavery?" 1863; "On the Morality of the Emancipation Proclamation," 1863; and other pamphlets on the same subject. In 1861 he visited the United States on a lecturing tour. He met with an enthusiastic reception, and the Brown University conferred upon him the honorary degree of LL.D. On his return he published "England and America," 1865, and "The Civil War in America," 1866. In Nov. 1863, having resigned his chair at Oxford, he settled in the United States as Professor of English and Constitutional History in the Cornell University at Ithaca, New York. This post he occupied till 1871, when he removed to Canada, where he was for a time a member of the Senate of the University of Toronto. He was editor of the *Canadian Monthly* 1872-74, and he subsequently founded *The Week* and *The Bytander*; the publication of the latter was discontinued in 1890. In addition to the works mentioned above, he is the author of various lectures and letters in the *Daily News*. The degree of D.C.L. was conferred upon him by Oxford in 1882.

**SMITH, The Rev. Isaac Gregory, LL.D.,** was born Nov. 21, 1826, at Manchester, being the fourth son of the Rev. Jeremiah Smith, D.D., High Master of the Free Grammar School, and Rector of St. Anne's, Manchester. He was educated at Rugby, and Trinity College, Oxford; was elected Hertford University Scholar in 1846, Ireland University Scholar in 1847, Fellow of Brasenose College in 1848. He was appointed Rector of Tedstone Delamere, Herefordshire, in 1854; Prebendary of Hereford Cathedral in 1870; Vicar of Great Malvern, in 1872; Bampton Lecturer at Oxford, in 1872; Examining Chaplain to the Bishop of St. David's, and Rural Dean of Powyke, 1882. In 1886 he received the honorary degree of LL.D. from Edinburgh University; and was made Honorary Canon of Worcester Cathedral. He is the author of "Faith and Philosophy," and "Epitome of the Life of Our Saviour," 1867; "The Silver Bells," 1869; "Fra Angelico and other Poems," 1871; "Prayers for Every Hour," 1879; "Thoughts on Education," and "Diocesan History of Worcester,"

1883; "History of Worcester Cathedral," 1884; "Aristotelianism," 1886; and "Why do I believe?" 1890.

**SMITH, The Hon. John Smalman, M.A.,** was born at The Chauntry, Shropshire, on Aug. 28, 1847, and is the eldest son of the late S. Pountney Smith, J.P. He was educated at Shrewsbury School, and St. John's College, Cambridge, where he took his M.A. degree. He was called to the Bar Nov., 1872; went the Oxford Circuit; was appointed Puisne Judge in the Gold Coast Colony, 1883; Solicitor of the Supreme Court of the Colony of Lagos, 1886; Chief Justice of the Colony of Lagos, 1889. His Honour has published 3 editions of "How we are Governed;" "County Courts;" "County Government;" and various works on legal subjects: e.g., "The Law of Support in relation to land, mines, and buildings;" "The law of Fixtures and dilapidations," &c.

**SMITH, The Right Hon. Sir Montagu E., Q.C., P.C.,** was born in 1809; called to the Bar of the Middle Temple in 1835; and was made Q.C. in 1852. He represented Truro as a Liberal Conservative from 1859 to 1865 when he was appointed a Judge of the Court of Common Pleas. In 1871 he was made a Member of the Judicial Committee of the Privy Council; and, in 1877, a Member of the Universities Committee of the Privy Council.

**SMITH, The Very Rev. Robert Payne, D.D., Dean of Canterbury,** born in Gloucestershire, in Nov. 1818, was educated at Pembroke College, Oxford, of which he was scholar, and where he graduated, with second-class honours, in 1841, and obtained the Boden (Sanscrit) and the Pusey and Ellerton (Hebrew) University Scholarships. In the discharge of his duty as Under-Librarian of the Bodleian, he published, in a quarto volume, an elaborate Latin Catalogue of the Syriac MSS. belonging to that Library; has edited and translated the Commentary of St. Cyril of Alexandria upon the Gospel of St. Luke—extant only in Syriac—from the MSS. brought to this country by Archdeacon Tattam; and has translated the curious ecclesiastical history of John of Ephesus, in the same collection of MSS. Dr. Smith is engaged in preparing, for the Delegates of the Oxford Press, a Syriac Lexicon, based on that of Castelli, but a much larger work. The first part was published in 1868, and the eighth in 1889. Two more parts will complete the work. In 1869 he published a course of

Hampton Lectures upon "Prophecy as a Preparation for Christ." He has contributed a commentary on Jeremiah to the large work which appeared under the auspices of the late Speaker. He is also the writer of the commentary on Genesis in Bishop Ellicott's commentary for English readers; of one on Isaiah in the commentary published by the S.P.C.K.; and of one on Samuel in the Pulpit Commentary. He was also a member of the Old Testament Revision Company. Dr. Smith was appointed, in Aug. 1865, to succeed Dr. Jacobson as Regius Professor of Divinity in the University of Oxford, on the advancement of the latter to the bishopric of Chester; and in Jan. 1871, was raised to the Deanery of Canterbury, vacant by the death of Dr. H. Alford.

**SMITH, The Right Rev. Dr. Saumarez,** Bishop of Sydney and Primate of Australia.

**SMITH, Thomas Roger,** Professor of Architecture at University College, London, was born in 1830, and is the son of the Rev. Thomas Smith of Sheffield, a well-known scholar and eloquent preacher. His mother was of Huguenot family, and was a granddaughter of Roubillan the sculptor. He was attached to the late Samuel Beazley, as an architect; and, on his death, to Mr. P. C. Hardwick, having as fellow-pupils Mr. (now Sir Arthur) Blomfield, Mr. Eastlake, and the late Mr. F. P. Cockerell. He travelled as an architectural student for about a year, and spent some time under Sir James Pennethorne, before starting in practice in 1855. Since that time he has practised his profession continuously, and has designed and erected many public and private buildings of importance in London and the provinces. A design by him for the European Hospital, Bombay, was selected by the Government for execution. This led to his visiting India in 1866, and subsequently preparing, in cooperation with the architect to the Bombay Government, the plans from which several public buildings in that Presidency were erected. Among these were the Elphinstone College, the enlargement of the Cathedral and (with modifications made on the spot) the Post Office, Bombay, the Government House at Gunnish Khind, and the Engineering College, Poona. Professor Roger Smith is an Examiner in Architecture for the Science and Art Department, an Examiner under the Metropolitan Building Act of Candidates for the Office of District Surveyor, and in 1879 he was appointed Professor of Archi-

lecture in University College, London, in succession to Professor T. Hayler Lewis (resigned). He is the author of two or three manuals on subjects connected with his profession, and of many papers or special lectures delivered before the various societies which deal with his subjects in London, and he has been engaged both as an editor and a writer on the professional press. Professor Roger Smith is a Fellow of the Institute of Architects, and has been a member of the Council. He is a past President of the Architectural Association, and belongs to other societies. He holds one or two professional appointments, including that of Architect to the Carpenters' Company of the City of London, in which capacity he has been able to assist the Court of that Company in organising its classes, its technical library and free public lectures, its examination for skilled artisans in carpentry and joinery; and, very recently, its Exhibitions and School of Wood Carving.

**SMITH, William, LL.D., Hon. D.C.L.,** Oxon., late Classical Examiner in the University of London, born in London in 1813; received his education at that university, where he gained the first prizes in the Latin and Greek classes; was intended for the Bar, and kept the usual terms at Gray's Inn; but abandoned the profession of the law for the study of classical literature. The "Dictionary of Greek and Roman Antiquities," edited by him, commenced in 1840, was completed in 1842, followed by the "Dictionary of Greek and Roman Biography and Mythology," commenced in 1843 and concluded in 1849, and by the "Dictionary of Greek and Roman Geography," commenced in 1852 and finished in 1857. These three works form an *Encyclopædia of Classical Antiquity*. In 1850 Dr. Smith began the publication of his "School Dictionaries," concise but comprehensive summaries (for the benefit of less advanced scholars) of his more voluminous publications, consisting of "A Classical Dictionary of Mythology, Biography, and Geography," "A Smaller Classical Dictionary," abridged from the preceding work; "A Smaller Dictionary of Antiquities," &c. Each of these works has gone through many editions. In 1853 Dr. Smith was appointed Classical Examiner in the University of London, which office he held till 1863, when he was appointed a member of the Senate of the University. In 1853 he started the series of "Student's Manuals," by the publication of a "School History of Greece from the Earliest Times to the Roman Conquest, with chapters on the

History of Literature and Art." In 1851 he published his edition of (Hibon); in 1855 he published "A Latin-English Dictionary, based on the works of Forcellini and Freund;" and in 1860 he brought out his first volume of a "Dictionary of the Bible," which is designed to render the same service in the study of the Bible as the Dictionaries of Antiquities have done in the study of the Greek and Latin classics. The second and third volumes, completing the work, appeared in 1863. He edited, in conjunction with Archdeacon Cheetham, "A Dictionary of Christian Antiquities," 2 vols., 1875-1880, and, in conjunction with Dr. Wace, "A Dictionary of Christian Biography, Literature, Sects, and Doctrines, during the first eight Centuries," 4 vols., 1877-1887, both works being a continuation of the "Dictionary of the Bible." Dr. Smith is the author of the "Student's Latin Grammar," published in 1863; of a Latin course, in five parts, entitled "Principia Latina;" of a Greek course in three parts, entitled "Initia Græca;" and of numerous educational works. He became editor of the *Quarterly Review* in 1867, which office he still holds. In 1870 he brought out, in conjunction with Mr. Hall, "A Copious and Critical English-Latin Dictionary," the fruit of fifteen years' labour; and in the same year he received the honorary degree of D.C.L. from the University of Oxford. In 1875 he completed his large atlas of "Biblical and Classical Geography," forming a companion volume to his Biblical and Classical Dictionaries.

**SMITH, The Right Hon. William Henry, D.C.L., M.P., P.C., D.L.,** son of Mr. William Henry Smith, of the Strand, London, and Bournemouth, Hampshire, bookseller, publisher, and news-agent, was born in Duke Street, Grosvenor Square, London, June 24, 1825. He was educated at the Grammar School, Tavistock, and became, in due course, a partner in the well-known firm in the Strand. In July, 1865, he unsuccessfully contested Westminster in the Conservative interest, but his candidature was renewed with success in Nov., 1868, when he defeated Mr. John Stuart Mill. He continued to sit for Westminster down to 1885, when, after the Redistribution Act, he was returned for the Strand, being again elected in 1886. He was Financial Secretary of the Treasury from Feb., 1871, till Aug. 8, 1877, when he was appointed First Lord of the Admiralty, in succession to the late Mr. Ward Hunt. He went out of office on the retirement of the Conservatives in April, 1880, and was

appointed Secretary of State for War in 1885 on the formation of the Conservative Government in June of that year. On the resignation of Sir Wm. Hart Dyke in Jan., 1886, Mr. W. H. Smith was appointed Chief Secretary for Ireland, but the Salisbury Government fell immediately afterwards, and he held the appointment for only six days. In Lord Salisbury's second administration he was appointed Secretary of State for War. When the Ministry was reconstructed on the resignation of Lord R. Churchill, Mr. Smith became First Lord of the Treasury and Leader of the House of Commons. Mr. Smith was a member of the first and second School Boards for London, his retirement in 1874 being occasioned by the pressure of official duties. The university of Oxford conferred on him the honorary degree of D.C.L. in 1879; and he was presented with the freedom of the Stationers' Company in 1880. He is a magistrate and D.L. for Middlesex, and a magistrate for Herts and Oxon, and a member of the Council of King's College, London.

**SMITH, Professor William Robertson, M.A., LL.D. Aberd., D.D. Strasburg,** was born at Keig, Aberdeenshire, Nov. 8, 1816, and educated privately, and then at Aberdeen University, the New College, Edinburgh, and the Universities of Bonn and Göttingen. He was appointed Professor of Hebrew in the Free Church College, Aberdeen, in 1870, and was removed from that office by an extraordinary act of the General Assembly in 1881, on account of his critical views as to the Old Testament, published in the "Encyclopædia Britannica" and elsewhere. From 1881 he was associated with the late Professor Baynes in editing the ninth edition of the "Encyclopædia Britannica." From 1868 to 1870 he was assistant to the Professor of Physics at Edinburgh, and from 1872 he was a member of the Old Testament Revision Company. Professor Robertson Smith travelled in Arabia, 1879-80, and described his journey in letters to the *Scotman* newspaper. In Jan., 1883, Professor Robertson Smith accepted the Lord Almoner's Professorship of Arabic in the University of Cambridge, vacant by the death of Professor Palmer. He has published "The Old Testament in the Jewish Church," 1880; "The Prophets of Israel, and their Place in History to the close of the Eighth Century B.C.," 1882; "Kinship and Marriage in Early Arabia," 1886; and "Lectures on the Religion of the Semites" (first Series of Burnett Lectures), 1889. In Feb., 1886,

he was appointed Librarian to the University of Cambridge, in succession to the late Mr. Henry Bradshaw, and in 1889 he succeeded the late Professor William Wright in the Sir Thomas Adams Professorship of Arabic in the same University.

**SMITH-WILLIAMS, Mrs. ne MCKENZIE, Marian, A.R.A.,** an eminent contralto singer, is the elder daughter of Captain Joseph McKenzie, shipowner, of Plymouth, where she was born. She studied singing under Mr. Samuel Weeks of that town; and, coming to London, to complete her education, gained the Parepa-Rosa Scholarship at the Royal Academy of Music, also the Westminster Scholarship, and the bronze, silver, and gold medals of the Academy, the latter for declamatory singing. She was a pupil of Signor Randegger, and, for elocution, of Mr. Walter Lacy. She has also studied Oratorio singing with Miss Anna Williams, and has an extensive repertoire in works of the classical composers from Bach and Handel, down to those of the present day. Among the latter we notice repeated successes in Sir Arthur Sullivan's "Golden Legend," Dr. Mackenzie's "Rose of Sharon," Dvorak's "Saint Mater," and Dr. Hubert Parry's "Judith." Besides having a rising reputation as a Festival singer, Miss McKenzie has achieved distinction in classic and ballad concerts. With a voice remarkable for richness and sympathy, she is perhaps unrivalled for sweetness and distinctness in the use of the mother tongue. She is an Associate of the Royal Academy of Music, and of the Philharmonic Society. Miss Marian McKenzie married Mr. Smith-Williams, the brother of Miss Anna Williams, one of our leading English sopranos.

**SMYTH, Charles Piazzi, J.T.D. Un. Ed., F.R.A.S., F.R.S.E.,** for a time F.R.S., and for 43 years Astronomer Royal for Scotland, was born in 1819, at Naples, and is the second of three sons of the late Admiral Smyth, but was educated in England. He commenced his astronomical services at the Royal Observatory, Cape of Good Hope, under Sir T. Maclear in 1835; and subsequently assisted in the re-measurement of La Caille's South African Arc of the Meridian. He was appointed, in 1845, to succeed Thomas Henderson, First Astronomer Royal for Scotland in the Royal Observatory, Edinburgh. He applied himself, on arrival, to clearing off five years' arrears of computation and printing; and next to continuing Meridian star observations;

besides establishing a daily time-ball, and afterwards an electrically-fired daily time-gun for the service of the City. In 1858 he was appointed to prepare for Government all the meteorological deductions furnished by 55 observing stations. In 1856, soon after his marriage with Jessie Duncan, he spent several months in testing, with her, the qualities of the Peak of Teneriffe for star observation above the level of the clouds. In 1859 he visited and published on the Russian Observatories. In 1864-5 he visited, investigated, and published on, the Great Pyramid in Egypt, and described the results in various works, one of which has just reached its 5th edit. In 1872 he began to compose a comprehensive star-catalogue and ephemeris of all the Edinburgh, and best contemporary, observations of the same stars; of which new kind of catalogue, the first Four hours were published in 1877 in the 14th volume of the Edinburgh Observatory's publications; and the last Twenty hours were published in 1886, as the 15th volume. Then, with failing instruments and insufficient means for rectifying them, he applied for retirement, and obtained it in August 1888, and was awarded a small pension. He embraced the opportunity for secluded residence in the little town of Ripon, where he is now, in 1890, endeavouring on his own scanty resources alone, to complete a 16th quarto volume of the Edinburgh Observatory series, devoted to Spectroscopy; but complains that he is oppressed almost as much as heretofore, by never ending scientific correspondence.

**SODOR AND MAN**, Bishop of. See **BARDSLEY**, THE RT. REV. JOHN WARRING.

**SOLLAS**, Professor W. J., M.A., D.Sc., Cambridge, LL.D. Dublin, F.R.S., F.R.S.E., F.G.S., Officier d'Académie Française, born May 30, 1819, at Birmingham, is the son of a shipowner in London; and was educated in the City of London School, afterwards in the Royal School of Mines, and next at St. John's College, Cambridge, of which he was elected a Fellow in 1882. He took his B.A. degree in 1873, subsequently D.Sc., and was made an honorary LL.D. (Dublin) in 1886. He was appointed Lecturer on the Cambridge University Extension in 1873, and for it delivered courses of lectures on geology in most of the large towns of England and Wales; in 1880 he was appointed Professor of Geology and Zoology in the University College, Bristol, and in 1883 was elected Professor of

Geology and Mineralogy in the University of Dublin. He has been continuously writing memoirs on scientific subjects since 1872, most of these have appeared in the *Quarterly Journal of the Geological Society*, the *Annals and Magazine of Natural History*, *Geological Magazine*, and in the publications of the Royal Irish Academy and the Royal Dublin Society. These have for subjects, amongst others: the relations of fossil to recent sponges, the replacement of silica (opal) by carbonates of lime, the origin of flint, of freshwater faunas, the estuary of the Severn, the characters of plesiosaurus, the structure and history of granite, and the anatomy of living sponges. He is the author of the article "Sponges" in the "Encyclopædia Britannica," and of the 24th volume of the Reports of the Challenger Expedition treating of the Tetractinellida, 1888.

**SOLOMON**, J. Solomon, artist, was born in Southwark, Sept. 1860. His father is a leather manufacturer, and his mother a native of Prague (Bohemia). He was educated at the school of Mr. Thomas Whitford, M.A., and privately by the Rev. Mr. Singer. His artistic training was begun in 1876, at Heatherly's School of Art in Newman Street, and the next year he entered the Schools of the Royal Academy. In 1879, through the kindness of H.J.H. Prince Lucien Bonaparte, he got an introduction to Cabanel, who received him into his studio in the Beaux Arts in Paris. The following year found him in Munich; but he thought little of the German training, and, after a tour round Italy and Holland, he returned to England, and exhibited his first picture at the Royal Academy (a portrait of a gentleman). Mr. Solomon's friend Hacker and he journeyed through Spain, resting a while at the Shrine of Velasquez in Madrid, and passed the winter working in Morocco, where it was difficult at that time to induce the Moors to become their models. He again sought his master, Cabanel, and remained with him for about nine more months, having a studio of his own in Paris, and exhibiting at the Salon a portrait of Dr. Stevens, and, at the Royal Academy, a small highly-finished work, "Waiting." His next exhibit was "Ruth and Naomi," done in his garden in Tangier, on his second visit to Morocco, and since then, every year, he has shown a composition and a portrait at the Academy. The picture which first brought him any reputation was "Cassandra," now in Ballarat; then "Samson," "Niobe" following, and an allegorical work, "Sacred and Profane Love," with a por-

trait of Sir John Simon. Mr. Solomon was elected a Member of the Institute in 1887. At the Salon, of 1889, he received a Medal for "Niobe," and last year at the Academy he exhibited "Hippolyte," and a portrait of "Mrs. George Mosenthal," full length.

**SORBY, Henry Clifton, LL.D., F.R.S.,** was born at Woodbourne, near Sheffield, May 10, 1826, and educated at the Sheffield Collegiate School, and by private tutors. He is an honorary LL.D. of Cambridge (1879), and has been President of the Geological Society. On April 25, 1882, he was elected President of Firth College, Sheffield. He is the author of many separate papers on the microscopical structure of rocks, on the construction and use of the micro-spectroscope in studying animal and vegetable colouring matter, on a new method of studying the optical characters of minerals, on the physical geography of former geological periods, and on various other subjects connected with geology and the use of the microscope. His latest publications have been on the microscopical structure of iron and steel, and on the temperature of the water in estuaries. He is now much occupied with certain special archaeological studies, and in making preparations of invertebrate animals, as lantern slides, and for museum specimens.

**SOUTHWELL, Bishop of.** See RIDDING, THE RIGHT REV. GEORGE.

**SPAIN, King of.** See ALFONSO XIII.

**SPAIN, Queen-Regent of.** See MARIA CHRISTINA.

**SPENCE, The Very Rev. Henry Donald Maurice, M.A., D.D.,** Dean of Gloucester, son of George Spence, Esq., Q.C., M.P., born in Pall Mall, London, in 1836, was educated at Westminster School and at Corpus Christi College, Cambridge (B.A., 1861; M.A., 1866; D.D., 1897). While at the University he obtained a first-class in the voluntary theological tripos (1864), the Carus Undergraduate University Prize (1864), and the Carus and Scholesfield University Prize (1865, and again, 1866). He was Select Preacher at the University Church in 1883 and 1887. He was appointed Professor of Modern Literature in David's College, Lampeter, in 1865; Rector of St. Mary de Crypt, Gloucester, 1870; Examining Chaplain to the Bishop of Gloucester and Bristol (Dr. Eliott), in 1870; Principal of the Theological College of Gloucester, and

Memorial Canon of Gloucester in 1875. In 1877 the vicarage of St. Pancras, London, was presented to him by the Queen. Mr. Spence was in the same year appointed Rural Dean of St. Pancras. In 1886 he was appointed by the Crown to the Deanery of Gloucester. He has contributed many papers to the "Bible Educator," *Good Word*, and other magazines; is joint author with Dean Hovson of a Commentary on the Acts of the Apostles (Anglo-American Commentary); and is one of the Commentators of the New Testament and also of the Old Testament, edited by the Bishop of Gloucester and Bristol. Dean Spence is likewise editor and one of the writers of the "Pulpit Commentary on the Old and New Testaments," of which work 35 volumes have already been published (1890), and of several works on the Talmud. He is the author of a translation of the "Teaching of the Twelve Apostles," with excursus and notes (1885). He married Louise, daughter of David Jones, Esq., M.P., for Carmarthenshire.

**SPENCER, Herbert,** was born at Derby, in 1820. He was educated by his father, a teacher in Derby, and his uncle, the Rev. Thomas Spencer, a clergyman of the Established Church, who was active in various philanthropic movements. At the age of seventeen he became a civil engineer, but after about eight years abandoned the profession, having during that period contributed various papers to the *Civil Engineers' and Architects' Journal*. His first productions in general literature were a series of letters on "The Proper Sphere of Government," published in the *Nonconformist* in 1842, which were reprinted in pamphlet form. From 1848 to 1853 he was engaged as sub-editor of the *Economist*, and during that time published his first considerable work, "Social Statics: or, the Conditions essential to Human Happiness specified, and the first of them developed," 1851, but this is out of print and has been suppressed. Various articles, chiefly for the *Westminster* and other quarterly reviews, were written during the next four years. In 1855 appeared his "Principles of Psychology," which interpreted the phenomena of mind on the general principle of evolution (this was four years before the "Origin of Species" appeared). A break-down in health followed, which prevented work for eighteen months. 1857, 1858, and 1859, were occupied in writing various essays for the quarterly reviews, &c. In 1860 Mr. Spencer issued the programme of his "System of Syn-

thetic Philosophy," which proposed to carry out in its application to all orders of phenomena the general law of evolution set forth in two essays published in 1857. To the execution of this project his subsequent life has been mainly devoted. Of the works composing the System, the following have already been published: "First Principles," 1862 (7th edit., 1889); "The Principles of Biology," 2 vols., 1864 (4th edit., 1888); "The Principles of Psychology," 2 vols., 1872 (5th edit., 1890); "The Principles of Sociology," vol. I., 1876 (3rd edit., 1885); "Ceremonial Institutions," 1879 (3rd edit., 1888); "Political Institutions," 1882 (2nd edit., 1885); "Ecclesiastical Institutions," 1885 (2nd edit., 1886); "The Data of Ethics," 1879 (5th edit., 1888). Mr. Spencer's other works are:—"Education: Intellectual, Moral, and Physical," 1861 (23rd edit., 1890); "Essays: Scientific, Political, and Speculative," 2 vols., 1858-63 (4th edit., 3 vols., 1885); "The Classification of the Sciences; to which are added, Reasons for Dissenting from the Philosophy of M. Comte," 1864 (3rd edit., 1871); "The Study of Sociology," 1873 (11th edit., 1885); "The Man versus the State," 1884 (8th thousand, 1886). Beyond his own proper work Mr. Spencer has published eight parts of the "Descriptive Sociology," classified and arranged by himself, and compiled by Professor DUNOAN, Dr. SCHEPPIG, and Mr. COLLIER. This work was originally undertaken simply for the purpose of providing himself with materials for the "Principles of Sociology," but was eventually published for the use of others. Part VIII., published in 1881, contained the announcement that having during the preceding 11 years sunk between £8,000 and £1,000 in the undertaking, he could no longer continue it. Mr. Spencer paid a visit to the United States in 1892. On May 12, 1883, he was elected a correspondent of the French Academy of Moral and Political Sciences, for the section of Philosophy, in the room of Emerson, but he declined that in common with all Academic honours. Mr. Spencer's works have been extensively translated. All are rendered into French, nearly all into German and Russian, many into Italian and Spanish; and the work on Education has appeared also in Hungarian, Bohemian, Polish, Dutch, Danish, Swedish, Greek, Japanese, and Chinese. Since 1886 Mr. Spencer has been an invalid, and has published very little.

SPENCER (Earl), The Right Hon. John Foyntz Spencer, K.G., LL.D., only son of

the fourth Earl Spencer, born at Spencer House, Oct. 27, 1835, received his education at Harrow and at Trinity College, Cambridge, where he graduated in 1857. He represented the southern division of the county of Northampton in the House of Commons from April to Dec., 1857, when he succeeded to the title on his father's death. He was Groom of the Stole to the late Prince Consort, 1850-61; and Groom of the Stole to the Prince of Wales, 1862-67. In Dec., 1868, he was appointed Lord Lieutenant of Ireland, and he made his public entry into Dublin Jan. 16, 1869. He retained that office till the resignation of the Gladstone Ministry in Feb., 1874. On the return of the Liberals to office in May, 1880, he was appointed Lord President of the Council. He was nominated Lord Lieutenant of Ireland, on the resignation of Earl Cowper, May 1, 1882, retaining his seat in the Cabinet. He arrived in Dublin Castle on May 6, on the evening of which day Lord Frederick Cavendish, the newly-appointed Chief Secretary, and Mr. Thomas A. Burke, the Under-Secretary, were stabbed to death by assassins in the Phoenix Park, close to the Castle. After this it fell to Lord Spencer to administer the provisions of the Crimes Act. In March, 1883, Earl Spencer resigned the office of Lord President of the Council, but still remained a member of the Cabinet, until the close of Mr. Gladstone's administration in June, 1885. On the return of Mr. Gladstone to office in Feb. of the following year, Lord Spencer became for the second time Lord President of the Council. By that time he had adopted Home Rule opinions, and his support was of great value to the government. The University of Dublin conferred on Lord Spencer the honorary degree of LL.D. June 30, 1883. His lordship is Lord-Lieutenant and Chairman of the County Council of Northamptonshire.

SPERANI, Madame BRUNO, is the *nom de plume* of one of the most famous Italian authoresses of the present day. She is a native of Dalmatia. One of her short sketches, which is entitled "The two Houses," is a charming story of childhood, and gives us an interesting glimpse of her own childhood on the shores of the Adriatic—a barren and desolate region, but with a wild beauty of its own in sea and sky and distant mountains. Left an orphan at an early age, the little girl was brought up by two very severe old aunts, who put as much restraint as possible upon the warm, impulsive nature of their niece. She loved to escape from the dull,

monotonous house and ramble on the sea shores in company with the old dog Fiume and a few favourite playmates. After such wanderings the return home in the evening with torn frock and other mishaps would be followed by scolding and punishment. The house in town was still more dull and monotonous, for escapades in the country were then impossible; the only consolation was an attic full of all sorts of odds and ends fascinating to a childish heart. Among the *débris* were books, and here Mme. Sperani began to love literature, spending many a lonely hour in the company of Leopardi, Ossian, Ivanhoe—a pell-mell of fairy tales, novels, poems—all devoured eagerly. Her works are, as yet, comparatively little known outside Italy; no one has, we believe, translated them into English, though a German edition of one, if not more, of her books has already appeared. Mme. Sperani began her literary career by writing for newspapers and magazines, but she became celebrated by the novels which she has given to the world during the last twelve years. Her books are remarkable as showing a broader interest in social problems, and a more fearless way of attacking them than is the case with the writings of most women—and many men. They are not merely stories pure and simple—recitals, that is, of what certain people did and said on certain days, how they looked, and so forth; they have a deeper *raison d'être* in that they deal with some question of human and social life—they are written with a purpose. At the same time they are so interesting as to be read eagerly by those who look for no deeper meaning than a story of events. Mme. Sperani takes wide views of things; sometimes, it is true, disagreeing with the conventional standards. She writes because she has something to say, and goes straight to the point with a simple, forcible directness which carries you with her, making you at all events think about the matter, whether you agree with her conclusions or not. This was the case with a novel of hers entitled, "*La Morte*," in which the authoress has treated most delicately and skilfully a difficult social question—one of vital interest, moreover, to society—which may be thus summed up: Is a woman who has sinned against the laws of society to be for ever condemned and unpardoned—ruined, in fact? The book had many who agreed with its conclusions and many who condemned it, but it was, at any rate, eagerly read. The most important work of Mme. Sperani is one published a few years ago, entitled "*Numeri e Sogni*" (Numbers

and Dreams), a story describing the life of a young painter. Mme. Sperani shows wonderful insight in portraying, not only the outward circumstances, but the inner life of an artist; she shows his efforts to realise some ideal conception—how he falls short, often because the world with its absorbing interests rushes in to jar and fret him—the moment of inspiration passes, never to be recalled. At present she is in the prime of life, busy with her works, full of interest in all social and literary questions—in fact, in all that tends to make life freer and fuller. She lives in a quiet and retired manner in Milan (the great centre of literary activity in Italy), and is the mother of a daughter who has already written some promising sketches in magazines.

**SPIELHAGEN, Friedrich**, a German novelist, was born at Magdeburg, Feb. 20, 1829, being the son of a Government official. At an early age he accompanied his father to Stralsund, and on that journey the sea made a lasting impression on the susceptible mind of the future novelist, who has in most of his works described life and incidents at sea with remarkable force and vividness. In 1847 he entered the University of Berlin, and then removed to Bonn, where he applied himself to the study of the law for about six months, and then turned his attention to philological and literary studies, which he pursued with great zeal in Berlin and at Greifswald. In 1854 he settled at Leipzig, where he taught in the Gymnasium, but the sudden death of his father changed his circumstances and prospects, and led to his adopting literature as a profession. Since the year 1854 he has brought out, with ever increasing success, a series of novels, which have gained for him a foremost place among German writers of fiction. His larger works are: "*Problematical Natures*," 1861, 9th edit. 1880, and its sequel "*Through Night to Light*," 1862; "*Hammer and Anvil*," 1869, 8th edit. 1881; "*Ever Forward!*" 1872; "*What the Swallow Sang*," 1873; and "*Storm-Floods*," 1878. He has also written "*The Hohensteins*," 1864; "*Rank and File*," 1866; "*Flow Land*," 1879; and "*Quisisana*," 1880. Among his smaller pieces are "*Clara Vere*," 1857; "*On the Downs*," 1858; "*At the Twelfth Hour*," 1863; "*The Rose of the Court*," 1864; "*Hans and Margaret*," a village story, 1868; "*The Village Coquette*," 1869; "*German Pioneers*," 1870; "*Ultimo*," 1873; "*The Skeleton in the House*," 1879; and "*Angela*," 1881; two comedies, "*Love for Love*," 1875, and "*Uhlen-*

hanns," 2 vols., 1884, a family romance, with political background, representing the period 1830-40.

**SPRENGEL,** Hermann Johann Philipp, Dr. phil. (Heidelberg, 1858), F.R.S. (London, 1878), was born in 1834, at Schillerslage, near Hannover in Germany, and received his education first at the family home, by a private tutor, later at school in the town of Hannover, whence he removed to the Universities of Göttingen and Heidelberg, where he studied natural sciences (chemistry and physics in particular), and took his degree Aug. 2, 1858 (examine rigoroso summa cum laude superato). Coming to England early in 1859 he engaged in research-work with the Professor of Chemistry at the University of Oxford till the middle of 1862; after which he settled in London, engaged in research-work at the laboratories of the Royal College of Chemistry, Guy's and St. Bartholomew's Hospitals, till the autumn of 1864; and, since then, in work more or less connected with his inventions and discoveries, which, with only a few exceptions, he published in English. The more important among these refer to the two extremes in the gaseous state of matter—to vacua and detonating agents. As to vacua he discovered (Journal of the Chemical Society, 1865) a new method of producing them, viz., by the fall of water or mercury in tubes, a method distinguished by its convenience and effectiveness. Thus we see (*Chemical News*, vol. xxix., p. 125) that in 1870 his mercury air-pump produced vacua so nearly perfect, that the trace of air remaining in the exhausted vessel amounted to only  $\frac{1}{1000000}$  part of its original volume, leaving for further cultivation that field which lies between  $\frac{1}{1000000}$  and 0. The eyes of the scientific world turned towards this instrument in 1866, after the late Professor Graham, Master of the Mint, had bestowed upon it (among his then newly discovered occluded gases) the following encomium (Philosophical Transactions, vol. 156, p. 408): "The pneumatic instrument of Dr. Sprengel is particularly applicable to researches of the present kind. Indeed without the use of his invention some parts of the inquiry would have been practically impossible." Since then this instrument has become a very useful servant both in science and industry, and has been singularly productive of further important results, which to enumerate fully we have no space. Suffice it to point to a few, e.g., to Bunsen's filtering-process, to Crookes's radiometer-work and to Edison and Swan's incandescent vacuum-lamp

industry. Dr. Sprengel's researches on explosives (Journal of the Chemical Society, 1873) can likewise be only briefly referred to here. He was the first who drew attention to Picric acid (Melinite, Lyddite) as a powerful explosive, when fired by a detonator. He was the first who suggested Ammonium-Nitrate as the basis of an explosive and fired the first ammonium-nitrate shot, which started the industry in this class of explosives, represented by Explosif Favier, Bellite, Securite, Roburite, &c. He was the first who described and patented in England a number of substances called Safety-Explosives, consisting either of two liquids or of a liquid and a solid, which are non-explosive by themselves, but become explosive when mixed, and are known as Hellhoffite, Oxonite, Pancastite, Rackarock, &c. The latter one in particular, consisting of 71 parts of potassium chlorate and 21 parts of nitrobenzol, has recently become famous in America, for it was chosen by Gen. John Newton, Chief of Engineers, U.S. Army, to rack a rock called Flood Rock, which, covering an area of nine acres, obstructed Hell-gate, an entry to the harbour of New York. The mine, excavated underneath this rock, was charged with 107 tons of "rackarock" primed by 22 tons of dynamite, and the whole enormous charge (costing £22,100) was successfully fired Oct. 10, 1885. The explosion, which ensued, produced an earthquake of one minute's duration felt at a distance of 185 miles, and will be remembered as the greatest of its kind as yet recorded.

**SPRIGG,** Sir John Gordon, K.C.M.G., Commander of the Legion of Honour, was born at Ipswich, Suffolk, in 1830, and is the son of a Baptist Minister. He went to the Cape Colony in 1858, owing to ill-health; and was first returned to the House of Assembly in 1869. He has been twice Prime Minister of the Colony, and has held various Ministerial Offices for nearly ten years.

**SPULLER,** Eugène, a French politician, born at Senne (Côte-d'Or), Dec. 8, 1835, studied at the Lyceum and the Faculty of Laws at Dijon, and became a member of the Paris Bar in 1862. After having been employed in several political cases, he abandoned the legal profession in order to engage in active political life and journalism. At the general election of 1883 he supported at private meetings the candidature of Emile Olivier against the official candidature of M. Varin, in the third circonscription of the Seine. He

"Treatise on Harmony" (5th edit. 1881), educational primers on Harmony, Composition, and the Organ, and "The Music of the Bible." He has achieved a high reputation as a scientific musician. A cantata by Dr. Stainer, "The Daughter of Jairus," was composed for, and produced at, the Worcester Festival, 1878. In 1883 his cantata, "St. Mary Magdalen," was produced at the Gloucester Festival. In the same year Dr. Stainer was appointed Inspector of Music to the Education Department in the place of the late Dr. Hullah, and also had the honour of being nominated a member of the Council of the Royal College of Music by H.R.H. the Prince of Wales. In 1885 Dr. Stainer received the degree of Mus. Doc. *honoris causâ*, from the University of Durham. In 1888 he received the honour of Knighthood, and in 1889 was appointed Professor of Music in the University of Oxford, as successor to Sir F. G. Onslow, deceased. He is an honorary member of the Royal Academy of Music, an honorary Fellow of the Tonin Solfa College, and one of the Vice-Presidents of the college of Organists, and President of the Musical Association.

STANFORD, Professor Charles Villiers, is the son of the late John Stanford, Esq., Examiner to the Irish Court of Chancery. He was born in Dublin, Sept. 30, 1852, and received his first musical instruction from Mr. A. O'Leary, and Sir R. P. Stewart. In 1870 he matriculated at Queen's College, Cambridge, but shortly afterwards migrated to Trinity, where, on the death of Dr. J. L. Hopkins in 1873, he was elected organist of the College, a post he has retained ever since. In the same year he was appointed conductor of the University Musical Society. In 1874 Dr. Stanford graduated in classical honours, and shortly afterwards studied music at Leipzig, under Reinecke, and in Berlin, under Kiel. His principal compositions up to 1876, are a setting of Klopstock's Hymn "Die Auferstehung" (op. 5), incidental music to Tennyson's "Queen Mary" (op. 6), and a setting of the 46th Psalm (op. 8), first performed by the Cambridge University Musical Society in 1876. In 1877 Dr. Stanford took the degree of M.A. In the same year an overture by him was produced at the Gloucester Festival, and a Symphony at the Crystal Palace. The next few years were devoted to the writing of various chamber compositions, two church services (one of which was written for the Festival of the sons of the Clergy in 1880), and a grand opera, "The Veiled Prophet of Khorassan" (libretto by W. Barclay Squire), which

was produced at Hanover, Feb. 6, 1881. In 1882 an Elegiac Symphony was performed at Cambridge, a Choral Hymn (op. 16) to words by Klopstock at St. Paul's Cathedral, and an Orchestral Serenade (op. 17) at the Birmingham Festival. Shortly afterwards he published a collection of old Irish songs. At the opening of the Royal College of Music Dr. Stanford was appointed Professor of Composition and Orchestral playing, and in 1883, the honorary degree of Mus. Doc. was conferred upon him by the University of Oxford. In 1881 he produced two new operas, "Savonarola" at Hamburg, and (within a fortnight) "The Canterbury Pilgrims" at Drury Lane; the librettos of both works were by G. A. A'Beckett. The same year witnessed the production at the Norwich Festival of a setting of Walt Whitman's Elegiac Ode for Abraham Lincoln (op. 21), three Cavalier Songs (words by Robert Browning) (op. 18), and a pianoforte sonata (op. 20), played at the Monday Popular Concerts. In 1885 Dr. Stanford was elected Conductor of the Bach Choir. His oratorio "The Three Holy Children" (op. 22) was produced at the Birmingham Festival, and his music to the "Eumenides" (op. 23) of Æschylus at the performance of the play at Cambridge. His choral setting of Tennyson's ballad, "The Revenge" (op. 24), was performed at the Leeds Festival of 1886, and a pianoforte quintet (op. 25), at the Monday Popular Concerts. In 1887 he set to music the "Carmen Sæculare of Lord Tennyson, which was performed at a State Concert with Madame Albani as Solo Soprano. The same artist sang the principal part in a setting of the 150th Psalm, written expressly for the opening of the Manchester Exhibition of the same year. Dr. Richter conducted the first performance of his "Irish" Symphony (op. 28), and the following autumn his music to "The Œdipus Rex (op. 29), of Sophocles was given at Cambridge. Shortly afterwards he was elected Professor of Music in the University of Cambridge, in succession to Sir George Macfarren. In January, 1888, Professor Stanford conducted at Berlin his fourth Symphony in F (op. 31), on which occasion also Dr. Joachim played a Violin Suite with orchestral accompaniment (op. 32). His setting of Tennyson's "Voyage of Maeldune" was produced at the Leeds Festival of the same year. His latest work is an oratorio, "Eden," of which the poem has been written by Mr. Robert Bridges. This work is announced for production at the Birmingham Festival of 1891.

**STANHOPE**, The Right Hon. Edward, the second son of Philip Henry, fifth Earl Stanhope, and Emily Harriet, daughter of General Sir Edward Kerri-son, was born in Grosvenor place, Sept. 21, 1810, and educated at Harrow, and Christ Church, Oxford. He obtained a first class in mathematics at the first public examination, Dec. 1861, graduated B.A., 1862, M.A., 1865; and was elected Fellow of All Souls', 1862. He was called to the Bar in 1866, and was elected M.P. for Mid-Lincolnshire in Feb. 1874, for which constituency he sat until 1883, when he was elected for the Horncastle Division of that county. He was parliamentary Secretary to the Board of Trade from Nov., 1875 to April, 1878, Under Secretary of State for India from that date until April, 1880, Vice-President of the Committee of Council on Education from June to August, 1885, and President of the Board of Trade from the latter date until Jan. 1886. He is a Trustee of the National Portrait Gallery. In Lord Salisbury's Cabinet of August, 1886, he was appointed Secretary of State for the Colonies, and was transferred to the War Office in January, 1887.

**STANLEY**, The Right Hon. Frederick Arthur, Lord Stanley of Preston, G.C.B., P.C., Governor-General of Canada, younger son of the fourteenth, and brother of the present Earl of Derby, by Emma, second daughter of the first Lord Skelmersdale, was born in London in 1841, and received his education at Eton. He entered the Grenadier Guards in 1858, was appointed Lieutenant and Captain in 1862, and retired in 1865. He represented Preston in the House of Commons, in the Conservative interest, from July, 1865, till Dec., 1868, when he was elected for North Lancashire. He was a Lord of the Admiralty from Aug. to Dec., 1868, and Financial Secretary for War from Feb., 1874, till Aug., 1877, when he became Financial Secretary to the Treasury. On April 2, 1878, Colonel Stanley was appointed Secretary of State for War, in succession to Mr. Hardy, now Lord Cranbrook, and was sworn of the Privy Council. In the autumn recess of that year he and Mr. W. H. Smith, the First Lord of the Admiralty, with a numerous suite, visited the island of Cyprus. He went out of office with his party, in April, 1880. In Lord Salisbury's government he was Secretary of State for the Colonies from June, 1885, till Feb., 1886, and in the Cabinet of Aug., 1886, was appointed President of the Board of Trade, and raised to the peerage with the title of Lord Stanley

of Preston. In 1888 he became Governor-General of Canada. He married, in 1864, Lady Constance, eldest daughter of the fourth Earl of Clarondon. Lord Stanley is heir presumptive to the Earldom of Derby.

**STANLEY**, Henry Morton, D.C.L., LL.D., African Explorer, was born near Denbigh, in Wales, on Jan. 28, 1811. When three years of age he was placed in the poor-house of St. Asaph, where he remained ten years, and received an education which enabled him to teach in a school. At the age of fifteen he sailed as cabin-boy in a vessel bound for New Orleans. Here he was adopted by a merchant named Stanley, whose name he took, in place of his original one, which was John Rowlands. His patron died without leaving a will, and young Stanley was left to his own resources. He enlisted in the Confederate army, was made a prisoner, and subsequently joined the Federal Navy, serving as acting ensign on the *Ticonderoga*. After the close of the war he went to Turkey as a newspaper correspondent, and in 1867 was sent by the *New York Herald* as its correspondent with the British army in Abyssinia, and subsequently travelled in Spain and elsewhere for the same paper. He was finally sent by the conductor of the *Herald* to find Dr. Livingstone, of whom nothing had been heard for more than two years. Stanley sailed from Bombay in Oct., 1870, and reached Zanzibar, on the east coast of Africa, early in Jan., 1871, and on Nov. 10 found Livingstone at Ujiji, on Lake Tanganyika, where he had just arrived from the south-west. Stanley furnished him with supplies, explored the northern part of Lake Tanganyika with him, and remained until Feb., 1872, when Livingstone started on the journey from which he never returned, and Stanley made his way back to Europe, reaching England in July, 1872. Here he was received with great enthusiasm, was publicly entertained and presented by Her Majesty with a gold snuff-box set with diamonds, and by the Royal Geographical Society (1873) with the patron's Gold Medal. The *frat* of his first expedition induced the conductors of the *New York Herald* and of the *London Daily Telegraph* to send him, at their own expense, on another African expedition. He reached Zanzibar in the autumn of 1874, and learning that Livingstone was dead, resolved to go north-westward, and explore the region of Lake Victoria Nyanza. This, after many encounters with the natives and the loss by death

or desertion of 104 men out of 800, he reached in Feb., 1873, and found it to be the largest body of fresh water on the globe, having an area of 40,000 square miles. He then pushed westward towards Lake Albert N'yanza, and was able to satisfy himself that it was not, as had been generally supposed, connected with Lake Tanganyika. Forced by the hostility of the natives to return to Ujiji, he determined to descend the great river discovered by Livingstone, and believed by him to be the Nile, but which others thought was the Congo (and Stanley by this journey ascertained it was). It had been named by Livingstone the Luābala, but by Stanley it was named the Livingstone. The descent, chiefly by canoes, occupied him eight months, cost him the lives of thirty-five men, and was accomplished under the greatest difficulties and privations. On reaching a settlement on the coast, a Portuguese national vessel took him to St. Paul de Loanda, whence an English vessel conveyed the party to the Cape of Good Hope, and thence to Zanzibar. Here his men were left at their home; and Stanley reached England in Feb., 1878. He has published an account of his first expedition, under the title of "How I found Livingstone," 1872. Of his second expedition an account is given in "Through the Dark Continent," 1878 (abridged edition, 1885). The President of the French Geographical Society presented the Cross of Chevalier of the Legion of Honour to Mr. Stanley at the Sorbonne, Paris, June 28, 1878. In 1879-82 he visited Africa again, sent there by the Brussels African International Association with a view to developing the great basin of the river Congo. The King of the Belgians devoted from his private purse £50,000 per annum towards this costly enterprise. Stanley completed the work in 1884, having established trading stations along the Congo River from its mouth to Stanley Pool, 1400 miles by river. A description of his labours in this field was published by him in 1885 under title of "The Congo and the Founding of its Free State." On Jan. 13, 1887, he was presented with the honorary freedom of the City of London, just on the eve of his departure for a fourth time to Africa. This expedition was made for the purpose of relieving Emin Pasha, Governor of Equatorial Africa, whose condition was known in Europe to have become precarious. Stanley fulfilled his mission, succoured Emin and brought him and his followers safely back to Egypt, but only after the most severe hardships

endured in any of his explorations, and with a loss of over 400 out of the 650 men he had taken with him. Nearly three years were occupied in this journey. Among the important geographical results of the expedition were the discovery of the Semliki River, of Mount Ruvenzori (thought to be 17,000 feet high), of Lake Albert Edward, and of the South-western extension of Lake Victoria. Lake Albert Edward proved to be the primary source of the White Nile, and it was shown that its waters connect through the Semliki with the Albert N'yanza. Stanley reached Cairo near the close of 1889 and remained there until the following spring in order to write a record of the journey. This was published simultaneously in England, France, Germany, and the United States in June, 1890, under title of "In Darkest Africa" (2 vols.). His return to England was an unending ovation. The Universities of Oxford and Durham bestowed upon him the degree of D.C.L.; that of LL.D. was conferred upon him by the University of Cambridge, and every institution and individual sought to do him honour. On July 12, 1890, in Westminster Abbey, he was married to Miss Dorothy Tennant.

STANNARD, Mrs. Arthur, "John Strange Winter," the popular author of "Bootles' Baby" and many other well-known novels, who was recently described by Mr. Ruskin (in a letter to the *Daily Telegraph*) as "The author to whom we owe the most finished and faithful rendering ever given of the British soldier," was born at York on Jan. 13, 1836. She was the only daughter of the late Rev. H. V. Palmer, Rector of St. Margaret's, York, who, before taking Holy Orders was in the Royal Artillery, and was one of the officers selected to attend the Coronation of Queen Victoria. One of her ancestors was the celebrated actress, Hannah Pritchard, to whose memory a monument was erected, by public subscription, in Westminster Abbey, close to those of Shakespeare and Scott. Mrs. Stannard began her public literary career in 1874; and was, for some years after then, a prolific contributor to periodical literature. Her first publication in volume form was a collection of military sketches entitled, "Cavalry Life," issued in 1881, for which her publishers induced her to adopt the masculine *nom de guerre* by which she has since become so well known. In 1885 two stories from her pen, entitled, "Bootles' Baby" and "Houp-la," appeared in the *Graphic*, and attracted immediate attention from the author's racy style and evident familiarity

with army matters and child life. Up to this time it was universally assumed that the author was a cavalry officer, but when the success of "Bootles' Baby" had established her reputation as a competent writer on army life, she disclosed her identity. Since then she has become a familiar and favourite figure in literary and artistic circles. The following is a list of her works:—"Cavalry Life," "Regimental Legends," "Bootles' Baby," "Hoop-la," "Pluck," "In Quarters," "On March," "Army Society," "Garrison Gossip," "Mignon's Secret," "That Lump!," "Mignon's Husband," "A Siege Baby," "Confessions of a Publisher," "Bootles' Children," "Beautiful Jim," "My Poor Dick," "Harvest," "A Little Fool," "Duttons," "Mrs. Bob," "Dinna Forget." She was married in 1881 to Mr. Arthur Stansfeld, a civil engineer, and has three children.

**STANSFELD, The Right Hon. James, M.P.**, the eldest son of Mr. James Stansfeld, of Moorlands, Judge of the County Court of Yorkshire, at Halifax (who died Jan. 20, 1872), was born at Halifax in 1820, and educated at University College, London, where he attained the degree of LL.B. He was called to the Bar at the Inner Temple in 1840; was elected one of the members for Halifax, in the advanced Liberal interest, in April, 1850; was appointed a Lord of the Admiralty in April, 1863, and resigned in April, 1864, owing to the dissatisfaction caused by his intimacy with the conspirator Mazzini. He was appointed Under-Secretary of State under Lord Russell's second administration, in Feb., 1866, and retired in June of that year. He was made Third Lord of the Treasury on Mr. Gladstone's coming into office in Dec., 1868, and in Oct., 1869, he succeeded Mr. Ayrton as one of the joint Secretaries to the Treasury. The latter office he resigned in March, 1871, when he succeeded Mr. Goschen as President of the Poor Law Board. He was appointed the first President of the new Local Government Board in Aug., 1871, and held that office till the resignation of Mr. Gladstone's Cabinet in Jan., 1874. Mr. Stansfeld supported Mr. Gladstone's Home Rule policy, and in 1886, on the resignation of Mr. Chamberlain, succeeded him as President of the Local Government Board, re-entering the Cabinet for the first time for twelve years. He has continued to sit for Halifax since 1850. Mr. Stansfeld is chiefly known throughout the country for his opposition to the Contagious Diseases Acts, and his support of woman's suffrage.

**STANTON, Vincent Henry**, son of Rev. V. J. Stanton, late Rector of Halesworth, Suffolk, and formerly Colonial Chaplain of Victoria, Hong Kong, is descended, on the mother's side, from Robert Barclay, of Ury, and was born at Victoria, Hong Kong, June 1, 1846. He was educated at Kensington Grammar School, and by private tuition; was Minor Scholar of Trinity College, Cambridge 1866; Major Scholar 1868; B.A. 1870 (20th Wrangler and 2nd class in Classical Tripos); M.A. 1873; B.D. 1890; and Fellow of Trinity College, 1872. He was ordained deacon 1872, and priest 1874; appointed one of the first University Extension Lecturers on the commencement of the scheme in 1873; was made Junior Dean of Trinity College 1874-76; Senior Dean 1876-81; Tutor 1881-89; Divinity Lecturer at Trinity 1882-89; Ely Professor of Divinity in the University of Cambridge, and Canon of Ely 1889; Select Preacher before the University in 1874, 1878, &c.; Hulsean Lecturer 1879; Cambridge Whitehall Preacher 1880-81; Examining Chaplain from 1875 to the successive Bishops of Ely. He has for some years taken an active part in college and university business, and is a member of the Council of the Senate of the University; and is the author of "The Jewish and the Christian Messiah, A Study in the Earliest History of Christianity," and of various sermons and pamphlets.

**STAPLETON, Augustus Granville**, born in 1800, was educated at Rugby and St. John's, Cambridge. He was appointed private secretary to Mr. Canning in 1822. At that statesman's death he was made a Commissioner of Customs by desire of George IV., as "a tribute to Mr. Canning's memory," and having been entrusted with Canning's papers, he published, in 1830, his "Political Life" during his last tenure of office. Mr. Stapleton contributed letters on foreign policy, signed "Sulpicius," to the *Times* during April and May, 1830. He contested Birmingham (without success) at the election in 1837. In 1843 he published two pamphlets on Ireland. From 1850 to 1853 he contributed letters on foreign policy and international law, signed "Lex Publica," to the *Morning Herald*. He published in 1850 "Suggestions for a Conservative and Popular Reform of the House of Commons," advising a distinct and separate representation in Parliament of the educated classes. This was followed by a pamphlet on "The Educational Franchise." He was invited in 1851, by the friends of Protestant education in Ireland, to examine the schools under the

National Board and the Church Education Society, and he gave evidence (1853) before a Committee of the House of Lords as to the result of his inquiry. In 1857 he published a pamphlet, "Hostilities at Canton," on the Lorcha Arrow case, and in 1859 "George Canning and his Times;" in 1866, "Intervention and Non-Intervention;" in 1868, "The Origin of Fenianism," in 1871, "The French Case truly stated," showing how the French Government were beguiled into the declaration of war against Prussia; and in 1873, essays in *Macmillan's Magazine*, commenting, from a contemporary point of view, on Charles Greville's *Memoirs*.

**STEAD, William Thomas**, was born at Eubleton, Northumberland, on July 5, 1840; and is the son of a Congregational Minister who, a few months later, settled in Howdon-on-Tyne. Mr. Stead was educated at home and at Wakefield. He left school when 14; became office boy in a mercantile office, then Russian Vice-Consulate at Newcastle-on-Tyne; was appointed editor of the *Northern Echo*, a halfpenny daily paper published at Darlington, July, 1871; assistant editor to Mr. J. Moyley on the *Pull Mall Gazette* Sept., 1880; succeeded to the control of the paper in the spring of 1883; resigned the editorship Dec. 31, 1889; and is now editing and publishing the *Review of Reviews*, a sixpenny monthly, founded by him in Jan., 1890. As editor of the *Pull Mall Gazette* he was said by Mr. Matthew Arnold to have invented the "New Journalism," naturalized the interview in the English press, introduced illustrations into the daily newspaper, and established the *Pull Mall Extras*. It was his interview with General Gordon at Southampton which led to the mission to Khartoum. His "Truth about the Navy and its Coaling Stations" marked the beginning of the revival of our Naval Supremacy. In July, 1885, Mr. Stead published "The Maiden Tribute of Modern Babylon," an exposure of crimes against women and children, for which the law provided no remedy. The immediate result was the passing of the Criminal Law Amendment Act of 1885, which successive ministries had in vain endeavoured to pass. The attempt to illustrate the actual state of the unreformed law by the impunity with which crimes against children could be committed by procuring, taking to a house of ill-fame, and subsequently sending abroad, young girls offered by their parents, or guardians, for sale for immoral purposes led, months after the act had been passed to a prosecution in the case of one of these girls, all the informa-

tion concerning which was furnished by Mr. Stead himself. The jury found that Mr. Stead had been deceived by his agent, and he received two sentences of three months each, to run concurrently, for aiding in the abduction of the child Armstrong, and for abetting in having her examined by a midwife. After spending three days as an ordinary criminal convict in Coldbath prison, Mr. Stead was removed by the order of Lord Salisbury to Holloway, where he spent the rest of his sentence as a first-class misdemeanant, but was welcomed, on his release, by a crowded demonstration and presentation at Exeter Hall. Mr. Stead visited Ireland in 1886, and published "No Reduction, No Rent, a Plan for the Plan of Campaign." In 1888 he visited Russia, of which country he has been the foremost advocate in the English press, and published on his return "Truth About Russia," in one volume. In 1889 he went to the Vatican to report to the *New Era* on the attitude of the Pope, and published a work on that subject in Jan., 1890. Mr. Stead is married, and has six children.

**STEDMAN, Edmund Clarence**, was born at Hartford, Connecticut, Oct. 8, 1853. He is a graduate of Yale College, 1873, and A.M. of Yale and of Dartmouth. After some experience on the Connecticut press, he obtained a position, in 1859, in the New York Tribune Office. During the Civil War he was a war correspondent of the New York World. In 1865 he left journalism, and went into business in Wall Street, in order to obtain the means and time for purely literary work. Besides his contributions to the *Atlantic*, *Century*, and other periodicals, he has published "Poems," 1866, 1873; "Alice of Monmouth," 1864; "The Blameless Prince," 1869; a volume of essays on "Victorian Poets," 1875; "Octavius Brooks Frothingham and the New Faith," 1876; "Hawthorne and other Poems," 1877; "Lyrics and Idyls" (London), 1879; "Edgar Allen Poe," 1880, and a collection of his "Poetical Works," 1881. In 1885 his "Poets of America" appeared, and in 1887 the thirteenth edition of "Victorian Poets," extended to the fiftieth year of Her Majesty's reign. Since 1883 he has been engaged, with Ellen M. Hutchinson, in the compilation of "A Library of American Literature," an inclusive work, of which the eleventh and final volume appeared last year, 1890. He will initiate the newly-founded Turnbull Lectureship on Poetry, at Johns Hopkins University, with the opening course of lectures, early in 1891.

**STEEL**, Miss Kate, the first lady Professor of singing at the Royal Academy of Music since 1867, was educated at Liverpool. As a child she was remarkable for her extraordinary vocal powers, having then a high soprano of great natural flexibility. She studied music and composition under Mr. Toms, of the Royal Academy, and achieved early a great proficiency on the pianoforte under Mr. Walter Macfarren. At sixteen she came up to London, and her rare musical sensibility and great natural facility seemed to point her out as destined to become a pianist of the first order, but, after a successful *début* at St. James's Hall, her wrists gave signs of weakness, which made the needful practising impossible. Meanwhile, she had prosecuted her vocal studies with such success, that a brilliant career in the concert room or on the stage seemed open to her. But here too, she was doomed to disappointment, for no sooner had she appeared once or twice in public and won golden opinions, than her throat also proved unequal to the excessive strain now put upon professional singing, and she had to abandon this second career also. But so exceptionally gifted a musician could not be allowed to leave the Royal Academy, so her services were retained unofficially by Signor Randegger, and for some years she was chiefly engaged in preparing his pupils. At a late meeting of the Tenterden-street Committee, with the full approval of Principal Mackenzie, and the warm support of Signor Randegger, it was decided to offer Miss Steel the post of Lady Professor of Singing at the Academy, which she accepted, and is at present the only lady Professor at the Royal Academy of Music.

**STEEL**, Sir John, R.S.A., sculptor to Her Majesty for Scotland, born in Aberdeen, in 1801, studied art in Edinburgh, where his parents resided; afterwards proceeded to Rome, and on his return from that city, in 1833, distinguished himself by a colossal model of Alexander and Bucephalus, now cast in bronze and erected in Edinburgh. His sitting statue of Sir Walter Scott, in gray Carrara marble, under the lower ground arch of the monument to the great novelist at Edinburgh, brought him into notice. A public competition took place for this statue, and Sir John's model was unanimously selected from among numerous others. One of his principal works in Edinburgh, the sitting colossal figure of the Queen, in her royal robes, with orb and sceptre, above the Royal Institution, gained for him the appointment of

sculptor to Her Majesty for Scotland, and another of his works, the equestrian statue of the late Duke of Wellington, in bronze, was erected in 1852 in front of the Register House, Edinburgh. The bust taken from this figure so pleased the Duke that he ordered two to be executed for him—one for Apsley House, and the other for Elton. Sir John Steel's statue of Admiral Lord de Saumarez, in the Hall of Greenwich Hospital, his bronze statue of Lord Melville, his statues in marble of Lord Jeffrey and Lord Justice-General Boyle, in Edinburgh, and his monument to the 93rd Highlanders, in the Cathedral at Glasgow, have been favourably noticed by competent critics, and his statues of the late Marquis of Dalhousie, and of the distinguished financier, the late Right Hon. James Wilson, have been erected in Calcutta. His statue of the late Professor Wilson, in bronze, twelve feet high, was placed on its pedestal in Princes Street, Edinburgh, March 21, 1865. He has executed another colossal statue of Allan Ramsay; a marble statue of the Countess of Elgin, for Jamaica; busts of the Prince of Wales, the Duke of Edinburgh, and numerous other works. In 1872 Sir John Steel executed in bronze a full-size copy of his colossal statue of Sir Walter Scott, for the Central Park, New York; and he has completed the Scottish National Memorial to the late Prince Consort, which is erected in the centre of Charlotte Square, Edinburgh, and was inaugurated in August 1876 by the Queen, who conferred the honour of knighthood on the sculptor. He has executed a colossal bronze statue of the late Dr. Thomas Chalmers, erected in George Street, Edinburgh, and for America a colossal statue in bronze of the great Scottish poet, Robert Burns, erected in the Central Park, New York, as well as a replica of it for Dundee. He lately executed a large monumental work in memory of those who fell of the 42nd Royal Highlanders in the Russian war; it is in fine statuary marble, and erected in the Dunkeld Cathedral; and a large allegorical frieze for Montreal. More recently he has executed for London a colossal bronze statue of Burns, somewhat altered from his statue in New York; and a duplicate of it for Dunedin, New Zealand. Among his more interesting busts may be mentioned that of Miss Florence Nightingale, modelled just after her return from the Crimea. He was married early in life to a daughter of John Graham, Esq., of Edinburgh; she died in 1885.

**STEERE**, The Hon. Sir James George Lee, third son of Lee Steere, Esq., of Hayes.

Surroy, was born in 1830, and was educated at the Clapham Grammar School. He emigrated to Western Australia in 1860; became Justice of the Peace, 1861; has been Member of the Legislative Council since 1868; Member of the Executive Council since 1884; Member of the Federal Council of Australasia since 1885; and Speaker of the Legislative Council since 1886. He received the honour of knighthood 1888. Sir J. G. L. Stoeck married, in 1850, Kate, the only daughter of the late Luke Leake, Esq., of Perth, Western Australia.

**STEINITZ, William**, was born May 17, 1830, at Prague, Bohemia, where he was also educated, finishing his studies, however, at the Polytechnic Institute, Vienna. He early attained distinction as a chess-player, and by his defeat of the late Professor Anderssen in 1866 won the match championship of the world, a position which he has held against all contestants to the present time. He has gained every single-handed match, or series played since 1862 and either first or second place (or been tied for first or second) in every tournament he has entered since 1867. His average score in tournaments has been the highest, and in any single one, his score has been the best. Among the tournaments in which he has taken part have been those held in Dublin, 1865, Paris, 1867, Dundee, 1867, Baden, 1870, London, 1872-1883, and Vienna, 1873 and 1882; and among the well-known players he has been matched against are Blackburne, Bird, Zukertort, Martinez, Mackenzie, Tschigorin, Golmayo, and Vinasquez. In 1883 he settled in the United States where, since 1885, he has been the editor of the *International Chess Magazine*. He has recently (1889) published the first part of a work entitled the "Modern Chess Instructor."

**STEPHEN, Sir Alfred, G.C.M.G., C.B.**, Lieutenant-Governor of New South Wales, third son of the late John Stephen, a Judge of the Supreme Court of New South Wales, born in 1802, was educated at the Charterhouse, and the Grammar School of Honiton, Devon. He was called to the Bar in 1823, and appointed a Judge of the Supreme Court of New South Wales in 1839, having previously held, for several years, the posts of Solicitor-General and Attorney-General of Tasmania. He was Chief Justice of New South Wales from 1844 till Nov., 1873; received the honour of knighthood in 1846; was nominated President of the Legislative Council, on its creation in 1856, but resigned in the following year;

was created a C.B. in 1862; administered the government of the colony, on the retirement of the Earl of Belmore, from Feb. 23 to June 2, 1872; was created a K.C.M.G. in 1874; was appointed Governor of New South Wales in Nov., 1875. Sir Alfred is a cousin of the late Right Hon. Sir James Stephen, and of the late Sergeant Stephen, the author of "Commentaries," whose pupil he was.

**STEPHEN, Sir George, Bart.**, was born at Dufftown, Scotland, in June, 1829; emigrated to Canada in 1850; became a merchant in Montreal, and amassed an immense fortune. In 1878 he was made President of the Bank of Montreal. In 1887, as a memorial of Her Majesty's Jubilee, he and Sir Donald Smith gave a quarter of a million pounds sterling to found the Victoria Hospital in Montreal. In the year previous to this munificent gift he was created a baronet for his public services in connection with the Canadian Pacific Railway.

**STEPHEN, The Hon. Sir James Fitzjames, K.C.S.I., D.C.L.**, eldest son of the late Right Hon. Sir James Stephen, born at Kensington Gore, London, March 3, 1829, and educated at Trinity College, Cambridge, where he graduated B.A. in 1852, was called to the Bar at the Inner Temple, in Jan., 1854. He chose the Midland Circuit, became Recorder of Newark-on-Trent (1859-68), and acted as Counsel for the Rev. Roland Williams when that gentleman was tried by the Court of Arches on a charge of heresy preferred against him by the Bishop of Salisbury. His speech was reprinted in a separate form in 1862. He was an unsuccessful candidate for the representation of Harwich in 1865, and for the Recordership of London on the resignation of Mr. Russell Gurney. In Dec., 1869, he received the appointment of Legal Member of the Council of the Governor-General of India, in the place of Mr. (now Sir Henry) Maine, and he held it till April, 1872, when he returned to this country. During the three years which he spent in India he laboured hard to consolidate, abbreviate, and simplify Indian law. In 1873 he unsuccessfully contested Dundee. He was appointed by the Inns of Court Professor of Common Law in Dec., 1875, and a member of the councils of legal education and law reporting. In 1877 he was nominated a K.C.S.I.; and in 1878 a member of the Royal Commission appointed to inquire into the provisions of a Draft Code relating to Indictable Offences. Sir James has published a "General View of the

Criminal Law of England," 1863; "Essays by a Barrister," reprinted from the *Saturday Review*, 1862; "Liberty, Equality, and Fraternity," 1873; "A Digest of the Law of Evidence," and a "Digest of the Criminal Law," 1877, which formed the basis of an elaborate Bill on Indictable Offences which was brought forward in the House of Commons by the Attorney-General (Sir John Holker) on the part of the Government, in 1878, and the consideration of which was postponed till the following session. In Jan., 1879, he was appointed to a Judgeship of the High Court of Justice (Exchequer Division), vacant by the resignation of Baron Cleasby. Since then he has published "A History of the Criminal Law of England," 3 vols., 1883, and other works.

**STEPHEN, Leslie, M.A.**, son of the late Rt. Hon. Sir James Stephen, the author of "Essays on Ecclesiastical Biography," and brother of the Hon. Sir James Fitzjames Stephen, was born at Kensington, Nov. 28, 1832, and educated at Eton School and at King's College, London, whence he proceeded to Trinity Hall, Cambridge, where he graduated B.A. in 1854 and M.A. in 1857. For several years he was Fellow and Tutor of Trinity Hall. In 1861 Mr. Stephen left Cambridge, and since then he has been actively engaged in literary pursuits in London. He was editor of the *Cornhill Magazine* from 1871 till 1882, when he resigned that post in order to undertake the responsible task of editing the important "Dictionary of National Biography," which is in course of publication in a series of quarterly volumes. In May, 1883, he was elected to the Lectureship of English Literature at Cambridge, founded in honour of the late W. G. Clark, of Trinity College, but he held the office for only a year. His separate publications are:—"The Playground of Europe," 1871; "Hours in a Library," 1st series, 1874, 2nd series, 1876, 3rd series, 1879; "Essays on Free-thinking and Plain Speaking," 1873; "History of English Thought in the 18th Century," 1876; "The Science of Ethics," 1882; and "Johnson," "Pope," and "Swift," in "English Men of Letters." He edited Fielding's works, "with a biographical essay," 10 vols., 1882. His latest book is "The Life of Henry Fawcett," 1885. Mr. Leslie Stephen has also contributed numerous articles to the *Saturday Review* and the *Pall Mall Gazette*. Mr. Stephen married Harriet Marian, younger daughter of Mr. William Makepeace Thackeray, the celebrated

novelist. (This lady died in 1875.) He married, secondly, in 1878, Julia Prinsep Duckworth.

**STEPHENS, Professor George, LL.D.**, Ph.D., Professor of English language and literature in the University of Copenhagen, son of the Rev. John Stephens, and his wife, Rebecca Eliza Rayner, of Ongar, Essex, who died in 1857. He was a Wesleyan minister and President of the Conference, but always held fast to the Church of England. He died in London in 1811. They had twelve children, of whom George is the last survivor. For the career of his brother Joseph, see the Life by G. J. Holyoake, 1881. George Stephens was born in Liverpool, Dec. 13, 1813, educated in several English public and private schools, and in University College, London. He showed an early bias for language, especially for his own, and wandered over many British and Scandinavian provinces to study the local dialects. Pecuniary accidents having prevented his final career in Oxford, he married, Jan. 16, 1834, Maria Bennett, daughter of Edward and Elizabeth Bennett, of Brentwood, in Essex. He then settled in Stockholm, Sweden, to learn the origins of English in the folk-tales and literature of our Scandinavian homeland. In 1831 he was appointed lecturer (afterwards Professor) of Old-English (Anglo-Saxon) and the modern tongue in the University of Copenhagen (Kjøbenhavn, Copenhagen, Denmark), where he is still lecturing—always in English—as "Professor of the English Language and Literature." His activity as a writer has been so great, that we cannot here give the titles of even a tithe of his publications. It embraces prose and poetical contributions to literature in general, history, folk-lore, old-lore, linguistics, and runology. A list up to 1865 may be seen in his biography in the Danish work, "Supplement til Almindeligt Forfatter-Lexicon," by Erslev, vol. iii., Kjøbenhavn, 1868, pp. 268-278. But in addition to the above-mentioned list, we may point out a few things later than 1865. For instance, "Maabeth," 1876, which shows how a Swedish Runic stone identifies the last battle-field of that Scottish king; "Thunor the Thunderer," 1878, explaining a remarkable Swedish Font (about A.D. 1000), sculptured with antique Christian symbolism; "Some Runic Stones in Northern Sweden," and "On the Dialect of the First Book printed in Swedish," both in "Nova Acta Reg. Soc. Scient. Upsal," 1879. "The Old-Northern Runic

Monuments of Scandinavia and England," folio, with hundreds of illustrations, some of them in gold and colours, vol. i., 1866-67, vol. ii., 1867-68, vol. iii., 1884. A 4th volume will follow, should funds and life permit. "Handbook of the Old-Northern Runic Monuments," 4to, 1884; with all the O.N. engravings and translations, but a very short text; "The Oldest yet found Document in Danish," all in the later Runes on a small leaden tablet. (In "Mémoires des Antiquaires du Nord," 1887.) "Cantata, at the Copenhagen University Festival, Nov. 17, 1888," translated in the metre of the original poem by Carl Plong. Professor Stephens is F.S.A., Lond.; Honorary Dr. of Philosophy of the University, Upsala; Honorary Doctor of Letters, Cambridge; Honorary Member of many learned academies and societies at home and abroad; Knight-Commander of the North Star, Sweden; Knight of the Order of St. Olaf, Norway; Knight of the Danebrog, and also Danebrogsmann, Denmark.

STEPHENSON, Augustus Keppel, K.C.B., was born in London, Oct. 18, 1827, and is the son of the late Henry Frederick Stephenson, Barrister-at-law, formerly M.P. for Westbury, and a Commissioner of Inland Revenue, and the Lady Mary Keppel, daughter of William Charles, 4th Earl of Albemarle. He was educated privately, and at Cnus College, Cambridge, where he took his M.A. degree in 1849, and was called to the Bar as barrister-at-law of Lincoln's Inn, 1852; for two years he was Marshall and Associate in the Court of Queen's Bench to the Lord Chief Justice Campbell; went the Norfolk Circuit; was a Revising Barrister and Recorder of Bedford; appointed Assistant-Solicitor of the Treasury by Earl Russell in 1865; *ad interim* Registrar of Friendly Societies by Mr. Lowe, when Chancellor of the Exchequer; appointed Solicitor to the Treasury in 1876; and Her Majesty's Procurator-General, 1877, by Mr. Disraeli, when First Lord of the Treasury; Director of Public Prosecutions by Statute 47 & 48 Vic. cap. 38, 1884. He was created a C.B. on the recommendation of Mr. Gladstone, when First Lord of the Treasury in 1883, and a K.C.B. on the same recommendation in 1886. Sir Augustus Stephenson was made Queen's Counsel in 1889, on the recommendation of Lord Chancellor Halsbury. He married, in 1861, Eglantine, second daughter of the late Right Hon. Edward Pleydell Bouverie.

STEPHENSON, Rev. Thomas Bowman, B.A., Lond., D.D., LL.D. (Hon.), minister of the Wesleyan-Methodist Church, was born at Newcastle-on-Tyne in the year 1830. His father, the Rev. John Stephenson, was a minister of the same church. Dr. Stephenson was educated at Wesley College, Sheffield; and graduated at the University of London in 1860. His first clerical appointment was to Norwich, where he took part in the then novel experiment of theatre preaching. Removing to Manchester in 1862, he threw himself into the various labours rendered necessary by the Cotton Famine; and then, and subsequently at Bolton, his attention was turned to those social and philanthropic problems which have specially engrossed his subsequent years. He held two charges in London; and in the year 1869 commenced the great group of Institutions known as the Children's Home, by opening for wife a small Cottage in Lambeth. These institutions have so grown that there are over eleven departments in London and the provinces, in which efforts are made for the benefit of homeless children of both sexes, of ragged children, of young women, and of many others. With two exceptions, Dr. Stephenson's Institutions are the largest of the kind under any one man's control. In connection with the work, he has advocated the employment for religious and philanthropic purposes of women of culture and, when possible, of means, who should act together as a Sisterhood, duly trained and confederated, though, without any "vow." The "Sisters of the Children" have been organized and at work for about fifteen years. He is now promoting a considerable extension of the work of "Deaconesses," chiefly in connection with his own church. He was a member of the Second School Board for London; is an ardent "Temperance Reformer," and connected with several of the leading Philanthropic Societies. He has travelled extensively in many parts of the British Empire; has promoted, for many years, emigration, especially that of children, to Canada. He has been a frequent contributor to Reviews and Magazines; and is the author of several well-known hymns and tunes. He is considered to be a leader of the progressive section of Methodism.

STEPNIAK, Sergius Michael Draganoff, was born in 1811 at Hadjatsch, in the Ukraine Mountains, in the government of Poltawa, and comes of a semi-noble family descended from the Cossacks of Little Russia. He studied at Kieff

from 1859 to 1868. In that time he published several works in the Little Russian dialect, which were prohibited by the Government in 1862. In 1865 he became *docent* in ancient history in the University of Kieff, and in 1870 he became a Professor, but was removed from his chair by the government three years later. His criticisms on the system pursued by Count Tolstoi, one of the Ministers of Justice, led to his exile in 1876. He went to Geneva then and settled there, producing popular writings in the Little Russian dialect. In 1877 he began a series of reviews in the Ukraine dialect called, "Hromada," which means, "common things." At the same time he worked hard for the establishment of equal political rights for all people in Russia and declared against Socialism as well as Absolutism. Some of the principal works which Stepniak has produced are "The Turks Within and Without," "Tyranicide in Russia," and "Little Russian Internationalism." He has also contributed to the magazines some papers on East European peoples, and the propaganda of Socialism, and "Historical Poland and the Muscovite Democracy." He is also known for his works on the ethnography, history and literature of Little Russia, and, with M. Antonowitch, has edited a collection of Little Russian folk songs.

STERLING, Antoinette. See MACKINLAY, MRS. JOHN.

STEVENSON, David Watson, R.S.A., was born in 1812 at Ratho, a few miles to the west of Edinburgh; and began his artistic life under the late William Brodie, R.S.A., in November 1837, devoting himself from the first with the enthusiasm characteristic of his countrymen, alike to his work in the studio during the day and to his studies in the evening and during every leisure hour. Under Mr. Brodie he remained eight years, receiving every encouragement; and, although not a pupil, he had opportunities of acquiring varied experience in all the departments of Sculpture. During the first half of that period he attended the School of Art under the Board of Manufactures for Scotland, a copy of "The Venus of Melos," made in his last session at the School, was published by the Board, and largely subscribed for by the members. Admission to the life School of the Royal Scottish Academy having been gained in the usual way, he continued his studies there for about four years, at the same time studying anatomy.

In 1859, a juvenile work by Mr. Stevenson had, by a stretch of indulgence, been accepted; it was followed, however, next year by better work, and Mr. Stevenson has continued a regular contributor to the Annual Exhibitions of the Academy, of which body he was elected an Associate in 1877, and an Academician in 1886. In 1866, without friends and with a small sum which he had saved, augmented by £20 lent by his mother, and afterwards amply repaid, he began work on his own account; his first sitters being Mr. J. H. A. Macdonald, afterwards Lord Advocate, now Lord Justice Clerk, and Mrs. Millar, wife of Lord Craighill. The figure of a youth modelled at this time attracted the attention of Mr., afterwards Sir, John Steel, R.S.A., Her Majesty's Sculptor for Scotland, who, on the death of George Macculloch in October 1868, commissioned him to execute the life-size group representing "Labour" at one of the angles of the Prince Consort Memorial, Edinburgh, primarily entrusted to that promising young sculptor, but by him only carried the length of the first sketch, and which was then begun *de novo*. The execution of this group proving satisfactory to the Committee, it was immediately followed by the commission to carry out the companion group representing "Learning," and on the unveiling of the memorial by the Queen in August, 1876, he had the honour, along with the other Artists who had been engaged upon the work, of being presented to Her Majesty. In the spring of 1876, while alterations were being effected in the studio, and preparations made for carrying out this important undertaking, he paid a long-desired visit to Rome, modelling while there a life-size statue of Eve, a design for which he had carried with him. He modelled a statue to Tannahill, the poet, which was erected at Paisley; and a colossal statue of Wallace for the national monument to the Hero and Patriot on the Abbey Craig, Stirling; where are also, in the interior of the tower, a series of busts in marble, also by Mr. Stevenson, of eminent Scotsmen, beginning with that of King Robert the Bruce, not altogether ideal, being based on the cast taken from the bones of the head found in the grave of the King in Dunfermline Abbey. The series includes busts of Knox, Buchanan, Adam Smith, Burns, Scott, Watt, Tannahill, Thomas Chalmers, and Hugh Miller. A statue of Knox also was executed for Haddington. In the intervals between these larger works, various ideal figures were executed, including a "Nymph at the Stream," a seated figure now in the

Art Gallery at Oldham. He executed also a statue in marble of "Lady Godiva," one of "Echo," in movement; and one of "Galatea." A group of a "Pompeian Mother," attracted the attention of the Prince of Wales at the International Exhibition of 1886 at Edinburgh. In 1881 Mr. Stevenson was one of the successful competitors in the first competition for four groups of statuary for Blackfriars Bridge, London; his design "India visits Britain" being awarded the third premium by the assessors, among whom were Sir Frederic Leighton, P.R.A., Mr. W. Calder Marshall, the veteran sculptor, and other members of the Royal Academy. Mr. Stevenson has executed numerous portrait busts of eminent men, among the more recent being Sir John Fowler, Bart., the well-known engineer, exhibited at the Royal Academy in 1889, and Mr., now Sir, William, Arrol, the constructor of the Forth Bridge.

STEVENSON, Robert Louis Balfour, novelist (generally known as Louis Stevenson), was born in Edinburgh, Nov. 13, 1850, and is the son of Thomas Stevenson, the author of "Lighthouse Optics." He was educated at private schools and at the University of Edinburgh; and was called to the Scottish Bar, but travelled and devoted himself to literature. One of his earliest works was an account of his travels in California, but the book which established his reputation as a writer of fiction was "Treasure Island," published in 1883. Amongst the most popular of his works is "Dr. Jekyll and Mr. Hyde," which was dramatized and played at the Lyceum Theatre in 1888. Mr. Stevenson has also written a life of his father, the celebrated lighthouse engineer. The New York *Critic* says of Robert Louis Stevenson: "Truly in his power to 'harrow up the soul, freeze the young blood,' etc., Stevenson is unsurpassed by modern writers. We feel our flesh creep upon our bones as we sit absorbed in some of his weird and witch-like tales. Then, though we may be ashamed to confess it, we seem to lose our years, and shrink into an eager, uninitiated boy once more, as we huddle over 'Treasure Island' or 'Kidnapped,' 'The New Arabian Nights,' or 'The Black Arrow,' letting the hour-hand on the clock creep on to midnight unheeded; we may protest that it is the sheerest juvenile nonsense in the world, but none the less are we held by a spell; there are no pauses, no tame meanderings, when we might break away and begone; but the racy narrator hurries us on over adventurous by-ways, twisting and turn-

ing, bursting upon new surprises, dashing into dangerous pit-falls, until breathless we come plump into an unwelcome *Finis*, and close the book perforce."

STEWART, General Sir Donald Martin, Bart., G.C.B., G.C.S.I., C.I.E., was born in 1824. He received his education at the University of Aberdeen, and entered the Bengal Staff Corps in 1840. He served against the Hill Tribes in the Peshawur district in 1854 and 1855, when he was honourably mentioned in the despatches. In May and June, 1857, at the outbreak of the Sepoy Mutiny, he commanded the volunteers serving in the Allyghur district. When all communication with the upper provinces was cut off, Captain Stewart volunteered to carry despatches from the Government of the North-West Provinces to the officer commanding at Delhi. This he performed with success, and on his arrival at the camp before Delhi he was appointed Deputy Assistant-Adjutant-General, in which capacity he served with the field force throughout the siege of Delhi. He was again mentioned in despatches with signal approval, and was promoted to the brevet rank of Major. He afterwards served in the siege of Lucknow as Assistant-Adjutant-General, and throughout the campaign in Rohilkund. His services on this occasion were further recognised, and he obtained a brevet of Lieutenant-Colonel, with the Medal and two Clasps. In the Abyssinian Expedition of 1867-68 Colonel Stewart commanded the Bengal Brigade, and commanded for some time at Zulla and Senafé. He was then rewarded with the title of C.B. He attained the rank of Lieutenant-General in 1877. He was in command of the Candahar column of operations in the Afghan campaign from Nov., 1878, to April, 1880, and for his services received the thanks of Parliament and was made K.C.B. He commanded the field force which marched from Candahar to Cabul in April, 1880, fought and defeated the Afghans at Ahmed Kheyl, and again at Oorzoo. General Stewart subsequently held supreme command of the army in Northern Afghanistan, and after dispatching Sir Frederick Roberts to the relief of Candahar, he carried out the withdrawal of the British Army from Cabul and Northern Afghanistan. For these services he received the thanks of Parliament, and was made G.C.B. and baronet. In Sept., 1880, he was appointed Member of the Council of the Governor-General, and in April, 1881, succeeded Sir F. Haines as Commander-in-Chief in India. Sir D. Stewart is now a member of the Indian Council.

**STEWART, Sir Robert Prescott, Mus. D.**, son of the late Mr. Charles Frederick Stewart, of Dublin, by Anna, daughter of Mr. Francis Dawson, of Monaghan, was born in Dublin in Dec. 1825. He received his education in the school of Christ Church Cathedral, Dublin, and at the age of eighteen he was appointed organist of Trinity College, Dublin, and of both the Dublin Cathedrals. He took the degrees of Bachelor and Doctor of Music in 1851. He composed an "Ode to Industry," for the Exhibition held at Cork in 1852, and a "March," which was played before Her Majesty and Prince Albert at the Dublin Exhibition in the following year. In 1858 he produced his cantata "A Winter-Night's Wake;" and subsequently another cantata, "The Eve of St. John." He became Professor of Music in the University of Dublin in 1862. In 1872 he was knighted by the Lord-Lieutenant of Ireland, in acknowledgment of his musical attainments. He is a member of the Council of the Royal College of Music. Sir Robert Stewart has written works on "Irish Music," and "Dance Forms;" "The Life and Works of Handel;" and many articles in the "Dictionary of Music," edited by Sir George Grove. He was the first to remodel the organ compass in Ireland to the true German compass of C.; before his time, both manual and pedal keyboards were erroneously made to begin at F or G. Sir Robert was also the first to make the following literary curriculum compulsory in the case of all musical graduates:—"A Bachelor in Music must pass an Examination in the following subjects:—(1) English Composition, History, and Literature; (2) a modern Language (Italian, French, or German); (3) Latin, or, instead of it, a second modern Language; (4) Arithmetic." This was done immediately upon his election to the chair of Music in the University of Dublin in 1862, before which date no literary examination was required of any graduate in music, at any College or University in the Kingdom. The Universities of Oxford, Cambridge, and London adopted this idea in 1878; some private Colleges having done so about 1872.

**STEWART, Thomas Grainger, M.D.**, born in Edinburgh, Sept. 23, 1837, was educated at the High School and University of Edinburgh, and after graduating, studied in the Universities and Hospitals of Berlin, Prague, and Vienna, especially under Virchow, Rokitsky, and Oppolzer. On his return to Edinburgh he became Resident Physician

in the Royal Infirmary, and there made observations upon the diagnosis of certain forms of kidney disease, which attracted considerable attention. As a result of this work he was, in 1862, appointed Pathologist to the Royal Infirmary, and Lecturer on Pathology at Surgeons' Hall. During the succeeding seven years he published numerous papers on pathological and clinical subjects, and in 1869 unsuccessfully contested the chair of General Pathology in the University of Edinburgh. He then resigned the Pathologistship and the Physicianship to the Royal Hospital for Sick Children, and was elected ordinary Physician to the Royal Infirmary and Lecturer on Clinical Medicine. In 1876, he was appointed Professor of the Practice of Physic in the University of Edinburgh. Dr. Stewart is the author of a book on Bright's Diseases of the Kidneys, which has passed through two editions in this country, and two in America. The views embodied in this work have been to a large extent accepted on the Continent as well as in this country. He has also published a volume of Lectures on the Nervous System, and three Lectures on Giddiness, and fifteen on Albumen uree, being the first and second of a series of Clinical Studies on Important Symptoms, as well as many papers, particularly on the nervous system, the lungs, and the liver. He is a member of various learned societies at home and abroad, an Honorary Fellow of the King and Queen's College of Physicians, and M.D. (*Honoris Causa*) of the Royal University of Ireland. He has been President of the Medical Chirurgical Society of Edinburgh, and of the Medicine section of the British Medical Association, and has for many years taken a special interest in the Medical Students' Christian Association. He is at present President of the Royal College of Physicians of Edinburgh. In 1882 he was appointed Physician in Ordinary to Her Majesty the Queen in Scotland.

**STIGAND, William**, son of the late William Stigand, Esq., of Devonport, born in 1827, was educated at Shrewsbury and St. John's College, Cambridge. After studying the Equity branch of the profession of the law, he was called to the Bar at Lincoln's Inn in June, 1852. He has written "A Vision of Barbarossa, and other Poems," 1860; "Athlennis; or, the First Crusade," 1866; and "Life, Work, and Opinions of Heinrich Heine," 2 vols., 1875. Mr. Stigand has contributed largely to the *Quarterly* and *Edinburgh Reviews*, the *Times*, and other periodicals; he entered the British

Consular's Service as Vice-Consul of Boulogne sur Mer in 1873, and has been successively Consul at Ragnsa, Königs-burg and Palermo.

**STIRLING, Mrs.**, an accomplished and versatile actress, daughter of the late Capt. Hehl, of the Horse Guards, born in Queen Street, Mayfair, in 1817, was educated at a convent in France, and on her return home, finding that her family had fallen into pecuniary difficulties, she determined, although then but sixteen years of age, to try her fortune upon the stage. Adopting the name of Miss Fauny Clifton, she obtained an engagement at the East London Theatre, at which her reception was encouraging, attributable in no small degree to her handsome person and musical voice. This was followed by a better engagement at the Pavilion, where she met Mr. Edward Stirling, the stage manager, to whom she was soon afterwards married. Mrs. Stirling's next professional engagement was with Mr. Davidge, of the Liverpool Theatre, where she remained one season, went to Birmingham, and soon after returned to London, and played at the Adelphi in "Victorine," "The Dream at Sea," and other new pieces. About this time she accepted an engagement for three years under Mr. Macready, at Drury Lane, where she obtained important parts, and won her way to popularity. Her next engagement was at the Princess's, where she took leading Shakespearian characters, both tragic and comic; and amongst those her Cordelia was regarded as the most successful, though in Rosalind, Desdemona, and Portia her talents were displayed to great advantage. Mrs. Stirling's engagements at the Olympic and at the Strand Theatres, under Mr. Farren, and her later performances at the Haymarket, Adelphi, and St. James's Theatres, were attended with great success, especially in the prominent parts of Lady Teazle, in Sheridan's comedy of "The School for Scandal," Lady Guy Spanker, Maritana, the Widow Green, Mrs. Bracegirdle, in the "Tragic Queen," and Peg Woffington. Her later rôles have been the Nurse in "Romeo and Juliet" and Martha in "Faust," both at the Lyceum. Mrs. Stirling finally retired from the stage in 1836.

**STIRLING, The Hon. Sir James**, a Judge in the Chancery Division of the High Court of Justice, was born in 1836; called to the Bar in 1862; junior Counsel to the Treasury in 1881; Member of the Bar Committee in 1883; and was raised to the Bench in 1886.

**STIRLING, James Hutchinson, LL.D.**, born at Glasgow, June 22, 1820, was educated at Glasgow University for nine consecutive winter sessions in arts and medicine, and spent six years afterwards in France and Germany. He became LL.D. of Edinburgh, 1867; and a Foreign Member of the Philosophical Society of Berlin, 1871. In earlier days he held appointments as surgeon to the Hirwain and other iron and coal works, South Wales, but he relinquished professional practice in 1851, and went to the Continent to pursue there those literary and philosophical studies for which, as a student at College, he had shown a taste, and in which he had gained distinction. Returning to England in 1857, he devoted himself to the study of philosophy and literary pursuits generally. Leaving earlier contributions out of view, he published in 1865 "The Secret of Hegel," from the appearance of which work there dates in Great Britain, academically and generally, a new movement towards the study of philosophy, more particularly German and ancient. The following are the titles of his other works:—"Sir William Hamilton, on the Philosophy of Perception," 1865; "Schwegler's History of Philosophy, translated and annotated," 1867, tenth edit. 1888; "Jerrold, Tennyson, and Macaulay, with other Critical Essays," 1868; "Address on Materialism," 1868; "As Regards Protoplasm," 1869, second edit. 1872; "Lectures on the Philosophy of Law, &c.," 1873; "Burns in Drama, together with Seven Leaves," 1878; "Text-book to Kant," 1881; "Of Philosophy in the Poets," 1881; "The Community of Property," 1883; "Thomas Carlyle's Counsels," 1886. In 1888 he was appointed the first Gifford Lecturer to the University of Edinburgh; and, as such, in the two subsequent sessions, delivered courses of lectures on Natural Theology. These lectures are in course of publication. He has also contributed to periodicals.

**STOCKHAUSEN, Julius**, was born in Paris, July 22, 1825. His father was a harpist, and his mother a well-known singer. Intended at first for the priestly calling he received his early education at the school of Gebwiller in Alsace, and subsequently attended the College in Strasbourg. His mother's success at a farewell concert given in Basle, however, changed the course of his life, and in 1845 he went with his father to Paris, and there became the pupil of Hallé and Stanisly for piano, and of the famous Garcia for singing. In 1848 he sang the part of Elijah in Basle and with such

success that from that time he gave himself up entirely to singing. In 1840 he came to England, where he continued his studies with Garcia, and in 1851 sang in the 9th Symphony in London. From 1857-59 he was engaged at the Opera Comique in Paris, where he specially distinguished himself in the part of the Sénéchal in Boieldieu's *Tenue de Paris*. There he formed a close friendship with Ary Scheffer, the painter, in whose house, together with Berlioz Duprez, Pauline Viardot and Saint-Saens, German music was diligently cultivated. Concert tours followed in 1859-62. At Leipzig and Cologne he sang Schumann's *Faust* for the first time. In 1860 he entered on the second period of his musical activity as leader of the Hamburg Philharmonic Society; and in 1874, as director of the famous Stern Choral Society in Berlin. Great as his success as a leader and teacher has been Stockhausen's musical importance culminates in his achievements as a singer. His technic was perfect and he had such mastery over his instrument that the purity of tone and the intellectual expression never had to be sacrificed the one to the other. The astonishing distinctness of his pronunciation as well as its beauty and intellectual significance was due to a complete understanding of the nature of the elements of speech. Nowhere was the slightest trace to be detected of a mere seeking after effect, or a display of the voice. As Joachim plays the violin, and Clara Schumann the piano, so does Stockhausen sing and interpret the thoughts of the great masters. Seldom, if ever, in singing has the reproductive art been distinguished for such purity, elevation, and dignity. In 1878 began the third period of his artistic career, that of a teacher, first at the newly founded Hoch Conservatoire in Frankfurt-on-Main, which, however, he quitted in the following year. Since then he has been at the head of a singing school of his own, and has repeatedly, up to the most recent date, himself sung in Concerts and Oratorios. His "Method of singing," a very important work, was published in 1884 in Leipzig, and translated into English in 1888.

**STOCKS, Lumb, R.A.**, born Nov. 80, 1812, at Lightcliffe, near Halifax, Yorkshire, was educated at Horton, near Bradford, and articled to Charles Rolls in 1827. He began his profession as line engraver in 1833, producing plates after Stothard, Sir W. Beechey, etc., for the annals of that period, then for Finden's Gallery of British Art, "Fitting out Moses for the Fair," after Maclise; and

"Noll Gwynne," after Charles Landseer; succeeded by "Raffaele and the Fornarina," after Sir A. W. Callcott, for the Art-Union of London, in 1843; "The Piano School," 1840, and "The Rubber," in 1851, both after Webster, followed; and for the Association for the Promotion of Fine Arts in Scotland he engraved "The Glee Maiden," after Lauder; "The Gentle Shepherd," after Wilkie, and others; "Bed Time," after Frith, was engraved in 1853, in which year Mr. Stocks was elected an Associate Engraver of the Royal Academy. "The Birthday," 1850; and "Claude Duval," 1863, also after Frith, followed; and in 1872, "The Meeting of Wellington and Blücher," from the wall-painting in the Royal Gallery at Westminster, by Maclise, was completed, in which year Mr. Stocks was elected a Royal Academician. "The Odalisque," 1875, and "The Sister's Kiss," after Sir F. Leighton; "The Silken Town," after Macd; "A Souvenir of Velasquez," and "The Princess in the Tower," after Sir J. E. Millais; "Marie Antoinette," "Charlotte Corday," "Dr. Johnson in the Antechamber of Lord Chesterfield," after E. M. Ward, have subsequently been engraved by Mr. Stocks. His latest work, produced in 1887, is "The Spanish Letter Writer," after J. B. Burgess, R.A., executed in the Line Manner, to which style of engraving he has ever been faithfully devoted.

**STOCKTON, Francis Richard**, an American writer, was born at Philadelphia, April 5, 1834. He graduated from the Philadelphia Central High School in 1852, and began life as an engraver, but abandoned engraving to devote himself to journalism. His earliest writings were a number of fantastic tales for children contributed to the *Riverside Magazine* and other periodicals. He subsequently became connected with a daily paper, in Philadelphia, and afterwards with *Heath and Home*, New York. Later he joined the editorial staff of *Scribner's Monthly* (now *The Century*), and on the establishment of *St. Nicholas* became its assistant editor. His "Rudder Grange" papers, which appeared in *Scribner's*, were the first to attract general public attention, which he had successfully held by the novel character of the short stories for which he is chiefly celebrated. Among the best known of these are "The Lady or the Tiger," "The Transferred Ghost," "The Spectral Mortgage," "The Discourager of Hostancy," "Negative Gravity," etc. He has also published novels entitled

"The Little Mrs. Null," "The Hundredth Man," and "Ardis Claverden," besides "The Casting Away of Mrs. Lecks and Mrs. Alshine," "The Dusanter," "The Merry Chantor," "The Great War Syndicate," and "The Stories of the Three Burglars," which are novelettes.

**STODDARD, Richard Henry**, was born at Hingham, Mass., July 2, 1825. His family removed, in 1835, to New York, where he learned the trade of an iron-moulder. In 1818 he began to write for periodicals both in prose and verse. In 1853 he received an appointment in the New York Custom-House, which he held until 1870, at the same time continuing his literary labours. He has published: "Footprints," 1849; "Poems," 1852; "Adventures in Fairy-Land," 1853; "Songs of Summer," and "Town and Country," 1857; "Life of Alexander von Humboldt," 1859; "Loves and Heroines of the Poets," 1860; "The King's Bell," 1863; "The Story of Little Red Riding Hood," 1864; "Under Green Leaves," and "Late English Poets," 1865; "Melodies and Madrigals, mostly from the Old English Poets," 1865; "The Children in the Wood," 1866; "Putnam, the Brave," 1866; "The Book of the East, and other Poems," 1871; new and enlarged editions of "Griswold's Poets of America," 1873; "Female Poets of England in the Nineteenth Century," 1875; "Mémoir of Edgar Allen Poe," 1875; "Poems," 1880; and "Henry Wadsworth Longfellow," 1882. He has also edited a series of dainty works, entitled "Bric-a-Brac Series" (1874-75); and "Sans Souci Series," and more recently a number of volumes relating to English literary history and memorabilia. In conjunction with others he published in 1877 a volume, entitled "Poets' Homes." He was for a short time after leaving the Custom House, City Librarian, and is now (1890) the literary editor of the *New York Mail and Express*. His wife, **ELIZABETH D. (BARSTOW) STODDARD**, born at Mattapoiset, Massachusetts, in 1823, is also a contributor to periodicals, and has published three novels: "The Morgesons," 1862; "Two Men," 1865; and "Temple House," 1867. These novels have recently been reprinted, "Two Men" and "Temple House" in 1888, and "The Morgesons," in 1889, and have met with great critical success.

**STOKES, Sir George Gabriel, Bart, F.R.S., D.C.L., LL.D., M.P.**, born Aug. 13, 1819, at Skroon, co. Sligo, was educated at Dr.

Wall's school, in Dublin, at the Bristol College, and at Pembroke College, Cambridge, where he graduated B.A. in 1841, as Senior Wrangler, and was elected to a Fellowship. In 1849 he was appointed to the Lucasian Professorship of Mathematics, and in 1852 was awarded the Rumford Medal by the Royal Society (of which he had been chosen a member a few months before), in recognition of his services to the cause of science by his discovery of the change in the refrangibility of light. An account of this discovery will be found in the "Philosophical Transactions" for 1852. Mr. Stokes was chosen one of the Secretaries to the Royal Society in 1854, and President in 1885, on the retirement of Prof. Huxley, and was President of the British Association at the meeting at Exeter in 1869. He has contributed to the Transactions of several learned societies, and has delivered professorial lectures at Cambridge, and at the Museum of Practical Geology in London. He is an honorary Fellow of several foreign academies, and has received the Prussian order *Pour le Mérite*. He has also received the honorary degree of D.C.L. or LL.D. from the Universities of Oxford, Edinburgh, Dublin, and Aberdeen. On the death of Mr. Beresford-Hope, in 1887, he was returned as one of the representatives in Parliament of Cambridge University. In 1889 he was created a Baronet of the United Kingdom; and in 1890 retired from the Presidency of the Royal Society, and was succeeded by Sir William Thomson.

**STOKES, Lieut.-General Sir John, K.C.B.**, son of the Rev. John Stokes, vicar of Cobham, Kent, was born there in 1825, and received his education at the Proprietary School, Rochester, and at the Royal Military Academy, Woolwich. He entered the Royal Engineers as Second Lieutenant in 1843, and saw active service in the Caffre War of 1846-47, and received the thanks of the Commander-in-Chief on two occasions, and again in 1850-51. In 1851 he was appointed to act as Deputy Assistant-Quartermaster-General of the Field Force in Caffraria, and assisted in organising 4,000 levies among the Hottentots, and was engaged in all the principal operations, frequently receiving the thanks of General Sir Harry Smith, G.C.B., and his marked approbation in General Orders. He received the Cape Medal for these services. In 1855 he was appointed Chief Engineer to the Turkish Contingent, and raised and organised the Engineer Corps and Train of that force

In the winter of 1855-56 he was employed in fortifying Kertoh, for which he obtained a brevet majority, the Turkish Medal, and the order of the Medjidieh, fourth class. At the close of the war he was appointed by the Secretary of State for War (Lord Panmure) his commissioner for regulating all matters connected with the breaking up of the Turkish Contingent—disposing of the horses, stores, &c. All his decisions were approved. In July, 1856, he was appointed Her Majesty's Commissioner for the Danube, under the Treaty of Paris. In 1861 he was nominated Vice-Consul in the Delta of the Danube, and in 1866 he signed the convention for regulating the navigation of the mouths of that river. In 1868, with full powers under the great seal, he signed the Danube Loan Convention with the plenipotentiaries of France, Austria, Hungary, Prussia, Italy, and Turkey. He did not quit the Danube until the great works for deepening the Sulina entrance had been completed, in December, 1871. He was in command of the Royal Engineers in South Wales from May, 1872, to Aug., 1873; British Commissioner on the International Tonnage Commission (Suez Canal Question) from Aug., to Dec., 1873; was employed on Suez Canal Affairs in London and in Egypt in 1874 and 1875; was in command of the Royal Engineers at Chatham from Jan., to Nov., 1875; was attached to Mr. Cave's special mission to Egypt in Dec., 1875, when he received the special thanks of H.M. Government for the convention concluded with M. de Lesseps, under which the many vexatious questions then pending were amicably settled; was Commandant of the School of Military Engineering at Chatham from Nov., 1875, to March, 1881. In 1876 he was appointed, and has since remained, Representative of Great Britain on the Board of the Suez Canal Company. In 1879-80 he was sent on a special international mission to Egypt to solve a difficulty about the harbour dues at Alexandria. From March, 1881, to July, 1886, he was Deputy Adjutant-General, Royal Engineers. He was promoted to a Lieut.-Colonelcy in 1867, and became a full Colonel in 1873, and Major-General in 1885. In 1871 he was nominated a Companion of the Bath, and in 1877 a Knight Companion of the same order (Civil Division). He retired with the rank of Lieut.-General in 1887. In that year he was appointed one of the Vice-Presidents of the Suez Canal.

STOKES, Whitley, C.S.I., C.I.E., Hon. D.C.L. Oxon., Hon. LL.D. Dublin, Hon.

LL.D. Edinburgh, Hon. Fellow Jesus College, Oxford, Hon. Member of the Deutsche Morgenlandische Gesellschaft, Correspondant de l'Institut de France (Académie des Inscriptions et Belles Lettres), of the Inner Temple, Barrister-at-Law, was born in Dublin in 1830, and is the eldest son of the late Wm. Stokes, M.D., Regius Professor of Medicine in the Dublin University. He was educated at Trinity College, Dublin, was reporter to the High Court and acting administrator-general, Madras, 1863-4; served subsequently as Secretary to the Government of India in the legislative department, and law-member of the Council of the Governor-General, May 1877 to May 1882, president of the Indian Law Commission, 1879, draughtsman of the present Codes of criminal and civil procedure, and of the acts dealing respectively with the transfer of property, trusts, easements, specific relief, and limitation. In 1868 he framed the scheme for collecting and cataloguing the Sanskrit MSS. preserved in India. Dr. Stokes is the author or editor of the following legal works: "A Treatise on the Rights of Legal Practitioners," London, 1860; "On Powers of Attorney" (Bythewood and Jarman's Conveyancing, 1st edit., vol. VII., part I.), London, 1861; "Hindu Law Books," Madras, 1865; "The Indian Succession Act with a Commentary," Calcutta, 1865; "The Indian Companies Act," 1866, with notes; "The Older Statutes in force in India," with notes, 1871; "The Unrepealed General Acts of the Governor-General of India," with Chronological Tables, &c., 3 vols., Calcutta, 1875 and 1876; "The Anglo-Indian Codes," vol. I., 1887, and vol. II., 1888, (Clarendon Press, Oxford). He is also the author of the following philological works: "Irish Glosses," Dublin, 1860; "Three Irish Glossaries," London, 1862; "The Play of the Sacrament," a Middle-English Drama, with a Glossary, Berlin, 1862; "The Passion," a Middle-Cornish Poem, with a translation and notes, Berlin, 1862; "The Creation of the World," a Cornish Mystery, with a translation and notes, Berlin, 1863; "Three Middle-Irish Homilies," Calcutta, 1871; "Goidelic, Irish Glosses, Prose and Verse," London, 1872; "The Life of S. Meriasek," a Cornish Drama, with a translation and notes, London, 1872; "Middle-Breton Hours," Calcutta, 1876; "The Calendar of Oengus," Transactions of the Royal Irish Academy, Dublin, 1880; "Togail Troi," Calcutta, 1881; "Saltair na Rann," Oxford, 1883; "The Tripastile Life of Patriok," with other documents relating to that Saint

(in the Rolls Series of Chronicles and Memorials of Great Britain and Ireland), London, 1887; "The Old Irish Glossee at Würzburg and Karlsruhe," London, 1887; and "Lives of Saints from the Book of Lismore," Oxford, 1889.

STONE, Edward James, F.R.S., is of Devonshire extraction, but was born in London, Feb. 28, 1831. He did not begin to study classics or mathematics until he was past the age of twenty, but nevertheless graduated as fifth Wrangler at Cambridge in 1859, and was immediately elected a Fellow of Queen's College. He was appointed chief assistant at Greenwich in 1860; Her Majesty's Astronomer at the Cape of Good Hope in 1870; and Radcliffe Observer at Oxford in 1879. He has contributed a large number of papers on all branches of astronomy to the Royal Astronomical Society, and to the Royal Society the results of experiments on the heating power of stars, magnetic observations made in Nauyasaland, and a determination of the velocity of sound. Whilst at the Cape, besides reducing and publishing the observations made by his predecessor (Cape Catalogues, 1810, 1860), he completed a systematic observation of the Southern heavens from the South Pole to 115. N.P.D. The results were formed into a Catalogue of 13,141 stars, which was completed after his return to England, and published in 1881. He received the Gold Medal of the Royal Astronomical Society in 1868, and the Lalande Prize of the French Academy of Sciences in 1881. Mr. Stone has been a member of the Council of the Royal Society, and President of the Royal Astronomical Society; and was intrusted by the committee appointed by the Government to organise plans for the observation of the transit of Venus in 1882, with the superintendence of the work and the discussion of the results.

STONE, Marcus, R.A., painter of historical and genre subjects, son of the late Frank Stone, A.R.A., a distinguished artist (who died in 1859), was born in London July 4, 1840. He received his education at home, and was never a student in any Art School. He was elected an Associate of the Royal Academy Jan. 21, 1877, and was made full R.A. on Jan. 7, 1887. Mr. Stone received one of the Medals awarded to the English School at the Vienna, Philadelphia, and Paris International Exhibitions. As a very young man he illustrated the works of Dickens, and later, those of Anthony Trollope, and various

numbers of the *Cornhill Magazine*. Mr. Stone has been much in Paris, and has visited Italy several times. He exhibited first in 1858, and achieved his earliest marked success in 1863 with "From Waterloo to Paris," a picture of Napoleon in a peasant's cottage. His principal pictures since then are: "Stealing the Keys," 1866; "Nell Gwynne," 1867; "The Princess Elizabeth forced to attend Mass," 1869; "Henry VIII. and Anne Boleyn," 1870; "The Royal Nursery," 1871; "Edward II. and Piers Gaveston," 1872; "Le Roi est Mort—Vive le Roi," 1873; "My Lady is a Widow and Childless," 1874; "Sain et Sauf," 1875; "An Appeal for Mercy," 1876; "A Sacrifice," 1877; "The Post Bag," "The Time of Roses," 1878; "In the Shade," 1879; "Amour ou Patrie," 1880; "Married for Love," 1881; "Bad News" and "Il y en a toujours un autre," 1882 (purchased under the terms of the Chantry bequest by the Royal Academy); "An Offer of Marriage," and "Asleep," 1883; "A Gambler's Wife," 1885; "A Peacemaker," 1886; "In Love," 1888; "The First Love-letter," 1889. Several of these have been engraved. Mr. Stone has painted some landscapes, and some water-colour pictures.

STOREY, George Adolphus, A.R.A., born in London, Jan. 7, 1834, was educated in Paris by M. Joseph Morand, Professor in the *Athénée Royale*, his painting master being M. J. L. Dulong. He returned to London in 1850, and attended Mr. J. M. Leigh's school in Newman Street. He first exhibited at the Royal Academy in 1852. In 1863 he was in Spain, painting portraits at Madrid. In the following year he first attracted the special notice of the public by his picture of "The Meeting of William Seymour with the Lady Arabella Stuart at the Court of James I., 1609." It was followed by a "Royal Challenge," 1865; "After You," 1867; "The Shy Pupil," 1868; "The Old Soldier," 1869; "The Duet," and "Only a Rabbit," 1870; "Rosy Cheeks," and "Lessons," 1871; "Little Buttercups," 1872; "Scandal" (considered his best picture), "Love in a Maze," and "Mistress Dorothy," 1873; "Grandma's Christmas Visitors," "The Blue Girls of Canterbury," and "Little Swansdown," 1874; "Caught," 1875; "A Dancing-Lesson," 1876; "The Old Pump-room, Bath," and "The Judgment of Paris," 1877; "Sweet Margery," 1878; "Lilies, Oleanders, and the Pink," 1879; "Follow My Leader," 1880; "The Ivory Door," 1881; "Coracles on the Dee," 1882; "The Connoisseur," 1883; "The

Shy Lover," 1884; "As Good as Gold," 1885; "The Violinist," and "On Guard," 1886; "A Young Prodigal," and "Salome," 1887; "No Wife" and "Pun and Syrinx," 1888; "Godiva," 1889; "The Hungry Messenger" and "Paris and Cénons," 1890; besides numerous portraits. Nearly all the above-named pictures were exhibited at the Royal Academy. Mr. Storey was elected an A.R.A. in April, 1876.

**STORRS, Richard Salter, D.D.**, was born at Braintree, Massachusetts, Aug. 21, 1821. He graduated at Amherst College in 1839. He studied law, and afterwards theology at the Andover Seminary, where he graduated in 1845. He was pastor of a church at Brookline, Massachusetts, for one year, and then took charge of the (Congregational) Church of the Pilgrims at Brooklyn, New York, where he has since remained. Dr. Storrs is noted as an eloquent preacher and as a student of history. For many years he has been President of the Long Island Historical Society. From 1848 to 1861 he was one of the editors of *The Independent*, a religious weekly. In addition to a number of orations and discourses he has published a "Report on the Revised edition of the English Version of the Bible undertaken by the American Bible Society," "The Graham Lectures on the Wisdom, Power, and Goodness of God, as Manifested in the Constitution of the Human Soul," 1856; "Conditions of Success in Preaching without Notes," 1875; "The Early American Spirit and the Genesis of It," 1875; "The Declaration of Independence and the Effects of It," 1876; "The Divine Origin of Christianity indicated by its Historical effects," 1881; and "The Puritan Spirit," 1890.

**STORY, The Rev. Robert Herbert, D.D.**, born at Rosneath Manse, Scotland, Jan. 28, 1835, being the son of the Rev. Robert Story, minister of that parish. He was educated in Edinburgh, Heidelberg, and St. Andrews; was appointed assistant-minister of St. Andrew's Church, Montreal, in Feb., 1859; ordained there Sept. 21, 1859; presented by the Duke of Argyll in the same year to the parish of Rosneath on the death of his father; and received the degree of D.D. *honoris causa*, from the University of Edinburgh, April 22, 1871. Besides contributions to current literature of a minor character, he has published "Life of the Rev. Robert Story, including passages of Scottish Ecclesiastical History during the Second Quarter of the Present Century," 1862; "Christ the Consoler, being a Manual of

Scriptures, Hymns, and Prayers," 1861; "Mémorial and Remains of Robert Lee, D.D.," 2 vols., 1870; "William Carstares: a Character and Career of the Revolutionary Epoch, 1669—1715," 1871; "Creed and Conduct: Sermons preached in Rosneath Church," 1878; "Health Haunts of the Riviera," 1890; "Nugie Ecclesiastice," 1881. As one of the founders of the Scottish "Church Service Society," and convener of its "editorial committee," he has had charge of its publication of "Euchologion: a Book of Common Order," now in the 6th edition; and has assisted in the promotion of the liturgical restoration in the Church of Scotland. He became editor of *The Scottish Church*, a monthly magazine, which was instituted in 1885 in the interest of the Church of Scotland; and which was merged in 1887 in the *Scotts Magazine*, also for some time edited by Dr. Story. He was appointed, in 1886, one of Her Majesty's chaplains; was elected by the General Assembly to the office of deputy clerk in succession to Dr. Milligan. In the autumn of the same year was appointed Professor of Ecclesiastical History in the University of Glasgow. Dr. Story is editor of a work in 5 volumes on the "Church of Scotland, past and present," now (1890) in course of issue. He is a member of the "Moderate" or Broad Church party.

**STORY, William Wetmore**, was born at Salem, Massachusetts, Feb. 12, 1819, A.B. (Harvard), 1838; A.M. and LL.B., Harvard 1841; D.C.L. (Oxon); A.A.S., Massachusetts Historical Society; Commendatore del ordine della Corona d'Italia (K.C.G.I.); Chevalier de l'Ordre de François 1st; Officier de La Légion d'Honneur; Prof. Acad. degli Arenti, di Santa Cecilia, dei Quirite, &c. He studied law in the Law School at Cambridge under his father, Mr. Justice Story, of the Supreme Court of the United States, and published several legal works, among which were a treatise on "Contracts not under seal," 2 vols., now in the 10th edit.; a "Treatise sales of Personal Property," 6th edit., and three vols. of "Reports of Decisions of the Circuit Court of the United States. He was for several years U.S. Commissioner for Massachusetts, Maine, Pennsylvania, and Rhode Island, and also U.S. Commissioner in Bankruptcy; and practised law in Boston until 1850; and also edited and annotated various of his father's works. Since then he has lived principally in Rome (Italy) and devoted himself chiefly to sculpture and literature. Among his works in sculpture are numerous monuments, ideal figures, and groups, colossal statues, portraits and

busts. Of the portraits, statues and monuments may be mentioned those of Hon. Mr. Justice Story at Cambridge, U.S.A., Hon. Chief Justice Marshall in Washington, Hon. Edward Everett in Boston, Mr. George Peabody in London, and in Baltimore, Professor Joseph Hewry in Washington, Colonel Prescott at Charlestown (Mass.), William Cullen, Bryant, and a large monument to Francis Scott Key, surmounted by a colossal figure of "America," at San Francisco; and, besides these, statuettes of Shakespeare, Byron, Beethoven; and a large number of portrait busts. Of large ideal statues, modelled and executed by him in marble may be mentioned two different statues of Cleopatra, The Lybian Sibyl, Medea, Electra, Helen, Alcestis, Judith, Sappho, Semiramis, Orpheus, Saul, Orestes, Sardanapalus, Miriam, Jerusalem in her desolation, Canidia, the old sorceress, Salome, Polyhymnia, Dullah, Phryne, Vista, Polyxena, and Christ ("Come unto me all ye who are heavy laden"). Among the groups in marble are Aphrodite and Eros, Thetis and Achilles, The Silent Land, Bacchus on a Panther, Love and the Sphinx, Little Red Riding Hood and the Wolf, &c. In general literature among his prose publications are "Life and Letters of Joseph Story," 1851; "Roba di Roma," 1862; "The American Question," 1862; "Neutral Relations in Peace and War," 1862; "Proportions of the Human Figure," 1866; "Castle St. Angelo," and "The Evil Eye," 1877; "He and She, or a Poet's Portfolio," 1883; "Fiammetta," and "Vallombrosa," 1885; "The Origin of the Italian Language and Pronunciation of Latin," "Conversations in a Studio," 2 vols., 1890; "Passion Plays," "Michel Angelo," "Conversation with Marcus Aurelius," "Distortions of the English Stage," "Macbeth," &c. In poetry he has published a volume of "Poems," 1847; "Grassite d'Italia," 1860; "The Roman Lawyer in Jerusalem," 1870; "Tragedy of Nero," 1875; "Poem delivered on the Centennial of the Settlement of Salem," "Stephania," a tragedy, 1870; 2 vols. of "Poems," 1886; and many poems printed but not collected. Mr. Story's two sons are artists of much distinction; Mr. Waldo Story being a sculptor, and Mr. Julian Story a painter; their works are well known in London, Paris, and Rome.

**STOUGHTON**, The Rev. John, D.D., born at Norwich, Nov. 18, 1807, was educated at Highbury College, Islington, now incorporated with New College, St. John's Wood, and University College, London. He was appointed pastor of the Congre-

gational Church, Windsor, in 1832, and thence removed to Kensington in 1813, where he remained in office until 1875, and on his retirement received a presentation from his congregation of £3,000. He became Professor of Historical Theology and Homiletics in New College, St. John's Wood, the same year; that office he has since relinquished, and is now living in retirement at Ealing. But he still is active in managing the business of New College; of which he was one of the founders, when three previously existing Academies for ministerial culture were incorporated in that one Institution. He was Congregational Lecturer in 1855, Chairman of the Congregational Union of England and Wales in 1856, and received the degree of D.D. at Edinburgh in 1860. He took an active part in the Conference at New York, 1873, and Basle, 1870, in connection with the Evangelical Alliance, of which he is an honorary secretary. Dr. Stoughton is the author of numerous works, of which the following are the principal: "Windsor in the olden Time," 1814; "Spiritual Heroes," 1818; "Ages of Christendom," 1850; "Church and State Two Hundred Years Ago," 1852; "Ecclesiastical History of England," 5 vols., 1867-74; "Haunts and Homes of Martin Luther," 1875; "Lights of the World," 1876; "Progress of Divine Revelation," 1878; "Our English Bible: its Translations and Translators," 1878; "Worthies of Science," "Introduction to Historical Theology," "Footprints of Italian Reformers," "William Wilberforce," "William Penn," 1882; and "Howard, the philanthropist," 1884. In addition to the works on "Luther" and the "Italian Reformers," he wrote one on "The Spanish Reformers," 1884. All three contain descriptions of localities, resulting from repeated visits to many of the spots. Since then he has published "Golden Legends of the Olden Time," dedicated to his children and grandchildren, 1885; also "Shades and Echoes of Old London," 1889. Dr. Stoughton visited Egypt and the Holy Land in 1865, and gave an account of his travels in different publications. The lays work on Ecclesiastical History, continued to the end of the last century, has been republished in 6 vols., 1881, under the title of "Religion in England from the Opening of the Long Parliament to the end of the Eighteenth Century." To these, two more volumes were added in 1884, under the title of "Religion in England from 1800 to 1850."

**STOUT**, Sir Robert, K.C.M.G., late Premier of New Zealand, is the eldest son

of Thomas Stout of Lerwick, in the Shetland Isles, merchant, was born at Lerwick in 1814, educated at Lerwick Parish School, and was trained for the profession of teacher, serving his pupil teachership in the same school. Towards the end of 1863 he went to Otago, New Zealand, and shortly after his arrival he obtained an appointment in the Grammar School. He was engaged in the exercise of his profession as teacher until 1867, either in the Government schools or in private grammar schools, when he commenced the study of law. He was admitted to the New Zealand Bar in 1871, and before long became one of its leading members, not only of Dunedin, but of the colony. In 1872 Mr. Stout obtained a seat in the Provincial Council of Otago. In 1875 he was elected to the House of Representatives, as member for Cavenham. In 1878 he was elected as one of the members for Dunedin, and retained his seat until his retirement in June, 1879. He was offered, and accepted, the office of Attorney-General and Minister of Lands in Sir George Grey's Ministry in 1878. From 1879 to 1884 Mr. Stout was not engaged in politics, but during that period, as before, he took part in the administration of various local bodies, e.g., the Otago Land Board and others. In 1884 Mr. Stout was elected Member of the House of Representatives for Dunedin East, and on the downfall of the Atkinson Ministry, took office as Premier, Attorney-General, and Minister of Education, with Sir Julius Vogel as Colonial Treasurer. In 1886 Mr. Stout received the Order of K.C.M.G. At the General Election in 1887 Sir R. Stout again stood for Dunedin East, but was defeated chiefly, it was said, as a protest against the unpopular financial policy of the Ministry. He was offered seats in several parts of the Colony, but preferred to retire into private life, and has not since taken any active part in politics. He has been an industrious contributor to numerous journals and magazines, and the writer of a number of pamphlets. He has also delivered, and still delivers, lectures and addresses on political, social and religious subjects. He is a Fellow of the New Zealand University, and has always taken an active interest in education. At the General Election of 1890 he was again requested to enter active political life by several constituencies, but declined.

**STOWE, Mrs. Harriet Elizabeth**, American writer, daughter of the late Lyman Beecher, and sister of the late Henry Ward Beecher, was born at Litchfield,

Connecticut, June 14, 1812. She was associated with her sister Catherine in the labours of a school at Hartford in 1827, afterwards removed (1832) to Walnut Hill, near Cincinnati, and was married in 1836 to the Rev. Calvin E. Stowe, D.D. Mrs. Stowe wrote several tales and sketches, which were afterwards collected under the title of "The May Flower," 1849. In 1851-52 she contributed to the *National Era* an anti-slavery paper published in Washington, "Uncle Tom's Cabin," as a serial. This was published in book-form in 1852, and met with great success; nearly 500,000 copies were sold in the United States within five years of its publication, and in Great Britain also its sale was enormous. It has been translated into more than twenty languages, including Welsh, Russian, Armenian, Arabic, Chinese, and Japanese; there were fourteen different German and four different French versions; and it was dramatised in various forms. Mrs. Stowe subsequently published, "A Peep into Uncle Tom's Cabin for Children," 1853; "A Key to Uncle Tom's Cabin," giving the original facts and statements on which that work was based, 1853; and "The Christian Slave," a drama, founded upon "Uncle Tom's Cabin," 1855. She visited Europe in 1853, and in the following year published, "Sunny Memories of Foreign Lands." A little work entitled "Geography for My Children" was published in 1855, and the next year appeared her second anti-slavery novel, "Dred; a Tale of the Dismal Swamp," republished in 1859 under the title of "Nina Gordon." In subsequent works Mrs. Stowe has delineated the domestic life of New England of fifty or a hundred years ago. These include: "Our Charley, and what to do with Him," 1858; "The Minister's Wooing," 1859; "The Pearl of Orr's Island," 1862; "Agnus of Sorrento," 1863; "Reply on Behalf of the Women of America to the Christian address of many thousand Women of Great Britain," 1863; "The Ravages of a Carpet," 1864; "House and Home Papers," 1864; "Religious Poems," 1865; "Stories about our Dogs," 1865; "Little Foxes," 1865; "Queer Little People," 1867; "Daisy's First Winter, and other Stories," 1867; "The Chimney Corner," 1868; "Men of Our Times; or, Leading Patriots of the Day," 1868; "Old-town Folks," 1869; "Little Pussy Willow," 1870; "Pink and White Tyranny," 1871; "Sam Lawson's Fireside Stories," 1871; "My Wife and I," 1872; "Palmetto Leaves," 1873; "Betty's Bright Idea, and other Tales," 1875; "We and Our Neighbours," 1876; "Footsteps of the

Master," 1876; "Bible Heroines," 1878; "Paganic People: their Loves and their Lives," 1878; "A Dog's Mission," 1881; and, with her sister Catherine, "The American Woman's Home," 1869. A Selection from her writings entitled "Golden Fruit in Silver Baskets," was issued in 1859. In Sept., 1860, Mrs. Stowe contributed to the *Atlantic Monthly* and to *Macmillan's Magazine* an article entitled "The True Story of Lady Byron's Life." This article evoked a storm of indignant literary criticism, which was by no means allayed by the publication in 1870 of her work entitled "Lady Byron Vindicated." Mrs. Stowe's health for some years has been very precarious. She resides at Hartford, Conn., with her son, the Rev. Charles E. Stowe, who, in 1889, published a "Life of Harriet Beecher Stowe, compiled from her Letters and Journals," by himself.

**STRACHEY, Lieut.-General Richard, R.E., C.S.I., F.R.S.**, son of Edward Strachey, B.C.S., was born July 21, 1817, at Sutton Court, Somersetshire. He was educated at a private school and at Addiscombe, and in 1836 entered the corps of Bombay Engineers, from which he was shortly transferred to the Bengal Engineers. He was employed on irrigation works in the N. W. P. from 1840, and appointed executive engineer on the Gauges Canal in 1843. He served in the Sutlej campaign with Sir Harry Smith's division; was in the battles of Aliwal and Sobraon, was mentioned in despatches and received a brevet majority. In 1857 he became Under Secretary to the Government in the Public Works Department; and, in the same year, was appointed Secretary to the Government in the Central Provinces, which, during the mutiny, were placed under Sir John Peter Grant as Lieut.-Governor. He became Consulting Engineer in the Railway Department in 1858; Secretary to the Government of India in the Public Works Department in 1862; and Inspector-General of Irrigation in 1866. He was appointed additional Member of the Governor-General's Council in 1869. He took an active part in the organisation and improvement of the Accounts of the Public Works Department, and originated the scheme for the decentralisation of the finances of India. He also originated the measures taken by the Government for carrying out railway and irrigation works on a large scale by means of borrowed capital. On leaving India, in 1871, he was appointed Inspector-General of railway materials and stores at the India Office. In 1875 he retired from the

army on full pay as a Major-General; and in the same year was appointed a Member of the Council of India; which post he vacated in 1877, in order to proceed to India on special duty, viz., to arrange for the purchase by the Government of the East Indian Railway. He became Officiating Financial Member of the Council of the Governor-General in 1878, and Officiating Military Member thereof in 1879; during those years he also presided over the Famine Commission. On his return to England, in 1879, he was reappointed to the Council of India, from which post he retired in 1889, and became Chairman of the East Indian Railway Company. He is in receipt of a good-service pension. Lieut.-General Strachey was employed on a scientific survey of the Himalayan province of Kumaon in 1818 and 1819, and made valuable geological and botanical researches and collections. He was elected a Fellow of the Royal Society in 1854. He is Chairman of the Meteorological Council. He was President of the Royal Geographical Society from 1887 to 1889, and is an Honorary Member of the Geographical Societies of Berlin and Italy. He was appointed one of the Delegates of Great Britain at the International Prime Meridian Conference which was held at Washington in 1884. He has contributed papers to various scientific societies, and is the author of "Lectures on Geography," and, jointly with Sir John Strachey, of "The Finances and Public Works of India."

**STRAFFORD (Earl of), The Right Hon. George Henry Charles Byng**, son of the second Earl, was born in London in 1830. He received his education at Eton and at Oxford. He represented Tavistock in the Liberal interest from 1852 till Sept., 1857, and sat for Middlesex from the latter date till Jan., 1871, when he was summoned to the House of Peers in his father's barony, with the title of Viscount Enfield, under which name he had long been known in political circles. In 1865 he was attached to Earl Russell's special mission to Vienna. He was Parliamentary Secretary to the Poor Law Board from 1865 till July, 1866. In Dec., 1870, he was appointed Under-Secretary for Foreign Affairs, and in Sept., 1880, Under-Secretary of State for India. The latter office he resigned in Dec., 1882. He was First Commissioner of the Civil Service, unpaid, from May, 1880, to March, 1888. The appointment of Lord Kimberley as Secretary of State rendered this step necessary in order that one of the political offices connected with the

home administration of India might be represented in the House of Commons. Viscount Enfield was succeeded by Mr. J. K. Cross in the office of Under-Secretary. He succeeded to the earldom on the death of his father in 1886. His wife, when Viscountess Enfield, edited the memoirs of Henry Greville.

**STROSSMAYER, The Right Rev. Joseph, D.D.**, a distinguished prelate of the Roman Church, born at Essak, in Slavonia, Feb. 4, 1815, received his education in the Universities of Vienna and Padua, and on May 20, 1850, was consecrated Bishop of Bosnia and Sirmio. During the sittings of the Ecumenical Council of the Vatican in 1869-70, he was constantly represented as an earnest opponent of the dogmatization of the infallibility of the Pope. Several journals went so far as to reproduce the text of a speech alleged to have been delivered at the Council by Mgr. Strossmayer; but in 1873 the Bishop addressed to the *Francis* a letter in which he says:—"Lately several liberal, or rather self-called liberal papers, have published a pretended speech, supposed to have been made by myself at the Vatican Council. I resolutely and absolutely deny ever having made any such discourse. I never said a word during the entire Council which could in any way diminish the authority of the Holy See, or tend to promote discord in the Church."

**STRUTHERS, John, M.D., LL.D.**, second son of Alexander Struthers, Esq., of Brucefield, near Dunfermline, was born there on Feb. 21, 1823. He was educated privately, and entered the Edinburgh University, in 1841, as a student of Medicine. He graduated as M.D. in 1845; and, at the same time, became a Licentiate of the Royal College of Surgeons. He was admitted a Fellow of the College by examination in the same year, with a view to teaching Anatomy in the Edinburgh School. He was Demonstrator of Anatomy for two years, and Lecturer on Anatomy from 1847 to 1863; during which time his classes were largely attended. He resigned the Medical School, erected at the College of Surgeons in 1849; was President of the Hunterian Medical and Royal Physical Societies; Examiner and Member of the Council of the College of Surgeons; and Surgeon to the Royal Infirmary. In 1863 he was appointed by the Crown to the Chair of Anatomy in Aberdeen University; an office which he held till 1880, when he retired from teaching. The increase of the school rendered new anatomical

buildings necessary, which were erected according to his plans; and he formed an extensive museum of Human and Comparative Anatomy for the University. In Aberdeen he was President of the Medico-Chirurgical Society; and one of the Vice-Presidents of the British Association at the meeting there in 1885. On the formation of the Anatomical Society of Great Britain and Ireland in 1887, he was elected the Vice-President for Scotland. In 1874-75 he was Visitor of Examinations for the General Medical Council. He has represented Aberdeen University in the General Medical Council since 1883, and is Chairman of the Education Committee of the Council. He has taken an active part in questions of medical and university reform, as settled by the Medical Act of 1886, and the Scottish Universities Act of 1889. He gave evidence before the Royal Commission on the Scottish Universities in 1876; before the Select Committee of the House of Commons in 1880 on the amendment of the Medical Act of 1858; before the Royal Commission on the Medical Acts in 1881; and before the Committee on General Education in Scotland, in 1887. In 1885 the University of Glasgow conferred on him the honorary degree of LL.D. When teaching in the Edinburgh School he published various researches in Human and Comparative Anatomy, mainly in the *Edinburgh Medical Journal*, from 1848 to 1863; among which may be mentioned:—"On the Supra-Condyloid Process," "On the Oblique Muscles of the Eye," "On Diverticula from the Small Intestine," "On the Abnormal Anatomy of the Arm," "Demonstration of Valves in the Veins of the Neck," "On the Round Ligament of the Hip-Joint," "On the Relative Weight of the Viscera on the two sides of the Body," "On Variation in the Number of the Fingers and Toes in Man," and "On the Solid-hoofed Pig." When Professor in Aberdeen he published in the *Journal of Anatomy and Physiology*, from 1869 to 1880, further researches, among which are, "On Variations of the Vertebra and Ribs in Man," "On the Mediastinum Thoracis," "On the Rudimentary Hind-limb of the Greenland Right-Whale," "On Rudimentary Finger-Muscles in a Toothed Whale, and in the Greenland Right-Whale," "On the Cervical Vertebra and their Articulations in Fin-Whales," "On a Method of Promoting Maceration for Anatomical Museums," and "On Methods of Preparing the Brain, Museum specimens and dissections." He published separately, in 1855, "Memoir on the Clavicle;" in

1859, "Lessons on the Human Body;" in 1867, "Historical Sketch of the Edinburgh Anatomical School;" in 1880, "Memoir on the Anatomy of the Humpback Whale," and "References to Papers in Anatomy, Human and Comparative." His system of teaching was always demonstrative, and embraced Comparative as well as Human Anatomy. He frequently gave evening lectures to general audiences on the "Human Body," and on the "Relation of Man to the Animal Kingdom," in which he accepted the hypothesis of descent from pre-existing forms as the most reasonable explanation of similarity of structure.

STUART, Professor James, M.A., LL.D., and M.P., born at Bulgonie works, Markinch, Fifeshire (of which works his father was owner), Jan. 2, 1843, was educated at home, afterwards at St. Andrews University, and then at Trinity College, Cambridge. He became Fellow of Trinity College in 1867, Assistant-Tutor of that College in 1868, first Professor of Mechanism and Applied Mechanics in the University of Cambridge, Nov. 17, 1875. He graduated as third Wrangler in 1866; M.A. of the University of Cambridge in 1869; LL.D. of the University of St. Andrews in 1876. Professor Stuart has taken a leading part in popular education. He inaugurated the system of courses of educational lectures of a University standard in connection with Cambridge and Oxford, in Nottingham, Sheffield, and many other towns, on the system indicated by his experiments, and recommended by him to the universities. He has been instrumental in the foundation and establishment of several local colleges; has taken special interest in women's education, having originated the Ladies' Lectures in 1867, and the Cambridge Higher Examination for Women in 1868. He has been a consistent friend of all movements for the amelioration of the condition of women, and honorary Secretary of "La Fédération Britannique Continentale et Générale pour le relèvement de la moralité publique." He has taken an active part in the organisation of university education, and especially in its adaptation to the wants of the engineering profession, having founded extensive workshops and drawing offices in the University of Cambridge. He is an Associate Member of the Institute of Civil Engineers; a Member of the Institute of Mechanical Engineers; and Representative of the University and the governing bodies of the colleges at Bristol, Nottingham, Liverpool, Shef-

field, and Aberystwith. He is the author of "Six Lectures to the Workmen of Crews," "A Chapter of Science," "Science and Religion, a Lecture," "The New Abolitionists," "A Letter on University Extension, addressed to the University of Cambridge," and a number of articles, speeches, and pamphlets on educational, scientific, and social questions. Professor Stuart contested Cambridge University in 1882 unsuccessfully. On the death of Professor Fawcett, in Nov., 1884, he was unanimously chosen by the Liberal Party of Hackney as his successor, and was returned to Parliament by a majority of 6,000. At the general election of 1885, Hackney being divided into seven districts, Professor Stuart stood for the Hoxton Division of Shoreditch, and was elected by a majority of 1,037. He was again returned (as a Gladstone Liberal) in 1886.

STUBBS, The Right Rev. William, D.D. of Oxford, and honorary LL.D. of Cambridge, Edinburgh, and Dublin; Bishop of Oxford, born at Knaresborough, June 21, 1825, was educated at the Grammar School, Ripon, and at Christ Church, Oxford, where he took a first-class in classics and a third in mathematics, in Easter Term, 1848, and was immediately elected to a Fellowship at Trinity College. He was ordained in 1848, became vicar of Navestock, Essex, in 1850, and Librarian to Archbishop Langley, at Lambeth, in 1862. He was Diocesan Inspector of Schools in the diocese of Rochester from 1860 till 1866, when he was appointed Regius Professor of Modern History at Oxford. In 1867 he was elected Fellow of Oriel College, Oxford, of which he became an Honorary Fellow in 1888; in 1876 an honorary Fellow of Balliol; and in 1878, an honorary student of Christ Church. On Nov. 20, 1868, he was elected Curator of the Bodleian Library; and in 1872 was chosen as a member of the Hebdomadal Council. In 1875 he was presented to the Rectory of Cholderton, Wilts. In 1879 he was appointed Canon Residentiary of S. Paul's; and in consequence resigned the rectory of Cholderton. In 1884 he was consecrated on S. Mark's day to the See of Chester, from which See he was translated to Oxford, being confirmed Jan. 15, 1889. He published, in 1850, "Hymnals secundum usum Sarum;" in 1858, "Registrum Sacrum Angliorum;" in 1860, "Tractatus de Sancta Cruce do Waltham;" edited, in 1868, "Mosheim's Institutes of Church History;" in 1864 and 1865, "Chronicles and Memorials of Richard I.,"

published by the Master of the Rolls; in 1807, the "Chronicle," ascribed to Benedict of Peterborough, in the same series; in 1869-71, the "Chronicle of Roger Hovedon;" in 1872-3, the "Memorial of Walter of Coventry;" in 1871, "Memorials of S. Dunstan;" and, in 1876, the "Works of Ralph de Diceto;" and several other books issued by the Master of the Rolls; in 1870, "Select Charters and other Illustrations of English Constitutional History, from the Earliest Period to the Reign of Edward I.;" and published, in 1874, 1875, and 1878, "The Constitutional History of England, in its Origin and Development," 3 vols. Dr. Stubbs is Honorary LL.D. of Cambridge, Edinburgh, and Dublin, and doctor *in utroque jure* of Heidelberg; he is the President of the Surtees Society, and a Vice-President of the Yorkshire Archaeological Society, an honorary member of the Royal Irish Academy and of the Historical Society of Massachusetts, a foreign member of the Bavarian Academy, a corresponding member of the Prussian Academy, of the Royal Danish Academy, of the American Academy of Arts, of the Academy of Moral and Political Sciences, of the Institute of France, of the Royal Society of Sciences at Göttingen, and of the Imperial University of Vladimir at Kiev.

**SUELUS, George James, F.R.S., F.C.S.,** Bessemer Metallist, Vice-President of the Iron and Steel Institute, etc., was born June 25, 1837, at Camden Town, London, is the son of James Suelus, a builder, who died when George James Suelus was seven-and-a-half years of age, and the family was left impoverished by a long and heavy law-suit. Thanks, however, to a loving, self-sacrificing, and far-sighted mother, George James Suelus was provided with a good education. He was originally trained as a teacher at St. John's College, Butlerssea; and for some years he noted in that capacity with great success, particularly in the conduct of Science Classes under the Science and Art Department. During that time he also attended Owens College, Manchester, as a student under Professor Roscoe, and the Physical Classes under Professor Clifton. In the May examinations of 1864 he obtained the first of the Royal Albert Scholarships in competition with the whole of the United Kingdom, securing the Gold Medal for Physical Geography, Bronze Medal for Chemistry, &c., and a free education for three years at the Royal School of Mines. His career there was eminently successful, as he obtained the first scholarship in

the first year, second scholarship in the second year, and the first place and the *De la Roche* medal for Mining in the third year, passing out as an Associate of the School in mining and metallurgy. He was then nominated by Dr. Percy for the appointment of chief chemist to the Dowlais Works, which appointment he filled for four-and-a-half years to the great satisfaction of the late William Monnais, who, in 1871, recommended him for the post of scientific adviser to the commission then being sent out by the Iron and Steel Institute to the United States to investigate and report on the Danks Rotary Puddling Process. Mr. Suelus had carefully studied the theory of all the processes of making steel and iron when at Dowlais, and he had at this time formed a very clear idea of the action of phosphorus, &c., upon iron, and the investigation of the Danks process enabled him to point out to Dr. Percy on his return to England in the spring of 1872, that contrary to the ideas entertained up to that date by all Metallurgists, and in opposition to the teachings of the Doctor himself (who held that the phosphorus was eliminated in the puddling process by liquation of a third phosphide of iron from the partly puddled ball), the phosphorus was most largely eliminated in the early stage of the process, and while the iron was perfectly fluid and contained a large quantity of carbon, and that therefore it should be possible to eliminate the phosphorus during the Bessemer process; and further, that he believed he had discovered the secret of overcoming the difficulty hitherto considered insurmountable. The Doctor at the time remarked that if this was so he had made a very great discovery. For his discovery the Iron and Steel Institute in 1883 awarded Mr. Suelus the Bessemer Gold Medal for being "The first to make pure steel from impure iron in a Bessemer converter lined with basic materials." Over ten million tons of steel have since been made from phosphoric iron previously useless for steel-making. This invention has to a large extent revolutionized steel-making, and no country has benefited by the invention so much as Germany, while owing to the stringency of the Patent Laws of that country in 1872, Mr. Suelus was unable to obtain a patent for his invention, and so has never reaped the slightest reward or recognition from Germany, although his work has brought large fortunes to those who have availed themselves of the process. At the "Inventions Exhibition" in London Mr. Suelus exhibited some illustrations of these im-

provements, together with the first piece of dephosphorus steel made by the basic process, and was awarded a Gold Medal for discoveries and inventions. At the Paris Exhibition of 1878 Mr. Snelus exhibited an elaborate set of analyzed samples illustrating the manufacture of iron and steel in various countries, for which he was awarded a Gold Medal. The collection was subsequently purchased as an educational collection for the Polytechnic School at Aix-la-Chapelle. Mr. Snelus is an original member of the Iron and Steel Institute, has been a member of the Council since 1881, and last year was elected one of the Vice-Presidents. The following is a list of the most important contributions to the Iron and Steel Proceedings:—"On the condition of Carbon and Silicon in Iron and Steel," 1870; "Composition of Gases evolved from the Bessemer Converters during the blow," 1871; "Sherman process," 1871; "Scientific features of the Danks Endling Furnace," 1872; "Manufacture and use of Spiegelisen," 1874; "Fire-clay and other refractory materials," 1875; "Use of Molten Iron direct from the Blast Furnace for Steel-making," 1876; "Removal of Phosphorus and Sulphur during the Bessemer and Siemens-Martin processes of Steel Manufacture," 1879; "Distribution of elements in Steel Ingots," 1881; "Chemical composition and testing Steel Rails," 1882. He has also contributed to the literature of Iron and Steel on many other occasions; his principal works in this direction are two able articles on "Iron and Steel in Chemistry, as applied to the Arts and Manufactures." For his work generally and his discovery of the Basic Process in particular, the Royal Society elected him a Fellow of that learned body in 1887. He was married in 1867 to Lavinia Woodward, daughter of a silk manufacturer of Macclesfield, and has now a family of three sons and three daughters.

**SULLIVAN, Sir Arthur Seymour, Mus. D.,** was born in London, May 13, 1812. His father was principal Professor at Kneller Hall, the training school for British military bands. He received his first systematic instruction in music at the Chapel Royal, St. James's, under the Rev. Thomas Helmore, and he was still a chorister when, at the age of fourteen, he gained, the first time it was competed for, the Mendelssohn Scholarship. After two years' study under Mr. (afterwards Sir Sterndale) Bennett, and Mr. (afterwards Sir John) Goss, he studied at

Leeds. Upon his return to England in 1861, he brought with him his music to Shakespeare's "Tempest," which was performed for the first time at the Crystal Palace. His next work was the cantata "Kenilworth," produced at the Birmingham Festival in 1864. This was followed by the Symphony in E (Crystal Palace), 1865; overture "In Memoriam" (Norwich), 1866; overture "Marmion" (Philharmonic), 1867; oratorio "The Prodigal Son" (Hereford), 1868; overture "Di Ballo" (Birmingham), 1869; "On Shore and Sea" (International Exhibition), 1871; Festival "Te Deum," to commemorate the recovery of the Prince of Wales (Crystal Palace), 1872; oratorio "The Light of the World" (Birmingham), 1873; and the sacred musical drama "The Martyr of Antioch" (Leeds), 1880; and "The Golden Legend," a dramatic cantata (Leeds), 1886. Sir Arthur Sullivan has produced also the following popular and successful operas and operettas: "Cox and Box," 1866; "Contrabandista," 1867; "Thespis," 1872; "Trial by Jury," 1875; "Sorcerer," 1877; "H.M.S. Pinafore," 1878; "The Pirates of Penzance," 1879; "Patience," 1881; "Iolanthe," 1882; "Princess Ida," 1884; "The Mikado," 1885; "Ruddigore," 1887; "The Yeoman of the Guard," 1888; and "The Gondoliers," 1889. He was also musical editor of "Church Hymns," for which he composed several of the best known tunes. He has written also the incidental music to the following Shakespeare's plays: "The Tempest," "The Merry Wives of Windsor," "The Merchant of Venice," "Olivia," and "Macbeth." The honorary degree of Doctor of Music was conferred upon him by the University of Cambridge in 1876; and a like honour by the University of Oxford in 1879. Sir Arthur Sullivan was Principal of the National Training School for Music from its foundation in 1876 to 1881. Sir Arthur conducted the Leeds Triennial Musical Festival of 1880, 1883, 1886, and 1889; and in 1885 and 1886 he conducted the Philharmonic Concerts in London. In 1898 he was President of the Birmingham and Midland Institution, and is a member of a large number of foreign learned and musical societies. He was British Commissioner for music at the Paris Exhibition in 1878, when he was made a Chevalier of the Legion of Honour. He is also a Knight of the Order of the House of Coburg, and received from H.M. the Sultan of Turkey the Order of the Medjidieh, 1888. He was knighted by the Queen at Windsor, May 24, 1893.

**SULLIVAN**, Barry, tragedian, born at Birmingham, in 1824, made his first appearance on the stage at Cork, in 1840, when his success was so great that he determined to adopt the stage as a profession. After studying for some time in Ireland, he proceeded to Scotland, and joined the company of the Theatre Royal, Edinburgh, under the management of the late W. H. Murray; there he remained for several seasons, studying hard and making rapid strides in his profession; he then visited Paisley, Dundee, Aberdeen, Glasgow, Liverpool, and Manchester. His reputation having reached the metropolis, he was engaged by Mr. H. Webster, and made his first appearance in London at the Haymarket Theatre in Nov., 1851, in the character of Hamlet. During his continuance at that theatre he repeatedly had the honour of appearing before the Queen and the late Prince Consort. He subsequently had engagements at the St. James's, Sadler's Wells, the Standard, and Drury Lane, and after making a farewell tour of the United Kingdom, sailed for America in Nov., 1857. He met with an enthusiastic reception throughout the United States and the new Dominion of Canada. Returning to London in May, 1860, he reappeared at the St. James's, &c.; he then made a second tour of the United Kingdom, and sailed for Australia in May, 1861, his success being so great that he played nearly one thousand nights in Melbourne alone. He also held several engagements at Sydney, and after paying a visit to Queensland, sailed from Brisbane for India, and reached England in June, 1866, thus completing a tour round the world. In the following September he reappeared at Drury Lane, in the characters of Richard III., Hamlet, Macbeth, &c. About 1869 and 1870 he was lessee of the Holborn Theatre. He made successful tours of the United Kingdom down to 1887, his last appearance being at the Royal Alexandra Theatre, Liverpool, as Richard III., Saturday, June 4, 1887. Failing health has since prevented him from resuming his professional duties.

**SULLY**, James, M.A., LL.D., born at Bridgwater, Somersetshire, in 1812, was educated in the Independent College, Taunton, the Regent's Park College (one of the affiliated colleges of the University of London), and the University of Göttingen. He is M.A. and Gold Medallist of the University of London, where he graduated in 1866 and 1868. He is also honorary LL.D. of the University of St. Andrews. He took to a literary career

in 1871, beginning as a contributor to the *Saturday*, *Fortnightly*, and *Westminster Reviews*. He is the author of "Sensation and Intuition: Studies in Psychology and Aesthetics," 1874; "Pessimism: a History and a Criticism," 1877; "Illusions" (International Scientific Series), 1883; "The Outlines of Psychology," 1884; and "The Teachers' Handbook of Psychology," 1886. The last three have run through several editions, both in England and in America. He is also the writer of articles on "Aesthetics," "Dreams," and "Evolution," in the ninth edition of the "Encyclopædia Britannica." These writings

mainly occupied with the modern science of Psychology, as developed, more especially in Germany, by help of the physiology of the brain and nervous system. At the same time they have a distinctly practical bearing, discussing such questions of the day as the Aims of Art, the Value of Human Life and of Social Progress, and the Principles of Education. Mr. Sully has served as Examiner in Philosophy (Mental and Moral Science) to his own University, and has held a similar office in the University of Cambridge, and the Victoria University. He is also lecturer on the Theory of Education at the College of Preceptors, Bloomsbury Square.

**SULLY-PRUDHOMME**, René François Armand, French poet, was born in Paris, March 16, 1839, and educated at the Lycée Bonaparte. He afterwards became a lawyer's assistant, and published his first volume of poems in 1865. It attracted considerable attention, and the poem "Le Vaso Fêlé" was pronounced a masterpiece of its kind. M. Sully-Prudhomme has since published several volumes of poems, mostly of a philosophical tendency: "Les Épreuves," 1866; "Les Solitudes," 1869; "Les Destinées," 1872; "Les Vaines Tendresses," 1875; "La Justice," 1878. He has also published (1869) a very remarkable translation of the "De Natura Rerum," of Lucretius. In 1881 he was elected a member of the Académie Française.

**SUMNER**, The Right Rev. George Henry, D.D., Bishop of Guildford, youngest son of the Rt. Rev. Charles Richard Sumner, Bishop of Winchester, 1827-1898, was born at Windsor, July 3, 1824, and was educated at Eton and Balliol College, Oxford, whence he graduated in 1845, taking his M.A. in 1848. In 1847 he was ordained Deacon, and in 1848 Priest. His title for orders was that of Crawley, near Winchester, and in 1850 he was pre-

ferred to the Rectory of Old Alresford, which he held until 1885, for the last twenty-seven years of the time acting as Rural Dean, and as Chaplain to the Archbishop of Canterbury and Bishop of Winchester during their lifetime. In the year 1866 he was elected Proctor in the Lower House of the Convocation of Canterbury for the Archdeaconry of Winchester, which office he held until his appointment as Archdeacon of Winchester, in 1881, gave him an official seat in Convocation. A year after, he was elected Prolocutor of the Lower House in succession to Lord Alwyne Compton, appointed to the Bishopric of Ely; on which occasion he had the degree of D.D. conferred upon him by decree of Convocation of the University of Oxford. The Bishop of Winchester also conferred upon him a Canonry of Winchester. He resigned the Rectory of Old Alresford and entered upon the canonical residence at Winchester. In the year 1888 he was appointed by the Crown Bishop Suffragan of Guildford, which office he now holds. In the year 1869 the Bishop edited a volume of essays, published under the title of "Principles at Stake," which passed through two editions; and, in 1881, he edited "Our Holiday in the East," by Mrs. George Sumner, which also passed through two editions. In 1876 the Bishop published a "Life of Charles Richard Sumner, D.D., Bishop of Winchester;" and, in 1890, a "Churchwardens' Manual," showing their rights, privileges, and duties. In 1848 he was married to Mary Elizabeth, younger daughter of Thomas Heywood, Esq., of Hopo End, Ledbury.

**SWANWICK, Anna**, is the youngest daughter of the late John Swanwick, Esq., of Liverpool, a descendant of Philip Henry, the celebrated nonconformist divine. She was born in 1813; left school at the age of thirteen, and after some years of private study, repaired to Berlin, where she studied, not only German, but Greek and Hebrew. On her return to England she joined her family which then resided in London; and in 1819 she published a volume of translations, entitled "Selections from the Dramas of Goethe and Schiller." Her translation of Schiller's "Maid of Orleans" was published in 1817; and in 1850 the volume containing her translation of the first part of Faust, with other masterworks of Goethe, Tasso, Iphigenia, and Egmont. In 1878 appeared her translation of the two parts of Faust, 4to, with Retzsch's illustrations, which was followed by a smaller edition

in 1879. She was strongly urged by the late Baron Bunsen to undertake the translation of the Great Dramas. Acting upon his suggestion she translated the *Æschylean Trilogy*, published in 1865, which was followed, in 1873, by her translation of the complete dramas of *Æschylus*, with Flaxman's illustrations. A fourth and revised edition has since been published. Impressed with the low standard of female education which prevailed in England during her younger days, Miss Anna Swanwick has taken an active part in the establishment of Ladies' Colleges and other educational centres. She sympathised also most deeply with those who were labouring to raise the people to a higher level, moral and intellectual, and for many years she superintended classes of young working men and women, whom she instructed in various departments of knowledge, and by whom she has reason to think her efforts were appreciated.

**SWEATMAN, Rt. Rev. Arthur, D.D., D.C.L.**, Bishop of Toronto, was born in London, Nov. 19, 1831. He was educated at London University College, and is an honour graduate of Christ's College, Cambridge. In 1862 he was appointed to the curacy of St. Stephen's, Canonbury, and to the Mastership of the Modern Department of the Islington Proprietary School. On the invitation of Bishop Hllmuth, he accepted, in 1865, the Head Mastership of Hellmuth Boys' College, London, Ontario, and at a later date became Clerical Secretary to the Synod of the Diocese of Huron and Secretary to the House of Bishops. Resigning his educational charge, he became assistant Rector of St. Paul's, Woodstock, and Archdeacon of Brant; and, during the Bishop of Huron's absence in England, acted as his commissary. In March, 1879, he succeeded Bishop Bethune in the See of Toronto, and in the same year received the degree of D.D. from Cambridge; and in 1882 that of D.C.L. from Trinity University, Toronto.

**SWEDEN and NORWAY, King of.** See OSCAR II.

**SWETE, The Rev. Henry Barclay, D.D., Hon. Fellow of Caius College**, received the Caius Greek Testament Prize in 1855, and the Members' Prize in 1857, and graduated B.A. in the Classical Tripos in 1858. He is Professor of Pastoral Theology at King's College, and was made Regius Professor of Divinity at Cambridge in June, 1890. He has

edited a translation of the Septuagint, and is the author of various theological works.

**SWINBURNE**, Algernon Charles, poet and essayist, son of the late Admiral Charles Henry Swinburne, by Lady Jane Henrietta, daughter of George, third Earl of Ashburnham, and grandson of Sir John Edward Swinburne, Bart., of Capheaton, Northumberland, was born in Chester Street, Grosvenor Place, London, April 5, 1837. He entered as a commoner at Balliol College, Oxford, in 1857, but left the university without taking a degree. He afterwards visited Florence, and spent some time with the late Walter Savage Landor. His first productions, "The Queen Mother," and "Rosamond," two plays, published in 1861, attracted but little attention. They were followed by "Atalanta in Calydon, a Tragedy," in 1861; "Chastelard, a Tragedy," in 1865; and "Poems and Ballads," in 1866. The latter work was very severely and justly censured, and was consequently withdrawn from circulation by Messrs. Moxon. Mr. W. M. Rossetti then published "Poems and Ballads: a Criticism," and Mr. Swinburne himself, "Notes on Poems and Reviews." His later works are, "A Song of Italy," and "William Blake: a Critical Essay," 1867; second edition, 1868; "Siena: a Poem," 1868; the second part of "Notes on the Royal Academy Exhibition," 1868, the first part of which was written by Mr. W. M. Rossetti; "Ode on the Proclamation of the French Republic, Sept. 4, 1870;" "Songs before Sunrise," 1871, in which he glorifies Pantheism and Republicanism; and "Bothwell, a Tragedy," 1874; "Essays and Studies," 1875; "Erechtheus," 1876; "A Note on Charlotte Brontë," 1877; "Poems and Ballads: second series," 1878; "A Study of Shakespeare," 1879; "Studies in Song," 1881; "Tristram of Lyonesse," 1882; "A Century of Roundels," 1883; and another volume of "Prose Miscellanies," and "The Life of Victor Hugo," 1886; "The Armada," 1898; and a poem (1890), in which he advocated the assassination of the Czar of Russia for the cruelties permitted under his government. This called for a remonstrance in the House of Commons.

**SYBEL**, Professor Heinrich von, one of the most eminent of living German historians, born at Düsseldorf, Dec. 2, 1817, studied history for four years in Berlin, under the famous Von Ranke, was Privatdozent at the University of Bonn, and became

Extraordinary Professor there in 1844. The following year he was appointed ordinary Professor at Marburg, and in 1847 elected a member of the States of Hesse, and deputy in the Diet of Erfurt. Summoned to Bavaria in 1856, by Maximilian II., he became a member of the Munich Academy of Sciences, and was sent on several scientific missions. In 1861, however, he returned to Bonn as Professor, and was elected by the electors of Erfurt a member of the Chamber of Deputies in Berlin, being more recently returned to the Constituent Diet of the North German Confederation. He was appointed Director of the Prussian State Archives in Berlin in 1875. His principal works are "History of the French Revolution," which has been translated into English by Mr. Walter C. Perry, from the third German edition, and a "History of the Establishment of the German Empire by William I." He is also the author of "History of the First Crusade," 1841; "Origin of Royalty in Germany," 1845; "The Rising of Europe against Napoleon I.," 1860; "Minor Historical Writings," 4 vols., 1863-69; "Prince Eugene of Savoy;" a preface to Labbe's "Gregory of Tours," and to "Memoirs of Uechtritz;" and various other historical works.

**SYLVA**, Carmen. See ELIZABETH, QUEEN OF ROMANIA.

**SYLVESTER**, Professor James Joseph, LL.D., D.C.L., F.R.S., was born Sept. 3, 1811, in London. He was educated at two private schools in London, at the Royal Institution, Liverpool, and at St. John's College, Cambridge, where he passed the Senate House examination as second Wrangler, but was precluded by religious disabilities from graduating. He became Professor of Natural Philosophy at University College, London, Professor of Mathematics in the University of Virginia, U.S.; Professor of Mathematics, after an interval of ten years, at the Royal Military Academy, Woolwich; Professor, after an interval of five years, at the John Hopkins University, Baltimore, Maryland, U.S. He was for ten years reduced to make a living as an Actuary of Assurance Companies. He founded the Law Reversionary Interest Society, and has been called to the Bar. In Dec., 1883, he was elected Savilian Professor of Geometry at Oxford. He has published some hundreds of Memoirs in the Royal Society's *Transactions*, in *Crelle's Journal*, in the *Acta Mathematica*, in the *London and Dublin*, and in the *Quarterly Journal of Mathe-*

*matics*, in the *London and Edinburgh Philosophical Magazine*, in the *Comptes Rendus* of the Institute of France, in other English, French, Belgian, and Italian Journals, and in the *American Journal of Mathematics*, of which he was the founder and first editor. He received the Royal Medal of the Royal Society in or about 1860, the Copley Medal in 1880, and in 1887 the De Morgan Medal of the London Mathematical Society. He is a Fellow of the Royal Society, Hon. Fellow of St. John's College, Cambridge (1880), Hon. D.C.L. Oxford, LL.D. of Dublin and Edinburgh, and D.Sc. of Cambridge, a Foreign Member of the Royal, or Royal and Imperial Academies of Sciences of Naples, Rome, and Göttingen, and Vienna; a Corresponding Member of the Institute of France, and of the Imperial and Royal Academies of Berlin and St. Petersburg, Member Ordinary or Correspondent of many other learned bodies in Europe and the United States, and Officer of the Legion of Honour. He has given a theory of Vestification in a volume published under the title of "Laws of Verse;" is the inventor of the Plagiograph, the Geometrical Fan, and other Kinematical Instruments. He introduced into England, and greatly generalised, Poncelet's method of Linkages, on which he gave a lecture at the Royal Institution. On Dec. 12, 1885, in an inaugural lecture delivered before the University of Oxford, he made known his newly-discovered Theory of Reciprocants, which has given rise to a large literature on the subject. His latest memoir is on a Universal funicular solution of Buffon's "Problem of the Needle," published in the *Acta Mathematica*, June, 1890.

**SYMONDS**, John Addington, born at Bristol, Oct. 5, 1810, was educated at Harrow School, and Balliol College, Oxford. He was elected, in 1862, to a Fellowship at Magdalen College, in that University, and vacated it by his marriage. He has written "Introduction to the Study of Dante;" "Studies of the Greek Poets," 2 vols.; "Sketches in Italy and Greece;" "Renaissance in Italy," 7 vols., completed in 1886; "Sketches and Studies in Italy;" "Shelley" and "Sir Philip Sidney" in the "English Men of Letters Series;" the article on "Italian History" in the "Encyclopædia Britannica;" a translation of the "Sonnets of Michael Angelo and Campanella;" "Many Moods," a volume of verse;" "New and Old," a volume of verse;" "Animi Figura," a volume of sonnets;" "Italian By-ways;" and, in

1889, "In Days and Nights." Mr. Symonds has for many years been compelled by reason of ill-health, to live at Davos-platz, in the Grisons.

**SYMONDS**, Sir Thomas Matthew Charles, G.C.B., Admiral of the Fleet, son of the late Rear-Admiral Sir William Symonds, C.B., F.R.S., was born in 1811; educated at the Royal Naval College, Portsmouth; entered the Royal Navy in 1825, became Commander 1837, Captain 1841, Rear-Admiral 1860, Vice-Admiral 1866, Admiral 1871, and Admiral of the Fleet 1879; was placed on the Retired List 1881; served in the Black Sea during the Crimean War; was Captain of H.M.S. *Arethusa* at the bombardment of Sebastopol 1854, Admiral Superintendent of Devonport Dockyard 1862-6, Commander-in-Chief of the Channel Squadron 1868-70, and of Naval District, Devonport, 1873; has the Crimean Medal, and 3rd class Medjidieh; was awarded pension for good and meritorious service 1858 and 1870. He was created C.B. 1855, K.C.B. 1867, G.C.B. 1890. Admiral Symonds married 1st, 1845, Anna Maria, —who died in 1817,— daughter of Captain Edmund Haywood, R.N., C.B.; 2ndly, in 1856, Prestwood Mary, daughter of Captain Thomas Wolrige, R.N.

**SYMONS**, George James, F.R.S., was born in London in 1838, and was educated privately. Before he was twenty-one he had been elected Member of the Meteorological Society, had given several lectures upon the subject, had commenced a series of observations with standard instruments, the records of which were supplied to Mr. Glaisher, F.R.S., for insertion in the "Quarterly Reports" of the Registrar-General, and had started, in 1857, an organization for the observation of thunderstorms and the record of injuries by lightning. In 1859 he was elected a Member of the General Committee of the British Association. In 1860 he became a Member of the Scottish Meteorological Society, issued his first separate publication "Notes on the Solar Eclipse of July 18, 1860," and accepted the invitation of Admiral FitzRoy, F.R.S., to become one of his assistants at the Meteorological Office, where he continued until nearly the time of his Chief's death, being occupied principally with preparing for publication the records of the Anemometers at Bermuda and Halifax. During these years he devoted all his non-official time to collecting details of the fall of rain, and commenced the organization known as the British Rainfall system, which now includes nearly 3,000 ob-

servers. The results have been published in 29 successive volumes of "British Rainfall," and in 25 volumes of the *Meteorological Magazine*, which have been compiled and edited under his direction. With the above exception, Mr. Symons has written few books, but his papers and reports communicated to scientific societies in this and other countries, and his letters to the *Times* on Meteorological subjects are to be numbered by hundreds. In 1872 he was elected Membre de la Soc. Mété. de France, and has served three times on the Council. In 1873 Mr. Symons was elected Hon. Secretary of the (now) Royal Meteorological Society, which office he has held ever since, excepting during 1880 and 1881, when he was President. In 1875 he was elected a Fellow of the Royal Colonial Institute; and during that and the subsequent year drew up a complete summary of the statistics and bibliography of the meteorology of our Colonial Empire. The results of that inquiry were embodied in a paper which he read before the Royal Colonial Institute in 1877. In the autumn of 1875 serious floods occurred, and he submitted to the Institution of Civil Engineers a paper "On the Floods in England and Wales, and on Water Economy," for which he was awarded a Telford Premium. In 1878 Mr. Symons was Président Étranger of the Congrès International de Météorologie held in Paris, and in 1880 Vice-Président of a similar meeting. In 1879 he was elected Fellow, and in 1880 became Registrar, of the Sanitary Institute, which office, with its greatly developed duties, he still holds. He was a Juror of the Health Exhibition (Section for Water Supply) 1884, in which year he was elected Membre Corresp. Étranger de la Soc. Roy. de Médecine Publique de Belgique, and in 1880 he was elected Korrespondirendus Mitglied der Deutschen Met. Gesellschaft. In the autumn of 1886 the first Session of the Congrès International d'Hydrologie was held at Biarritz; and Mr. Symons was appointed Vice-Président Étranger, and subsequently Juror of the Exhibition. He afterwards visited the thermal stations of the Pyrenees, and this drew his attention to the question of the constancy or otherwise of the temperature of those waters. After full inquiry, and with the co-operation of the Royal Society, he designed special thermometers, and revisited all the principal stations in the autumn of 1887, determining the temperatures with all possible precision. Mr. Symons was elected F.R.S. in 1878, and when, in 1884, a Committee was appointed to report upon the Eruption of

Krakaton he was chosen as its Chairman, and subsequently as Editor of the Report.

## T.

**TAAFFE, Count Edward Francis Joseph**, an Austrian statesman, was born at Prague, Feb. 21, 1833. He is Viscount Taffe of Carren, and Baron of Ballymore, Sligo, in the Irish peerage, and was brought up along with the present Emperor Francis Joseph. He entered the Imperial service in 1857 as Secretary of the Hungarian Government, and was appointed Governor of Salzburg in 1863. In 1867 he became Austrian Minister of the Interior, and Vice-President of the Cisleithan Ministry. At the end of 1869 he served as Minister President; and in 1871 accepted the office of Governor of the Tyrol and Vorarlberg. He has shown great ability in mediating between conflicting creeds and nationalities; and has publicly expressed his disapproval of the anti-Semitic agitation.

**TAINÉ, Hippolyte Adolphe**, a Member of the French Academy, born April 21, 1828, at Vouziers (Ardennes), pursued his studies with brilliant success in the Collège Bourbon, gaining the prize of honour for rhetoric at the general competition of 1847, and being in the following year first on the list of those admitted to the Normal School (Section of Literature). After having obtained, in 1853, the diploma of Doctor in Letters by two theses—"De Personis Platonis," and "Essai sur les Fables de La Fontaine"—he renounced the career of university teaching and brought out several works. Two of these, written in a very brilliant style, contained opinions diametrically opposed to the traditional doctrines of the University, and produced a great sensation. One was an "Essai sur 'Vie-Live,'" 1854, "crowned" by the French Academy, and designed by the author as an application and a demonstration of the system of Spinoza; the other, entitled "Philosophes Français du XIX<sup>e</sup> siècle," 1856, 2nd edit., 1860, sharply criticised the spiritualist philosophers and religious writers. These and many of his subsequent works were received with high favour by the materialist school. In March, 1863, M. Tainé was appointed Examiner in Literature at the Military School of Saint-Cyr, and, in Oct., 1864, Professor of the History of Art and Aesthetics at the École des Beaux Arts. M. Tainé was a candidate for the seat in the French Academy that had

been vacated by the death of M. Thiers, but he was unsuccessful, being defeated by M. Henri Martin the historian. Martin got eighteen votes and Taine fifteen (June 13, 1878). Very soon afterwards, however, M. Taine gained the coveted seat among the forty, being elected on Nov. 14, 1878, in the place of M. de Léman. His reception into the French Academy took place on Jan. 15, 1880. In addition to the works already mentioned M. Taine has written:—"Voyage aux Eaux des Pyrénées," 1835; "Essais de Critique et d'Histoire," 1857; "Le Fontaino et ses Fables," 1860; "Histoire de la Littérature Anglaise," 1 vols., 1864, translated into English by H. Van Laun, a work which being sent in to the competition of the French Academy was rejected by that learned body on account of the materialist and atheistical opinions it contained; "L'Idéalisme Anglais," a study on Carlyle, 1864; "Le Positivisme Anglais," a study on John Stuart Mill, 1864, translated into English by T. D. Hayo, 1870; "Nouveaux Essais de Critique et d'Histoire," 1865; "Philosophie de l'Art," 1865; "Philosophie de l'Art en Italie," 1866; "Voyage en Italie," 2 vols., 1866; Notes sur Paris: ou Vio et Opinions de M. Frédéric Thomas Graindorge," 1867; "L'Idéal dans l'Art," lectures delivered at the École des Beaux Arts, 1867; "Philosophie de l'Art dans les Pays-Bas," 1868; "Philosophie de l'Art en Grèce," 1870; "L'Intelligence," 1874; "Les Origines de la France Contemporaine," vol. i. "L'Ancien Régime," 1875, vol. ii. "La Révolution," 1878, vol. iii. "La Conquête Jacobine," 1881, vol. iv. "Le Gouvernement Révolutionnaire," 1885. The conservative tendency of this work more than rehabilitated M. Taine in the eyes of his academical colleagues. M. Taine has contributed to the *Journal des Débats*, the *Revue de l'Instruction Publique*, and the *Revue des Deux Mondes*, numerous and important articles, most of which have been reprinted in the volumes enumerated above. In 1873 M. Taine, by the invitation of the Curators of the Taylor Institution, gave a course of lectures in French at Oxford. His impressions of his stay in England, were recorded in his well-known "Notes sur l'Angleterre." In June, 1868, he married the daughter of M. Denuelle, a rich merchant.

TAIT, Patrick Macnaghten, F.S.S., F.R.G.S., son of the late William Tait, Esq., was born in Edinburgh, and educated in his native city, having for some time been under the late Principal Tulloch. He first entered the Scottish Union Insur-

ance Office, Edinburgh, of which Sir Walter Scott was a Director, and in 1851 proceeded to India; was in India during 1857, 1858, and 1859, the years of the Mutiny, when he raised the Rifle Company of the Calcutta Volunteer Guards, in which corps he held a command. Subsequently he travelled in India, Ceylon, China, Japan, Canada, and the United States of America. He has contributed largely to the *Edinburgh Review*, and *Calcutta Quarterly Review*, also to the *Examiner*, *Life*, and other London weekly papers. He is the author of numerous papers read before different societies, including the British Association, the Institute of Actuaries, and the Royal Statistical Society, amongst which may be mentioned, "Observations on Existing Tables of Mortality of Europeans in India," 1855; "Mortality of East Indians," published in the *Calcutta Review* for Dec., 1858; "Mortality of Christian Females in India," published in the *Calcutta Review* for March, 1859; "The Mortality of Europeans," 1864; "The Population and Mortality of Calcutta," 1867; "The Population and Mortality of Bombay," 1869; "Anglo-Indian Vital Statistics," 1874; "The Theory and Practice of Accident Insurance on Sea and Land," "Original D and N Tables for Joint Lives in India," "Vital and other Statistics Applicable to Musicians," 1880; "Vital and other Statistics of Eastbourne," 1885; "On the Value of European and Native Life in India," 1888.

TAIT, Professor Peter Guthrie, M.A., whose father was private secretary to the Duke of Buccleuch, was born at Dalkeith, April 28, 1831, and educated at the Academy and University of Edinburgh, and at Peterhouse, Cambridge, where he was Senior Wrangler and First Smith's Prize-man. In 1852 he was elected Fellow of Peterhouse, and in 1854 was appointed Professor of Mathematics at Queen's College, Belfast, where he remained until 1860, when he was elected Professor of Natural Philosophy in Edinburgh. Professor Tait has published a number of scientific and other works, amongst which are "Dynamics of a Particle," 1856; "Quaternions," 1867; "Thermodynamics," 1868; "Recent Advances in Physical Science," 1870; "Heat" and "Light," 1881; "Properties of Matter," 1885, besides a large number of papers contributed to different periodicals, among which may be mentioned those on "Knots," on the "Kinetic Theory of Gases," and on "Thermo-electricity." In conjunction with Sir William Thom-

son, he published in 1867 a "Treatise on Natural Philosophy." He was also, with the late Professor Balfour Stewart, the joint author of the quasi-scientific essay called "The Unseen Universe." To the "Challenger" Reports, Professor Tait has recently contributed an experimental discussion of the "Pressure Errors of the Challenger Thermometers," and of the "Physical Properties of Water." Another experimental work, which he carried out in conjunction with the late Dr. Andrews, deals with the "Volumetric Relations of Ozone."

**TALBOT, The Rev. Edward Stuart, M.A.**, born in London, 1814, is the son of the Hon. J. C. Talbot, Q.C., one of the leaders of the Parliamentary Bar, and of Caroline, daughter of the first Lord Wharncliffe. He was educated at Charterhouse, and Christ Church, Oxford, where he obtained a first-class Lit. Bacc., 1835; and first-class Law and Modern History, 1836. He was ordained in 1837 and 1870. He was elected senior student of Christ Church in 1836, and obtained the Elliottson Prize Essay in 1839, on the "Influence of Christianity on Slavery." In 1870 he was appointed first Warden of Keble College, Oxford, and was Select Preacher in 1873 and in 1883. He was Examiner in the Final Classical Honour Schools in 1871-76, and was appointed examining Chaplain to the Archbishop of Canterbury in 1883. Mr. Talbot married in 1870, Javinia, third daughter of the fourth Baron Lytton.

**TALMAGE, Thomas de Witt, D.D.**, was born at Bound Brook, New Jersey, Jan. 7, 1832. He studied at the University of the City of New York, and graduated at the New Brunswick (N.J.) Theological Seminary in 1856. On ordination he was chosen pastor of the Reformed Dutch Church at Belleville, N.J.; from 1859 to 1862 he had charge of a church in Syracuse, N.Y.; and from 1862 to 1869 of one in Philadelphia. During the Civil War he was chaplain of a Pennsylvania regiment, and he is now chaplain of the 13th New York Regiment. Since 1869 he has been pastor of the Central Presbyterian Church at Brooklyn, N.Y. Twice during this period his church edifice has been destroyed by fire, once in 1872 and again in 1890. A new church is to be built, at a cost of \$42,000. In 1884 he received the degree of D.D. from the University of Tennessee. Dr. Talmage is a popular lecturer and preacher, and his sermons are weekly reported in a large number of newspapers. He visited England in Nov. 1889, and afterwards made a Con-

tinental tour, and visited Palestine. From 1873 to 1876 he edited the (N.Y.) *Christian at Work*; in 1877-78 the (Chicago) *Advance*; and later *Frank Leslie's Sunday Magazine*. He is now the editor of the *Christian Herald*. He has published "The Almond-Tree in Blossom," and "Gravels Swept Up," 1870; "Abominations of Modern Society," 1872; "One Thousand Gems," 1873; "Old Wells Dug Out," and "Around the Tea-Table," 1871; "Sports that Kill," and "Every-Day Religion," 1875; "Night Sides of City Life," 1878; "Masque Torn Off," 1879; "The Brooklyn Tabernacle," 1884; "The Battle for Bread," and "The Marriage Ring," 1886, besides several volumes of collected sermons and a number of lectures, addresses, and magazine articles.

**TASCHEREAU, The Most Rev. Elzéar Alexandre, D.C.L.**, Cardinal and Archbishop of Quebec, was born at Sainte Marie de la Beauce, Quebec, Feb. 17, 1820. He was educated at the Seminary of Quebec and in Rome, receiving the tonsure at the age of eighteen. In 1842 he was ordained a priest at Quebec, and from that year until 1854 occupied the chair of Moral Philosophy at the Quebec Seminary. He resumed his studies in Rome in 1854, and in 1856 the degree of Doctor of Canon Law was conferred upon him by the Roman Seminary. Returning to Quebec he was Director of the Petit Séminaire until 1859, when he became Director of the Grande Séminaire and a Member of the Council of Public Instruction for Lower Canada. He was made Superior of the Grande Séminaire and Rector of Laval University in 1860, and Vicaire-General of the Diocese of Quebec in 1862. In 1863 he again became Director, and in 1869 was re-elected Superior of the Grande Séminaire. He was consecrated Archbishop of Quebec in 1871; and in 1886 was made a Cardinal, being the first Canadian to receive the laureate, and was congratulated alike by the Protestant and by the Catholic press; his advancement being regarded as the merited reward of a long life devoted to educational progress.

**TAUCHNITZ (Baron), Bernhard Christian**, publisher at Leipzig, celebrated for his editions of Greek and Latin Classics, Hebrew and Greek Bibles, but best known to English travellers and writers for his continental editions of British authors, is a member of an old family of booksellers and printers, Karl Tauchnitz, half a century ago, having made himself famous for his cheap editions of the Classics. He was born at Schleinitz, near Naumburg,

in 1816. He founded an independent establishment in 1837, and, in 1841, began his series of English authors. At that time there was no International copyright, yet he resolved to obtain the sanction of the authors to the republication of their works, and to pay them for permission to include them in his series. This collection consists of nearly 2,700 volumes, and is continually increasing. In order to mark his appreciation of the endeavours of Tauchnitz to familiarize in Germany the *chefs d'œuvre* of a literature of which he himself was so great an admirer, the Duke of Saxe-Coburg, the brother of the late Prince Consort, raised him to the rank of Baron. In 1872, on the retirement of Mr. Crowe, he was appointed British Consul-General for the Kingdom of Saxony, and in 1876 for the other Saxon Principalities. In 1877 he was called by the King to the House of Peers of Saxony. His eldest son, Baron C. C. Bernhard, a Doctor of Laws, and British Vice-Consul, has been a partner in the house since 1866.

**TAYLOR, The Rev. Charles, D.D., LL.D.,** Master of St. John's College, Cambridge, and Vice-Chancellor of the University, was born in Middlessex, May 27, 1840, and was educated at King's College School, London, and St. John's College, Cambridge. He proceeded to the degree of B.A. in 1862, and in the same year became an editor of the *Oxford, Cambridge, and Dublin Messenger of Mathematics*. In 1863 he published his first work on "Geometrical Conics." He was elected Fellow of St. John's College in 1861, and Master of the same, 1881, and shortly afterwards received the degree of D.D., *jure dignitatis*. He is the author of numerous articles on Hebrew, geometrical, and other subjects; of the *Kaye Essay* for 1867, on the citations from the Old Testament in the New, published under the name "The Gospel in the Law," 1869; and of the following works: "The Dirge of Coheleth," 1874, a monograph giving a new and literal interpretation of the 12th chapter of Ecclesiastes; "Sayings of the Jewish Fathers," in Hebrew and English, edited for the Syndics of the Cambridge University Press, 1877; an "Introduction to the Ancient and Modern Geometry of Conics, with Historical Notes and Prolegomena," 1881. In the Prolegomena he proves that the modern period properly begins with Kepler, who distinctly formulated the principles of infinity and continuity, which differentiate the modern from the ancient geometry. He has given a course of lectures at the Royal Institution on the "History of Geometry," 1886;

also on the lately discovered *Διδαχὴ τῶν δώδεκα ἀποστόλων*, 1885; these were published in April, 1886, under the title "The Teaching of the Twelve Apostles, with illustrations from the Talmud, two Lectures on an Ancient Church Manual discovered at Constantinople." Dr. Taylor received the honorary degree of LL.D. from Harvard (Cambridge, Mass.), 1880; and was made Vice-Chancellor of the University of Cambridge, 1887 and 1888.

**TAYLOR, The Rev. Isaac, M.A., Litt. D., LL.D.,** Canon of York, born May 2, 1820, at Stanford Rivers, is the oldest son of the late Isaac Taylor, author of the "Natural History of Enthusiasm." Educated at Trinity College, Cambridge, he obtained the Silver Oration Cup, and graduated as a Wrangler in 1853. In 1854 he edited a translation of Becker's "Charicles." He was ordained in 1857 to a country curacy, and published in 1860 "The Liturgy and the Dissenters." Removing to London, where he successively held two West-End curacies, he published in 1864 a work on the Etymology of Local Names, entitled "Words and Places, or Etymological Illustrations of History, Ethnology, and Geography." In 1865, he undertook the charge of one of the poorest parishes in Bethnal Green. His plans and labours for the benefit of his destitute parishioners were described in a little book entitled "The Burden of the Poor." In 1867 he published "The Family Pen; Memorials, Biographical and Literary, of the Taylor Family of Ongar." In 1869 he accepted the incumbency of a church at Twickenham. In 1873 he read a paper before the Philological Society on "The Etruscan Numerals," and in 1874 brought out a volume entitled "Etruscan Researches." Presented in 1875, by Earl Brownlow, to the Rectory of Settrington, in Yorkshire, he undertook systematic researches into the origin and history of the Alphabet. The first-fruit of these studies appeared in 1879, in a book called "Greeks and Goths, a Study on the Runes." Shortly afterwards he published, at Berlin, a paper "Ueber den Ursprung des glagolitischen Alphabets," in which he discussed the origin of the earliest Slavonic alphabet. In 1879 he received from the University of Edinburgh the degree of LL.D., *honoris causa*, in recognition of his discoveries and philological attainments. In 1883 Dr. Taylor published, in two large volumes, his most important work, entitled "The Alphabet, an Account of the Origin and Development of Letters." In consideration of its merits the Board

of Classical Studies at Cambridge unanimously recommended its author for the degree of Doctor in Letters. In the same year, 1885, he was collated to a Canonry and Prebendal Stall in York Minster, and two years later was appointed Rural Dean. In 1887 he read a paper at the Manchester meeting of the British Association on "The Origin and Primitive Sect of the Aryans," which was afterwards enlarged into a volume, published in the Contemporary Science Series in 1889. The winter of 1887-88 he spent in Egypt, whence he wrote to the *St. James's Gazette* a series of letters recording conversations with Egyptians on politics and religion. These letters, with additional chapters on the tenets of Islam, were republished in the autumn of 1888, in a volume entitled "Leaves from an Egyptian Note Book," with the object of dispelling prejudices as to the beliefs and practices of our Mahomedan fellow-subjects in India and elsewhere. Canon Taylor, who was one of the founders of the Alpine Club, is a frequent contributor to learned periodicals, especially on subjects connected with Aryan and Ural-Altaic Philology, Onomatology, Ethnology, Palaeography, Epigraphy, and Comparative Mythology. In 1865 he married a daughter of the Hon. H. Cockayne-Cast.

**TAYLOR, General Sir Richard Chambre Hayes, K.C.B.**, born in Dublin, March 19, 1819, second son of the Hon. and Rev. Edward Taylor, younger son of the First Earl of Bective, by Marianna, daughter of Colonel the Hon. Richard St. Leger, was educated at Hazelwood School and at the Royal Military College, Sandhurst, and entered the army as Ensign of the 79th Highlanders in 1835. He served in various colonies and in the Crimean War, including the battles of the Alma and Balaklava, siege and fall of Sebastopol (in command of his regiment), also in the Indian Mutiny, including the siege and capture of Lucknow, operations in Oude and Rohilcond, Trans-Gogra campaign, actions of Rooyah-Allygunge, Bareilly, Shahjehanpore, Funnar, Mahomed, Rampoor, Russia, passage of the Gogra (commanded column), and was frequently mentioned in despatches. He was Assistant-Adjutant-General, Shorncliffe and Dover Division, from July, 1860, to July, 1865; Inspecting Field Officer and Assistant-Adjutant-General, home district, from May, 1867, to April, 1871; Inspector-General of Recruiting from August, 1873, to Dec., 1876; Deputy-Adjutant-General of the Forces from Dec., 1876, to Oct., 1878; Adjutant-General of the Army from August, 1882, to Nov., 1882; Gover-

nor of the Royal Military College, Sandhurst, from Jan., 1883, to August, 1886. He was promoted Colonel, May, 1858; Major-General, March, 1868; Lieutenant-General, Oct., 1877; General, April, 1883; and nominated C.B. 1857, and K.C.B. 1882; Retired list, Aug., 1886.

**TAYLOR, William Mackergo, D.D., LL.D.**, was born at Kilmarlock, Scotland, Oct. 23, 1820. He graduated at the University of Glasgow in 1840, and at the Divinity School of the United Presbyterian Church at Edinburgh in 1852. For two years he was pastor of a small church at Kilmarlock, Ayrshire, and in 1855 went to Liverpool to take charge of a newly organized Presbyterian church, which under his care became a large and influential church society. Visiting the United States in 1871, his preaching while there was received with so much favour that he was called to succeed the late Dr. Joseph P. Thompson in the pulpit of the Broadway Tabernacle (New York City), one of the most prominent Congregational Churches in America, and of this church he has been, since 1872, the pastor. In 1876 and 1886 he was lecturer at the Yale Seminary, and in 1880 at Princeton Seminary. From 1876 to 1880 he was editor of *The Christian at Work*. He has published "Life Truths" (sermons), 1862; "The Miracles," 1865; "The Lost Found and the Wanderer Welcomed," 1870; "Memoirs of the Rev. Matthew Dickie," 1872; "Prayer and Business," 1873; "David, King of Israel," 1875; "Elijah the Prophet," and "The Ministry of the Word" (Yale lectures), 1876; "Songs in the Night," 1877; "Peter the Apostle," and "Daniel the Beloved," 1877; "Moses the Lawgiver," 1879; "The Gospel Miracles in Relation to Christ and Christianity" (Princeton lectures); and "The Limitations of Life" (sermons), 1880; "Paul the Missionary," 1882; "Contrary Winds" (sermons), 1883; "Jesus at the Well," 1884; "John Knox, a Biography," 1885; "Joseph the Prime Minister," and "The Parables of Our Saviour," 1886; and "The Scottish Pulpit," 1887. The degree of D.D. was conferred upon him by both Yale and Amherst Colleges in 1872, and that of LL.D. by Princeton College in 1883.

**TCHERNAIEFF, Michael Gregorovitch**, a Russian general, born Oct. 24, 1822, entered the Russian military service in 1847, distinguished himself greatly in the Crimean war, and attained the rank of a General of Infantry. On the conclusion of the Crimean war he was first ap-

pointed chief of the staff of a division in Poland, and in 1858 he was sent to Orenburg in the capacity of Aide du Chef de la ligne du Syr Daria. In 1859 he commanded an expedition on Lake Aral, to support the Khirgiss tribes, at war with the Khivans. After a period of service as Quarter-Master-General of the left flank of the line held by the army of the Caucasus, Tohernaieff for some time acted as chief of the staff of the corps at Orenburg. Next he was placed in command of an expeditionary force consisting of 1000 men, with instructions to march from Orenburg, through the passes of the mountains bounding Siberia on the south, and across the steppes of Turkestan, and to effect a junction with another detachment under Colonel Verevkin which had set out from Semipalatinsk, in Siberia. The junction occurred in the vicinity of the town of Tchumkend, then occupied by the Khokanians. This town Tohernaieff took by assault, and immediately afterwards unsuccessfully attacked (October, 1861) the important city of Tashkend, about 80 miles south of Tchumkend, and also in possession of the Khokanians. Having wintered at Tchumkend he renewed successfully the attempt on Tashkend (June 27, 1865). It is said that he had received specific instructions to content himself with the position of Tchumkend, and to refrain from any further efforts to extend the Russian domination further southward. Tohernaieff disobeyed his orders, took Tashkend, and was afterwards welcomed most enthusiastically at St. Petersburg, and received a sabre of honour from the Emperor in recognition of his military enterprise; but from that date he was not actively employed in the Russian service. After a time he retired from the army, and passed a legal examination qualifying him to adopt the profession of a notary, when the Emperor begged him to re-enter the army. He did so in compliance with the Imperial request, and was reinstated in his rank. After vainly waiting a whole year for active employment, he again retired from the army, and purchased the *Ruski Mir*, a journal which boldly advocated Slav interests, and of which, after he had quitted the military service altogether, in July, 1874, he became the recognised editor. When in 1875 the insurrection in Herzegovina broke out, he opened a subscription in its behalf, and afterwards, in the summer of 1876, he went to Belgrade and took the command-in-chief of the Serbian army. The campaign was most disastrous to the Serbians, although their army was largely reinforced by Russian volunteers. Tcher-

naieff's proclamation of Prince Milan as King of Servia was much censured at the time as a rash and foolish act. General Tohernaieff left St. Petersburg Sept. 1<sup>st</sup>, 1882, for Tashkend, to take up the reins of Government there.

**TEALE, Thomas Pridgin, M.A., M.B., Oxon., F.R.S., F.R.C.S.,** was born at Leeds, June 28, 1831, and is the son of Thomas Pridgin Teale, F.R.S., some time surgeon to the General Infirmary at Leeds, and one of the first members of the General Medical Council nominated by the Queen. He was educated at the Leeds Grammar School, Winchester, Brasenose College, Oxford, and King's College, London. He was lecturer on Anatomy and Surgery in the Leeds School of Medicine, 1856 to 1876; Surgeon to the General Infirmary at Leeds, 1864 to 1894; and subsequently Consulting Surgeon. He was President of the Health Section of the Social Science Congress at Huddersfield, 1883; President of the Public Health Section of the British Medical Association at Liverpool, 1883; President of the Association of Sanitary Inspectors of Yorkshire, 1888-89; and President of the Leeds Philosophical and Literary Society, 1889. He is the author of "Dangers to health, a pictorial guide to Domestic Sanitary Defects," first published in 1879, now in the 16th edition. This work has been translated into French and Spanish, and into German by H.R.H. the Princess Christian, and is now in its 2nd edition. "Hurry, Worry, and Money, the Law of Modern Education," being the Presidential address in the Health Section of the Social Science Congress at Huddersfield, 1883; "Economy of Coal in House Fires," 1886; "The Principles of Domestic Fireplace Construction," a lecture delivered at the Royal Institution, 1886; and many contributions to Medical Literature.

**TEOK (Prince and Duke of), His Serene Highness Francis Paul Charles Louis Alexander, G.C.B.,** only son of Duke Alexander of Wurtemberg and the Countess Claudine Rhédey and Countess of Hohenstein, was born on Aug. 27, 1837. His Highness served in the Austrian army, was Captain in the Austro-Italian Campaign, 1859, and was mentioned in despatches, but resigned after the campaign in 1866. He served on the staff of Lord Wolseley in Egypt in 1882, and received the Egyptian medal and the Khedive's star, was mentioned in the despatches, and was made colonel, unattached. His Highness is colonel *à la suite* of the Wurtemberg dragoon regiment, "Queen

Olga; " honorary colonel, 1867, of the First City of London Artillery Volunteers; honorary colonel, 1874, of the 24th Middlesex Rifle Volunteers, " Post Office;" and President of the Royal Botanic Society of London. His Highness married, on June 12, 1866, H.R.H. The Princess Mary Adelaide, daughter of H.R.H. Prince Adolphus Frederick, Duke of Cambridge, the seventh son of His Majesty King George III. He has issue, their Serene Highnesses, all born at Kensington Palace, the Princess Victoria Mary Augusta Louise Olga Pauline Claudine Agnes, born May 26, 1867; the Prince Adolphus Charles Alexander Albert Edward George Philip Louis Ludislaus, born Aug. 13, 1868 (lieutenant in the 17th Lancers), the Prince Francis Joseph Leopold Frederick, born Jan. 9, 1870 (lieutenant 1st Royal Dragoons), and the Prince Alexander Augustus Frederick William Alfred George, born April 14, 1871 (at Eton College).

**TEGETMEIER, William B., F.Z.S.,** of German extraction, born at Colnbrook, Bucks, in 1810, was educated for the medical profession at University College, London. Mr. Tegetmeier is well known as a writer on natural history. He is the author of "The Poultry Book," "Pigeons," "The Natural History of the Pheasants," "Monographs of the Cranes," "Pallas's Sand Grouse," &c., and as having republished many rare ornithological treatises, as "Boddaert's Planches Enluminées" and "Moore's Columbarium." He has devoted much attention to the variation of species, and assisted Mr. Charles Darwin in the preparation of his volumes on "The Variation of Animals and Plants under Domestication," and other works. Mr. Tegetmeier has contributed articles to the "Encyclopædia Britannica" and "The Ibis;" and is the author of two text books on "Domestic Economy," written at the request of the School Board of London and for the Government Training Colleges. He has been for many years on the staff of the *Field* newspaper.

**TEMPLE, The Right Rev. Frederick, D.D.,** Bishop of London, son of an officer in the army, born Nov. 30, 1821, was educated at the Grammar School at Tiverton, and proceeding to Oxford, became Scholar of Balliol College, and took his degree of B.A. in 1842 as a double first-class. He was elected Fellow and Mathematical Tutor of his college, and, having been ordained in 1846, was appointed Principal of the Training College at Kneller Hall, near Twickenham, in

1848. This post he resigned in 1855; and having held an Inspectorship of Schools during the interval, was appointed, on the resignation of Dr. Gouldburn, in 1858, Head Master of Rugby School. Dr. Temple, who was a Chaplain to the Queen, gained some notoriety in 1860 as the author of the first of the seven "Essays and Reviews," which caused so much controversy soon after their appearance. At the general election of 1868, Dr. Temple took an active part in Warwickshire in support of Mr. Gladstone's measure for the disestablishment of the Irish Church; and the Premier nominated him to the bishopric of Exeter, in succession to the late Dr. Philpotts—an appointment which caused considerable commotion in clerical circles. The confirmation of Dr. Temple's election took place Dec. 8, 1869, at the church of St. Mary-le-Bow, Cheap-side, when Bishop Crowe, as the representative of a portion of the clergy who were opposed to Dr. Temple, because he was the author of one of the "Essays and Reviews," instructed counsel to oppose the election. Counsel were accordingly heard on both sides, and Dr. Temple's election was confirmed by the Vicar-General. Dr. Temple received episcopal consecration at Westminster, Dec. 21, 1869, together with the bishops-elect of Bath and Wells, and of the Falkland Islands. Dr. Temple published "Sermons preached in Rugby Chapel, in 1858-60," in 1861. In April, 1883, he was elected Bampton Lecturer at Oxford for the ensuing year. On the death of Dr. Jackson in Jan., 1885, Dr. Temple was appointed Bishop of London, and was succeeded at Exeter by Dr. Bickersteth.

**TEMPLE, Sir Richard, Bart., (K.C.S.I., M.P., D.C.L. (Oxon.), LL.D. (Camb.)),** of the Nash, Kempsay, near Worcester, was born in 1826, and entered the third class of the Bengal civil service in 1846. Was Secretary to Sir John Lawrence in the Punjab, and First Assistant to the Financiers, James Wilson and Samuel Laing; and eventually was appointed Chief Commissioner of the Central Provinces, and the Political Resident at Hyderabad. He was Foreign Secretary to the Governor-General, and Finance Minister of India, from 1868 to 1874. In Jan., 1874, he was appointed to superintend the relief operations in the famine-stricken districts of Bengal. He became Lieutenant-Governor of Bengal in 1875; was created a Baronet in Aug., 1876; and was appointed Governor of the Presidency of Bombay, in Jan., 1877, which office he held till March, 1880. He was appointed K.C.S.I. in 1864. He returned home in

1880, in order to accept the candidature offered to him by the Conservative party for East Worcestershire, but was defeated. He has sat for the Southern or Evesham division of Worcestershire since 1885; has been Vice-Chairman of the London School Board; and has been President of the Social Science Congress. He is still the Financial Member of the London School Board. He was nominated an Extra Knight Grand Commander of the Order of the Star of India, Jan. 1, 1878. He is the author of "India in 1880;" "Men and Events of my Time in India," 1882; "Oriental Experience," 1883; "Cosmopolitan Essays," 1886; "Palestine Illustrated," 1888; and the memoir of "John Lawrence," in the series of "English Men of Action."

**TENNIEL, John**, artist, born in London, in 1820, was educated at Kensington. At a very early age he showed a taste for art, and whilst a boy his first picture was exhibited, and sold at the Gallery of British Artists in Suffolk Street. He studied art in his own way, and may be said to have been entirely self-taught. He was a successful candidate in one of the Cartoon competitions in Westminster Hall in 1845, painted a fresco in the Palace at Westminster, and has produced only a few pictures since, chiefly for private collections. In 1851 he became a member of *Punch's* "Staff," and from that time has contributed to the illustration of that periodical. For many years he has, without the break of a single week, produced the political cartoon, and may thus claim a place not only as an artist but as an historian of the time. He has illustrated, wholly or in part, many Christmas books and other works; amongst which may be mentioned "*Æsop's Fables*," "*Lulla Bockh*," "*The Ingoldsby Legends*," and "*Once a Week*." He is also the illustrator of "*Alice's Adventures in Wonderland*," and its sequel, "*Through the Looking Glass*;" but has long since entirely discontinued making drawings for "book illustration," and has been for many years a Member of the Royal Institute of Painters in Water Colours.

**TENNYSON, Alfred** (Lord Tennyson), D.C.L., F.R.S., Poet Laureate, third son of the late Rev. G. C. Tennyson, the elder brother of the late Right Hon. C. Tennyson D'Eyncourt, was born in 1809, at his father's parsonage, at Somerby, Lincolnshire; his mother, who died in 1865, being a daughter of the Rev. Stephen Fytche. He was educated by

to Trinity College, Cambridge. In 1829 he gained the Chancellor's Medal by a poem in blank verse, entitled "Tinnuctoo." With the exception of a volume of poems published in conjunction with his brother Charles, when they were boys, and a prize poem, composed whilst an undergraduate at Cambridge, Mr. Tennyson did not publish anything till 1830, when "*Poems chiefly Lyrical*," appeared, and from 1812 the steady and rapid growth of his fame may be traced. The two volumes then issued were in part merely a republication, but the most important poems were those added to his former productions. It was at once apparent that the author of the "*Morte d'Arthur*," "*Locksley Hall*," the "*May Queen*," and the "*Two Voices*," was entitled to take the first rank among English poets, a reputation which was more than sustained by the two great works which followed. So well known and popular, indeed, had Mr. Tennyson become after the publication of "*In Memoriam*," in 1850, that it seemed only a matter of course, upon the death of Wordsworth, in 1850, that the privilege of wearing "the laurel greener from the brows of him who uttered nothing base" should be offered to him. This was also the year of his marriage to Emily, daughter of Henry Sellwood, Esq., of Berkshire, and niece of Sir John Franklin, by whom he has had two sons, Hallam, and Lionel. The "*Ode on the Death of the Duke of Wellington*" was published in 1852, on the morning of the funeral; and since that occurrence few events of more than ordinary interest in the eyes of Englishmen have taken place without eliciting from the Laureate some poem worthy of the occasion. He has written "*Poems chiefly Lyrical*," published in 1830; "*Poems*," in 1832; "*Poems*," 2 vols., in 1842; "*The Princess, a Medley*," in 1847; "*In Memoriam*," issued anonymously, in 1850, being a series of elegies—a tribute of affection to the memory of Arthur Hallam, a son of the eminent historian, and the chosen friend of the poet in his earlier days at Cambridge; "*Maud, and other Poems*," in 1855; "*The Idylls of the King*," in 1858; "*Enoch Arden, and other Poems*," in 1861; "*The Holy Grail, and other Poems*," published Dec. 15, 1869; "*The Widow, or the Songs of the Wrens*," in 1870; and "*Garoth and Lynette*," in 1872. In 1870 Mr. Tennyson republished "*The Lover's Tale*," a poem which was originally printed in 1833, but soon withdrawn from circulation. In the re-issue it is accompanied by a reprint of the sequel, a work of the author's mature

life, "The Golden Supper." After this followed "Ballads, and other Poems." Among his dramatic compositions are, "Queen Mary," 1875; "Harold," 1876; "The Cup," a play which was represented at the Lyceum Theatre, Jan. 3, 1881, Mr. Irving taking the principal character (as also was "Queen Mary"); "The Falcon," produced by Mr. and Mrs. Kendal; and "The Promise of May," a drama in three acts, brought out at the Globe Theatre, Nov. 11, 1882. "A Concordance to the entire Works of Alfred Tennyson," published in 1860, is a remarkable proof of the Laureate's great popularity. At the Commemoration of 1855, the University of Oxford, giving expression to the universal feeling of England, conferred on the poet the honorary degree of D.C.L., and the Fellows of his own college, Trinity, Cambridge, endorsing the judgment of the sister university, subscribed to purchase his bust (by Woolner), which they have placed in their library, and in 1869 they unanimously elected him an honorary fellow of the college. In Dec., 1883, Mr. Tennyson accepted a peerage as Baron Tennyson of Aldworth, Sussex, and of Freshwater, Isle of Wight. Since then he has published "Becket," "Tiresias and other Poems," and, at the end of 1886, "Locksley Hall—Sixty Years After," and, in his 81st year, he has lately produced another volume, "Demeter, and other Poems," which has been very popular with both the English and the American public.

**TERBY, François Joseph Charles**, was born on Aug. 9, 1846, at Louvain, Belgium, in which city he was educated; and in 1869 he obtained the degree of Docteur en Sciences. As early as 1862 he had begun making astronomical, and occasional meteorological observations; and these he has never abandoned, though for some years he was lecturer on physics at the University of Louvain. He has now in his private observatory an eight-inch equatorial by Grubb, which he devotes chiefly to planetary and lunar work. His papers have mostly been inserted in the publications of the Royal Academy of Belgium. Dr. Terby is a member of the Commission d'Inspection de l'Observatoire Royal de Belgique; Correspondent of the Academy of Sciences of Belgium; and Foreign Member of the Royal Astronomical Society of London.

**TERRY, Edward O'Connor**, was born in London, March 10, 1844, and made his first histrionic attempt as an amateur with the "Thespian Dramatic Club," and showing promise as an actor, entered the

profession in 1863. He played at Woolwich, Rochester, Sheffield, and Belfast. On leaving Belfast he became a member of Mr. Charles Calvert's company at the Prince's Theatre, Manchester. In 1867 he made his *debut* in London, at the Surrey Theatre. In 1868 he appeared at the Lyceum Theatre, under the management of the late Mr. E. T. Smith. After remaining the season, he accepted an engagement from Mr. Swanborough for the Strand Theatre, where he played Paul Pry for ninety-five consecutive nights, the longest run of the play on record. He next became a member of the Gaiety company, in 1870, where he has played in "Little Don Caesar de Braganza," "Bohemian Gypsy," "Little Doctor Faust," "Robbing Roy," "Forty Thieves," and "Bluebeard." Latterly he has given up burlesque, appearing in comedy parts, as Walkinshaw in "The Racket," Montague Jolliffe in "In Chancery." In May, 1885, he fulfilled his last engagement at the Gaiety, and has since been in the provinces, where he has produced a new farcical comedy entitled "The Churchwarden," adapted from the German by himself, and presented for the first time (in London) at the Olympic Theatre, Thursday, Dec. 16, 1886. Mr. Terry is now proprietor of a new theatre called by his name, which was erected in the Strand during 1887; in which house he produced and played in "Sweet Lavender," which was performed 670 consecutive times. Mr. Terry was invited to speak at the Church Congress at Cardiff, and read to an audience of over 2,000, a paper on "Theatres as an Amusement for the People," and was compelled to repeat it (the same night) at an overflow meeting.

**TERRY, Miss Ellen Alice**, actress, was born at Coventry, Feb. 27, 1818, and made her first appearance on the stage at the Princess's Theatre under the management of Mrs. Charles Kean, and remained with the Keans until they gave up management in London. Miss Terry next appeared at the Royalty Theatre, and afterwards at the Haymarket, learning her first steps in legitimate comedy in this, the London Comedy Theatre. Then followed a short engagement at the Queen's Theatre, with Mr. and Mrs. Wigan at the head of affairs, playing in the "Taming of the Shrew," and acting for the first time with Mr. Henry Irving. Leaving the stage for seven years, she returned to the Queen's Theatre, making her re-appearance as Philippa Chester in Charles Reade's "Wandering Heir." In 1875, Miss Terry was engaged by Mr.

Bancroft to play at the Prince of Wales' Theatre. In 1876, Lord Lytton's play "The House of Darnley" was produced by Mr. John Hare, at the Court Theatre, and in this play Miss Terry took the principal character. She remained at the Court Theatre until Mr. Hare gave up its direction. On Mr. Irving taking the management of the Lyceum Theatre, he was enabled to secure the services of Miss Ellen Terry, who made her first appearance at that theatre on Dec. 30, 1878, playing Ophelia to the Hamlet of Mr. Irving. "Hamlet" was followed by "The Lady of Lyons," in which she played Pauline. She afterwards took in succession the parts of Portia, in the "Merchant of Venice," Desdemona to the Othello and Inge of Mr. Irving and Mr. Edwin Booth; and Juliet, to the Romeo of Mr. Irving. Miss Terry went with Mr. Irving and the other members of the Lyceum company on a tour to the United States in 1883, and again in 1884, playing Ophelia, Beatrice, Portia, and other leading rôles in her well-known repertoire. She was received in America and Canada with great enthusiasm. During 1889, Miss Terry visited Germany; and, after her return, had the honour of appearing before the Queen at Sandringham.

**TEWFIK PACHA** (Mohammed Tewfik), Khedive of Egypt, was born Nov. 10, 1852, being the eldest son of the late Khedive Ismail. He succeeded to the Vice-royalty of Egypt by a decree of the Ottoman Empire, June 25, 1879, upon the forced abdication of his father, and received the investiture on Aug. 14. He is the sixth ruler of Egypt in the dynasty of Mohammed Ali Pacha, who was appointed Vali or Governor in 1806, and who in 1841 got the Sultan, with the Five Great Powers of Europe, to settle the hereditary principality in his own family. Ali had rebelled against the Sultan, encouraged by the French Government of that day, and had made himself absolute master of the country. He was succeeded in 1848 by his son, Ibrahim Pacha, who had lived but two months after his elevation. The next ruler, Abbas Pacha, a son of Mohammed Ali's second son, reigned six years. In 1854 he was strangled by order of the Sultan, as a punishment for attempted treason. Said Pacha, a third son of Mohammed Ali Pacha, succeeded on the death of Abbas; but Said also died in 1863, whereupon his nephew, Ismail Pacha, second son of Ibrahim, born in Jan. 1829, became ruler in his turn. The title of Khedive was conferred upon him

instead of that of Vali by an Imperial firman in 1866. At the same time the law of succession was altered from that which had been established in 1841. Instead of succession devolving as heretofore, according to the usual principles of Mohammedan Law, upon the senior male descendant of the founder of the dynasty, it was to go to Ismail's eldest son, and thenceforth in the same order of primogeniture, excluding the other branches of Mohammed Ali's family. This favour was granted to the late Khedive in 1866 by Sultan Abdul Aziz, in consideration of a large money payment, but in violation of the ancient and sacred law, and of the convention with the foreign Powers. The consequence of that arrangement of 1866 was the accession of Tewfik in 1879, instead of Halim, the fourth son of Mohammed Ali. Prince Tewfik was President of the Council at the time of the *coup d'état* of his father, but resigned the post immediately afterwards. The principal events of his reign up to 1883 have been narrated in our notice of Arabi (q.v.). Since that time the Khedive has acted in close harmony with the British authorities. He is a loyal and an honest man; is neither cruel, vicious, extravagant, nor an intriguer; and is thus, as far as character goes, a very paragon among Khedives. Tewfik married, on Jan. 18, 1873, the Princess Eminah, daughter of the late El Hami Pacha, and has two sons and two daughters. He behaved with noble devotedness during the outbreak of cholera in 1883; in company with his wife he visited the sick and dying, in spite of the remonstrances of his ministers.

**THACKERAY**, Miss Anne Isabella. See RITCHIE, Mrs. RICHMOND.

**THEEBAW**, ex-King of Ava (Burmah), whose Burmese titles are Theebaw Min, His Most Glorious and Excellent Majesty, &c., is the eleventh king of the Aloupia Dynasty, founded in 1853 by the first Burmese King of that name. He was born in 1858, and succeeded his father, Mindong Min, in Oct. 1878. He was placed on the throne by the intrigues of the favourite Queen of the late King, who assumed the position of Dowager-Queen, and caused Theebaw to be proclaimed, at the same time forming an alliance between Theebaw and her second daughter, Soo Pyah Lat, whom he married shortly after his accession. His reign was unfortunately remarkable for palace orgies and for the murder of his relatives, followers, and servitors. Anarchy and

misrule reigned throughout his kingdom. Theebaw sought to injure British trade and influence by placing the control of the whole commerce of his country and the taxation of the frontier in the hands of French agents, and took away the teak forests from British concessionaires to give to French monopolists. For some time he endeavoured to establish relations with foreign agents, and to contract agreements or alliances with the object of creating a situation full of embarrassment for the English Government. In Nov. 1885, an ultimatum was despatched to King Theebaw, but the proposals for an amicable settlement were refused. General Prendergast then sailed up the Irrawaddy to his capital, and proclaimed his deposition and the annexation of Upper Burma to England. Theebaw surrendered on Nov. 20, and shortly afterwards was sent first to Rangoon, thence to British India, where he still remains.

"THEODORUS." See MULLINBEE, JAMES BASS.

**THIBAUDIN, Jean**, a French General, was born at Moulins-Engilbert (Nièvre), Nov. 13, 1822, and received his military education at Saint-Cyr. He first saw active service in Africa, and afterwards went through the Italian campaign. On the outbreak of the Franco-Prussian war he was sent as *lieut.-colonel* to serve under Gen. Frossard, took part in the battles of Forbach and Rezonville, and was taken prisoner after Bazaine's capitulation of Metz. He succeeded, however, in escaping, and made his way back to the French army, where, under an assumed name, he commanded a regiment. After the conclusion of peace he was promoted *colonel*, and in 1882 became general. In 1883 he succeeded Gen. Billot as Minister of War, and at once appeared as a prominent Radical, hostile to the Orleans Princes. By his order the Duc d'Anjou and the Duc de Chartres were placed on the retired list. On the visit of the late Alfonso XII., king of Spain, to Paris, in Sept. 1883, Gen. Thibaudin was thought to be compromised in the hostile demonstrations that took place, and he was dismissed from the Ministry (Oct. 5, 1883). In 1885 he resumed his duties as a member of the Committee of Infantry.

**THISELTON-DYER, William Turner**, C.M.G., M.A., F.R.S., son of the late W. G. Thiselton-Dyer, M.D., was born in the parish of St. James, Westminster, July 28, 1843, and educated at King's

College School, where he was First Class Mathematical Scholar, at King's College, and at Christ Church, Oxford, where he became Junior Student in 1863. He obtained a Second Class in Mathematics, a First Class in Natural Science in the Final Schools, 1867, the B.Sc., London, 1870, and the M.A., Oxford, in 1873. He has held successively the following appointments: Professor of Natural History at the Agricultural College, Cirencester, 1868; Professor of Botany at the Royal College of Science for Ireland, 1870; Professor of Botany, Royal Horticultural Society, 1872; Assistant-Director of the Royal Gardens, Kew, 1875; and Director, 1885. At the International Phylloxera Congress, Bordeaux, 1881, he was the representative of New South Wales, South Australia, and Victoria. He was a Royal Commissioner for the Melbourne Centennial International Exhibition of 1884. In 1873 and several succeeding years Mr. Thiselton-Dyer delivered in the Schools of the Science and Art Department, South Kensington, courses of instruction in Botany to teachers in training. In these a new treatment of the subject was developed; the leading types of vegetable organisms were described and practically demonstrated, and for the first time the same methods of class exposition were applied to the vegetable kingdom as were more or less in general use for the animal kingdom. Mr. Thiselton-Dyer was Examiner in Botany, in the University of London, 1878-83; and Member of the Senate, 1887-90. At Kew he has been specially occupied with the development of botanical work, and the organisation of botanical departments in the Colonies and India. He has published "Flora of Middlesex," 1869 (with Dr. Trimen); an English edition of "How Crops Grow," 1869 (with Professor Church); and an English edition of "Sachs's Text Book of Botany," 1875 (with Mr. A. W. Bennett). Mr. Thiselton-Dyer married, in 1877, a daughter of Sir J. D. Hooker, K.C.S.L., late Director of Kew Gardens.

**THOMAS, Annie**, See CUDLIP, Mrs. ANNIE HALL.

**THOMAS, Arthur Goring**, the youngest son of the late F. Thomas, Esq., of Ralton Park, near Eastbourne, Sussex, formerly in the 8th Hussars, latterly Master of the Southdown Foxhounds, was born Nov. 21, 1851, and was educated at Haileybury College. He was intended for the Civil Service, but his health failing, he had to go to Madeira in 1870, for three winters. On returning to England in 1873, he

determined to take up music seriously, an idea which had up to that time been discouraged. He went to Paris, and, by the advice of Ambrose Thomas, studied for two years with Emile Durand, of the Conservatoire. He returned to London in 1875, and studied three years with Sir Arthur Sullivan and Mr. Prout at the Royal Academy of Music, twice gaining the Annual Medal for composition. He wrote an opera on the subject of Mooré's "Light of the Haram," which was performed by students, and led to a commission being given by Mr. Carl Rosa to write for him "Esmeralda," which was produced at Drury Lane, March, 1883, with great success; and at Cologne, in Germany, the same year; and at Hamburg in 1885. Previous to this the most important works given in public were:—"The Sun Worshipers," a cantata written for the Norwich Festival, 1881; two ballet suites, and various concert scenes, &c. The second opera written for Carl Rosa in 1885 was a Minnetto, by Julian Sturgis, on a Russian subject entitled, "Nadeshda." This also was produced at Drury Lane, with Madame Valleria in title role. This opera was produced also in Breslau in 1890, and is accepted for performance at Cologne, Hamburg, and Berlin. A comic opera in three acts written for Carl Rosa Company is finished, but has not yet been produced. In the same year "Esmeralda" was played at Covent Garden in French, various important alterations having been made for that purpose. The French translation has been written by M. Paul Milliet, author of the libretto of "L'Herodinde." Besides the above publications Mr. Thomas has published three volumes of French and English songs and duets, as well as many detached pieces.

THOMAS, Charles Louis Ambrose, a French musical composer, born at Metz, Aug. 5, 1811, is the son of a distinguished professor of music. He entered the Conservatoire in 1828, and there gained many prizes, including the grand prize of Rome at the competition of 1832. After his return from Italy, he produced the following works amongst others:—"La Double Echelle," 1837; "Le Perruquier de la Régence," 1838; "Le Panier Fleuri," "La Gipsy," ballet, composed conjointly with Benoist, 1839; "Carlina," 1840; "Le Guerillero," 1842; "Le Cand," his first great success, 1848; "La Sonde d'une Nuit d'été," 1850; "Raymond," 1851; "La Cour de Célimène," 1853; "Psyché," 1856; "Le Carnaval de Venise," 1857; "Le Roman d'Elvire," 1860; "Mignon," 1863; "Hamlet," an opera represented for the first time on

the stage March 8, 1868, and the hundredth repetition of which was prevented by the burning of the old Opera House in the Rue Lepeletier, Oct. 23, 1873; "Mignon," altered into an opera for the Baden Theatre, 1869; "Gilles et Gillestin," and "Françoise de Rimini," another opera, 1877. M. Ambrose Thomas has also composed a Requiem Mass, fantasies, nocturnes, rondos, &c. He was elected a member of the Académie des Beaux Arts in succession to Spontini, in 1851; was appointed "Officier d'Instruction Publique" in Dec., 1869; and replaced Anber as Director of the Conservatoire de Musique in 1871. He has been a Commander of the Legion of Honour since 1868, and "Grand Officier" since Jan. 1, 1881.

THOMAS, Theodore, musician, was born at Esens, Hanover, Germany, Oct. 11, 1835. He first played in public at the age of six. In 1855 his family removed to the United States, and for two years he played violin solos at concerts in New York. He then travelled for a time in the South, and returning to New York in 1851, he played at concerts and at the opera; at first as one of the principal violinists, and afterwards as orchestral leader, until 1861. In connection with others he began a series of Chamber Concerts in 1855, which were continued until 1869. His first symphony concerts were given in 1861-65, and extended (excepting from 1869 to 1872) until he left New York, in 1878, to take the direction of the College of Music at Cincinnati. He remained in Cincinnati until 1880, when he resigned this position and returned to New York. With brief intervals he has been conductor of the Brooklyn Philharmonic Society since 1882, and of the New York Philharmonic Society since 1878. From 1866 to 1878 he gave a series of summer concerts nightly in various cities; and in 1869 he made his first concert tour in the Eastern and Western States, which he has repeated from time to time since. He has conducted eight music festivals in Cincinnati (1873, 1875, 1878, 1880, 1882, 1884, 1886, and 1889), two in Chicago (1882 and 1884), and one in New York (1882). In the winter of 1885-86 he organised a series of popular concerts in New York, and during the same season was conductor of the American Opera Co. Mr. Thomas has unquestionably done more than anyone else to raise the musical standard in America during the past thirty years.

THOMAS, William Luson, director of the *Graphic*, was born on Dec. 4, 1830, and

was educated privately. He is the younger brother of the late George H. Thomas, the well-known artist. At the age of sixteen he went to Paris; then to New York; afterwards to Rome, where he studied drawing with his brother. In 1818 he returned to London, and was articled pupil to James W. Linton, the wood engraver; and two years afterwards commenced business on his own account, with great success. He employed his spare time in painting, and was elected an Associate of the Institute of Painters in Water Colours, and a few years afterwards full member; since which time he has been a constant exhibitor. The Institute deciding to alter their laws and admit all artists' works at their exhibition, it was proposed to build a new gallery for the advancement of Water-Colour Art in Piccadilly, and invite the senior society and the Royal Water-Colour to amalgamate. Mr. W. L. Thomas was very active in this attempt, viz., to have only one large Water-Colour Exhibition, but, unfortunately for the advancement of Water-Colour art, was not successful; he, however, succeeded in obtaining the principal portion of the large capital required, and was elected Chairman of the Piccadilly Art Galleries Co. The building embraces the picture galleries of the Institute and Prince's Concert Hall. In 1869 he established the *Graphic*, and was decorated by the French Government "Officier de l'Instruction Publique." In 1890 he attempted the even more formidable task of establishing a daily illustrated paper—the *Daily Graphic*. The difficulties are enormous, but they are being steadily surmounted. The new journal at once became a favourite, and is improving daily in every department.

**THOMPSON, Edmund Symes, M.D.**, is the third son of the late Theophilus Thompson, M.D., F.R.S., Physician to the Hospital for Consumption, Brompton; author of "Annals of Influenza;" "Clinical Lectures on "Pulmonary Consumption," &c. Mr. E. S. Thompson was born in London on Nov. 10, 1837, and was educated (for nine years) at St. Paul's School and at King's College Hospital. At the M.B. examination of the University of London he obtained the Scholarship and Gold Medal in Medicine, and high honours (third) in the three allowed subjects. He took the M.D. Lond. in 1860, and was appointed, in the same year, Assistant-Physician to King's College Hospital. In 1864 he was elected Assistant-Physician to the Hospital for Consumption at

Brompton; Physician in 1871; and Consulting Physician in 1880. In 1867 he became Professor of Physic in Gresham College (founded A.D. 1574); Fellow and (for four years) Secretary of the Royal Medical and Chirurgical Society; Fellow and (for three years) Secretary, Vice-President, and President of the Medical Society of London; and F.R.C.P. in 1868. He is editor of the 2nd edition (with additional chapters) of "Lectures on Pulmonary Consumption," and author of "Essays on the Influence of Cod-liver Oil;" on "Sciatica;" on "Mediastinal Growths;" on "Indigestion in early Phthisis;" on "The Elevated Health Resorts of the Southern Hemisphere;" "Gresham Lectures;" on "Coughs and Colds;" on "South Africa as a Health Resort;" on "Winter Alpine Health Resorts;" on "Sea Voyages;" &c.

**THOMPSON, Edward Maunde, F.S.A.**, Hon. LL.D. of St. Andrews, Hon. D.C.L. of Oxford and of Durham, born May 4, 1840, in Jamaica, was educated at Rugby. He was appointed an Assistant in the British Museum in May, 1861, became Assistant-Keeper of the MSS. in 1871, and was appointed Keeper of the MSS. in succession to Mr. Bond, in 1878, and Principal Librarian and Secretary in 1888. Mr. Thompson, who is a barrister of the Middle Temple, has edited "Chronicon Anglium, 1328-1388" (in the Rolls Series), 1871; "Letters of Humphrey Prideaux" (for the Camden Society), 1875; "Chronicon Adm de Usk, 1377-1401" (for the Royal Society of Literature), 1876; "Correspondence of the Family of Hatton" (for the Camden Society), 1878; "Diary of Richard Coek, in Japan, 1615-1622" (for the Hakluyt Society), 1883; jointly with Professor Jebb, the facsimile of the "Laurentian Sophocles" (for the Hellenic Society), 1885; "Chronicon Galfridi de Baker de Swynbroke, 1303-1356," 1886; and "Adm Murimuth Continuation (Chronicon, 1303-1347," with "Robertus de Avesbury de gestis mirabilibus Regis Edwardi Tertii" (in the Rolls Series), 1880. He is joint editor of the publications of the Palaeographical Society.

**THOMPSON, Sir Henry, F.R.C.S.**, born at Framlingham, Suffolk, Aug. 6, 1820, and educated at University College, London, was appointed Assistant Surgeon of University College Hospital, London, in 1853, Surgeon in 1863, Professor of Clinical Surgery in 1866, and Consulting Surgeon in 1874. In 1884 he held the post of Professor of Surgery and Pathology to the Royal College of Surgeons,

London. He gained the Jacksonian Prize of the Royal College of Surgeons in 1852, with an essay on "The Pathology and Treatment of Stricture of the Urethra;" and the same prize in 1860, with an essay on "The Healthy and Morbid Anatomy of the Prostate Gland," both which, together with his "Clinical Lectures" and his work on "Practical Lithotomy and Lithotomy," have run through numerous editions here, and have been translated into all the chief European languages. After performing a difficult but successful operation upon the late King of the Belgians, in 1868 he was appointed Surgeon Extraordinary to His Majesty, and to the present King in 1866. He is an honorary member of the Society of Surgery in Paris, of the French Society of Hygiene, and of that of Italy; also an honorary member of l'Accademia de' Quiriti at Rome, and of the Royal Society of Fine Arts of Antwerp, besides numerous other foreign societies; he became an Officer of the Order of Leopold in 1861, and a Commander of the same Order in 1876. He was knighted in 1867. Two articles written by him in the *Contemporary Review*, in 1873, drew public attention to the subject of cremation. Sir Henry has since written other articles on the same subject; and, in the *Contemporary Review* in 1874, a paper on "The Prayer for the Sick: hint towards a serious attempt to estimate its value." At various times he has written on matters relating to Food and Diet, in the *Nineteenth Century*; also a work entitled "Food and Feeding," the fifth edit. of which has just been issued. Sir Henry Thompson studied painting under Mr. Elmore, and Mr. Alma Tadema, and he has frequently exhibited pictures at the Royal Academy, in the Salon of Paris, and elsewhere. He is also understood to be the author of two novels which appeared about four or five years ago under the pseudonym of "Pen Oliver." More recently he has written a small work entitled "Diet in relation to age and activity," and last year, "Modern Cremation, its History and Practice." He has been President of the "Cremation Society of England" since 1874, when it was founded, and has taken an active part in advocating the practice here and abroad.

**THOMPSON, The Rev. John, A.M.,** was born in the city of Carlisle more than sixty years ago. He is to a large extent a self-made man. Losing his father at the age of four, his early training was conducted by a kind and prudent mother; for a few years his own hands ministered to his necessities. During

leisure hours, he studied Latin and Greek under the freely given skilful tuition of a ministerial friend. He entered Glasgow College in 1813, and left it in 1848, after taking the degree of M.A. In Greek classics he obtained two prizes, and in Moral Philosophy one, awarded by the votes of his fellow-students. During his Theological Course at the United Presbyterian Divinity Hall, in Edinburgh, he obtained four scholarships, varying in value from £15 to £31 10s. He was ordained to the Holy Ministry in West Calder United Presbyterian Church in 1852. There he laboured more than six years; was then translated to St. Paul's, Birkenhead; and thence, after fourteen years, was removed in 1872 to Westmorland Road Presbyterian Church, Newcastle-on-Tyne. Mr. Thompson gave his chief strength to ministerial work, and was favoured with much success. At his ordination in West Calder the membership of his Church was 250; at his removal it was 375. At his induction in St. Paul's Church, Birkenhead, the members were 33; at his leaving they were 153. In 1872 the members of Westmorland Road Church were about 130; in the end of 1889 they were over 600. Occasionally Mr. Thompson has done a little literary work. Several articles from his pen have appeared from time to time in some of our religious periodicals. He published "Life-Work of Peter the Apostle," in 1870; and "Life and Writings of John the Apostle," in 1882. He was unanimously chosen moderator of the Presbyterian Church of England by the Synod of 1890. There he delivered an inaugural address on "The Spiritual Success of Christianity," a proof of its divine origin and a stimulus to ministerial activity. His presidency over the deliberations of the Synod gave general satisfaction. Mr. Thompson is a Liberal in politics; and is never reluctant to take his place on a Liberal platform. Thirteen years ago, he was elected as a Liberal candidate to a seat in the Newcastle-on-Tyne School Board. For six years he has been Chairman of the Works Committee; and throughout his career he has done everything in his power to secure for England the benefits of a liberal education.

**THOMPSON, Joseph, F.R.G.S.,** African explorer, was born at Penpont in 1858, and at the age of twenty, visited Central Africa in company with the late Keith Johnston, and assumed the command of the expedition on the death of his chief. In 1884 he began his famous journey to Masai Land, and was successful in

reaching the north-eastern corner of Lake Victoria Nyanza. He published a description of his journey under the title of "Through Masai Land." In 1888 he started on an expedition to Morocco, during which he crossed the Atlas chain of mountains in six different places. In 1889 he published "Travels in the Atlas and South Morocco." He has received the Gold Medal of the Royal Geographical Society, and is also Gold Medallist in geology and zoology at the University of Edinburgh.

**THOMPSON, Sir Ralph Wood, K.C.B.,** PERMANENT UNDER SECRETARY FOR WAR.

**THOMPSON, Professor Silvanus Phillips, F.R.A.S.,** was born in York, June 19, 1831, and educated chiefly at Bootham School, York, the Fomanders Institute, Pontefract, and the Royal School of Mines. He took the degree of B.A. (Lond.), 1860; B.Sc. (Lond.), first (bracketed in Honours), 1876; and D.Sc. (Lond.), 1878. He was appointed Science Master, Bootham School, York, 1871; Lecturer in Experimental Physics, University College, Bristol, 1876; Professor of Experimental Physics, in the same college, 1879; and Principal of, and Professor of Physics in, the City and Guilds' Technical College, Finsbury, 1885. He is the author of "Elementary Lessons in Electricity and Magnetism," 1881, 13rd thousand in 1889; "Dynamo-electric Machinery," 1885, 4th edition 1890; and other works on electricity. Professor Thompson has made numerous scientific researches in electricity, magnetism, acoustics and optics. He is Vice-President of the Physical Society of London, Membre du Conseil de la Société de Physique (Paris), Hon. Member of the Physical Society of Frankfurt-am-Main, Member of Council of the Institution of Electrical Engineers, Fellow of the Royal Astronomical Society, and Hon. Sec. of the Gilbert Club.

**THOMSON, Joseph John, M.A., F.R.S.,** was born on Dec. 18, 1856, at Manchester, and is the son of Mr. J. J. Thomson of Manchester. He was educated at the Owens College, Manchester, and Trinity College, Cambridge, where he was 2nd Wrangler in the Mathematical Tripos, 1880. He was elected Professor of Experimental Physics, in the University of Cambridge, in 1884. He is the author of a treatise "On the Motion of Vortex Rings," 1883; "The application of Dynamics to Physics and Chemistry," 1883; and of various papers in the Trans-

actions of Scientific Societies. He is Fellow of Trinity College, Cambridge, and Fellow of the Royal Society.

**THOMSON, Professor Sir William,** President of the Royal Society, F.R.S., S.L. & E., LL.D., D.C.L., was born in Belfast in June, 1824. His father, the late James Thomson, LL.D., was lecturer on mathematics at the Royal Academical Institute in Belfast, but on his appointment to the professorship of that science in the University of Glasgow, he removed thither with his family. At the early age of eleven William entered the College, and shortly after completing his course at Glasgow he removed to Peterhouse, Cambridge, where he graduated in 1845 as second Wrangler, being immediately afterwards elected to a Fellowship. In 1846 he was made Professor of Natural Philosophy in the University of Glasgow, and still occupies that post. In the same year he accepted the editorship of the *Cambridge and Dublin Mathematical Journal*. To this magazine, which he continued to edit for about seven years, he contributed valuable additions to the mathematical theory of electricity, and among the principal of these was his paper on the "Distribution of Electricity on Spherical Conductors," published in 1848. In 1853 Professor Thomson delivered the Bakerian Lecture. It was entitled, "Electrodynamical Properties of Metals," and contained a series of experimental investigations of the highest value. Among the most important of his contributions to the advancement of electrical science are the construction of several beautiful instruments, and their application to the study of atmospheric electricity. His quadrant and portable electrometers, owing to their diversities of application and extreme delicacy and accuracy, have been of the greatest service; a modification of the former has been very successfully used at the Kew Observatory, to indicate and self-register changes in the electric state of the atmosphere. But it is in connection with submarine telegraphy that Sir W. Thomson's labours in electrical science are best known, he being the inventor of the Mirror Galvanometer and the Siphon-Recorder, which, owing to their extreme delicacy, can be worked by very low battery power, a circumstance that tends greatly to the preservation of the cables. To the science of magnetism also Sir W. Thomson has made important additions. In the investigation of the nature of heat, his extraordinary power of mathematical insight is seen to great advantage; and many communications from

his pen on the subject of Vortex Motion have appeared in the Proceedings and Transactions of the Royal Society of Edinburgh. Amongst his many valuable scientific papers we may mention those on "Thermal Effects of Fluids in Motion;" the "Mathematical Theory of Elasticity;" the "Rigidity of the Earth;" the "Determination of a Ship's place at Sea from Observation of Altitudes;" and on "Approach caused by Vibration." On the successful completion of the Atlantic Cable in 1866 he received the honour of knighthood, and was presented with the freedom of the city of Glasgow. The degree of LL.D. was conferred on him successively by the Universities of Dublin, Cambridge, and Edinburgh, and that of D.C.L. by Oxford. He is a Fellow of both the London and Edinburgh Royal Societies, from the former of which he received the Royal Medal, and from the latter the Keith Prize. He delivered the Rede Lecture at Cambridge in 1866; was President of the British Association at its meeting in Edinburgh in 1871; and was elected President of the Geological Society of Glasgow for the year 1872. On Oct. 29, 1872, he was elected a Fellow of St. Peter's College, Cambridge, under the provisions of the College statutes, empowering the Master and Fellows to elect men eminent for science or learning. He has also received various decorations from abroad. He is Grand Officer of the Legion of Honour, Commander of the Order of Leopold, and has received the German Ordre pour le Mérite. In Dec., 1877, he was elected by the Paris Academy of Sciences to fill the place of the late Von Baer as Foreign Associate. He was President of the Section of Mathematical and Physical Science at the meeting of the British Association, held at York in Sept., 1881, when he delivered a remarkable address on the sources of energy in nature available to man for the production of mechanical effect. Sir W. Thomson was appointed one of the British Commissioners for the Electrical Exhibition held in Vienna in Aug., 1883. Three volumes of "Mathematical and Physical Papers" by him, "collected from different scientific periodicals," were published at Cambridge in 1882, 1884, and 1890. He has been President of the Mathematical and Physical Section of the British Association five times, viz., Belfast, 1862; Dundee, 1867; Glasgow, 1876; York, 1881; Montreal, 1884. He is the inventor of a very extensively used improved form of the Mariner's Compass, in which complete and perfect correction against disturbance by the

ship's magnetism, temporary and permanent, is provided; and of a Sounding Machine, by means of which soundings are taken in depths up to 100 fathoms, without even slackening the speed of the ship. Sir William Thomson has also of late years devoted much attention to the subject of Electric lighting, and is the inventor of a great variety of instruments designed for measuring the electric currents and potentials used in that industry. Sir William Thomson succeeded Sir George Gabriel Stokes, Bart., as President of the Royal Society, in 1890.

**THORBURN**, Sir Robert, K.C.M.G., was born March 28, 1836, at Juniper Bank, in the County of Peebles, Scotland, and is the son of the late Robert Thorburn, Esq., of Juniper Bank, and Alison, daughter of the late Robert Grieve, Esq., of Kailatar, Perthshire, Scotland. He was educated in Edinburgh; went to Newfoundland in 1852; settled at St. John's, the capital of the island, where he has followed mercantile pursuits, and is now engaged in business. He was appointed Member of the Legislative Council of Newfoundland, Feb. 11, 1870, but resigned his seat in that body in 1885, when he entered the House of Assembly, and became Premier, which office he held till the close of 1889. Sir Robert Thorburn represented the Colony of Newfoundland at the Colonial Conference in London in 1886, when he received the Honour of Knighthood, and, being senior member of the Conference, had the honour of reading and presenting the address of the Conference to Her Majesty the Queen.

**THORNE**, Richard Thorne, M.B., F.R.S., was born Oct. 13, 1812, at Leamington, Warwickshire, and is the eldest living son of the late Mr. T. H. Thorne, J.P., banker, Leamington. He is Bachelor of Medicine (double first-class), University of London; Fellow of the Royal Society; Fellow of the Royal College of Physicians, London; was appointed a Medical Inspector to H.M. Privy Council Office in 1871; and Senior Assistant Medical Officer to the Local Government Board in 1883. He is Lecturer on Public Health to St. Bartholomew's Hospital Medical School; Examiner in Public Health to the Universities of Oxford and London, and to the Conjoint Board of Physicians and Surgeons in London. He was appointed delegate to represent the British Government at the International Sanitary (Cholera) Conference in Rome, 1885; President of the Epidemiological Society of London, 1887-89; and Milroy Lecturer to the Royal College of Physicians of

London, 1891. He is the author of a paper "On the Origin of Infection," published in the Transactions of the Epidemiological Society, 1878; "The Progress of Preventive Medicine during the Victorian Era, 1837-87;" "Diphtheria; its Natural History, and Prevention," 1891; "Report on the Use and Influence of Hospitals for Infectious Diseases," published in the Tenth Annual Report of the Medical Officer of the Local Government Board; and of a large number of official reports on the causation of epidemic diseases, and on the health of towns, published in the Reports of the Privy Council Office and of the Local Government Board.

**THORNTON**, The Right Hon. Sir Edward, G.C.B., P.C., D.C.L., LL.D., is the son of the late Right Hon. Sir Edward Thornton, G.C.B., who was for some time Envoy Extraordinary and Minister Plenipotentiary in Portugal, and upon whom the title of Count de Cassilhas, in that kingdom, had been conferred by King John VI. of Portugal. Sir Edward Thornton, who succeeded to the title of Count de Cassilhas (in the kingdom of Portugal) on the death of his father about 1850, entered the diplomatic service in 1842, when he was attached to the mission at Turin. He was appointed paid attaché in Mexico in 1845, and Secretary of Legation to the Republic of Mexico in 1851. From April, 1852, till Oct., 1853, he acted as Secretary to the late Sir Charles Motham's special mission to the River Plate. He was appointed Chargé d'Affaires and Consul-General to the Republic of New Granada in May, 1851, but was transferred to the Republic of Uruguay in Sept. of the same year. He was appointed Minister Plenipotentiary to the Argentine Confederation of 1859; in July, 1865, he was sent on a special mission to the Emperor of Brazil, and in the following month he was appointed Envoy Extraordinary and Minister Plenipotentiary to the Emperor of Brazil. He retained this post until Sept., 1867, when he was transferred in the same capacity to the court of the King of Portugal. He, however, did not proceed thither, but was appointed in the following Dec. to the post of Envoy Extraordinary and Minister Plenipotentiary at Washington, in the place of the late Hon. Sir Frederick Bruce, G.C.B. In recognition of his diplomatic services he was made a Companion of the Bath (civil division) in Feb., 1868; and a Knight Commander of the same order, Aug. 9, 1870. He was sworn of the Privy Council, Aug. 19, 1871. Sir Edward Thornton was appointed Am-

bassador at St. Petersburg in May, 1881, and to the Sultan of Turkey, Dec. 1, 1884. This post he only actually held during some months in 1886; and in Oct. of that year left Constantinople "on leave of absence," to be succeeded by Sir William White. He was created a G.C.B. in Aug., 1883.

**THORNYCROFT**, W. Hamo, R.A., sculptor, son of Thomas and Mary Thornycroft (*q.v.*), was born in London, March 9, 1850. He was brought up in a remote part of Cheshire, and educated at Macclesfield Grammar School, and at University College School, London. At the age of seventeen he began to work in his father's studio, and in 1869 was admitted a student at the schools of the Royal Academy. In 1871 he first exhibited at the Royal Academy, and in the same year proceeded to Italy, where the nature of his art received considerable modification from study of the works of the Renaissance. In 1875 Mr. Thornycroft gained the Biennial Gold Medal of the Royal Academy for a group of "A Warrior bearing a Wounded Youth from the Field of Battle." In 1880 he made his first great success, with a statue of "Artemis," which he executed in marble for the Duke of Westminster, and which is now at Eaton Hall. In Jan. 1881, Mr. Thornycroft was elected A.R.A., and for the exhibition of the same year produced his statue of "Tenece," which was purchased from the Chantrey Fund, and is now, in bronze, in the South Kensington Museum. Since then his most important works have been, the statue of "The Mower," 1881; "The Memorial to the Poet Gray," at Pembroke College, Cambridge, 1885; and the statue of "The Sower," 1886. Also in 1885 he executed a bust of Samuel Taylor Coleridge for Westminster Abbey; also a memorial to Sir John Goss for the crypt of St. Paul's, and was commissioned by the Government to execute the National Memorial to General Gordon, which now adorns Trafalgar Square. A replica of this statue, but with different sculptural treatment of pedestal, he executed for Melbourne also. In 1888 he exhibited his statue of "Medea," and was elected a Royal Academician. He is now engaged upon a public statue of John Bright, for Rochdale. In 1890 Mr. Thornycroft exhibited at the Academy his diploma work, a marble relief, entitled "The Mirror," and some small bronzes. In 1884 Mr. Thornycroft was married to Agatha, daughter of Homersham Cox, Esq., of Tonbridge.

**THORNYCROFT**, John Isaac, builder of

torpedo boats, eldest son of Thomas and Mary Thornycroft, was born on Feb. 1, 1813, in the Via Felice, Rome, in which ancient city his parents were then studying classic art. His mechanical training was commenced at an early age by his father, who made a locomotive, on which his children rode round his studio. The cylinders of this locomotive were afterwards adapted by his eldest son to form the engines of a very successful model steamer, which contained several of the most important elements to which the success of the modern torpedo boat is due, —the closed stokehole and fan, by means of which air could be forced through the fire, and the relatively large size and low position of the propeller. Rather later, when eighteen years of age, he constructed a small steam launch, the *Nautilus*, which was the first steam launch on the Thames that attained sufficient speed to keep up with racing crews. In 1863 he designed the *Ariel*, which was built at Chiswick, where he started, almost as an amateur, boat-builder. The *Ariel* was an example of a very fast steamboat, which was surpassed in speed by only the *Mironia*. The exact performance of the *Ariel* was measured by Sir Frederick Bramwell in 1872, and made a considerable sensation when published at a meeting of the Naval Architects. This boat may be considered as the progenitor of the torpedo boats of the present day. The closed stokeholes, however, were perfected by Mr. Thornycroft only in 1876, in the *Gitan*, a yacht on the Lake of Geneva, which has never yet been beaten by a boat of similar size. After building the *Ariel* Mr. Thornycroft went for nine months as a draughtsman to Palmer's Shipbuilding Co., on the Tyne; he then went to Glasgow to go through the engineering course at that University, and obtained the certificate of proficiency in less than the usual time. On leaving the University he spent nine months at Mr. John Elder's, of Govan, in studying the method of shipbuilding on the Clyde. He then returned to Chiswick, and became a builder of torpedo boats. In this profession he rapidly took the first place; and he has constructed a very large number of such boats for the British and foreign governments. Among some of the more recent inventions of Mr. Thornycroft we may mention a speed-indicator which he has perfected during the last few years, and a water-tube boiler, which combines great economy of fuel with lightness of structure, and has been fitted in many torpedo boats with marked success. The turbine propeller, also designed by Mr. Thornycroft for shallow draught vessels, is gaining

ground and gives results which cannot be obtained by the use of the paddle-wheel.

**THORNYCROFT, Mrs. Mary**, daughter of the late Mr. John Francis, sculptor, was born in 1814, at Thornham, in Norfolk. From an early age she was admitted to her father's studio, and soon became an exhibitor of heads and busts at the Royal Academy. The work which first attracted the attention of the public was a life-size statue called the "Flower-Girl." Miss Francis became the wife of Mr. Thornycroft, who had been a pupil of her father; in 1840, accompanied him on a tour through Italy in 1812, and at Rome derived great advantage from the advice of Thorwaldsen and Gibson. The latter was struck with her models of "Sappho" and a "Sleeping Child," and recommended her to the Queen as the best artist to model the portraits of the royal children. On her return to England in 1843, Mrs. Thornycroft received Her Majesty's command to execute a statue of the Princess Alice, and performed her task so satisfactorily, that commissions were given to her for statues of the Princess Royal, the Prince of Wales, and Prince Alfred. The Queen continued to patronise her, and she executed other works for the royal family. Her admirable work, a "Girl Skipping," was greatly admired in the Paris Exhibition of 1855. Of Mrs. Thornycroft's sons, one is the proprietor of the great torpedo-boat building yard on the Thames, and one is the sculptor and A.R.A. Her daughter, Miss Helen Thornycroft, is an accomplished flower-painter.

**THOROLD, The Right Rev. Anthony Wilson**, D.D., Bishop of Winchester, younger son of the late Rev. Edward Thorold, rector of Hougham-cum-Mareton, Lincolnshire, by Mary, only daughter of Thomas Wilson, Esq., M.D., of Grantham, was born at Hougham, June 13, 1825, and educated at Queen's College, Oxford (B.A. 1847; M.A. 1850; D.D., by diploma, 1877). He was rector of St. Giles-in-the-Fields, London, from 1857 to 1868; a member of the Schools Inquiry Commission in 1864; minister of Curzon Chapel, Mayfair, in 1868; and was elected on the first School Board for London in 1870. He became vicar of St. Pancras, Middlesex, and rural dean, in 1869; canon residentiary of York in 1874; examining chaplain to the Archbishop of York the same year; also provincial chaplain to the Archbishop of Canterbury. On the recommendation of Lord Beaconsfield, he was nominated by

the Crown to the bishopric of Rochester, in succession to Dr. Cloughton, who had been translated to the newly-constituted See of St. Albans. He was consecrated in Westminster Abbey, July 25, 1877, and was made Bishop of Winchester in Jan., 1891, in succession to the Right Rev. E. Harold Browne who resigned. He is the author of several devotional works, of which one, "The Presence of Christ," has gone through twenty editions.

**THORPE, Professor Thomas Edward**, F.R.S., was born at Harpurhey, near Manchester, Dec. 8, 1845, being the son of a Manchester merchant. He was educated at private schools, at Owens College, Manchester, and at the Universities of Heidelberg and Bonn. He was appointed Demonstrator of Chemistry at Owens College in 1869; Professor of Chemistry in Anderson's College, Glasgow, in 1870; Professor of Chemistry in the Yorkshire College at Leeds in 1871; and Professor of Chemistry at the Normal School of Science, and Royal School of Mines, South Kensington, in 1885. He is an F.R.S., and a Member of Council, 1890, a Vice-President and Treasurer of the Chemical Society of London, a Member of the Council of the Society of Chemical Industry, and of the Institute of Chemistry, a Fellow of the German Chemical Society, and of the Physical Society of London, Ph.D. of Heidelberg, and U.Sc. of the Victoria University, Manchester, formerly Examiner in Chemistry at, and now Fellow of, the University of London, and Examiner to the Victoria University, and the Science and Art Department, South Kensington. He was the first Longstaff Medallist of the Chemical Society of London, a Royal Medallist of the Royal Society (1889), and is a corresponding member of the Philosophical Societies of Glasgow and Leeds. Professor Thorpe is the author of upwards of 70 memoirs on Chemistry and Physical Chemistry, published in the "Philosophical Transactions," the Proceedings of the Royal Society, and the Journal of the Chemical Society, and the British Association Reports. He is also the author of a "Dictionary of Applied Chemistry," 3 vols.; "Inorganic Chemistry," 2 vols.; "Qualitative Analysis;" "Quantitative Analysis;" "Chemical Problems;" and editor of "Coal: its History and Uses." He has likewise written various articles in Watts' "Dictionary of Chemistry," and is a frequent contributor to *Nature* and other scientific periodicals. Professor Thorpe was a member of the Solar

Eclipse Expeditions of 1870, 1878, and 1886. He has acted as one of the Secretaries of the Chemical Section of the British Association for the Advancement of Science, was a Vice-President of the Section at the Jubilee Meeting at York in 1880, a Member of the Council, and President of the Chemical Section at the Leech Meeting in 1890.

**THRING, Lord Henry**, K.C.B., born at Alford, Somerset, on Nov. 3, 1818, is the second son of the Rev. J. G. D. Thring, and Sarah, daughter of the Rev. J. Jenkyns, of Everced, Somerset. He was educated at Shrewsbury, and Magdalen College, Cambridge; was third in the First Class of Classical Tripos, and fourteenth Junior Optime, 1841; B.A., 1841; M.A., 1844; called to the Bar in 1845, Inner Temple; was appointed Counsel to the Home Office in 1860, and Parliamentary Counsel in 1868. He was made K.C.B. in 1873, and a Peer in 1886, on his retirement from office. He has published works on the Succession Duty Act; "The Law of Joint Stock Companies;" "Practical Legislation," and various articles in reviews. He married, in 1850, Elizabeth, daughter of the late John Cardwell, Esq., of Liverpool, and has one child, Katharine Annie.

**THURLOW (Lord), The Right Hon. Thomas John Nevill-Thurlow Gunning-Brace**, P.C., M.P.S., fifth Baron Thurlow, of Thurlow, County Suffolk, was born in London on Dec. 5, 1838. He is the son of the third Baron, by Sarah, only daughter of Peter Hodgson, Esq., and succeeded his elder brother as the fifth Baron on April 22, 1874. Lord Thurlow is a descendant of a Norfolk family, which dates back several centuries. Amongst his ancestors was William Thurlow, of Burnham-Ulp, in Norfolk, who died in the year 1590. The Barony of Thurlow was created in 1702, and the first Baron was Edward Thurlow, who was born in 1732, and died in 1806. It was in recognition of his high legal merits that the first Lord Thurlow was created a peer, and occupied the Woolsack, as Lord Chancellor, for close on 20 years. The present Lord Thurlow entered the diplomatic service in the year 1858, and in the year following became attached to the Embassy at Paris. During 1860-1 Lord Thurlow was attached to the Earl of Elgin's special mission to China. He was present at the capture of the Taku forts and of Peking, and was one of the recipients of the China Medal. In 1892 he was appointed private secretary to the Viceroy and Governor-General of India,

and in 1861 was attached to H.M. Embassy at Vienna. During the years 1865-6 he was private secretary to Sir Frederic Bruce, H.M. Minister at Washington. Subsequently he was appointed second secretary in the diplomatic service, proceeding to the Hague in December, 1866. He resigned that appointment in July, 1870, and retired from the diplomatic service. He is a Justice of Peace and Deputy-Lieutenant for the counties of Elgin, Nairn, Stirling and Suffolk, and was a Lord-in-waiting upon the Queen from Sept., 1880, to June, 1885, and from Feb. to May, 1886. From the April to the August of the last mentioned year he occupied the position of Paymaster-General; and was also, in that year, appointed to represent Her Majesty as Lord High Commissioner to the General Assembly of the Church of Scotland, which holds its annual meetings in Edinburgh. He was then also appointed a Privy Counsellor. In 1864 he married Lady Elma, the only surviving child of the eighth Earl of Elgin by his first wife, Elizabeth Mary, who was the only daughter of Charles Lennox Cumming-Bruce, Esq., M.P., of Roseisle, Dunphail and Kinnaird, N.B. Lord Thurlow assumed in the right of his wife, and by Royal license in July, 1874, the additional names of Cumming-Bruce. Lord Thurlow has six children, and his heir, the Honourable James Bruce, was born in 1897.

**THURSTON**, Sir John Bates, K.C.M.G., High Commissioner and Consul-General for the Western Pacific, was born in 1836, followed the nautical profession till 1866, when he became Consul at Fiji and Tonga, and was very popular there; and became the chosen and special adviser of the King and Chiefs of Fiji to confer with Her Majesty's Commissions as to the cession of Fiji. In 1871 he was Colonial Secretary and Auditor General of Fiji, and in 1879 was Secretary to the High Commissioner for the Western Pacific; and, in 1887, became Governor of Fiji and High Commissioner.

**THURSTON**, Professor Robert H., LL.D., formerly of the United States Naval Engineer Corps, later Professor of Engineering, was born in Providence, R.I., Oct. 25, 1839. He is the son of Robert L. Thurston, who built his first engine in 1821, and founded the Providence Steam Engine Company, in 1837. R. H. Thurston was educated at Brown University, and received, during youth, a useful practical education in his father's workshops. When he left college, in 1859, he was

familiar with the work of the draughtsman, designer, pattern maker, moulder, the forger, and machine shop. He also did a considerable amount of work in the design and construction of the Sickles and the Greene engines, which were built by the firm. Then the war broke out, calling the best men of the country into the army and navy. Mr. Thurston applied for appointment in the engineer corps of the navy, passed examination in the summer of 1861, and was ordered to duty on board the *Unadilla*, was senior assistant, and had charge of the engines during action. January, 1866, found Mr. Thurston at the office of the Commandant of the Naval Academy at Annapolis, reporting to Admiral Porter for duty in the Department of Natural and Experimental Philosophy, as an acting assistant Professor. He was six years continuously on duty at the Naval Academy. In July, 1871, Mr. Thurston accepted an appointment at the school of mechanical engineering at Hoboken, and for fourteen years filled the chair of engineering in the Stevens Institute of Technology, resigning his commission in the navy in 1872. He organized, about 1873, or earlier, what was probably the first mechanical laboratory for research in engineering that was ever founded; and, for the dozen years succeeding, kept it employed constantly in the investigation of problems of practical importance. He was, meantime (1875-8) a member of the U.S. Board appointed to test iron, steel, and other metals, directed the greater part of the work completed by that board, and, as its secretary, edited its reports. His investigation of the laws of friction and of properties of the alloys of copper, tin and zinc, which resulted in the determination, by a new and ingenious method, of the relative values of all combinations of those elements, were perhaps the most strikingly original, and famous of these researches. In July, 1885, Professor Thurston took charge of Sibley College, reorganized it, created a department of mechanical engineering, readjusted the older departments, and saw immediate results in the rapid growth of Sibley College. Dr. Thurston was the first President of the American Society of Mechanical Engineers, has been for many years a member of the American, French, Scotch, German and Austrian Societies of Civil Engineers, of the British Institution of Naval Architects, the American Institution of Mining Engineers, of which he is also Past Vice-President, the American and British Associations for Advancement of Science, three times Vice-President of the former, and once of

the latter (Montreal, 1894), and of other scientific and technical associations at home and abroad. He is a member of the "Loyal Legion," and is Officier de L'Instruction Publique de France, and was given the degree of LL.D. by his Alma Mater, Brown University, on the thirtieth anniversary of his graduation. He has been an extensive writer, on professional subjects mainly, his papers numbering something like 250, and he writes some articles of a speculative character. He is the author of many books, including a "History of the Steam Engine," a three-volume treatise on "The Materials of Engineering," a treatise of "Friction and Lost Work," etc.

**TICHBORNE**, Charles Robert, LL.D., Ph.D., Fellow of the Institutes of Chemistry and the Chemical Society, Member of the Council of the Royal Irish Academy, and Licentiate of the Royal College of Surgeons of Ireland, was educated at Birmingham, and is the son of William S. Tichborne, a descendant in the direct line from Sir Robert Tichborne, whose name appears on the death warrant of Charles the 1st. Charles Tichborne studied chemistry under Professor Hofmann, and shortly afterwards went to superintend the Laboratories of the Apothecaries' Hall of Ireland, with which body he has been associated for many years. He was appointed, in 1872, Lecturer on Chemistry to the Carmichael College of Medicine, and in 1871-75 he was External Examiner in Chemistry to the University of Dublin. He is at the present time an Examiner under the Conjoint Board of the College of Surgeons and Apothecaries' Hall. On the retirement of Sir Dominic Corrigan, Mr. Tichborne was elected President of the Pharmaceutical Society of Ireland, and is at present a gas examiner for the Board of Trade, and one of the County Analysts. Mr. Tichborne began very early in life to write scientific papers, some of the most important of which are the following:—"Official Reports upon the Chemical Section of the International Exhibition, Dublin, 1864;" "Detection of Cantharides in Medico-legal Investigations," described in Taylor's Principles of Medical Jurisprudence. He contributed to the columns of the *Cornhill Magazine* a description of the naturally formed mummies found in St. Michael's Church, Dublin. This was transferred to the pages of the *Pall Mall Gazette*, Sept. 6, 1866. In 1868 appeared an analysis of the well-known Schwalphain Waters, in which the author discovered lithium; these waters had previously been ex-

amined by Järlsig, and, in 1869, Tichborne described, in the Transactions of the Royal Irish Academy, a new body, which he called coluphonic hydrate. As far back as 1871 the Royal Irish Academy voted £50 to aid him in his researches upon Molecular Dissociation. In 1870-71 he published many papers on dust as a ferment, and particularly street dust. At that time this investigation was in its infancy. His papers on subjects connected with Pharmacy are too numerous to mention, but many of the processes in the British Pharmacopoeia are based upon his investigations. He also published, in connection with Dr. Prosser James, a work entitled "The Mineral Waters of Europe." Professor Tichborne invented an instrument for scientifically determining the relative hardness of stones, which was most favourably received by the Institute of Civil Engineers, and about 1888 he patented, in association with a syndicate, the collection, liquefaction, and utilization, of the carbonic acid gas given off during fermentation. This Tichborne process is being successfully carried into operation in the largest brewery in the world, Messrs. Guinness's, of Dublin. He married, in 1861, Sarah, the daughter of Surgeon Wilkinson, of Black Rock, co. Dublin, and has one son and three daughters.

**TIRARD**, M., twice Prime Minister of France, was born at Geneva, of French parents, in 1827. He is a working watchmaker by trade, and kept a small shop on the Boulevard Sebastopol, in Paris, till brought to the front by force of circumstances. He was elected a deputy in 1871; was one of the representatives of Paris from 1876 to 1881, when he passed to the Senate. In 1879 he was Minister of Agriculture and Commerce, and subsequently he was Minister of Finance.

**TISZA**, von Borosjenö Koloman, late Prime Minister of Hungary, was born at Gész, Dec. 16, 1830, and educated for the Civil Service, but his career was blocked at the outset by the Revolution of 1848. For some years he devoted himself to travel, and in 1859 first became known as an opponent of the Government policy of religious intolerance. In 1860 his party gained some independence; he then obtained a seat in the Hungarian Parliament, and succeeded Count Teleki as a leader of the Moderate Radicals. In 1875, carrying over this branch to the united Liberals under Deák, he became Minister of the Interior, and subsequently Prime Minister of the Hun-

garian Cabinet. In the critical period of 1876-8, he opposed Russia and Pan-slavism, being less vacillating than Count Andrassy, who kept hesitating between the views of Russia and Germany on the Eastern Question. He resigned with his co-ministers when Austrian finances were insufficient to meet the expenses of the Bosnian occupation, but eventually returned to his former position. In March, 1890, he resigned the Premiership, and was succeeded by Count Szapary.

**TODD, Charles, C.M.G., M.A. (Cantab.), F.R.S., F.L.S., &c.,** Postmaster-General, Superintendent of Telegraphs, and Government Astronomer, Adelaide, South Australia, was born at Islington, July 7, 1826, and entered the Government Service at the Royal Observatory, Greenwich, in 1841. In 1848 he was appointed Assistant Astronomer at Cambridge under the late Rev. Professor Challis. In 1854 he was appointed Assistant Astronomer at the Royal Observatory, Greenwich, and in the following year he was offered, by the Secretary of State for the Colonies, Lord John Russell, and accepted, the appointment of Government Astronomer and Superintendent of Telegraphs in South Australia, and left for that colony in July, 1855, where he introduced the Electric Telegraph System. In January, 1870, the Colonial Government, having decided upon amalgamating the Postal and Telegraph Services, appointed Mr. Todd Postmaster-General in addition to his duties as Superintendent of Telegraphs and Government Astronomer. Under his direction the telegraph was rapidly extended throughout the colony, his greatest work being the construction of a line from Adelaide through Central Australia, then a *terra incognita*, to Port Darwin, on the north coast, 2,000 miles long, to meet the cable of the Eastern Extension Telegraph Co. This work was carried out, in the face of great natural difficulties, in the space of about twenty months, being completed towards the end of 1872, in which year Mr. Todd rode across the Continent and thoroughly organised the service; and, on his return to Adelaide, received from Her Majesty the honour of the Companionship of the Order of St. Michael and St. George. Shortly after this, the South Australian section, 1,000 miles long, of the telegraph line from Adelaide to Perth was constructed under Mr. Todd's immediate direction. As Government Astronomer, Mr. Todd has carried out an extensive series of Astronomical and Meteorological Observations, the latter affording much

valuable information on the climate of Australia, including the dry interior, and the north coast. He determined the position of the eastern boundary line of the colony, or 141st meridian; and, in conjunction with Messrs. Ellery & Russell, the Government Astronomers of Victoria and of New South Wales, he made a careful telegraphic determination of the difference of longitude between Singapore, Adelaide, Melbourne, and Sydney. In 1886 the Cambridge University conferred upon him the degree of M.A., *honoris causa*; and in 1889 he was elected a Fellow of the Royal Society of London. He is a Member of the Council of the Adelaide University; one of the Governors of the South Australian Public Library; has been President of the Royal Society of South Australia; and is a Member of the Council of the Adelaide School of Mines, &c.

**TOLSTOI, Count Lyof Nikolaivitch,** usually called Count Leo Tolstoy, the most eminent living Russian novelist and social reformer, is a descendant of Count Peter Tolstoy, the friend and comrade of Peter the Great, and was born on Aug. 28, 1828, at Yasnaya Polyana, in the Government of Tula, but was left an orphan at an early age. He received the usual education of a Russian noble, first privately and afterwards at the University of Kazan. He spent the subsequent years in study till 1851; when, at the age of 23, he entered the army and accompanied his brother to the Caucasus. On the outbreak of the Crimean war (1853) he was called to Sebastopol and saw active service there, taking the command of a mountain battery and assisting in the defence of the citadel. Resigning his commission at the close of the war (1856), he devoted himself to literature. His "War and Peace" (1860), a tale of the invasion of Russia by Napoleon in 1812, is regarded by Russians as his masterpiece; but "Anna Karenina," which appeared in 1876, is better appreciated abroad. Matthew Arnold spoke most enthusiastically in its praise a few months before his death, and George Meredith says that Anna, the beautiful but unfaithful wife, who ends her guilty passion by suicide, is the most perfectly depicted female character in all fiction. Since the publication of this last work, Tolstoy has given himself up to the earnest working out of the problems of life, the attainment of a higher religious and moral philosophy. He makes "Return not Evil" the keystone of the Christian faith, and insists that the literal interpretation of the Sermon on the Mount is

the only rule of Christian life. His religious views are set forth in "Christ's Christianity" and "My Religion." His "Kreutzor Sonata," with its strange theory of morals, was published in 1890. Count Tolstoi is married, and has nine children living.

"TOM BROWN." See HOWES, THOMAS, Q.C.

**TOMLINSON, Professor Charles, F.R.S., F.C.S.,** was born in London, Nov. 27, 1808. His father becoming embarrassed, enlisted in the Army; and after serving in Holland, died on his passage to India, leaving his widow in poverty, and two children, Charles being the younger. She could provide them with only the mere rudiments of education, and at the age of twelve the boys were sent out into the world to earn their own living. The elder, meeting with friends, was able to obtain a University education; the younger, during many years, had to serve in very subordinate offices; but being fond of reading, he devoted his scanty leisure to study, and derived assistance from the London Mechanics' Institution, under the genial management of Dr. Birkbeck. In 1830 an opportunity offered for further improvement. He became assistant in a classical school, and a few years later, his brother being appointed to a curacy near Salisbury, it was suggested that a good day-school for boys was much wanted in that city. Accordingly the two brothers started such a school, the one undertaking the classical, and the other modern languages, and the science department. The introduction of experimental science into schools was at that time a novelty, and the lectures on Chemistry and Physics, delivered on two evenings in every week, not only interested the boys, but attracted many of the members of the boys' families. Charles even made some attempts at original research, and published papers in *Thomson's Records of Science*, and also in the *Magazine of Popular Science*. Some of these papers formed the basis of a work published in 1838, entitled the "Student's Manual of Natural Philosophy." This work was well adapted to the time, and had a rapid sale. Parker, the publisher of the *Saturday Magazine*, invited Charles to contribute to that work, which he did to a large extent during many years. Parker found Charles so useful to him, that he invited him to settle in London, so as to increase his literary and scientific connection with his publishing house. This offer was accepted, but before leaving Salisbury,

Charles married a highly cultivated lady, who during many years rendered him most valuable assistance in his literary work. Mr. Tomlinson's connection with Parker's house brought him into contact with various scientific men, and led to his appointment as Science Lecturer in King's College School. Mr. Tomlinson was one of the first members of the Cavendish Society, and undertook much literary work for it. He also wrote a number of scientific treatises for the Society for Promoting Christian Knowledge, also several of the treatises in Weale's Series, and many articles on Technology in several Cyclopaedias. Mr. Tomlinson's original researches in science are contained in numerous memoirs and papers in the Transactions and Proceedings of the Royal Society (of which he became a Fellow in June, 1867); the *Philosophical Magazine*; Jamieson's *New Edinburgh Philosophical Journal*; *The Journal of the Chemical Society* (of which he is also a Fellow); the Reports of the British Association (of which he is a Life Member); *The Journal of the Society of Arts*; *The Pharmaceutical Journal*; *The Chemical News*; *Nature*; *The Proceedings of the Geologists' Association*, and some others. He was also one of the original founders of the Physical Society. Mr. Tomlinson holds the opinion that the culture of a scientific man is very imperfect unless combined with a taste for literature. All through life it has been his business to become acquainted with the best books of the best authors in various languages. In 1874 he published a volume on "The Sonnet," and in 1877 a translation of Dante's "Inferno," accompanied by an essay on Dante and his translators. This led to his appointment as Barlow lecturer on the Divine Comedy at University College, which he held during three years according to the founder's bequest, giving twelve lectures in each year. In 1881 he published a volume containing original Sonnets, and also Translations from the Italian and Spanish. In 1887 he brought out a second edition of his translation of Goethe's "Hermann and Dorothea" (the first edition being published in 1840), including a long critical and historical introductory essay. In 1887 was published a volume of "Essays Old and New." Mr. Tomlinson is a Member of the Dante Society, and also of the Goethe Society; and has contributed various literary papers to the Transactions of the latter. He is also the author of a volume well known to chess players as "Amusements in Chess," and has contributed various papers to chess periodicals.

**TOMLINSON, Herbert, B.A., F.R.S.**, was born at York, on Nov. 18, 1845, and was educated at St. Peter's School, York, and at Christ Church, Oxford. In 1868 he graduated B.A., both in the Mathematical and Natural Science Honours Schools; in 1870 he was Whitworth Exhibitioner, and in the same year was appointed Demonstrator of Natural Philosophy at King's College, London, which post he still retains. In 1889 he was elected a Fellow of the Royal Society in consideration of his original researches in physics. As a writer on natural science, Mr. Tomlinson is well known through his numerous contributions to the "Proceedings" of the Royal Society, the *Philosophical Magazine*, &c.; the most important of which relate to the influence of stress and strain on the Physical Properties of Matter. The following papers may be enumerated:—"Effect of Magnetization on the Electrical Conductivity of Iron" ("Proceedings" of the Royal Society, 1875); "Increase in Resistance to the Passage of an Electrical Current produced in Certain Wires by Stretching" (*ibid.*, 1877); "Alteration of Thermal Conductivity of Iron and Steel caused by Magnetism" (*ibid.*, 1878); "Moduli of Elasticity" (*Philosophical Transactions*, 1883); "Electrical Conductivity" (*ibid.*); "Relations between Moduli of Elasticity, Thermal Capacity, and other Physical Constants" (*Proceedings of the Royal Society*, 1885); "Alteration of the Electrical Conductivity of Cobalt, &c., by Longitudinal Traction" (*ibid.*, 1885); "Internal Friction of Metals" (*Philosophical Transactions*, 1886); "Coefficient of Viscosity of Air" (*ibid.*); "On Certain Sources of Error in connection with Experiments on Torsional Vibrations" (*Philosophical Magazine*, 1885); "Temporary and Permanent Effects on some of the Physical Properties of Iron produced by raising the Temperature to One Hundred Degrees C." (*ibid.*, 1886); "Effect of Change of Temperature on the Internal Friction and Torsional Elasticity of Metals" (abstract in *Proceedings of the Royal Society* 1886); and "Effects of Magnetization on the Elasticity and the Internal Friction of Metals" (*Philosophical Transactions*, vol. clxxx., p. 1).

**TOOLE, John Laurence**, comedian, son of Mr. Toole, the civic toast-master, born in London, March 12, 1833, was educated at the City of London School, and became a clerk to a wine-merchant, but soon quitted this occupation. Having been smitten with the "bias dramatic," he was induced to join the City Histrionic Club,

where his qualifications for the dramatic profession were soon recognised, and he found a favourable opportunity for appearing before a public audience at a benefit to Mr. F. Webster, at the Haymarket Theatre, July 22, 1852. Having successfully passed this ordeal, he resolved to become an actor, and begun his professional career under Mr. Charles Dillon, at the Queen's Theatre, Dublin, where he achieved great success. After further testing his powers at Belfast, Edinburgh, and Glasgow, he accepted, in 1851, an engagement at the St. James's Theatre, London, under the management of Mrs. Seymour, and sustained a variety of characters in low comedy with considerable success. This was followed by an engagement with his old manager, Mr. C. Dillon, who had the Lyceum for a short term, and on the opening of the New Adelphi Theatre by Mr. Webster, Mr. Toole became the leading comedian. He has for more than thirty years been a popular favourite, whether it be in the broad region of farce, or in those more important parts in which tears and laughter equally predominate; such as "Caleb Plummer," in the version of Mr. Dickens' "Cricket on the Hearth," or the honest fireman, Joe Bright in the drama "Through Fire and Water." For several years Mr. Toole has been in the habit of making a professional tour in the provinces, where he is as great a favourite as in the metropolis. In July, 1874, he went on a "starring" tour to the United States, and made his American debut at Wallack's Theatre, New York (Aug. 17). He re-appeared at the Gaiety Theatre, London, Nov. 8, 1875. On Nov. 17, 1880, he undertook the management of the Folly Theatre, which he has reconstructed in accordance with all the requirements of the authorities, and renamed, calling it after his own name—Toole's Theatre. In 1888 he published his "Reminiscences." In March, 1890, he started for a tour in Australia.

**TORRENS, William Torrens McCullagh**, eldest son of Mr. James McCullagh, of Delville, co. Dublin, born in Oct., 1813, was educated at Trinity College, Dublin (B.A., 1834; LL.B. 1840), became a member of Lincoln's Inn, and practised at the Common Law Bar. He was appointed a Commissioner of the Poor Law Inquiry in Ireland in 1835, private secretary to Lord Taunton (then Mr. Labouchere) in 1846, represented Dundalk from 1847 till July, 1852, when he was an unsuccessful candidate for Yarmouth, for which he was returned at the general election in March, 1857; he was returned for Fins-

bury in July, 1865, and sat for the borough in four consecutive parliaments. In 1863 he assumed, for family reasons, his maternal name. He was a prominent member of the independent Liberal party, who secured by their support Mr. Disraeli's proposal of household suffrage for towns, and in committee on the Bill he proposed and carried the lodger franchise. In the following year he brought in the Artisans' Dwellings Bill, which passed both Houses. In 1869 he obtained the adoption of the system for London of boarding out children by Poor Law Guardians; and in 1870 an Act to amend the laws regarding extradition was passed in accordance with the recommendations of a committee, for which Mr. Torrens had moved two years before. The School Board for London was suggested and proposed to Parliament by him as an amendment to Mr. Forster's Elementary Education Bill; and he was himself elected a member of the School Board for Finsbury. When purchase in the army was abolished, he carried an address to the Crown against sending soldiers under arms to serve in hot climates. Mr. Torrens has written "Lectures on the Study of History;" "The Life of R. L. Shiel;" "Life and Times of Sir James Graham;" "Industrial History of Free Nations;" "Empire in Asia, How we came by it;" "Memoirs of Viscount Melbourne;" "Reform of Procedure in Parliament;" and "Life of Lord Wellesley." In 1885, he brought in and carried an Act limiting the charge for Water Rates in London to the amount, from time to time, of the public assessment. To him also is due the enactment removing the principal prisons from the metropolis, in order to provide sites for workmen's dwellings and public gardens.

**TOURGEE, Albion Winegar**, American writer, was born at Williamsfield, Ohio, May 2, 1838. He studied at Rochester University, 1859-61, and then entered the Union Army and served throughout the Civil War. At its close he settled as a lawyer, farmer, and editor at Greensboro', N.C. He was a member of the N.C. Constitutional Conventions of 1868 and 1876, and was on the Commission to codify and revise the State laws. From 1868 to 1874 he was a Judge of the Superior Court of the State, and in 1876 he became U.S. pension agent for the State. In 1866-67 he published, at Greensboro', the *Union Register*, and from 1882-85, at Philadelphia, *The Continent*, a literary weekly. He is well known as a lecturer and as the author of "North

Carolina Form-Book," 1869; "Foinette," 1874; "North Carolina Code," 1878; "Digest of Cited Cases," 1879; "Statutory Decisions of the North Carolina Reports," 1879; "Pigs and Thistles," 1879; "A Fool's Errand," of which 135,000 copies were sold, 1879; "Bricks without Straw," 1880; "John Faw and Mamelon," 1882; "Hot Ploughshares," 1883; "An Appeal to Caesar," 1884; "Black Ice," 1887; "Hutton's Inn," 1887; "Letters to a King," 1888; "With Gauge and Swallow," 1889; and "Ptoleus Prime," 1890.

**TRACY, The Hon. Benjamin Franklin**, American statesman, was born at Oswego, N.Y., April 26, 1830. He received an academic education, studied law and began its practice as soon as he was of age. In 1853 and 1856 he was elected District Attorney of Tioga (his native) county, and in 1862 was a member of the New York legislature. He was appointed in 1862, by Governor Morgan, on a committee to organize recruiting for the United States army, and later commanded a regiment in the field, taking part in the battles of the Wilderness and Spottsylvania; and subsequently being in charge of the rendezvous and prison-camp at Elmira, N.Y. When mustered out at the close of the war he was brevetted a Brigadier-General of Volunteers. He settled at Brooklyn, N.Y. (which has since been his home), and resumed his law practice. From 1866 to 1873 he was U.S. District Attorney for the district in which he lived; and from Dec., 1881, to Jan., 1883, he sat in the Court of Appeals (the highest judicial body in New York), to fill a vacancy. In 1882 he was nominated by his (the Republican) party as a Judge of the Supreme Court, but was not elected. Since March, 1889, he has been a member of President Harrison's Cabinet, holding the portfolio of Secretary of the Navy.

**TRAILL, Henry Duff**, D.C.L., youngest son of the late James Traill, a stipendiary magistrate of the metropolitan district, was born at Blackheath, Aug. 14, 1842, and educated at Merchant Taylors' School, whence he proceeded as Probationary Fellow to St. John's College, Oxford, where he graduated B.A. in 1864. He was called to the bar by the Society of the Inner Temple in 1868, and joined the Home (now South-Eastern) Circuit. He adopted the journalistic and literary profession in 1871, and has been an extensive contributor to the *Pall Mall Gazette* (under the original management), the *St. James's Gazette*, the *Daily*

*Telegraph*, the *Saturday Review*, &c. He published in 1881, "Central Government" (the *English Citizen* series); in 1882, "Sterne" (the *English Men of Letters* series), and "Recaptured Rhymes," a re-issue of (principally) light political verse contributions to various newspapers and periodicals; in 1881, "The New Lucian," a series of Dialogues of the Dond; and "Coleridge" (*English Men of Letters*); in 1886, "Shattisbury (the first Earl)," a monograph contributed to the series called *English Worthies*; in 1888, "William III." (*Twelve English Statesmen*); in 1889, "Strafford" (*English Men of Action*); and in 1890, "Saturday Songs," a reprint of political verse contributions to the *Saturday Review*. He is the editor of the *Observer*.

**TRAQUAIR, Dr. Ramsay Heatley, F.R.S.**, Keeper of the Natural History Collections in the Museum of Science and Art, Edinburgh, is the son of the late Rev. James Traquair, Parish Minister of Rhynd, Perthshire, and Elizabeth Mary Bayley, his wife, and was born at the Manse of Rhynd, July 30, 1840. Dr. Traquair received his school education in Edinburgh, and in 1857 entered the University of Edinburgh as a student of medicine. After a course of five years' study he received the degree of Doctor of Medicine in Aug., 1862, and, on that occasion, a Gold Medal was awarded to him for his thesis on a biological subject, viz., the "Asymmetry of the Pleuronectidae." From 1863 to 1866 Dr. Traquair acted as Demonstrator of Anatomy in the University of Edinburgh, under the late eminent Professor Goodsir, and, from 1866 to 1867, as Professor of Natural History in the Royal Agricultural College, Cirencester. In the autumn of 1867 he was appointed by the Lords of the Committee of Council on Education to the Professorship of Zoology in the Royal College of Science, Dublin, from which post he was transferred, in 1873, to the Keepership of the Natural History Collections in the Museum of Science and Art, Edinburgh. He has also held the Swinney Lectureship in Geology at the British Museum, for a period of five years (1883-88). Dr. Traquair's attention was early drawn to the study of the structure of fishes, and among the extinct forms of the palaeozoic rocks he soon found a rich and extensive field for original investigation. He has published about forty papers on Fossil Ichthyology, of which the most important are "On the Structure and Affinities of *Tristichopterus alatus*," *Trans. Roy. Soc.*,

Edin., 1875; "On the Agassizian Genera *Palaeoniscus*, *Amphlypterus*, *Pygopterus*, and *Gyrolepis*," *Qu. Journ. Geol. Soc.*, 1877; "The Structure and Affinities of the *Platycomidae*," *Trans. Roy. Soc.*, Edin., 1879; "Report on Fossil Fishes Collected by the Geological Survey of Scotland in Eskdale and Liddisdale," *Trans. Roy. Soc.*, Edin., 1881. He is also engaged in monographing the Old Red Sandstone and Carboniferous Rocks of Great Britain for the Palaeontographical Society, one part of the carboniferous monograph having appeared in the Society's volume for 1877. Of Dr. Traquair's contributions to the structure of recent fishes the two most important are his graduation thesis, "On the Asymmetry of the *Pleuronectidae*," published in *Trans. Linn. Soc.* for 1865, and his "Cranial Osteology of *Polypterus*," *Journ. Anat. and Phys.*, 1870. Dr. Traquair received the Neil Medal of the Royal Society of Edinburgh in 1876; and, in 1881, was elected a Fellow of the Royal Society of London.

**TREVELYAN, The Right Hon. Sir George Otto, Bart., P.C., D.C.L.**, born July 20, 1833, at Rothley Temple, Leicestershire, is the only son of the late Sir Charles Edward Trevelyan, Bart., K.C.B., and Hannah More Macaulay, sister of Lord Macaulay. He was educated at Harrow School and Trinity College, Cambridge, where he was second in the first class in classics. He was elected member for Tynemouth in the Liberal interest in 1865, and for the Border Burghs in 1869. Mr. Trevelyan was appointed Civil Lord of Admiralty, in Mr. Gladstone's Government, in Dec., 1868, but resigned office in July, 1870, on a point of conscience connected with the Government Education Bill. He advocated a sweeping reform of the army, including the abolition of the purchase of commissions, both in and out of Parliament, and was for many years the foremost supporter of the extension of the County Franchise. Mr. Trevelyan succeeded Mr. Shaw-Lefevre as Parliamentary Secretary to the Admiralty in Nov., 1880, and held that office until his appointment, after the murder of Lord Frederick Cavendish, as Chief Secretary to the Lord-Lieutenant of Ireland (May 9, 1882). This arduous post he held through two most trying years, and in Oct., 1884, he joined the Cabinet as Chancellor of the Duchy of Lancaster. On the formation of Mr. Gladstone's third Government in 1885, he was appointed to the new post of Secretary for Scotland, but resigned on March 27, 1886, in consequence of dis-

agreement with the Prime Minister's proposed scheme for Ireland. He failed to secure re-election after the dissolution of 1886, but in 1887 he was returned as member for the Bridgeton Division of Glasgow. He is the author of "Letters of a Competition Wallah," republished from *Macmillan's Magazine* in 1864; "Cawnpore," in 1865; "The Ladies in Parliament, and other pieces," collected and published in 1869; "The Life and Letters of Lord Macaulay," 2 vols., 1876, 2nd edit., 1877; and "The Early History of Charles James Fox," 1880.

**TRIMEN, Henry, M.B., F.R.S., F.L.S.,** was born in London, Oct. 26, 1813, and was educated at King's College. He graduated M.B. at the University of London, 1845; was Curator of the Anatomical Museum of King's College, 1866-7; and Lecturer on Botany at St. Mary's Hospital Medical School, 1867-72. He entered the Botanical Department of the British Museum, as Senior Assistant, May, 1869, and held that appointment till Dec., 1879. He was appointed Director of the Royal Botanic Gardens, Ceylon, Jan., 1880, which post he still holds. He was editor of the *Journal of Botany*, 1872-79; and author of "Flora of Middlesex" (with Mr. Threlknot-Dyer), 1869; of the botanical portion of "Medicinal Plants," 4 vols., 1875-80; of a "Systematic Catalogue of the Plants of Ceylon," 1895; and of numerous papers on various branches of botanical science in the publications of the learned societies and scientific periodicals. Dr. Trimen has paid special attention to the economic aspects of Botany, particularly to the sources of drugs and other products, especially of tropical countries. In 1883, he was employed by the Madras Government to report on the botanical and cultural problems presented by the cinchona plantations in the Nilgiri Hills; and he has been the means of introducing into cultivation in Ceylon many useful and valuable products of other countries.

**TRIMEN, Roland, F.R.S., F.L.S., F.Z.S., F.Ent.S.,** zoologist, was born in London, Oct. 29, 1840, and was educated at a private school near Brighton, and at King's College School in London. He voyaged to the Cape (on medical advice), 1858-59; and was appointed to the Cape Civil Service, July 1860. He served in the Audit, the Colonial Secretary's, the Governor's, and the Crown Lands Offices, until 1876, when he was appointed Curator of the South-African Museum, Cape Town. He was elected a Fellow of

the Royal Society, June 1883; and is the author of "Rhopaloura Africa Australis; a Descriptive Catalogue of South-African Butterflies" (London and Cape Town, 2 vols., 1862-66), and "South-African Butterflies; a Monograph of the Extra-Tropical Species" (London, 3 vols., 1897-80); also of various memoirs on Entomology, Ornithology, and Botany in the Transactions or Proceedings of the Entomological, Linnean, and Zoological Societies of London, the *Quarterly Journal of Science*, and other publications. He was President of the South-African Philosophical Society, 1883-85; and has been Commissioner of the Botanic Gardens, Cape Town, since 1876. He was Chairman of the Phylloxera Commission, Cape Town, 1884; and represented the Cape at the Bordeaux Phylloxera Congress of 1881, and at the Congress of Zoologists held in Paris in August, 1889.

**TRIPE, John William, M.D.,** born in London in 1821, is the son of a surgeon, and was educated at Merchant Taylors' School, and at the London Hospital; and became L.S.A., 1843; M.D. St. Andrews 1846; M.R.C.S. Eng., 1848; M.R.C.P. Edin. 1879. He was appointed Medical Officer of Health for Hackney in 1850; and Public Analyst in 1872. He is the author of "The Mortality from the Eruptive Fevers;" "On the Winter Climate of some English Seaside Health Resorts;" "On Scurritinal Dropsy," *Brit. Jour. Rev.*, 1851; "The Relative Mortality of Males and Females," *Ibid.*, 1857. He has contributed "Scurritina and its Etymology," to the *Med. Times*, 1848; "Scurritinal Waves," to the *Sunday Record*, 1875; and is the author of numerous Reports, Essays, and Papers in the Medical, Sanitary, and Meteorological Journals, 1848 to 1890; and of papers at the Conferences of the Health Exhibition. He has been President, Vice-President, and Secretary to the Royal Meteorological Society, and is Assoc. For. Mem. French Soc. of Hygiene; Corr. Mem. Roy. Soc. Pub. Med. Belgium.

**TRISTRAM, The Rev. Henry Baker, D.D., LL.D., F.R.S., C.M.Z.S.,** son of the late Rev. Henry Baker Tristram, vicar of Eglingham, Northumberland, was born May 11, 1822, and educated at the Grammar School of Durham, and at Lincoln College, Oxford (B.A. 1844; M.A. 1846). In 1845 he was ordained to the curacy of Morchard-Bishop, Devonshire, which he was obliged to resign in less than two years in consequence of ill-health. At that juncture Admiral Sir Charles Elliot was about to proceed to

Bermuda as governor, and Mr. Tristram accompanied him as Chaplain and Secretary. He resided at Bermuda three years, and then accepted, in 1819, the small rectory of Castle Eden, co. Durham. In 1855 the state of his health again induced him to seek a milder climate. He spent that winter in the city and neighbourhood of Algiers, making excursions into the northern Saham. A second winter was occupied in researches beyond the range of the Atlas Mountains, guarded by an escort granted by Field-Marshal Randon, Governor-General of Algeria, and a third, spent on board a yacht in the Mediterranean afforded him the first opportunity of visiting Palestine. In 1860 he was collated by Bishop Longley to the Mastership of Greatham Hospital and Vicarage of Greatham, which he held till 1874, when he was appointed to a residential Canonry in Durham Cathedral by Bishop Baring. In 1863 he again visited the Holy Land, making scientific observations and identifying Scripture localities. In 1873 he made a similar tour in Moab, and in 1881 made an extensive tour through Palestine and the Lebanon, into Mesopotamia and Armenia. In 1879 he declined the offer made to him by the Earl of Beaconsfield of the Anglican Bishopric in Jerusalem. He is a Member of the Convocation of the province of York, and Provincial Grand Master of "Mark Masons" for the two northern counties. Dr. Tristram is the author of "The Great Sahara," 1860; "The Land of Israel, a Journal of Travels with reference to its Physical History," 1863, 3rd edit., revised, 1876; "The Natural History of the Bible," 1880; "The Ornithology of Palestine," 1867; "A Winter Ride in Palestine," published in "Vacation Tourists," 1864; "Scenes in the East," 1870; "The Daughters of Syria," 3rd edit., 1874; "The Seven Golden Candlesticks," new edit. 1881; "Bible Places, or the Topography of the Holy Land," 1871, 8th thousand, 1878; "The Land of Moab," 2nd edit., 1874; "Pathways of Palestine," 1st series, 1881, 2nd series, 1883; "Incidents in Bible History chiselled on Ancient Monuments," 1875; "Genesis and the Brick Kiln," 1878; "Fauna and Flora of Palestine," 1884, for the Palestine Exploration Fund; Contributions to *The Contemporary Review*, "Smith's Dictionary of the Bible," and many scientific periodicals.

**TROCHU**, Louis Jules, a French general, was born in Bretagne, March 12, 1816, and received his education in the Military

Academy of St. Cyr. In 1837 he entered an artillery regiment as Lieutenant. His talents soon attracted attention, and in particular that of Marshal Bugeaud, who, in recognition of his bravery displayed in the battles of Sidi-Yussuf and Isly, made him his Adjutant, and intrusted him with most important commissions. His services, circumspection, and bravery in the Crimean war, gained for him the rank of a General of Division. In that capacity he received a command in the Italian campaign of 1859. On the conclusion of peace he was relegated to the Ministry of War, and received the Grand Cross of the Legion of Honour. Niel had intended him for his successor as Minister of War, but the latter's celebrated *brochure* on French military affairs had drawn down upon him the displeasure of the Imperial Court. Before the war of 1870-71, General Trochu held command of the Army Division in Toulouse, which Niel and Lebœuf had held before him. In the crisis which followed the battle of Sedan, he was made governor of Paris and Commander-in-Chief of all the forces destined for the defence of the capital, which he held until the city surrendered to the German hosts. In Oct., 1871, he was elected President of the Council-General for Morbihan; but he afterwards resigned that post, and he has lived in retirement since Jan., 1873. His pamphlet on "L'Armée Française en 1867" reached its 20th edition in 1870. In 1873 he published a work entitled "Pour la Vérité et pour la Justice," in justification of the Government of the National Defence.

**TROLLOPE**, The Right Rev. Edward, D.D., F.S.A., Bishop of Nottingham, son of the late Sir John Trollope, Bart., and brother of John, 1st Baron Kesteven of Casewick, born April 15, 1817, was educated at Eton and at Christ Church, Oxford (B.A., 1839; M.A., 1855; D.D., *honoris causa*, 1877). He was presented to the Rectory of Leasingham, Lincolnshire, in 1843, was collated to a Prebendaryship in the Cathedral Church of Lincoln in 1861, was elected Proctor in Convocation for the diocese of Lincoln in 1866, and appointed Archdeacon of Stow and Prebendary of Liddington in 1867. Having been appointed by Royal Letters Patent to be Bishop Suffragan of the See of Nottingham in the room of Dr. Henry Mackenzie, resigned, he was consecrated in Westminster Abbey, Dec. 21, 1877. The following is a list of his works: "Illustrations of Ancient Art," 1854; "Life of Pope Adrian IV.," 1856; "The Captivity of John, King of France, at Somerton Castle," "Handbook of Lincoln," "Tem-

ple Brner and the Templars," "Introduction of Christianity into Lincolnshire," 1857; "Labyrinth, Ancient and Medieval," "Sepulchral Memorials," 1858; "Fens and Submarine Forests," "The Danes in Lincolnshire," "Memorabilia of Grimsby," "The Use and Abuse of Red Bricks," "The Roman House of Apethorpe," 1859; "The History of Workop," "Monastic Gatehouses," 1860; "Life of Hereward, the Saxon Patriot," 1861; "History of Ann Askowe," "Battle of Bosworth Field," 1862; "Shadows of the Past," 1863; "The Raising of the Royal Standard at Nottingham," 1861; "Spilsby and other Churches," 1865; "Gainsborough and other Churches," "Norman Sculptures of Lincoln Cathedral," 1866; "Grantham and other Churches," 1867; "The Roman Ermine Street," 1868; "The Norman and Early English Styles of Gothic Architecture," 1869; "Boston and other Churches," 1870; "Stenford and the Wapentakes of Flaxwell and Aswardham," 1872; "Holbeach and other Churches," 1872; "Louth Park Abbey, Louth and other Churches," 1873; accounts of Churches in the neighbourhood of Grantham, Newark, Southwell, Grimsby, and Stunford, and "Little St. Hugh of Lincoln," 1880, besides numerous charges and sermons. The bishop married a daughter of Sir J. H. Palmer, of Carlton Park, Northamptonshire. She died Oct. 21, 1890.

**TROLLOPE, Thomas Adolphus**, brother of Anthony Trollope, and son of the late Mr. T. A. Trollope, barrister-at-law, and of Mrs. Trollope, the well-known authoress, was born April 20, 1810, and educated at Winchester and at Allon Hall, Oxford. About 1810 he published two volumes on Brittany, followed by two on Western France in 1841, when he took up his residence at Florence, and he has produced a series of works connected with the history of Italy. His "Impressions of a Wanderer in Italy," appeared in 1850; "Girlhood of Catherine de Medici, a History," "A Decade of Italian Women," and "Tuscany in 1840," in 1850; "Filippo Strozzi: a History of the Last Days of Old Italian Liberty," and a volume on the celebrated Venetian Interdict, entitled "Paul the Pope and Paul the Friar," in 1860; "La Beata, a Novel," in 1861; "Lenten Journey in Umbria and the Marches," and "Marietta, a novel," in 1862; "Giulio Malatesta, a novel," in 1863; "Beppo the Conscript, a novel," and "Lindisfarne Chase, a novel," in 1864; "History of the Commonwealth of Florence from the Earliest Independence of

the Commune to the Fall of the Republic in 1531," 1 vols., 1865; "Gemma, a novel," 1866; "Artingall Castle, a novel," 1867; "The Dream Numbers," and "Leonora Casolani," 1868; "The Garstangs of Garstang (Trango)," 1869; "Dunton Abbey," 1871; "The Story of the Life of Pius IX.," 2 vols., 1877; "History of the Conclaves," "A Syren," 3 vols., and "What I Remember," 3 vols. Mr. Trollope married first Miss Garrow, authoress of several works on Italy (she died 1866), and secondly a daughter of Thomas L. Terman.

**TRURO, Bishop of.** See WILKINSON, THE RIGHT REV. GLOBAN HOWARD.

**TUBE, D. Hock, M.D., F.R.C.P., LL.D.**, London, son of Samuel Tube, Esq., the well-known author of the work on the York Retreat for the Insane, was born at York in 1827. He was for many years officially connected with the Retreat, and Lecturer on Mental Diseases at the York School of Medicine. Dr. Tube is the editor of the *Journal of Mental Science*, conjointly with Dr. Savage, the late superintendent of that hospital. In 1881, he was elected President of the Medico-Psychological Association of Great Britain. In addition to a treatise on "Sleep-walking and Hypnotism," Dr. Tube has published the results of a visit recently paid to asylums in Canada and the United States. The exposure of the bad condition of certain asylums in Canada has already borne fruit in the Colony. His principal works are, "Prize Essay on Insanity," 1853; "A Manual of Psychological Medicine," 1st edit., 1858 (conjointly with Dr. Ducknill); this has been largely used as a text-book in England and America; "Illustrations of the Influence of the Mind upon the Body," 1st edit., 1872; this has passed through several editions and been translated into French and German. In 1865 he wrote "Artificial Insanity," and suggested hypnotism in the treatment of the delusions of the insane; "Insanity in Ancient and Modern Life," with Chapters on its Prevention, 1st edit., appeared in 1878; "History of the Insane in the British Isles," 1882; the history of the Royal Hospital of Bethlehem, of which Dr. Tube is a governor, receives special notice in that work; "Sleep-walking and Hypnotism," 1881; "The Insane in the United States and Canada," 1885; besides numerous articles in the medical journals. He has been editor since 1878 of the *Journal of Mental Science*. A "Dictionary of Psychological Medicine" is announced, edited by Dr. Tube.

**TUPPER, The Hon. Sir Charles, Bart.**, C.C.M.G. (1886), K.C.M.G. (1879), C.B. (1867), M.D., L.R.C.S., Edinburgh, was born July 2, 1821. He is B.A. of Cambridge, M.A. and D.C.L. of Acadia College, Nova Scotia. He is Governor of Dalhousie College, Halifax (appointed by Act of Parliament in 1862); was President of the Canadian Medical Association from its formation, 1867, until 1870, when he declined re-election. He was a member of the Executive Council and Provincial Secretary of Nova Scotia from 1857 to 1860, and from 1863 to June 30, 1867; and Prime Minister of that Province from 1861 until he retired from office with his Government, on the Union Act coming into force on July 1, 1867; he was a delegate on public business from the Nova Scotia Government, 1858 and 1865, and from the Dominion Government, March, 1868; leader of the delegation from Nova Scotia to the Union Conference at Charlotte-town, 1861, to that in Quebec in the same year; and to the final Colonial Conference in London to complete terms of Union in 1861-67; he holds patent of rank and precedence from Her Majesty as an Executive Councillor of Nova Scotia; was sworn as a Privy Councillor of Canada, June, 1870, and was President of that body from that date until July 1, 1872, when he was appointed Minister of Inland Revenue, which office he held until Feb. 22, 1873, when appointed Minister of Customs. He resigned office with Sir John Macdonald, in Nov., 1873, and on the return of Sir John to power, was appointed Minister of Public Works in Oct., 1873, and Minister of Railways and Canals in 1870. He represented the County of Cumberland, Nova Scotia, in Parliament for thirty-two years—in the Nova Scotia Assembly from 1855 until the Confederation in 1867, and thence in the Commons of Canada, to 1881, when he resigned his seat in Parliament, and was appointed High Commissioner for Canada in London. He was appointed by the Dominion Government Executive Commissioner for Canada of the Antwerp Exhibition, 1885, and of the Colonial and Indian Exhibition, 1886, of which he was also appointed Royal Commissioner by the Queen. He received, in 1886, the honorary degree of Doctor of Laws (Cambridge), and the same day had conferred on him the honorary freedom of the Worshipful Company of Fishmongers of London. Just previous to the Federal elections of Feb., 1887, he re-entered the Cabinet as Finance Minister, which position he retained until May 24, 1888, when he was re-appointed High Commissioner for the Dominion of

Canada in London. Sir Charles was appointed one of Her Majesty's plenipotentiaries to the Fisheries Conference in Washington in 1887, the result of which Conference was the signature of a treaty on Feb. 15, 1888—subject to ratification for the settlement of the matters in dispute between Canada and the United States in connection with the Atlantic Fisheries. Sir Charles carried a Bill through the Canadian Parliament for the ratification of the Treaty, where it was passed in both Houses without division. He was created a baronet under patent dated Sept. 13, 1888.

**TURKEY, Sultan of.** See ABD-UL-HAMID II.

**TURNER, Godfrey Wordsworth,** was born in London, in 1825, and having some aptitude for art, became a pupil of Mr. Leigh, but by the advice of his father's friend, Leigh Hunt, he relinquished a vocation to which he had no decided call, and entered on newspaper work. His first engagement was, in conjunction with Mr. Thornton Hunt, on the *Spectator*. At the same time he wrote for the *Morning Chronicle* and the *Leader*; afterwards, from being fine art critic of the *John Bull*, he accepted a more onerous position in the conduct of that paper; whence he transferred his services to the *Daily News*, during the editorship of Mr. Thomas Walker. In Dec., 1880, he joined the staff of the *Daily Telegraph*, and has continued to serve that journal down to the present time, in various literary capacities, but chiefly as a special correspondent in many parts of the world. On the outbreak in Jamaica, he was despatched with the Royal Commission to that island. He has been an industrious contributor to the magazines and periodicals, and is the author of "*Jest and Earnest*," "*Honely Scenes from Great Painters*," "*Art Studies*," and other books.

**TURNER, Professor Sir William, M.B., LL.D., D.C.L.** Oxford and Durham, F.R.S. London and Edinburgh, was born in Lancaster, in 1832. He received his medical education at St. Bartholomew's Hospital, where he obtained a Scholarship, and in 1853 he became a member of the Royal College of Surgeons of England. As a student he gained an Exhibition and Gold Medal at the University of London, and took his degree in Medicine in 1857. In 1854 he was appointed Demonstrator of Anatomy in the University of Edinburgh, and in 1867, on the death of Professor John Goodsir, he became

Professor of Anatomy. In addition, he holds the office of Honorary Professor of Anatomy to the Royal Scottish Academy, and is Examiner in Anatomy in the Universities of Oxford and Edinburgh. He has, at various times, held the following appointments:—Examiner in Anatomy in the University of London; Lecturer on Anatomy and Physiology in the Royal College of Surgeons of England; Dean of the Faculty of Medicine in the University of Edinburgh, and President of the Royal College of Surgeons of Edinburgh. For many years he has represented the University of Edinburgh on the General Council of Medical Education; and in December, 1889, he was elected by the Senate of the University as one of their representatives on the University Court. He was made, in 1881, a Member of the Royal Commission to inquire into the working of the Acts affecting the Medical Profession. He has written numerous articles on anatomy, both human and comparative, in the transactions of various learned societies, and in different journals, more especially in the *Journal of Anatomy and Physiology*, of which he is one of the founders and editors. He is also the author of the Reports on the Skeletons of the Races of Man, and on the specimens of Marine Mammals collected during the voyage of exploration of H.M.S. *Challenger*. Some years ago he was awarded by the Royal Society of Edinburgh the Niell Medal for his contributions to Scottish Natural History. He is a member of many scientific societies, and has received the honorary membership of the Royal Irish Academy, the Anthropological Society of Paris, the Royal Medico-Chirurgical Society of London, and the Obstetrical Society of Edinburgh. The Universities of Oxford, Glasgow, and Durham have also conferred on him Honorary Degrees, and he has been elected a member of the Athenæum under the rule which admits those who have attained eminence in Science, Literature, the Arts or Public Service. In 1880 he acted as President of the Anthropological Section of the British Association for the Advancement of Science. In 1886 he received the honour of Knighthood. He joined the Volunteer force at its institution in 1859, and held for thirty years a commission in the Queen's Rifle Volunteer Brigade, Royal Scots, when he retired with the honorary rank of Lieutenant-Colonel.

TÜRR, Gen. Stephen, born at Paja, in Hungary, in 1825, became a lieutenant in the Austrian army in 1848. His regi-

ment was stationed in Italy, and his rooted dislike of the House of Hapsburg inspired him with a strong sympathy for the Italian cause. The Revolutionary Government of Hungary having called upon all Hungarians serving under the Austrian flag in Italy to desert to the Piedmontese, he went over to the latter from Buffalora, in Jan., 1849, and was appointed Colonel of the Hungarian Legion in the Sardinian service. After the disaster of Novara, the greater part of the Hungarian Legion followed their Colonel in Baden, where a revolutionary movement had taken place, and throughout the struggle Colonel Türr commanded not only the remnant of his legion, but also three Baden battalions. After the insurrection had been put down, the Hungarians took refuge in Switzerland, and the Federal Government aided many of them to start for the United States; but Colonel Türr being too ill to go, lived for four years on a small pension granted to him by the Sardinian Government. On the outbreak of the Russian war, he vainly endeavoured to serve under Prince Pasko, but succeeded in taking part as a volunteer in several of the battles in the Crimea, especially in that of the Tchernaya, and received a commission from Colonel McMurdo, the officer in command of the British transport service. While engaged in the performance of his duty, and in connection with this employment in the autumn of 1855, he was arrested at Bucharest by the Austrians as a deserter, and sent under escort to Cronstadt to be tried there. His illegal arrest caused great excitement throughout Europe, and was protested against by the British and French Governments. After a long incarceration he was tried by court-martial, and sentenced to death; which sentence was, however (owing to the urgent remonstrance of the British Government), commuted to perpetual banishment. In the Italian war in 1859, he was appointed a member of Garibaldi's staff, with the rank of colonel, and was always at the general's side during this campaign, until he was seriously wounded in the left arm at Brescia. In the spring of 1860, when Garibaldi planned his Sicilian expedition, Colonel Türr again served under him in the capacity of aide-de-camp, and, before Palermo, was promoted to the rank of general of division. The brilliant part he played in the War of Liberation was acknowledged by the Government of Victor Emmanuel, who promoted him to the rank of general of division in the army of Italy in 1861, and confided to him the military command of the town and province of

Naples. He is the author of "Arrestation, Procès, et Condamnation du Général Turr," 1863; and also of "The House of Austria and Hungary," 1865. He married the Princess Adelino Wyse Bonaparte, a cousin of Napoleon III., Sept. 10, 1861, and took up his residence at Pullauza. Since his marriage he has made two journeys to Roumania, with a view of creating difficulties for Austria in the East of Europe. These political journeys were, however, thought to be compromising to the Italian Government, and, accordingly, Colonel Turr resigned his commission in 1864.

TWAIN, Mark. See CLEMMONS, S. L.

TWISS, Sir Travers, Q.C., D.C.L., F.R.S., son of the late Rev. Robert Twiss, LL.D., of Pembroke College, Cambridge, and Travallyn, Donbighshire, born in Westminster, March 10, 1809, was educated at University College, Oxford, where he graduated in high honours in 1830, and became Fellow and Tutor of his college. From 1835 till 1839 he was one of the Public Examiners at Oxford in Classics and Mathematics; in 1838 he was elected a Fellow of the Royal Society; from 1842 till 1847 was Professor of Political Economy in the University of Oxford; from 1852 till 1855 Professor of International Law in King's College, London, which office he resigned upon being appointed Regius Professor of Civil Law in the University of Oxford. In 1840 he was called to the Bar at Lincoln's Inn, and was admitted an advocate in Doctor's Commons. In 1849 he was appointed Commissary-General of the City and Diocese of Canterbury, in 1852 Vicar-General of the Archbishop of Canterbury, and in 1858, on the advancement of the Right Hon. Dr. Lushington to the office of Judge of the Archdeaconry of Canterbury, was appointed Chancellor of the Diocese of London. In 1862 he was appointed Advocate-General of the Admiralty. On the transfer of the testamentary and matrimonial jurisdiction from the ecclesiastical to the civil courts, Dr. Twiss was created a Queen's Counsel, was elected a Benchor of Lincoln's Inn, became Queen's Advocate-General in Aug., and was knighted in Nov., 1867. He has written various works; amongst which may be mentioned "Epitome of Niebuhr's History of Rome," 1837; "The Oregon Question examined with respect to facts and the Law of Nations," 1846; "View of the Progress of Political Economy in Europe since the 16th Century," 1847; "The Relation of the Duchies of Schleswig and Holstein to

the Crown of Denmark and the Germanic Confederation," 1848; "The Letters Apostolic of Pope Pius IX., considered with reference to the Law of England and the Law of Europe," 1851; "Lectures on the Science of International Law," 1856; "The Law of Nations, considered as Independent Political Communities," 1861, 2nd edit., 1884; "Law of Nations in Times of War," 1863, 2nd edit., 1875; translated into French, and published in Paris in 1886; "The Black Book of the Admiralty," 1874. In 1872 Sir Travers Twiss resigned all his appointments, and has since devoted himself to literary and scientific pursuits, being a frequent contributor to the *Nautical Magazine*, the *Law Magazine and Review*, the "Encyclopædia Britannica," and *La Revue de Droit International*, being also a Vice-President of L'Institut de Droit International, established in 1872, and of the Association for the Reform and Codification of the Law of Nations, established in 1873. At the request of King Leopold II. of the Belgians, Sir Travers drew up in 1884 a Constitution for the Free State of the Congo, and at the request of Earl Granville, he assisted at the West African Conference at Berlin in 1885, as legal adviser of the British Embassy during the Conference. He has served on several Royal Commissions, amongst others on that of 1852 to inquire and report on the regulations of the College of Maynooth in Ireland; on that of 1867 to inquire into the Laws of Neutrality; on that of 1868 to inquire into the Laws of Naturalisation and Allegiance; on that of 1869 to inquire into the Law of Marriage in Great Britain and Ireland and in the British Colonies. He was also a member of the Royal Commission on Rubrics, and was one of the Arbitral Commissioners who settled the boundary line between the Provinces of New Brunswick and Canada.

TYLOR, Edward Burnett, D.C.L., LL.D., F.R.S., was born at Camberwell, Oct. 2, 1832, and educated at the School of the Society of Friends, Grove House, Tottenham. His work has been specially devoted to the study of the races of mankind, their history, languages, and civilisation. He was elected a Fellow of the Royal Society in 1871; received the honorary degree of LL.D. from the University of St. Andrews in 1873, and of D.C.L. from the University of Oxford in 1876. In March, 1883, he was appointed Keeper of the Oxford University Museum. Later in the same year (Oct.) he was appointed Reader in Anthropology. In 1888 he was elected the first Gifford Lecturer by the

University of Aberdeen, delivering a two-years' course on "Natural Religion." Dr. Tylor is President of the Anthropological Society. He is the author of "Anahuac, or Mexico and the Mexicans," 1861; "Researches into the History of Mankind," 1865; and "Primitive Culture: Researches into the Development of Mythology, Philosophy, Religion, Art, and Custom," 2 vols., 1871. A more recent work is an educational handbook of the Science of Man, "Anthropology, an introduction to the Study of Man and 'Civilisation,'" 1881.

**TYNDALL, Professor John, M.D., D.C.L., F.R.S.**, was born Aug. 21, 1820, in the village of Leighlin-bridge, near Carlow, in Ireland. His parents were in very modest circumstances, but they gave him a sound English education. At the age of nineteen he joined in the capacity of "civil assistant" a division of the Ordnance Survey which was stationed in his native town. In 1841 he was engaged by a firm in Manchester, and for about three years he was employed in engineering operations in connection with railways. In 1847 he accepted an appointment as teacher in Queenwood College, in Hampshire, a new institution, devoted partly to a junior school and partly to the preliminary technical education of agriculturists and engineers. There he became acquainted with Mr. (now Dr.) Frankland, who was resident chemist to the College, and there he began those original investigations which have placed him in the foremost rank among the explorers of science. In 1848 the two friends quitted England together and repaired to the University of Marburg, in Hesse-Cassel, where they studied under Bunsen and other eminent Professors. Afterwards Mr. Tyndall prosecuted his researches in the laboratory of Magnus, in Berlin. He conducted investigations on the phenomena of diamagnetism, and on the polarity of the diamagnetic force, including researches on the magneto-optic properties of crystals, and the relation of magnetism and diamagnetism to molecular arrangement. He has published a volume on these subjects. He returned to England in 1851. In 1853, having been previously elected a Fellow of the Royal Society, he was chosen Professor of Natural Philosophy in the Royal Institution of Great Britain, and succeeded the celebrated Faraday as Superintendent. The publication of an essay on the cleavage of slate rocks was the proximate cause of his joining his friend Professor Huxley in a visit to the

glaciers of Switzerland in 1856; and they afterwards published a joint paper on the structure and motion of glaciers. He returned to Switzerland, in 1857, 1858, and 1859, twice in the latter year. He reached Chamonix on Christmas night, 1859, through deep snow, and two days afterwards succeeded in attaining the Montanvert, where he remained nearly three days, for the most part amid blinding snow, and determined the winter motion of the Mer de Glace. In 1859 he commenced his researches on Radiant Heat, which disclosed relations previously unthought of between this agent and the gaseous form of matter. Numerous memoirs published in the "Philosophical Transactions," are devoted to this subject. Prof. Tyndall is a Rumford Medalist of the Royal Society, and a member of various foreign scientific societies; he was made M.D. of Cambridge in 1855, and M.D. of Edinburgh in 1866, when Mr. Carlyle was installed Rector of the University, and afterwards D.C.L. of Oxford. On the occasion of his receiving the honorary degree of D.C.L. from the University of Oxford, June 18, 1873, Dr. Hentley, Margaret Professor of Divinity, protested against the proceeding, on the ground that Professor Tyndall "had signified himself by writing against and denying the credibility of miracles and the efficacy of prayer, thus contravening the whole tenor of that book, which, with its open page inscribed 'Dominus illuminatus est,' the University still bears as her device, and therefore still professes to acknowledge as her guide." In 1872 Professor Tyndall went on a lecturing tour in the United States, in the course of which he delivered thirty-five lectures, thus realizing a sum of 23,000 dollars. Deducting expenses, the residue was carefully invested, and rose in a few years to 33,000 dollars, which was devoted to the founding of scientific scholarships in Harvard and Columbia Colleges, and in the University of Pennsylvania, "in aid of students who devote themselves to original research." Professor Tyndall presided at the annual meeting of the British Association held at Belfast, in Aug., 1874. He accepted the presidency of the Birmingham and Midland Institute for the year 1877. For some years Professor Tyndall was Scientific Adviser to the Board of Trade and to the Lighthouse Authorities, but he resigned those offices in May, 1883, when he also withdrew from the special committee appointed by the Board of Trade to investigate the subject of the best illuminants for lighthouses. He has

written "The Glaciers of the Alps," 1860; "Mountaineering," 1861; "A Vacation Tour," 1862; "Heat, considered as a Mode of Motion," 1863; "On Radiation: the 'Rede' Lecture, May 16, 1865," published in 1865; a volume on "Sound," a volume on "Light," two volumes of collected memoirs, 1883; "Faraday as a Discoverer," "Notes on Electricity," 1870; "Notes on Light," 1871; "Hours of Exercise in the Alps," 1871; "The Forms of Water in Clouds and Rivers, Ice and Glaciers," 1872; "Address delivered before the British Association assembled at Belfast, with Additions and a Preface," 1871; "Fragments of Science: a Series of Detached Essays, Addresses, and Reviews," 5th edit., 1876; and "Essays on the Floating Matter of the Air in Relation to Putrefaction and Infection," 1881. He married, Feb. 29, 1876, Louisa, eldest daughter of Lord and Lady Claud Hamilton.

## U.

**UNITED STATES OF AMERICA**, President of. *See* HARRISON, THOMAS MON. BENJAMIN.

**UNWIN**, Professor William Oawthorne, B.Sc., F.R.S., M.I.C.E., M.I.M.E., was born at Coggeshall, in Essex, in 1838, and is the son of William Jordan Unwin, J.L.D., for many years Principal of Homerton College. He was educated at the City of London School and was apprenticed in the works of Sir William Fairbairn at Manchester, 1855 to 1862. Professor Unwin was instructor at the Royal School of Naval Architecture, South Kensington, 1868-72; Professor of Mechanical and Hydraulic Engineering, Royal Indian Engineering College, Coopers Hill, 1872-84; and since that time has been Professor of Engineering Central Institution of the City and Guilds Institute, at South Kensington. He is the author of "Wrought Iron Bridges and Roofs," 1869; "The Elements of Machine Design," 1877; "The Testing of Materials of Construction," 1888; and of various papers in the Proceedings of Societies.

**UPINGTON**, Sir Thomas, K.C.M.G., Q.C., eldest son of the late S. Upington, Esq., of Lisdoigh House, co. Cork. Sir Thomas was born Oct. 23, 1844, and was educated at the Cloyne Diocesan School, Mallow, and at Trinity College, Dublin, of which university he is a Master of Arts. He was called to the Irish Bar in 1867, and soon after became Secretary to

the then Lord Chancellor of Ireland (Lord O'Hagan, K.P.). On his retirement from that office in 1874 he settled at the Cape of Good Hope, where, in 1878, he was elected a Member of the Legislature for the division of Colesberg, almost simultaneously with his appointment as Attorney-General for the Colony during the administration of the late Sir Harle Frere. He resigned that office in 1881, was subsequently elected Leader of the Opposition in the Cape Parliament, and on the retirement of the Ministry then in office, in 1884, he became Prime Minister of the Cape Colony; that position he resigned, in 1886, but elected to hold the office of Attorney-General, which position he still occupies. He was a Member of the Commission appointed to inquire into the Native Laws and Customs of the Cape Colony; is interested much in the defence of the important post of the Cape; and is Lieut.-Colonel, commanding a volunteer regiment in Cape Town. He is also one of Her Majesty's Counsel for the Colony, and was one of the delegates to the Historic Colonial Conference in 1887.

## V.

**YAMBÉRY**, Professor Arminius, born at Duna-Szerdahely, in Hungary, in 1832, of very poor parents, was at an early age obliged to leave the shelter of the paternal roof and seek his own livelihood. He studied in the Latin school of Pressburg, and devoted his leisure hours to the study of foreign languages. In order to complete his knowledge of oriental languages, he went to the East; and, taking up his residence in Constantinople, visited many parts of the East, and travelled in the disguise of a dervish, by routes unknown to Europeans, through the deserts of the Oxus to Khiva, and thence by Bokhara to Samarcand, in 1861-64. His "Travels and Adventures in Central Asia" appeared in London in 1864. He has been appointed Professor of Oriental Languages at the University of Pesth. From that town he has for many years written frequent letters to the *Times* and other English papers, warning England against the designs of Russia. He has more than once visited England on a lecturing tour; the last occasion being in 1885, when he was in London at the same time as M. Lessar, whose diplomacy he endeavoured to counteract. His more recent works are "Cagatal Language," and an account of his "Wanderings and Adventures in Persia," 1867; "Sketches of Central Asia," 1868; "Uigur Linguisti-

cal Monument," 1870; "History of Bokhara from the Earliest Period down to the Present," 1873; "Central Asia and the Anglo-Russian Frontier Question," 1874; "Mahomedanism in the Nineteenth Century," 1875; "Sketches of Manners and Costumes in Oriental Countries," 1876; "Etymological Dictionary of the Turco-Tartar Languages," 1878; "Primitive Civilisation of the Turco-Tartar Peoples," 1879; and "Theilumiano," 1885. An interesting account of his "Life and Adventures," written by himself, with a dedication to the boys of England, was published in English in 1889.

**VAPEREAU, Louis Gustave**, author, born at Orleans, April 4, 1819, studied at the seminary and college of his native city, and, in 1838, carried off, at a competition between all the colleges of France, the prize for Philosophy, established by M. de Salvandy. Admitted into the Normal School, he applied himself to various studies, with a special view to teaching philosophy. On quitting that establishment he remained a year in Paris, and in 1842 became Private Secretary to M. Victor Cousin, whom he assisted in his "*Pensées de Pascal*." He presided over a class on Philosophy at the College of Tours in 1843, and defended philosophy, violently attacked in a treatise entitled "*Du Caractère Litéral, Moral, et Religieux de la Philosophie Moderne*," published in 1844. Though his course of lectures was frequently denounced, he retained his professional chair for ten years, and, in addition, presided over the German course at the same college for five years, and began to study law. In consequence of the restrictions with which the teaching of philosophy was fettered, in 1852, M. Vapereau repaired to Paris, completed his law studies, and became "avocat" in 1854. About that time Messrs. Hachette intrusted to him the direction of the "*Dictionnaire des Contemporains*," which occupied his whole attention for four years, the first edition appearing in 1858. M. Vapereau continued to labour at this great undertaking, and the "Supplément" was published in 1859; a new edition of the work, revised and considerably augmented, in 1861, the "Supplément" to the new edition in 1863, the third edition, in a great measure rewritten, in 1865, the fourth edition in 1870, and the fifth edition in 1880, with a "Supplément" in 1886. Since 1859, M. Vapereau has issued yearly "*L'Année Littéraire et Dramatique*," an annual review of the principal productions of

French literature, and the tenth volume contains a general table of the ten previous years. M. Vapereau subsequently brought out another important work, a "*Dictionnaire Universel des Littératures*." He was nominated Prefect of the Cantal by the Government of the National Defence in Sept., 1870. He was Prefect of the department of Tarn-et-Garonne, from March 26, 1871, till March 31, 1873. He returned to the University as Inspector-General of Public Instruction (primary education), Jan. 23, 1877, and he was decorated with the Legion of Honour, Feb. 7, 1878.

**VAUGHAN, The Very Rev. Charles John**, D.D., Dean of Llandaff, and Master of the Temple, is the son of the late Rev. R. T. Vaughan, Vicar of St. Martin's, Leicester. Born in 1816, he was educated at Rugby and at Trinity College, Cambridge, where he closed a brilliant collegiate career by taking his B.A. degree in 1838 as Senior Classic and Chancellor's Medallist, being bracketed with Lord Lyttelton. He was elected to a Fellowship at Trinity College in 1839, and having held the living of St. Martin's, Leicester, for three years, became Head Master of Harrow School in 1844; and held that post till the close of 1859, when he resigned. Early in 1860 he was offered, but refused, the Bishopric of Rochester, and shortly afterwards was appointed to the Vicarage of Doncaster, which he held until 1869, when he was appointed to the Mastership of the Temple. In 1870 he was appointed Dean of Llandaff. This appointment did not vacate the Mastership of the Temple. In May, 1882, Dr. Vaughan was appointed one of the Deputy Clerks of the Closet in Ordinary to Her Majesty. He has published "*Memorials of Harrow Sundays*," "*Temple Sermons*," "*University Sermons*" (Oxford and Cambridge), "*Lectures on the Revelation of St. John*," "*Lectures on the Epistle to the Philip-pians*," "*Epistle to the Romans*" (with notes), "*Heroes of Faith*" (Hebrews xi.), "*The Church of the First Days*" (Lectures on the Acts), "*Epistle to the Philip-pians*" (for English Readers), "*Epistle to the Hebrews*" (with Notes), "*Christ Satisfying the Instincts of Humanity*," "*Twelve Discourses on Liturgy and Worship*," "*Notes for Lectures on Confirmation*," and a long series of other works.

**VAUGHAN, The Right Rev. Herbert**, D.D., Roman Catholic Bishop of Salford, oldest son of the late Lieut.-Colonel Vaughan of Courtfield, Herefordshire, born at Gloucester, April 15, 1832, re-

ceived his education at Stonyhurst College, Lancashire, on the Continent, and in Rome. He founded, and is still President-General of, St. Joseph's Foreign Missionary College, Mill Hill, Middlesex, and towards the close of the year 1871 accompanied to Maryland the first detachment of priests who were sent from that institution on a special mission to the coloured population of the United States. On the death of Bishop Turner, he was elected Bishop of Salford, and consecrated in his cathedral by the present Cardinal Archbishop of Westminster, Oct. 28, 1872. Since that time he has published a series of pastoral letters. Bishop Vaughan, who has acquired a considerable reputation as a preacher, has published several pamphlets, and is the proprietor of the *Tablet* newspaper and of the *Dublin Review*.

**VEITCH, Professor John, M.A., LL.D.,** born at Peebles, N.B., Oct. 21, 1820, received his early education at the Grammar School, and in 1835 entered the University of Edinburgh, where he gained honours, especially in logic and moral philosophy. In 1850 he published a translation of the "Discourse on Method," of Descartes, with an introductory essay on the nature of the Cartesian philosophy, and in 1853 a translation of the "Meditations," and selections from the "Principles of Philosophy," of Descartes, with notes. In 1855-6 he acted as assistant to the late Sir W. Hamilton, Professor of Logic and Metaphysics in the University of Edinburgh, and to his successor, Professor Fraser, until 1860, when he was appointed to the Professorship of Logic, Metaphysics, and Rhetoric in the University of St. Andrews. Professor Veitch, who in 1867 was presented with the honorary degree of M.A. by the University of Edinburgh, acted as joint editor with Professor Mansel of Oxford in superintending the publication of the "Lectures on Metaphysics and Logic of Sir W. Hamilton, Bart.," published in 1850-60. He wrote the "Memoir of Dugald Stewart," in connection with the new edition of his collected works, upon which Sir W. Hamilton was employed at the time of his death, after which this publication was superintended by Professor Veitch, at the request of the Stewart trustees. In 1864 Mr. Veitch was appointed to the Professorship of Logic and Rhetoric in the University of Glasgow. He has written a "Memoir of Sir W. Hamilton," 1839. In 1872 he received the honorary degree of LL.D. from the University of Edinburgh. He is the author of "The Tweed and other

Poems," 1875; "Lucretius and the Atomic Theory," 1875; "The History and Poetry of the Scottish Border," 1877; "Descartes," new edition with new introduction, 1879; "Hamilton" in the Blackwood Series of Philosophical Classics, 1882; "The Philosophy of Sir W. Hamilton," two lectures delivered before the Philosophical Institution, Edinburgh, 1881; "Institutes of Logic," 1885; "The Theism of Wordsworth," "Transactions of Wordsworth Society," 1888; "The Feeling for Nature in Scottish Poetry," 2 vols., 1887; "Merlin and other Poems," 1889; "Knowing and Being," 1889.

**VENN, John, Sc.D., F.R.S.,** is the eldest son of the late Rev. Henry Venn, Prebendary of St. Paul's, who was for many years Hon. Sec. of the Church Missionary Society. He was born at Hull, Aug. 4, 1811, and was educated at the Grammar School, Highgate, the Islington Proprietary School, and afterwards at Caius College, Cambridge, where he graduated in 1837, and obtained a Fellowship in the same year. He took Orders in 1838, and for some years held curacies at Cheshunt, Herts, and Mortlake, Surrey; but later (in 1843) he abandoned the clerical calling. Since 1862 he has resided mostly at Cambridge, being Lecturer in Moral Sciences at Caius College, and frequently an Examiner in the same subjects in the university. In 1869 he held the office of Hulsean Lecturer. In 1883 he was elected a Fellow of the Royal Society. He is the author of "Logic of Chance," 1860, 1876, 1888; "Symbolic Logic," 1880; "Empirical Logic," 1889; and various papers in scientific and other periodicals. He married, June 21, 1867, Susanna Carnegie, oldest daughter of the Rev. C. W. Edmonstone, M.A.

**VENTRIS, The Right Hon. Lord,** eldest son of Mr. Thomas Flint Field, of Fielden, Bedfordshire, was born in 1813. He was educated at Burton Grammar School, in Somersetshire, and was at first articled to Messrs. Terroll, Barton, and Smale, solicitors, of Exeter, but was afterwards with Messrs. Price and Bolton, of Lincoln's Inn. He practised in that branch of the profession in London from 1840 to 1843, as one of the firm of Thompson, Dabenhams, and Field, of Salters' Hall Court; but from 1843, having entered himself as a member of the Inner Temple, and reading in the chambers of Mr. T. Kingdom, of the Western circuit, he prepared for the Bar. He began in 1847 to practise under the Bar as a special pleader. In 1850 he was

called to the Bar, and joined the Western circuit. This he afterwards exchanged for the Midland, where he gained a large practice, as well as in London, both in commercial cases at Guildhall and before the Privy Council. In 1864 Mr. Field was appointed a Queen's Counsel, and was elected a Bencher of the Inner Temple. He became Lord of the Midland circuit, besides practising largely before the Judicial Committee and Railway Commission, and other tribunals. Mr. Field was nominated a Justice of the Queen's Bench Division in the High Court of Judicature in Feb. 1875, and shortly afterwards he received the honour of knighthood. On his retirement from the Bench in Feb., 1890, he was created a peer.

**VERBEEK**, Reinier Dirk M., mining engineer, was born at Maarsse, Holland, Sept. 5, 1841, studied at the University of Liège, Belgium, and at the Mining Academies of Clausthal, Hannover, and Freiberg, Saxony, whence he received his degree of Mining Engineer in 1861. He is the author of several papers on the mining laws of the Netherlands, and on the mineral wealth of the Indian Archipelago, and was the first to draw public attention to the occurrence of gold in workable quantities in the Isles of Sumatra and Borneo. For many years he has resided in the Dutch East Indies, and in 1875 became Superintendent of the Geological Survey of Sumatra, and as such has published important maps and memoirs. When the Krakatau eruption occurred, he was naturally selected by the Government as head of the commission appointed to examine and report upon the geological and other phenomena of that great convulsion; the report, and splendid atlases of maps, sections, and drawings which he subsequently issued are permanent proofs of his energy and ability. M. Verbeek is *Ingenieur-en-chef des Mines*, and *Chevalier du Lion Néerlandais*.

**VERDI**, Giuseppe, composer, is the son of an innkeeper, born at Roncole, in the duchy of Parma, Oct. 9, 1814, received his first lessons from an organist in Milan, where he resided from 1833 till 1836; studied diligently under Lavigna, and in 1839 published his earliest work, a musical drama, entitled "Oberto di San Bonifazio." His principal compositions are serious operas, and the "Lombardi," one of his first productions, made a strong impression throughout Italy, and laid the foundation of his fame. His best known operas are "Nabuccodonosor," "Ernani"

(founded on Victor Hugo's tragedy), the "Due Foscari," "Attila," "Macbeth," the "Masnadieri" (founded on the "Robbers" of Schiller), "Lionisa Miller," "Rigoletto," the "Trovatore," "La Traviata," "Un Ballo in Maschera" (performed in London in 1861), and "Don Carlos" (performed at the Royal Italian Opera, Covent Garden, in 1867). The "Masnadieri," written for Her Majesty's Theatre, and produced in 1847, with Jenny Lind as heroine, proved a failure in London, though it has since been successful in Italy. The "Trovatore" and "La Traviata" have had great success, not only in Italy, but in Germany, France, and England. Signor Verdi's more recent operas are "Giovanni d'Arco," in 1868; "La Forza del Destino," in 1869; and "Aida," performed at the Scala, Milan, in 1872. His celebrated "Requiem Mass," composed in honour of his great countryman Manzoni, was first performed in the Church of San Marco at Milan, May 23, 1874. He was elected a member of the Italian Parliament in 1861, and in 1871 he went to Florence in order to assume the post offered him by the Italian Minister of Public Instruction, for the improvement and reorganisation of the Italian Musical Institute. M. Verdi, who is a member of the Legion of Honour, was elected corresponding member of the Académie des Beaux Arts, Dec. 10, 1859; was made Grand Cross of the Russian order of St. Stanislaus in 1862; Foreign Associate of the Académie des Beaux Arts, June 15, 1864; and Grand Officer of the Order of the Crown of Italy in 1872, in which year the Viceroy of Egypt conferred on him the Order of Osmani. King Victor Emmanuel, by a decree dated Nov. 22, 1871, created Signor Verdi an Italian Senator. In May, 1875, he was nominated a Commander of the Legion of Honour, and the Italian Minister at Paris was charged to present him with the insignia of the order, accompanied by a flattering letter from the Duc de Saxe. In the same year he was decorated with the Cross of Commander and Star of the Austrian Order of Franz-Joseph. Signor Verdi completed, in 1878, a new opera in 5 acts, entitled "Montezuma," which was given for the first time at La Scala, Milan. This was followed in 1887 by "Otello." On his return from Paris to his native country, in April, 1880, he received the Order of the Crown of Italy.

**VERDON**, Sir George Frederic, K.C.M.G., C.B., F.R.S., is the eldest son of the Rev. Edward Verdon, B.A., perpetual curate of St. Ann's, Tottington, Bury, Lancashire

was born Jan. 21, 1831, and educated at Rossall College, went to Melbourne in 1851, and engaged in commercial pursuits. He was afterwards called to the Bar at Melbourne in 1863, was elected to the Municipal Council of Williamstown, and appointed Chairman. He was one of the first members of the Volunteer force established in 1861 for the defence of the colony, and at the head of his company was engaged in suppressing an outbreak of convicts in 1857; and received the thanks of the government and of the Commander-in-Chief for this service. In 1859 he was elected member for Williamstown, and in the following year became a Minister of the Crown, having been appointed Treasurer, which office he held with little interruption until 1868. As Honorary Secretary to the Board of Visitors of the Astronomical Observatory, and as a member of the Government, he was enabled to secure the satisfactory establishment of the Observatory on a permanent footing, and to aid in the acquisition of a complete set of instruments, of which the Great Melbourne Telescope forms part. In 1866 the Government and Legislature of Victoria resolved upon sending a Minister of the Crown to England for the purpose of bringing the subject of the defence of the colony before the Home Government, and Mr. Verdon was selected for the mission, in which he was completely successful. He received the decoration of C.B. for this service. Shortly after his return to Victoria, Mr. Verdon was appointed the permanent representative of that colony in England as agent-general, with the consent of all political parties. He was elected F.R.S. in 1870, and an associate of the Institute of Civil Engineers. He was nominated a K.C.M.G. on the occasion of his retiring from the office of Agent-General for the Colony of Victoria in 1872. He has been for many years President of the Trustees of the Public Library, Museum, and National Gallery of Victoria; and was the official representative of the British Royal Commission of the International Centennial Exhibition held at Melbourne 1888-89; and was presented by the Commission with a silver writing service, "in recognition of the great public services which he rendered as their representative."

**VERNE, Jules**, a popular French writer, born at Nantes, Feb. 8, 1828, was educated in his native town, and afterwards studied law in Paris. Turning his attention to dramatic literature, he wrote a comedy in verse, entitled "*Les Pailles Rompues*,"

which was performed at the Gymnase in 1850. This was followed by "*Onze Jours de Siège*," a three-act comedy, brought out at the Vandeville, and "*L'Oncle d'Amérique*," and by several comic operas. But his fame rests chiefly on his scientific romances, the first of which appeared in 1863, under the title of "*Cinq Semaines en Ballon*." Its success led the author to produce many similar works, now numbering nearly 60, of which the following have been translated into English, and other languages, even into Japanese and Arabic: "*Five Weeks in a Balloon*," a Voyage of Exploration and Discovery in Central Africa," 1870, 2nd edn., 1874; "*A Journey to the Centre of the Earth*," 1872; "*Twenty Thousand Leagues under the Sea*," 1873; "*Moridiana: the Adventures of three Englishmen and three Russians in South Africa*," 1873; "*From the Earth to the Moon direct in Ninety-seven Hours Twenty Minutes; and a Trip Round it*," 1873; "*The Fur Country: or Seventy Degrees North Latitude*," 1874; "*Around the World in Eighty Days*," 1874; "*A Floating City, and the Blockade Runners*," "*The English at the North Pole*," "*Dr. Ox's Experiment*," 1874; "*Adventures of Captain Hatteras*," "*The Mysterious Island*," "*The Survivors of the Chancellor*," 1875; "*Michael Strogoff, the Courier of the Czar*," 1876; "*The Child of the Cavern*," "*Hector Servadac, or the Career of a Comet*," 1877; "*Dick Sands, the Boy Captain*," 1878; "*Le Rayon Vert*," 1882; "*Kéraban-le-têtu*," 1883; "*L'étoile du sud*," "*Le Pays des Diamants*," 1884; "*L'Archipel en feu*," "*Le Billet de Loterie*," "*Robur le Conquérant*," "*Le Chemin de France*," "*Deux ans de Vacances*," 1888; "*Famille sans nom*," 1889; "*Mathias Sandorf*," "*Nord contre Sud*," "*César Casenbel*," and "*The Purchase of the North Pole*," 1890.

**VERNEY, The Right Hon. Sir Harry**, born in 1801, is the eldest son of General Sir Harry Calvert, the first baronet. He was educated at Harrow, and at the Royal Military College. He succeeded his father in 1826, and assumed the name of Verney in 1827 on inheriting the estates of Mary Verney, Baroness Fernanagh. Early in 1818 he went to Stuttgart, attached to the mission of Sir Brook Taylor, British Minister at the Courts of Württemberg and Baden. He entered the army in 1819, served in the 7th Fusiliers, and in the Grenadier Guards, and retired, in 1830, with the rank of Major. From 1832 to 1841 he represented Buckingham in Parliament; Bedford, from 1847 to 1852, and Buckingham, again, from 1857 to 1874, and

from 1880 to 1885. In 1858 he married, for the second time, the eldest daughter of William Edward Nightingale, Esq., of Lea Hurst, Derbyshire, sister of Miss Florence Nightingale. Lady Verney has distinguished herself as an authoress. Sir Harry Verney's eldest son, Captain R. H. Verney, sat as Liberal member for North Buckinghamshire, he was defeated at the general election of 1886, but when in 1889 Mr. Egerton Hubbard became Lord Addington, Captain Verney regained the seat.

**VEZIN, Hermann**, actor, was born in 1829 in Philadelphia, U.S., of German parents, his father being a distinguished merchant of that city. He was intended for the legal profession, and took the degrees of B.A. and M.A. at the University of Pennsylvania. Having a passion for the stage, he came to England, and obtained, through the kindness of Mr. Charles Kean, an engagement in the Theatre Royal, York. He made his London *début* at the Princess's Theatre under Mr. Charles Kean's management. Having visited America professionally in 1857, he returned to England a year later, and after a few provincial engagements, appeared at the Surrey Theatre, London (1859), as Hamlet, Macbeth, Othello, Shylock, King John, and Louis XI. During Mr. Phelps's management of Sadler's Wells (1860), Mr. Vezin appeared as Orlando, Maro Antony, Romeo, and Cassio. In 1861 they produced Westland Murston's comedy of "Donna Diana," at the Princess's Theatre, London. In 1870 he alternated Othello and Iago with Mr. Phelps. Later he produced Mr. W. G. Wills's romantic drama "Hinko," at the Queen's Theatre. In 1873 Mr. Vezin played with Phelps, Toole, and Mathews, at the Gaiety Theatre. At Drury Lane, 1876, he played Macbeth for the benefit of the Philadelphia Centennial. On the production at the Crystal Palace, 1876, of Sophocles' "Edipus Colonus," the title part was assigned to Mr. Vezin. On Sept. 11, 1876, he made his first appearance at the Haymarket, in Mr. W. S. Gilbert's drama of "Dan'l Druce." After acting Dan'l Druce 106 times, he created the character of De Tuldé in an English adaptation of "The Danichofsky," produced at the St. James's Theatre, 1877. In 1878 he first played, at the Court Theatre, Dr. Primrose in Mr. W. G. Wills's drama of "Olivia," founded on the "Vicar of Wakefield." Since that time Mr. Vezin has constantly acted both in London and the provinces. In 1868 he married Mrs. Charles Young.

**VIARDOT-GARCIA, Madame Michelle Pauline**, vocalist, daughter of the great tenor, Emmanuel Garcia, and sister of the lamented Madame Malibran, born in Paris, July 18, 1821, at four years of age spoke four languages, and at seven was able to play the pianoforte accompaniments for the pupils to whom her father gave lessons. After sharing the family migrations, first to England, and afterwards to the United States, she returned to Europe in 1828, and her education was continued at Brussels. In consequence of her unusual facility on the piano, she became one of Liszt's most accomplished pupils. Her father died in 1832 before her voice was formed, and her sister being constantly absent on professional tours, her studies, which included various branches of the arts, drawing and painting, as well as music and singing, were directed by her own tastes and the counsels of her mother. She made her first appearance in London at the Opera-house in 1839, in the character of Desdemona. Her voice, like that of her sister, combined the twofold register of soprano and contralto, embracing a compass of three octaves. At the close of the season she joined the Italian operatic company, then acting at the Odéon, in Paris, and was equally successful. In 1841 she reappeared in England, singing with Mario in Clamassi's opera "Gli Orzi e Gurinzi." Her next engagement was at Vienna; and Rubini, on forming an operatic corps for St. Petersburg, selected her for his prima donna. She afterwards appeared at Berlin, and when Jenny Lind quitted the German Opera, Madame Viardot-Garcia proved herself an able successor in the *repertoire*, which she greatly extended. Her name is associated with the first performances of "Les Huguenots," in which she took the part of Valentine, and of "Le Prophète," in which she performed the part of Fides, an exquisite impersonation. Madame Viardot is also celebrated for her singing of Spanish songs. She retired from the stage in 1862, and devotes herself to composition. In April, 1810, she was married to M. Louis Viardot, Director of the Paris Italian Opera (he died in May, 1883).

**VICTORIA ALEXANDRINA** (Queen of Great Britain and Ireland, and Empress of India), only child of the late Duke of Kent and of the Princess Louise-Victoria of Saxo-Coburg (relict of the Hereditary Prince of Leiningen, and sister of Leopold, Prince of Saxo-Coburg, afterwards King of the Belgians), was born at Kensington Palace, May 24, 1819; her

parents, who had been for some time residing abroad, having hastened to England in order that their child might "be born a Briton." The Duke of Kent died Jan 23, 1820, and the general education of the young Princess was directed, under her mother's care, by the Duchess of Northumberland, wife of the third Duke. Until within a few weeks of her elevation to the throne her life was spent in comparative retirement, varied by tours through different parts of the United Kingdom. Queen Victoria succeeded her uncle, William IV., June 20, 1837, as Victoria I., and her coronation was celebrated in Westminster Abbey, June 28, 1838. Her Majesty was married Feb. 10, 1840, to his late Royal Highness Prince Albert of Saxe-Coburg Gotha, by whom Her Majesty had issue: 1. H.R.H. Victoria Adelaide Mary Louise, Princess Royal, born Nov. 21, 1840, married Jan. 25, 1858, to H.R.H. the Crown Prince Frederick William of Prussia (he died June 16, 1888); 2. H.R.H. Albert Edward, Prince of Wales, born Nov. 9, 1841, married, March 10, 1863, the Princess Alexandra of Denmark; 3. H.R.H. Princess Alice Mary, born April 15, 1843, married July 1, 1862, to Prince Louis of Hesse-Darmstadt (H.R.H. died Dec. 11, 1878); 4. H.R.H. Prince Alfred Ernest Albert, born Aug. 6, 1841, created Duke of Edinburgh, May 21, 1866, married, Jan. 23, 1874, the Grand Duchess Marie Alexandrovna, sister of the present Emperor of Russia; 5. H.R.H. Princess Helena Augusta Victoria, born May 26, 1846, married July 5, 1866, to Prince Christian of Schleswig-Holstein; 6. H.R.H. Princess Louise Caroline Alberta, born March 18, 1848, married to the Marquis of Lorne, March 21, 1871; 7. H.R.H. Prince Arthur William Patrick Albert, Duke of Connaught, born May 1, 1850, married, March 17, 1870, the Princess Louise Margaret Alexandra Victoria Agnes, third daughter of Prince Frederick Charles of Prussia; 8. H.R.H. Prince Leopold George Duncan Albert, Duke of Albany, born April 7, 1853, married, April 2, 1882, the Princess Helen Frederica Augusta, daughter of the Prince of Waldeck and Pyrmont (H.R.H. died March 28, 1884); and 9. H.R.H. Princess Beatrice Mary Victoria Feodora, born April 14, 1857, married July 23, 1885, to Prince Henry Maurice of Battenberg. The first domestic grief which Her Majesty suffered was the loss of her mother, the Duchess of Kent, after a short illness, March 16, 1861, followed by the sudden death of the Prince Consort, to the great grief of the entire kingdom, Dec. 14 in the same year. Her Majesty's

intense sorrow for her irreparable loss, although it has in a great degree disqualified her from appearing in public, and in court ceremonies, and has imposed on her the habits of a life of comparative seclusion, has, however, never been allowed by her to interfere with the performance of her important duties as a sovereign. Neither has it checked the exercise of that anxious interest which Her Majesty has ever since her accession to the crown steadfastly manifested for the social welfare of her people. It is a source of great pride to her subjects, and must doubtless tend in no small degree to assuage Her Majesty's abiding grief, that not only in her own vast dominions, but throughout the civilised world, Her Majesty's name is never mentioned save in terms of sympathy, affection and respect, as a Christian woman and as a queen. It would occupy much more space than our limits admit to give even a brief outline of the political events of Her Majesty's reign, and we can therefore merely glance at its more prominent features. On succeeding to the throne, Her Majesty found the Whig and Conservative parties nearly evenly balanced in the House of Commons. Lord Melbourne and his colleagues continued to hold office until Sept., 1841, when, owing to their increasing unpopularity, arising mainly from a want of financial ability, or at least of financial success, they were obliged to give place to the late Sir Robert Peel. Although he was pledged to maintain the corn-laws, he found himself compelled, in 1845, to acquiesce in their repeal, which was carried into effect at his instance in 1846. The effect of this change in Sir Robert Peel's policy caused a disruption in the Conservative party, and led to the accession to power of Lord John Russell, who was succeeded, in Jan., 1852, by the Earl of Derby. In the following Dec. the Conservative party, beaten on their budget, resigned, and gave place to Lord Aberdeen and the Coalition Cabinet, which in Feb., 1855, was dismissed for having mismanaged the Russian War. It was succeeded by Lord Palmerston's first administration, which was defeated on the Conspiracy to Murder Bill, in March, 1858, and Lord Derby held power for the second time, until June, 1859, when Lord Palmerston formed his second Cabinet. On his death, Nov., 1865, the ministry was remodelled, Earl Russell assuming the post of Premier. His ministry having decided upon introducing a Reform Bill, the duty of conducting it through the House of Commons de-

volved upon Mr. Gladstone. Having been defeated on an important clause in June, 1866, ministers resigned. Lord Derby formed his third administration, and during the session of 1867 carried a Reform Bill, thereby settling a question which had long been a stumbling-block impeding the progress of legislation. The Conservatives being placed in a minority at the general election of 1868, Mr. Disraeli resigned office, and was succeeded as Prime Minister by Mr. Gladstone. The chief events of Mr. Gladstone's administration were the disestablishment of the Irish Church, the passing of the Irish Land Act, and the Elementary Education Act, the abolition of purchase in the army, the negotiation of the Treaty of Washington respecting the Alabama Claims, and the passing of the Ballot Act. At the general election of Feb., 1874, the Conservatives again came into power, and a new administration was formed by Mr. Disraeli, afterwards Lord Beaconsfield. By virtue of the power conferred by an Act of Parliament passed in the previous session, Her Majesty was, on Jan. 1, 1877, proclaimed Empress of India, by the Governor-General, at the durbar at Delhi, before an imperial assemblage of all the governors, lieutenant-governors, heads of Government, princes, chiefs, and nobles of India. On the defeat of the Conservatives at the general election of 1880, Mr. Gladstone formed another Liberal administration, which continued in office until June, 1885, when it was succeeded by a Conservative Government under Lord Salisbury. After the general election of Nov., 1885, the Liberals again came into power, and the spring of 1886 was devoted by Mr. Gladstone to the consideration of the Irish question. His Home Rule Bill, however, met with so much opposition that the government decided to appeal to the country, and the result of the general election of July, 1886, was an immense Conservative majority. Lord Salisbury's second government came into power on Aug. 3, 1886. In April, 1882, an attempt on the Queen's life was made at Windsor by one Roderick Maclean, who after trial was ordered to be confined during Her Majesty's pleasure. "The Early Days of His Royal Highness the Prince Consort," compiled under the direction of Her Majesty, by Lieut.-General the Hon. C. Grey, was published in July, 1867, and was followed, in 1869, by "Leaves from the Journal of our Life in the Highlands;" and in 1874, by the first volume of Mr. (now Sir) Theodore Martin's "Life of H.R.H. the Prince Consort," of which the fifth and concluding volume appeared in

1880. In 1885, Her Majesty published a second volume, entitled "More Leaves from the Journal of our Life in the Highlands." In 1887, Her Majesty celebrated the Jubilee of her accession to the throne. A Thanksgiving Service was held in Westminster Abbey, and was attended by Her Majesty and all the Royal Family, the Indian Princes, the King of Denmark, the King and Queen of the Belgians, the King of Saxony, the King of the Hellenes, the Crown Prince of Austria, the Crown Prince of Portugal, the Infante Don Antonio of Spain, Prince Ludwig of Baden, the Crown Prince of Greece, the Grand Duke of Saxe-Weimar, the Queen of Hawaii, with her attendants in cloth of gold, and representatives from every nation upon earth. The service in the Abbey was conducted by His Grace the Archbishop of Canterbury, in the presence of 10,000 spectators.

**VILAS, William F.**, Postmaster-General of the United States, was born at Chelsea, Vermont, July 9, 1840. The family removed to Madison, Wisconsin, in 1851, and he graduated from the Wisconsin State University in 1858, and from the Albany (N.Y.) law school in 1860. He entered the Federal Army at the outbreak of the Civil War, and soon rose to the rank of Colonel. Since the close of the war, he has been a successful and prominent lawyer in Wisconsin. He was a member of the State Legislature in 1881-85, and chairman of the National Democratic Convention which nominated Mr. Cleveland to the Presidency in 1881. On March 5, 1885, he was appointed Postmaster-General.

**VILLIERS, The Right Hon. Charles Pelham, P.C.**, brother of the late Earl of Clarendon, born Jan. 10, 1802, and educated at St. John's College, Cambridge, was called to the Bar, at Lincoln's Inn in 1827. He has been an examiner in the Court of Chancery and a Poor-Law Commissioner, a Magistrate and Deputy-Lieutenant for Hertford, and has been one of the members in the House of Commons for Wolverhampton since 1835. He joined the Liberal Government, and was appointed Judge-Advocate-General in 1853, was President of the Poor-Law Board, and became a member of Lord Palmerston's second Administration in 1859. Mr. Villiers, as an independent Liberal member, was one of the most able and eloquent leaders of the anti-corn-law agitation, and to the triumph of the cause his earnest speeches and persistent motions in Parliament con-

tribute. Having been at the general election in 1817 returned for South Lancashire and Wolverhampton, he refused to abandon his old constituents. In the session of 1865 he introduced a very important measure in connection with the poor-law administration, the Union Chargeability Bill, which was carried through Parliament, and has become law. He resigned the Presidency of the Poor-law Board in July, 1866. A marble statue of Mr. Villiers was unveiled by Earl Granville in Wolverhampton on June 6, 1879. The unveiling was preceded by a meeting under the presidency of the mayor in the Agricultural Hall, where speeches in eulogy of the public services of Mr. Villiers, especially in connection with the anti-corn-law movement, were delivered by Earl Granville, Sir Robert Peel, M.P., Mr. Staveley Hill, M.P., and Mr. Alderman Fowler. At the last two general elections Mr. Villiers has been returned unopposed for Wolverhampton. He is the oldest member in the House of Commons.

**VILLIERS, Frederic**, born in London in 1852, was educated in the north of France. Afterwards he studied in the Schools of Art at South Kensington, and became a student of the Royal Academy in 1870. In 1876, as special artist and correspondent to the *Graphic*, he went through the Serbian Campaign with Mr. Archibald Forbes. He was with the armies of the Timok, Drina, Elber, and with Tchernieff on the Morava; was decorated with the Order of the Takova, and received a war medal for this campaign; was recalled in November to Constantinople. He then travelled in Rumania and Bulgaria, examined the Turkish army, re-crossed the Serbian lines and returned with the Turkish troops to Constantinople. Having been ordered to go into Russia, he, in January, started for Kishineff, and saw the mobilization of the Russian troops in Bessarabia. Mr. Villiers returned to England in Feb., 1877. The day on which war was declared between Turkey and Russia, he started for Bucharest, where he joined Mr. Forbes, and was present at all the chief engagements. When the armistice was declared, he was the only English correspondent who accompanied the Russian army to enter Constantinople, and was present at San Stefano when peace was signed and announced to the Russian Guard by the Grand Duke Nicholas on Sunday, March 3, 1878. Mr. Villiers received the Cross for the passage of the Danube and the war medal. In

June of that year he went to Malta, and was present at the review of the Indian Contingent by the Duke of Cambridge. In November he left England for Afghanistan. He went through the first part of that campaign till the signing of the Treaty of Candamak; then left for Australia; was at the opening of the Sydney Exhibition; travelled through New Zealand, and returned to England via San Francisco and New York, thus making a journey round the world. Mr. Villiers left England for Egypt immediately on receipt of the news of the massacres at Alexandria, of the 11th of June, 1882; was on H.M.S. *Condor* during the bombardment of that city; and landed with the Marines. Afterwards he followed the army to Ismailia; was at the first fight at Tel-el-Mahouta, and was with the Highland Brigade during the night march and subsequent attack on Tel-el-Kebir. Mr. Villiers remained in Cairo till the trial and banishment of Arabi and his confederates. He received for this campaign the order and rosette of the Medjidieh, and the Egyptian war medal from the hands of the Khedive. In May, 1883, he was one of the English correspondents, invited to attend the coronation of the Czar at Moscow; received silver medal and badge. In February, 1884, Mr. Villiers left Suakin, to join General Graham, who had gone to avenge the defeat of General Baker at the first battle of Foh. Mr. Villiers was present at the Arab defeat at the second battle of Foh. On March 13, he was at the battle of Fumai, and subsequently, as special correspondent of the *Daily News*, accompanied Admiral Sir W. Hewitt on his mission to the court of King John of Abyssinia. In the autumn of 1884 and the spring of 1885, Mr. Villiers was with the Nile Expedition for the relief of Khartoum, being present at the battles of Abu-Klea and the advance upon Metemmeh. Returning to England, he started almost at once for Ireland, where he witnessed the manoeuvres of the Revolutionary Squadron in Bantry Bay, in June, 1885. A period of rest followed, and in November, 1885, Mr. Villiers started for Serbia, and was with the Serbian forces at all the chief encounters with the Bulgarians. An armistice being declared, he started on his homeward journey. At Venice, he found a telegram from the proprietors of the *Graphic*, telling him to go to Barmah. He accomplished the journey from Venice to Rangoon in one month—arriving just in time to accompany Lord Dufferin on his journey up the Irrawaddy to Mandalay. When Lord Dufferin returned to India, Mr. Villiers left for Constantinople to

await the development of events in the Balkan Peninsula. He eventually joined the Greek army and was in Athens during the blockade of the Greek Ports. As a peaceful solution of the Turko-Greek question took place, Mr. Villiers returned to England. Since 1887 he has been lecturing in England, the United States and Canada, on his varied experiences during the last decade. In August, 1889, Mr. Villiers was invited by the Governor-General of Canada to accompany his Excellency on his official tour through the Dominion, and journeyed from the Atlantic to the Pacific coast over the Canadian Pacific Railroad, visiting all the principal towns and Indian reservations of the far west.

**VINCENT, Charles Edward Howard**, C.B., was born May 31, 1849, at Slinfold, Sussex, being the second son of the late Rev. Sir Frederick Vincent, 11th Bart. He was educated at Westminster School, and the Royal Military College, Sandhurst. He was appointed Ensign in the 23rd Royal Welsh Fusiliers in 1868; retired as Lieutenant in 1873; and was appointed Captain in the Royal Berks Militia in the latter year; but resigned in 1876 to assume the Lieut.-Colonelcy of the Central London Rangers, which commission he resigned in 1878, on his appointment as Director of Criminal Investigations. He entered at the Inner Temple in 1873; was called to the Bar in 1876; went the South Eastern Circuit; and practised in the Divorce Division; and entered at the Paris Faculté de Droit in 1877. He took over the control of the *Police Gazette* in 1883; and was Chairman of the Metropolitan and City Police Orphanage in 1880-83. Mr. Vincent was Special Correspondent of the *Daily Telegraph* in Berlin in 1871; received the thanks of the War Office for his reports upon Russia in 1872; gave numerous lectures upon Foreign Armies at the Royal United Service Institution between 1872 and 1878; was Military Commissioner of the *Daily Telegraph* at the outbreak of the Turco-Russian War in 1877; and assembled a Conference upon the requirements of the Volunteer Force, leading to considerable reforms, in 1878. He was appointed, March 4, 1878, to reorganise the Detective System of the Metropolitan Police with the designation of Director of Criminal Investigations, and with absolute control over the criminal administration. This post he resigned in 1884, and was appointed Colonel Commandant of the Queen's Westminster Volunteers. In 1888 he was elected to the Metropolitan Board of

Works for St. George's, Hanover Square, and in 1889 was returned unopposed for the same constituency to the first London County Council. He is a magistrate for Middlesex, Westminster, and Berkshire, and a Deputy-Lieutenant for London. In 1885 he was returned as Conservative Member for the Central Division of Sheffield by a majority of 1139, and by 1495 in 1886. In Parliament he is identified with the Fair Trade Movement and Imperial Federation, while Acts for The Probation of First Offenders, Saving Life at Sea, and the Appointment of a Public Trustee, are due to his initiation. In 1880 he was created a Companion of the Bath, and is also a Knight of the Orders of the German Crown and of the Crown of Italy. His published works are "Stoffel's Reports upon the Prussian Army," 1871; "Elementary Military Geography, Reconnoitring and Sketching," 1872; "Russia's Advance Eastward," 1873; "The Law of Criticism and Libel," 1876; "The Improvement of the Volunteer Force," 1878; "Procédure d'Extradition," 1880; "A Police Code and Manual of Criminal Law," 1881; and "A Police Code for the British Empire," 1886. Col. Vincent married, 1882, Ethel Gwentoline, daughter and co-heiress of Gen. Moffatt, Esq., M.P., of Goodrich Court, Herefordshire, and author of "10,000 Miles over Land and Water."

**VINCENT, Sir Edgar**, K.C.M.G., born Aug. 19, 1857, brother of the above, after assisting Mr. Goschen at the embassy at Constantinople, became President of the Public Debt, and, in 1883, was transferred to the important post of Financial Adviser to the Khedive, and now holds the office of Governor of The Imperial Ottoman Bank.

**VINES, Sydney Howard**, was born in London, Dec. 31, 1849. He was educated privately, and began the study of Medicine at Guy's Hospital in 1869, but soon became attracted by purely scientific subjects. Having gained an Open Scholarship at Christ's College, he went up to Cambridge in Oct., 1872. He graduated B.Sc. at the University of London in 1873, and D.Sc. in 1879. He took his Cambridge degree in 1876, and was shortly afterwards elected Fellow and Lecturer of Christ's College. He was elected to a Readership in Botany in 1881, and took his D.Sc. degree at Cambridge in the same year. In 1888 he was elected to the Sherrington Professorship of Botany at Oxford, and was admitted a Fellow of Magdalen College at the same time. He was elected Fellow of the Linnean Society

in 1878, and Fellow of the Royal Society, and an Hon. Member of the Physical Society of Edinburgh in 1885. He has written a book entitled "Lectures on the Physiology of Plants," published by the Cambridge University Press in 1886; and he is an editor and one of the founders of the "Annals of Botany" (published by the Clarendon Press, Oxford).

**VIRCHOW**, Rudolf, a celebrated German pathologist and anthropologist, was born at Schivelbein in Pomerania, Oct. 13, 1821, and studied Medicine at Berlin. In 1849 he was appointed Professor of Pathological Anatomy at Würzburg, and soon became one of the foremost exponents of the so-called Würzburg School. In 1856 he returned to Berlin as Professor; here he did excellent work in the newly-founded pathological institute, which at once became the centre of independent research amongst the younger men of science. He has always taken a great interest in politics, and has contributed important speeches to the parliamentary debates. At the Naturalists' Conference at Innsbruck in 1869, he was one of the founders of the German Anthropological Society. In 1873 he became a member of the Academy of Sciences. He has also taken a great interest in the spreading of scientific knowledge amongst the people, and has been since 1866 part editor of a series of popular lectures, to which he has contributed essays on various historical and scientific subjects. His principal works are: "Cellular Pathology," 11th edn., 1871; "Malignant Tumours," 3 vols., 1863-66; "Collection of Treatises on Scientific Medicine," 1856; "Collection of Treatises on Public Medicine and Epidemiology," 2 vols., 1870; "Zoology as a Naturalist," 1861; "Four Lectures on Life and Illness," 1862; "The Education of Women," 1865; "The Function of Science in the New National Life of Germany," 1871; "Free Knowledge in the Modern State," 1877; and "The Necropolis of Kolon in the Caucasus," 1883. His "Archives of Pathological Anatomy and Physiology, and of Clinical Medicine," founded in 1847, has, lastly, finished the 120th volume.

**VIRTUE**, The Right Rev. John, D.D., Roman Catholic Bishop of Portsmouth, was born in London, April 28, 1826. He was ordained priest in Rome by Cardinal Patrizi in 1851, having previously studied at St. Edmund's College, Hertfordshire, and the English College, Rome. Poplar was the scene of his first missionary labours, and in 1853 he went with the Apostolic Nuncio (afterwards Cardinal)

Bedini as his secretary to the United States and Canada. On his return, in acknowledgment of his services, he was made Chamberlain of Honour to Pope Pius IX., April 18, 1854. Monsignor Virtue went to Aldershot Camp on temporary duty in 1855; but he was appointed Chaplain to the Forces June 24, 1855, a post which he held for twenty-seven years. He was mentioned in general orders in 1861 for "distinguished and meritorious conduct during the epidemic of yellow fever in Bermuda," and was promoted from the fourth to the third class of Army Chaplains (Feb. 2, 1865) for the services he had rendered. Monsignor Virtue was six years stationed at Malta. He was re-appointed Chamberlain of Honour to Pope Leo XIII. April 3, 1878, was appointed the first Bishop of Portsmouth by Apostolic brief of June 13, 1882, and was consecrated by the Cardinal Archbishop on July 25. He has edited a "Prayer Book for the Army," 1859; and a revised edition of Bishop Challoner's "Meditations," 1880; and has contributed various articles to the *Dublin Review* and the *Month*. He represented the English Hierarchy at the Centennial celebration at Baltimore, United States, in 1889.

**VOGEL**, Sir Julius, K.C.M.G., was born in London in 1835. After attending London University School, he became at sixteen a pupil of Dr. Percy's metallurgical laboratory at the Royal School of Mines, where he studied more particularly the chemical art of assaying and testing gold and silver. He went out to Melbourne with a high certificate of proficiency, intending to employ his acquirements in the gold fields of Australia, then lately discovered. Fate, however, had decreed a more extensive field of usefulness for him. He was elected a Member of the Provincial Council, and became head of the Provincial Government, a position he resigned in 1869. He also became a Member of the New Zealand House of Representatives, and removed in 1869 to Auckland. Mr. Vogel joined the ministry of Mr. (now Sir) William Fox, of Wellington, in 1869, taking the office of Colonial Treasurer, Postmaster-General, and, finally, Commissioner of Customs. After acting also as Minister in Mr. Waterhouse's Government, and holding the leadership of the Lower House, Mr. Vogel became Prime Minister at Mr. Waterhouse's resignation, which followed after a few months. He held that office until 1876, when he resigned, because his health was not equal to the arduous duties. He became Agent-General for New Zealand at the end of

1876, and held that office until 1881, when he resigned. He held office as Member of the Government, and head of it, for a period of seven years, with an interval of only four months. Through Sir Julius Vogel's exertions, extended over three years, the Colonial Stocks Act (for inscribing Colonial Stocks) was devised, and finally passed both Houses of Parliament of Great Britain. Lord Carnarvon, in moving the second reading in the House of Lords, specially referred to Sir Julius's services in connection with the measure. Sir Julius Vogel's policy in New Zealand was the means of introducing 100,000 immigrants, and constructing 1,200 miles of railway in the colony during the ten years ending 1881. He visited the colony in 1883 and again in 1881, and joined the Government of Sir Robert Stout, known as the Stout-Vogel Government. He continued in office until the end of 1887, and shortly afterwards returned to England. He was made a C.M.G. in 1871, and the K.C.M.G. was conferred on him in 1875. He is the author of several pamphlets: a New Zealand handbook; several papers in the *Nineteenth Century* and the *Fortnightly*, chiefly concerning the Federation of the Empire, a subject on which he has always taken great interest. He latterly wrote a novel, "A.D. 2000." He was married, in 1867, to Mary, eldest daughter of W. J. Clayton, Esq., Colonial Architect.

**VOGT, Professor Karl, M.D.**, philosopher and author, born at Gießen, July 5, 1817, was educated there under Liebig, and removing to Berne in 1835, studied Physiology, and graduated M.D. He devoted his attention to Geology and Zoology under Agassiz, and became Professor of Zoology in the University of his native town. Having distinguished himself in the Frankfurt Parliament of 1848, he, from motives of prudence, retired into Switzerland, and delivered in the canton of Neuchâtel some lectures "On Man, his Place in Creation, and in the History of the Earth." They have been translated into English, and published under the auspices of the Anthropological Society. Dr. Vogt, who is Professor of Natural History in the University of Genoa, a Correspondent of the Institute of France (Académie des Sciences), foreign associate of the Anthropological Society of Paris, and an honorary Fellow of the Anthropological Society of London and Berlin, has published several works, amongst which may be mentioned "Manual of Geology," "Zoological Letters," "Lettres Physiologiques," trans-

lated into French, Italian, and Russian; "Les Mammifères," translated into French, English, Italian, and Russian; "Anatomie Comparée Pratique," in German, French, and Russian, and various lectures on animals and some descriptions of travel.

**VOGÜE, Vicomte Eugène Melchior de**, was born on Feb. 21, 1818; became Secretary to the Embassy, first at Constantinople, and subsequently at St. Petersburg, where, at the Winter Palace in 1878, he was married to the daughter of General Annenkoff. He retired from the diplomatic service in 1881, and has since devoted his time to literature; writing much in the *Revue des Deux Mondes*, and the *Journal des Débats*. He has also written "Syrie, Palestine, Mount Athos," 1876; "Histoires Orientales," 1879; "Le Fils de Pierre le Grand," 1884; "Histoires d'Hiver," 1885; "Le Roman Russe," 1886; "Souvenirs et Visions," 1887; "Remarques sur l'Exposition du Centenaire," 1889. Vicomte Melchior de Vogüe was elected a Member of the Académie Française in Nov., 1889.

**VOYSEY, The Rev. Charles, B.A.**, was born in London, March 18, 1828, being the youngest son of the late Mr. Amosley Voysey, architect. He was educated partly by private tuition, partly at Stockwell Grammar School, and afterwards at St. Edmund Hall, Oxford, where he took his B.A. degree in 1851. From 1852 to 1859 he held the curacy of Hensle, near Hull, after which he was curate (under the crown) of Crigton, Jamaica, for fifteen months. In 1861 he was appointed curate of Great Yarmouth, but in the same year was transferred to St. Mark's, Whitechapel. Being ejected from that curacy in consequence of a sermon against endless punishment, he was recommended by the Bishop of London (Dr. Tait) to the curacy of the well-known Victoria Dock parish, under the Rev. H. Boyd, Vicar. After six months' service there he was invited by the patron and vicar of Henshagh, Yorkshire, to accept the curacy of that parish, and at the expiration of six months the vicar resigned and presented Mr. Voysey to the benefice (1861). Mr. Voysey began his career as a religious reformer by the publication of a sermon entitled "Is every Statement in the Bible about our Heavenly Father strictly true?" This was soon followed, in 1865, by *The Sling and the Stone*, which first appeared in monthly parts, and was continued through several years; up to the present time nine volumes have been

issued. The opinions expressed were denounced as heretical by the ultra-orthodox parties in the Anglican Church, and eventually in the spring of 1860 legal proceedings were instituted by the Archbishop of York's secretary against Mr. Voysey. The case was heard in the first instance in the Chancery Court, York Minster, Dec. 1, 1860, when judgment was pronounced against Mr. Voysey, and on appeal, confirmed by the Judicial Committee of the Privy Council, which sentenced the appellant to be deprived of his living, and to pay the costs, Feb. 11, 1871. In October of that year, Mr. Voysey began holding Theistic services, and preaching in London, first at St. George's Hall, then at Langham Hall, and since April, 1885, at the Theistic Church, Swallow Street, Piccadilly. The religious movement with which he is associated was at first called the "Voysey Establishment Fund," but in 1880, at his own request, his supporters and congregation enrolled themselves into the "Theistic Church," which has been properly settled by an elaborate Trust Deed. For the first three years of his preaching in London, Mr. Voysey's sermons were published weekly in the *Western Post*, and frequently in other papers in England, in America, and in India. Every sermon which he has preached since Oct., 1871, has been printed and circulated in many parts of the world. The issue is 1,000 a week, and the total number, including reprints, up to the present time is over 100,000. The work of the Theistic Church in eighteen years has cost over £30,000, and large sums of money have been subscribed by the Theists for purely charitable objects. Mr. Voysey is the author of a very original work, entitled, "The Mystery of Pain, Death, and Sin."

## W.

**WACE, The Rev. Henry, D.D.,** Principal of King's College, London, was born in London, Dec. 10, 1836, and educated at Marlborough, Rugby, King's College, London, and Brasenose College, Oxford, where he graduated B.A. in 1860, taking a second class both in classics and mathematics. He proceeded D.D. at Oxford in 1883, and in the previous year received the honorary degree of D.D. from the University of Edinburgh. He was ordained in 1861; served as Curate at St. Luke's, Berwick Street, from 1861 to 1863; at St. James's, Piccadilly, from 1863 to 1869; and was Lecturer at Grosvenor Chapel, South Audley Street,

from 1870 to 1872. In 1872 he was elected, by the Benchers of Lincoln's Inn, Chaplain of that Society; and, in 1880, was promoted by them to the office of Preacher of Lincoln's Inn. He preached the Boyle Lectures for 1874 and 1875, on the subject of "Christianity and Morality." In 1879 he preached the Bampton Lectures at Oxford on the "Foundations of Faith." He was Select Preacher at Cambridge in 1878, and at Oxford from 1880 to 1882. In 1875 he was appointed Professor of Ecclesiastical History in King's College, London; and, in 1881, he was nominated by the Bishop of London a Prebendary of St. Paul's. He was appointed one of the Archbishop of Canterbury's chaplains in April, 1883; and, in November, the same year, Principal of King's College, London. In 1884, he was appointed one of the Honorary Chaplains to the Queen, and became Chaplain in Ordinary in 1889. In conjunction with Dr. William Smith, he is the editor of the "Dictionary of Christian Biography, Literature, Sects, and Doctrines, during the First Eight Centuries," 4 vols., 1877-87; and he is the editor of "The Speaker's Commentary on the Apocrypha." He is also the author of Lectures preached in 1881 at St. James's, Piccadilly, on "The Principal Facts in the Life of our Lord, and the Authority of the Evangelical Narratives;" and of a volume of discourses on "Some Central Points of our Lord's Ministry," 1890.

**WADDINGTON, William Henry,** a French statesman and diplomatist, was born in Paris, Dec. 11, 1826. His father, a rich Englishman, established cotton works in France, and became naturalized, but the son was partly educated in England. After several years passed at the Lycée St. Louis at Paris, he went to Rugby School in Oct., 1841, and remained there till June, 1845, when he went up to Trinity College, Cambridge, with an exhibition from the school. He became scholar of his college, and graduated in 1849 as second in the first class of the classical tripos, and was bracketed equal as Chancellor's Medalist. At Rugby he was distinguished for his prowess at football, and his contemporaries at Cambridge remember Waddington the souler, member of the Second Trinity Boat Club, and No. 6 in the Cambridge boat in the University race in 1849, when Cambridge won. Soon after leaving the University he returned to France, married, and settled in the department of the Aisne. He became a member of the Society of Antiquaries of France, and in the pursuit of his favourite studies relating to ancient

coins and inscriptions, he visited Asia Minor, Syria, and Cyprus (in 1850 and 1862), England, and Germany. His valuable contributions towards the history and archaeology of France led to his being elected, in 1865, a member of the Academy of Inscriptions and Belles Lettres. In that year he endeavoured at a by-election to enter the Corps législatif, as member for the fourth circonscription of the department of the Aisne, but his candidature was unsuccessful. However, on Feb. 8, 1871, he was sent as a representative of that department to the National Assembly. From the first he sat in the Left Centre, and allied himself to the Republicans, giving a hearty support to the policy of M. Thiers. He was a member of numerous commissions, and was the reporter of the law relating to the Conseils Généraux (Aug., 1871). Appointed Minister of Public Instruction, in the place of M. Jules Simon, May 19, 1873, M. Waddington retired, five days later, with M. Thiers, and resumed his seat on the benches of the Left Centre. Except on some questions of detail, or rather of procedure, M. Waddington voted regularly with the Republicans. On Jan. 30, 1876, he was elected a Senator for the department of the Aisne, together with M. Henri Martin and M. Saint-Vallier; his term of office expired in 1885, and was renewed for a second period of nine years. He was recalled to the Ministry of Public Instruction in the Cabinet of March 10, 1876, in succession to M. Wallon, and he retained his portfolio under the administration of M. Jules Simon, with whom he resigned office May 17, 1877. On the formation of the Dufaure cabinet in Dec., 1877, M. Waddington became Minister of Foreign Affairs. He was the first Plenipotentiary of France at the Congress of Berlin in 1878. After the resignation of Marshal MacMahon and the retreat of M. Dufaure, M. Waddington was invited by M. Grévy to remain at the Foreign Office while assuming the Presidency of the Council (Feb. 4, 1879). He had in that capacity to maintain before the Parliament a policy which was considered too Republican by the Senate, and too moderate by the Chamber of Deputies. On Dec. 27, 1879, he resigned, and was succeeded as Minister of Foreign Affairs, and as President of the Council by one of his colleagues, M. de Freycinet. At this juncture he refused the offer of the London embassy, and paid a visit to Italy, where he was received by the Pope and the King (March, 1880). In 1883 he was sent as Ambassador Extraordinary to represent France at the coronation of the

Czar Alexander III., at Moscow. He was appointed Ambassador at the Court of St. James's in succession to M. Tissot, in July, 1883, and still retains the position. He is President of the General Council of the department of the Aisne. He is a Protestant, and related to the Bunsens, whose late mother, the wife of the chevalier, was a Waddington. Mr. Waddington has published:—"Voyage en Asie Mineure au point de vue numismatique," 1852; a continuation of Lebas' "Voyage Archéologique en Grèce et en Asie Mineure," 1862; and "L'Édit de Dioclétien," with new fragments and a commentary, 1861; and "Fastes des Provinces Asiatiques de l'Empire Romain," 1872. He was elected an honorary Fellow of Trinity College, Cambridge, April 16, 1881.

**WADE, Sir Thomas Francis, K.C.B.**, elder son of Colonel Thomas Wade, C.B., born about 1820, entered the army as Ensign in the 81st Foot in 1838, and served afterwards in China and elsewhere in the 42nd Highlanders and the 98th Foot, from which he retired as Lieutenant in 1847. In 1848 he was appointed Interpreter to the garrison of Hong Kong, and in 1847 Assistant Chinese Secretary; in 1852 he was made Vice-Consul at Shanghai, where he acted as Inspector of Customs for the Chinese Government. In 1855 he was appointed Chinese Secretary at Hong Kong, and in the same year he was sent by the late Sir John Bowring on a special mission to Chien Ching. Owing to his familiarity with the native character and language, he was attached to Lord Elgin's Mission to China in 1857-60, and in the last-named year he was appointed Chinese Secretary to our Mission in China. In this capacity he accompanied Lord Elgin's Special Mission to Peking in Oct., 1860. In 1861 he was nominated a C.B. (Civil Division); in the following year he became Chinese Secretary and Translator to the British Legation in China, and was acting *Chargé d'Affaires* at Peking, from June, 1864, to Nov., 1865, and again from Nov., 1869, to July, 1871, when he was appointed Envoy Extraordinary and Minister Plenipotentiary and Chief-Superintendent of British Trade in China. He was advanced to the rank of K.C.B. in Nov., 1875, for his exertions in negotiating important treaties with the Chinese Government, and obtaining trading facilities in that empire. Sir Thomas Wade is the author of "Tzu-Erh Chi" (Progressive Course), 1867, which deals with both colloquial and documentary Chinese, and is of great value to students of the Chinese language.

**WAKEFIELD**, Bishop of. See *Now*,  
THE RIGHT REV. WILLIAM WALSHAM.

**WALDERSEE**, Count von, Chief of the General Staff of the German Army, was born in 1832; entered the army in 1850, and served with distinction through the war of 1866, and through the Franco-German campaign. In 1882 he became Quartermaster-General, and acted as Deputy Chief of the General Staff on behalf of the aged Count von Molke, on whose resignation, he succeeded to the position of Chief of the General Staff. Count Waldersee married an American lady who had received the title of Princess Marie von Noer, as the morganatic consort of the late Prince Frederick of Schleswig-Holstein.

**WALES** (Prince of), H.R.H. Albert Edward, K.G., K.P., G.C.B., G.C.S.I., G.C.M.G., P.C., heir-apparent to the British crown, eldest son of Her Majesty and the late Prince Consort, born at Buckingham Palace, Nov. 9, 1841, received his early education under the Rev. Henry M. Birch, rector of Prestwich, Mr. Hibbes, barrister-at-law, the Rev. C. F. Turver, and Mr. H. W. Fisher, and having studied for a session at Edinburgh, entered Christ Church, Oxford, where he attended the public lectures for a year, and afterwards resided for three or four terms at Cambridge for the same purpose. His Royal Highness spent most of the summer of 1860 in a visit to the United States and Canada, where he was most enthusiastically received, was in 1858 gazetted to a colonelcy in the army, and joined the camp at the Curragh in June, 1861. Accompanied by Dean Stanley, the Prince travelled in the East, and visited Jerusalem in 1862. His Royal Highness is a K.G., a general in the army, and Colonel of the 10th Hussars, and has the titles of Duke of Cornwall (by which he took his seat in the House of Lords in Feb., 1863, in the Peerage of England); Duke of Rothesay, Baron of Renfrew, and Lord of the Isles, in Scotland; and Earl of Dublin and Carrick in Ireland; and enjoys the patronage of twenty-nine livings, chiefly as owner of the Duchy of Cornwall. His Royal Highness married, March 10, 1863, the Princess Alexandra of Denmark, by whom he has issue. (See memoir of H.R.H. The Princess of Wales.) The Prince of Wales became President of St. Bartholomew's Hospital in April, 1867. Towards the close of the year 1871, his Royal Highness was attacked with typhoid fever, and for some weeks his life was despaired of; but he slowly

recovered, and was able to take part in the memorable "Thanksgiving Service" in St. Paul's Cathedral, Feb. 27, 1872. He was elected Grand Master of the Freemasons in England in succession to the Marquis of Ripon in 1874, and on April 28, 1875, was admitted to the office at a Lodge held in the Albert Hall, South Kensington. On May 5, 1875, he was installed at the Freemasons' Hall as First Principal of the Royal Arch Freemasons. In 1875-76 His Royal Highness visited India. The great interest he took in the Paris Exhibition of 1878 contributed in no slight degree to render it a success. His Royal Highness attended the Court Festivities held at Berlin in March, 1883, to celebrate the "silver wedding" of the Crown Prince with the Princess Royal of England. On this occasion he was nominated by the Emperor as a Field-Marshal in the German army. In 1885, the Prince, in company with the Princess, made a tour through Ireland. In 1880, the Prince, with the Princess and their sons, visited the Paris Exhibition; and in Oct. of the same year he was present at the wedding of the Duke of Sparta at Athens. The annual income of His Royal Highness was raised, in 1880, from £10,000 to £70,000 (in accordance with the recommendation of a select committee appointed to inquire into the subject of Royal Grants, on the occasion of the Queen's application for an allowance for Prince Albert Victor and the Princess Louise of Wales), so that henceforth the provision for the Prince's children will be made out of the Prince's income. His Royal Highness has taken a great personal interest in all the Exhibitions recently held at South Kensington, and was Executive President of the Colonial and Indian Exhibition, opened by the Queen in May, 1886. He also originated the Royal College of Music, and is the chief mover in the Jubilee scheme of an "Imperial Institute." In 1888 the Prince and Princess celebrated their silver wedding.

**WALES**, Her Royal Highness Alexandra Caroline Marie Charlotte Louise Julia, the Princess of, is the daughter of Christian IX., King of Denmark, and was born at Copenhagen Dec. 1, 1844, and was married at Windsor, on March 10, 1863, to His Royal Highness Albert Edward Prince of Wales, and has five children: Albert Victor Christian Edward, Duke of Clarence and Avondale, born at Frogmore Lodge, near Windsor, Jun. 8, 1864; George Frederick Ernest Albert, born at Marlborough House,

June 3, 1865; Louisa Victoria Alexandra Dugmar (Duchess of Fife), born at Marlborough House, Feb. 20, 1867; Victoria Alexandra Olga Marie, born at Marlborough House, July 6, 1868, and Charlotte Marie Victoria, born at Marlborough House, Nov. 20, 1869.

**WALFORD, Edward, M.A.**, author and editor, is the second son of the late Rev. Wm. Walford, of Hatfield Peverel, Essex, sometime Rector of St. Runwald's, Colchester; his mother was a granddaughter of the American Royalist, Sir William Pepperell, Bart. He was born at Hatfield, Feb. 3, 1823; was educated at the Charterhouse School, and at Balliol College, Oxford, where he won an open scholarship in 1841. He obtained the Chancellor's Prize for Latin verse in 1843; was *procurator accessit* for the Ireland University Scholarship in 1844 (when Professor Conington was the successful candidate) and took his B.A. degree with Classical honours in 1846. He subsequently won the Denyer Theological Prize in 1849 and 1850. He was ordained, but never held a parochial charge, and resigned his orders after the passing of Mr. Bouverie's Bill. He held for a year the Composition Mastership in Tunbridge School, and after his marriage he employed his time in taking private pupils at Clifton. In 1852 he settled in London and commenced his literary career. He is the author of "Old and New London," vols. 3, 4, 5, and 6; "Greater London," 2 vols.; "Londoniana," 2 vols.; "Pleasant Days in Pleasant Places," "Holidays in Home Counties," "The Pilgrim at Home," "Tales of Great Families," 1st series, 2 vols.; "Tales of Great Families," 2nd series, 2 vols.; "Chapters from Family Chests," 2 vols., 12mo; "The County Families of the United Kingdom" (dedicated by permission to H.R.H. the Prince of Wales, and published annually since 1860); "Handbook of the Greek Drama;" "Juvenal" in "Ancient Classics for English Readers;" "Tourist's Guide to Essex;" "Tourist's Guide to Berkshire;" "Progressive Exercises in Latin Elegiacs," 1st and 2nd series; "Progressive Exercises in Greek Iambics;" "The Grammar of Latin Poetry," and other school-books; "Annual Biography" for 1850 and 1857; "Greek History" (Ince's outline series); "Life of Prince Consort;" "Life of the Earl of Beaconsfield;" "Life of Lord Palmerston;" "Life of Earl Russell;" "Life of Louis Napoleon;" "Jubilee Memoir of the Queen;" "Life of Pitt," 1860. He has edited: "Lodge's Peerage," annually from 1861 to 1889; Charles Knight's

"London," 6 vols., 1870; Brayley's "History of Surrey," 4 vols., 1875. Bohn's Ecclesiastical Library; Eusebius' "Church History;" Sozomen's "Church History;" Theodoret's and Evagrius' "Church Histories;" Butler's "Analogy and Sermons;" Pearson's "On the Creed;" Southey's "Life of Wesley;" "Once a Week," 1850-68, 13 vols., 8vo; "Gentleman's Magazine," 1860-68, 5 vols.; "The Antiquary" (which he founded), 2 vols., 1880; "The Antiquarian Magazine," 1882-5; "The Charter-House Play," 1885; "The Shilling Peerage," "Shilling Baronetage," "Shilling Knightage," and "Shilling House of Commons," annually since 1865; "Herick's Poems, with Life;" "Lord Erskine's Speeches, with Biography," 2 vols.; "The Windsor Peerage," 1890. Besides these, Mr. Walford has been an extensive contributor of Biographical, Antiquarian, and Topographical articles to the *Times*, and other papers and various magazines. Mr. Walford is a Member of the Royal Historical Society; of the Archaeological Institute, of the British Archaeological Association; and on the Council of the Society for preserving the Memorials of the Dead. He is also a Member of the "Order of St. John of Jerusalem," and of the "Society of Old Volume," and was one of the founders of "The Salon."

**WALFORD, Mrs. Lucy Botha**, novelist, is the daughter of the second son of Sir James Cuthbertson and Laess, tenth baronet of the name; and brother of the unfortunate Sir James who was drowned in Loch Lomond, within sight of his own door some fifteen years ago. Her mother was the daughter of M. Fuller-Maitland, Esq., of Stunstead, Essex, and this lady—as is little known—was the writer of the principal portion of those verses, now in every hymn-book, and usually attributed to H. Kirke White,

Of in danger, oft in woe,  
Onward Christians, onward go.

Of these Kirke White wrote only the first six lines, and the poem was finished by Miss Frances Fuller-Maitland, then only in her sixteenth year. From both parents Mrs. Walford thus inherits literary tastes, as her father's comprehensive sporting work, "The Moor and the Loch," lately gone into its seventh edition, is considered as a classic among lovers of the rod and the gun. It was not until four years after her marriage, in 1869, to Mr. Alfred Saunders Walford, that Mrs. Walford published "Mr. Smith," her first serious attempt. It was sent anony-

monly to Mr. John Blackwood, and by him was accepted and published at once. On learning who was his new correspondent, he further dissuaded Mrs. Walford from adopting a fictitious name as she had intended doing, the argument he used being that he "was sure her father's daughter would never write anything to be ashamed of, and that was the only reason he could ever imagine for the concealment of anyone's identity." Mr. Blackwood, on the success of "Mr. Smith," urged Mrs. Walford to write for the time-honoured pages of "Maga" (*Blackwood's Magazine*), and the result was a series of short tales, beginning with "Nun: a summer scene," which has lately been brought out under this heading in book form. They comprehended "Hee or Bettrix;" "Lady Adelaide;" "Fashion and Fancy;" "Eleonor: a tale of Non-Performers;" and "Muttie: the History of an Evening;" all which made their first appearance in *Blackwood*. "Pauline," Mrs. Walford's first *Blackwood* serial novel ran its course in 1877; "Cousins," her third novel, was published by the same firm in 1879. "Prothlesome Daughters" followed in 1880; "The Baby's Grandmother" was the *Blackwood* serial in 1885; and "A Still-necked Generation" completed its course in the same pages in 1888. Alongside of these, her larger works, Mrs. Walford wrote "Dick Netherby," a one-volume tale of humble Scottish life, for *Good Words*, in 1881; and "Dinah's Son," on the same lines, for *Life and Work*, also in 1881; "The History of a Week" formed the Christmas number of the *Graphic* in 1885; and all these have also been re-published in book form. "A Mere Child," "A Sage of Sixteen," and "The Haven of a Smile" have successively been added as summer novelettes to the above list, "A Sage of Sixteen" having been published first in *Atalanta*. Many other short sketches, stories, essays, and verses have also been scattered over these years, most of which have been reprinted under the heading of the leading tale "Her Great Idea." "The Mischief of Monies," now running as a serial for the year in *Longman's Magazine*, is Mrs. Walford's latest work of fiction.

**WALKER, Frederick William**, High Master of St. Paul's School, only son of Mr. Thomas Walker, of Tullamore, was born in London, July 7, 1830, and educated at Rugby, under Dr. Tat. He was Scholar of Corpus Christi College, Oxford, 1849 (first-class in Classics, and second-class in Mathematics, Moderations,

1852, first-class in Classics, and second-class in Mathematics, Final Examination, 1853), Bolen Sanscrit Scholar, Vinerian Law Scholar, and Tured Law Scholar, 1854; and Fellow and Tutor of Corpus Christi College. He was called to the Bar, Lincoln's Inn, 1857; and was appointed High Master of Manchester Grammar School, 1859; Public Examiner at Oxford, 1869; and High Master of St. Paul's School, London, 1877. Under Mr. Walker's mastership the school has been removed from St. Paul's Churchyard to West Kensington.

**WALKER, John James, M.A., F.R.S.**, President of the London Mathematical Society, Member of the Physical Society, was born Oct. 2, 1823, at Kennington, Surrey, and is the son of John Walker, B.A., by Ann, sister of Ed. Fricker, Surgeon, Cheltenham. He was educated at London High, and Plymouth New Grammar Schools (of which his father became Head Master v. Rev. I. Macaulay appointed to Repton), and Trinity College, Dublin (with which he had an hereditary connexion, his great-grandfather Matthias Walker, Clerk, his grandfather, John Walker, a Fellow, and his father, having been Graduates of Dublin University), first-class Mathematics and Logic at Previous Exam. 1845; first-class Mathematics and Physics Degree Exam. 1849; second Bishop Law's Prizeman, 1850; M.A. 1857. From 1853 to 1862 Private Tutor to the present Lord Ardilaun, Captain B. L. and Sir Ed. C. Guinness; 1865-1868, Afternoon Lecturer in Applied Mathematics and Physics University College School; and 1868-1882 Vice-Principal University Hall, London; 1871-1888 Examiner in Mathematics and Natural Philosophy for Hibbert-Trust Scholarships. He is the author of papers and reviews in the *Philosophical Magazine* ("Iris seen in water," 1853, reprinted in *Annal de Chim. et de Phys.*, tome XXXIX), *Cambridge and Dublin*, and *Quarterly Journals of Mathematics*, *Messenger of Mathematics*, London Mathematical Society Proceedings, British Association Reports, 1859-63; Proceedings of the Royal Society; Philosophical Transactions; and *Nature*. Since 1888 Mr. Walker has devoted himself entirely to research in Pure and Applied Mathematics. In 1842, when residing in Somersetshire, he was fortunate, in discovering raising, cleaning and making an elaborate drawing of a fine specimen of *Iolithyosaurus Tenirostris*, from the *Lias* near Long Sutton, on the property of the then Earl of Burlington, now Duke of Devonshire, in whose possession the specimen remains.

It was accepted by Sir R. Owen as an illustration to his *British Fossil Reptiles*.

**WALKER, J. T.**, General E.E., C.B., F.R.S., LL.D., was born on Dec. 1, 1826, and is the son of John Walker, Esq., Madras Civil Service. He entered the I.E.I.C. Military Academy at Addiscombe in 1843, and obtained a commission in the Bombay (now Royal) Engineers. He served at the siege of Mooltan, and in the battle of Goograud, and the advance to Peshawur. Immediately after the annexation of the Punjab to British territory he made a survey of the Trans-Indus Frontier, from Peshawur down to Dera Ismail Khan. He served against the mutineers in 1857, and at the siege of Delhi, and was appointed an assistant in the Great Trigonometrical Survey of India in 1853, and became Superintendent of the Survey in 1861; and Surveyor-General in 1878. He supervised the publication of nine quarto volumes of the Account of the operations of the Great Trigonometrical Survey of India, and the annual reports of the survey for 23 years, and retired in 1884. General Walker has contributed various papers to the Journals of the Asiatic Society of Bengal, and to the Royal Geographical Society, and the articles "Oxus," "Pontoon," "Surveying," and "Tibet," to the ninth edition of the *Encyclopædia Britannica*.

**WALKINGTON, Miss Letitia Alice**, M.A., LL.D., was born in Belfast, but has lived nearly all her life in Stroudtown, about two and a half miles out of Belfast. Her father, Mr. T. R. Walkington, comes of a family that has been well known for several generations in Antrim and Down. In 1605 Edward Walkington was consecrated Bishop of Down and Connor. Her mother is the daughter of the late Prussian Consul, G. von Heyn. Miss Walkington was educated at home by a governess, Miss Bessel, until sixteen, and then went to a boarding-school, first in England and then in Paris. She did not, however, begin to study seriously until more than a year after she had left school. She matriculated in 1882 in the Royal University of Dublin. After doing so, she studied at the Methodist and Queen's Colleges, Belfast, and with a barrister, Mr. Thos. Harrison, and took her B.A. degree in 1886, and M.A. in 1886, taking the Logic, Metaphysic, and Political Economy Honour Group for both degrees. In 1888 she took the LL.B., and in 1889 the LL.D. degree. Miss Walkington was the first lady who took the last three degrees, several ladies have since taken the M.A., but only one, Miss

F. Gray, has taken the law degrees. Miss Gray, Miss Hamilton, B.A., and Miss Walkington, have organised university classes to prepare young ladies for the Intermediate and B.B.L. examinations, hoping thereby to supply a want, as there is nothing of the kind for girls in Belfast, except in close connection with the principal schools. Their success, as far as numbers are concerned, testifies that the want was really experienced. In 1889 Miss Walkington was invited to take part in the "Congrès International des Œuvres et Institutions Féminines," in connection with the Paris Exhibition.

**WALLACE, Alfred Russel**, LL.D., F.R.S., born at Usk, Monmouthshire, Jan. 8, 1822, was educated at the Grammar School, Hertford, and articled with an elder brother as land surveyor and architect, but gave up that profession in order to travel and study nature. In 1848 he visited the Amazon with Mr. Bates. Returning in 1852, he published his "Travels on the Amazon and Rio Negro," and a small volume on "Palm Trees of the Amazon, and their Uses." In 1854 he visited the Malay Islands, where he remained eight years. He has since published "The Malay Archipelago," 2 vols., 2nd edit., 1869, and a volume of essays entitled "Contributions to the Theory of Natural Selection," 1870, as well as a large number of papers in the publications of the Linnean, Zoological, Ethnological, Anthropological, and Anatomical Societies. In 1868 he was awarded the Royal Medal of the Royal Society, and in 1870 the Gold Medal of the Société de Géographie de Paris. In 1875 he printed a small volume "On Miracles and Modern Spiritualism." His elaborate work, in two volumes, on "The Geographical Distribution of Animals" was published in 1876, in which year he was President of the Biological Section at the meeting of the British Association at Glasgow. In 1878 he published a volume on "Tropical Nature," containing his latest views on the colours of natural objects, on sexual selection, the geographical distribution of animals and plants, and allied topics. In 1880 he published another important work, "Island Life," in which the principles established in the "Geographical Distribution of Animals," are applied to the faunas and floras of the chief islands of the globe, &c. Since then Mr. Wallace has turned his attention to social and political problems, and in 1882 published a volume on "Land Nationalisation, its Necessity and its Aims," in which he gives a sketch of the whole subject of land-tenure, and proposes a

practical scheme of occupying ownership under the State in order to remedy the numerous evils of the present system which he has pointed out. To advocate this scheme a Land Nationalisation Society has been formed, of which Mr. Wallace is president. He has also put forth a scheme for the Nationalisation of the Church of England. In 1881 he was awarded a Civil List pension of £200 a year in recognition of the amount and value of his scientific work. The honorary degree of D.Lit. was conferred upon him by the University of Dublin in 1882. Mr. Wallace is an opponent of compulsory vaccination, and in 1885 published his "Forty-five Years of Registration Statistics, proving Vaccination to be both useless and dangerous." In the latter part of the same year he brought out a small volume entitled "Bad Times: an Essay on the present Depression of Trade." The last two works are illustrated by means of diagrams and tables. He has also written many pamphlets, articles, and letters to the daily press on the land and other social questions.

**WALLACE, Robert, D.D., M.P.**, was born in the parish of St. Andrews, Fifeshire, June 21, 1831, and educated at Geddes Institution, Culross, the High School, Edinburgh, and the Universities of St. Andrews and Edinburgh, graduating M.A. in the former in 1853. He entered the Church, and became successively Minister of Newton-upon-Ayr, in Dec., 1857; Minister of Trinity College Church, Edinburgh, in Dec., 1860; Examiner in Philosophy, in the University of St. Andrews, in April, 1866; Minister of Old Greyfriars, Edinburgh, in Dec., 1868; D.D. of the University of Glasgow in 1869; and Professor of Church History in the University of Edinburgh, in Dec., 1872. He quitted the clerical profession in Aug., 1876, when he became editor of the *Scotsman* in succession to the late Dr. Russell. He resigned the editorship in Nov., 1880, and was called to the Bar in Nov., 1883. After the dissolution of 1886 he opposed Mr. Goschen for East Edinburgh, and was elected as a Gladstone Liberal by a large majority.

**WALLER, Mrs. Mary Lemon**, artist, the wife of Mr. S. E. Waller, the artist, was born at Bideford in Devonshire, and is the daughter of the Rev. Hugh Fowler, M.A., and any talent she at first exhibited appeared to lie rather in the direction of literature and music than of art. Her first efforts were with the pen, and writing some quaint little stories she was inspired with the desire to illustrate them.

These juvenile efforts were succeeded by attempts with the pencil at portraiture of her family and friends, which appeared to indicate so unusual an ability that the young lady was sent to the School of Art at Gloucester, where she underwent a course of freehand drawing and study from the antique under Mr. J. Kemp. A careful drawing of the Discobolus secured, in 1871, admission to the Royal Academy Schools, where she remained studying hard for two or three years. Her introduction to artistic life as an exhibitor also took place in 1871, as she in that year painted, and got accepted at the Dudley Gallery, a study called "An Unexpected Meeting," a child curiously regarding a snail, in a garden walk. This was a decided success, but it was not until some years later that Mrs. Waller appeared as an exhibitor at the Royal Academy, with a charming portrait of her little two years old son. Since then she has been a pretty regular contributor to the parent institution. Her chief works have been a head portrait of Lord Armstrong in the Academy, 1883, and a full-length of his Lordship, presented to the town of Newcastle in the same year, a work which was not publicly exhibited. In 1881 a portrait of Mildred, daughter of Colonel Tryon, was Mrs. Waller's Academy contribution, and the following year her "Little Snow-white," a fair-haired, blue-eyed child, sitting in a wood, fairly fascinated the public, and greatly added to the artist's reputation. Other works followed in due succession. "The Secret of the Sea," and "Ella, Daughter of Wilberforce Bryant, Esq.," 1886; "Dorothy, Daughter of J. G. Leeming, Esq.," 1887; "Lella," 1888, and in the same year "Evo," a child with an apple, exhibited at the Institute, Piccadilly, and reproduced in the Christmas number of the *Illustrated London News*; "Perdita," a portrait, in 1889 and in the Grosvenor Gallery, "Girl Fencing," whilst in last year's Academy (1890) she had "Gladys, Daughter of Major Lutley Jordan," a work rich in the qualities of the art of portraiture. We regard as unnecessary further multiplication of the artist's works, or might mention "Mrs. Montague," in the Grosvenor Gallery, 1888, and "The Rev. Alfred Gatty, D.D.," Sub-Dean of York, and many more equally valuable specimens of the limner's art. But those we have mentioned constitute an art reputation, and on them this lady may be well content to take her stand.

**WALLHOFEN, Madame, née Pauline Lucas**, a celebrated singer, born of Jewish parents in Vienna, in 1842. When

still a child her beautiful voice attracted attention and procured for her a musical training by Üschmann and Lévy. She made her *début* at Olmutz in 1859; and in 1860 sang at Prague in the opera of the "Huguenots," and in "Norma." Her genius elicited the admiration of the great composer, Meyerbeer, who, in 1861, procured for her an engagement in Berlin. In 1863 she appeared at Covent Garden for the first time; and she soon made herself a name in all the European capitals. In Berlin she received the appointment of Court singer; but resigned it in 1872, and went for a two years' tour through the United States. Since her return she has resided chiefly in her native city, Vienna. She married, in 1865, the Baron von Rohden, from whom she was divorced; and married Herr von Wallhofen.

**WALLIS, Henry**, member of the Royal Society of Painters in Water Colour, was born in London, Feb. 21, 1830, and studied in the art school of Gleyre, Paris, and also at Rome and Venice. His first picture (in oil colour) was exhibited at the British Institution, 1851. He exhibited at the Royal Academy in 1854, and succeeding years, pictures in oil representing incidents in the lives of celebrated personages, subjects from the poets, landscapes, and scenes of Venetian life of the period of the fifteenth century. His most celebrated work was "The Death of Chatterton." He joined the Royal Society of Painters in Water Colour in 1879, the pictures exhibited at the gallery of the society being mainly scenes from "The Merchant of Venice," and Italian and Oriental subjects. He has contributed papers to artistic and other journals on the history of painting and on ceramic art, also reviews of books on art.

**WALLON, Henri Alexandre**, was born at Valenciennes, Dec. 23, 1812; was member of the Faculty of Letters, Paris, in 1840, and successor to M. Guizot at the Sorbonne, in 1850, where he lectured on history and geography. In 1860 he gained the Gobert Prize of the French Academy for his work on Joan of Arc. He was a member of the National Assembly in 1819, but resigned in 1850. After the fall of the Empire he was again returned, as a moderate Conservative, by the department of the Nord, but he joined the Lavergne group on the question of the Constitutional Laws. To his moderation and vigour was due the definite establishment of the Republic,—indeed, he is still commonly called Father of the Republic

—and accordingly M. Buffet, on forming his administration in March, 1875, nominated him Minister of Public Instruction. It was he who proposed the clauses which first gave constitutional shape to the Republic. M. Wallon is a member of the Institute, and Secrétaire perpétuel de l'Académie des Inscriptions et Belles-Lettres. He was a candidate for the seat in the French Academy that had been vacated by M. Claude Bernard, but M. Renan defeated him by 19 to 15 (June 13, 1878). M. Wallon is a sound historian. His chief works are "Richard II.," "Histoire de l'Esclavage dans l'Antiquité" (3 vols.); "Jeanne d'Arc;" "St. Louis et son Temps" (2 vols.); "De l'Autorité de l'Évangile" (1 vol.); "Le Tribunal Révolutionnaire de Paris" (6 vols.), 1886; "La Révolution du 31 Mai et la Fédéralisme en 1793" (2 vols.); "Les Représentants du Peuple en Mission et la Justice Révolutionnaire dans les Départements en l'an II" (5 vols., 1830-00).

**WALPOLE, Spencer, LL.D.**, Lieutenant-Governor of the Isle of Man, eldest son of the Rt. Hon. S. J. Walpole, and his wife, Isabella, daughter of the Rt. Hon. Spencer Perceval, was born Feb. 6, 1830, and educated at Eton. He entered the War Office in 1858, and has been Private Secretary to the Rt. Hon. T. Sutherland Estcourt, and to his father. He was made one of Her Majesty's Inspectors of Fisheries in 1867, and was appointed Lieut.-Governor of the Isle of Man in 1882. He received an honorary LL.D. degree from the University of Edinburgh in 1890. He is the author of the "Life of the Rt. Hon. Spencer Perceval," 1873; "The Electorate and the Legislation," 1881; "Foreign Relations," 1882; "A History of England from the conclusion of the Great War in 1815," vols. 1 and 2 (1878), vol. 3 (1880), vols. 4 and 5 (1886); and the "Life of Lord John Russell" (1889); and he has been a contributor to periodical literature. Mr. Walpole married, in 1867, Marion, the youngest daughter of Sir John Digby Murray, Bart.

**WALPOLE, The Right Hon. Spencer Horatio**, born in 1806, was educated at Eton and at Trinity College, Cambridge, where he obtained the first prize for English declamation and another for the best essay on the character and conduct of William III. Having been called to the Bar in 1831, by the Society of Lincoln's Inn, of which he is a Bencher, he obtained a large practice in the Courts of Chancery, and became a Q.C. in 1846.

He was returned in the Conservative interest for Midhurst in Jan., 1816, and represented that borough till Feb., 1856, when he was elected one of the members for the University of Cambridge. He distinguished himself in the debate which took place in 1819 on the Navigation Laws, and in the discussions on the Ecclesiastical Titles Bill in 1851. On the accession of Lord Derby to office in 1852, Mr. Walpole sacrificed his practice at the Chancery Bar to accept the post of Secretary of State for the Home Department, and in that capacity carried through Parliament the measure for embodying the militia. After leaving office Mr. Walpole became Chairman of the Great Western Railway. He held the seals of the Home Office in Lord Derby's second administration in 1858, but resigned in March, 1859, owing to a difference in opinion with his colleagues with regard to the Reform Bill. He was appointed Secretary of State for the Home Department in Lord Derby's third administration in 1866, and resigned May 9, 1867, retaining a seat in the Cabinet without office. He retired with his colleagues in 1868. Mr. Walpole resigned his seat for the University of Cambridge in Nov., 1882.

**WALSH, The Right Rev. William Pakenham, D.D.**, Bishop of Ossory, Ferns and Leighlin, was born at Mote Park, County of Roscommon, Ireland, May 4, 1820, and is the son of Thomas Walsh, and Mary Pakenham Walsh. He was educated at Trinity College, Durham; B.A., 1841; M.A., 1853; B.D. and D.D., stip. con., 1873; Ordained Deacon, 1843; Priest, 1844; Curate of Ovoca, 1843; of Rathdrum, 1845; Chaplain of Sandford, 1856; Donellan Lectures, T.C.D., 1861; Canon of Christ Church, Dublin, 1872; Dean of Cashel, 1873; and elected Bishop of Ossory, 1878. The following is a list of his published works:—"Donellan Lectures," 1861, T.C.D.; "The Moabite Stone," 1871; "The Forty Days of the Bible," 1874; "The Angel of the Lord," and "Daily Readings for Holy Seasons," 1876; "Ancient Monuments and Holy Writ," 1878; "Horos of the Mission Field," 1879; "The Decalogue of Charity," 1882; "Echoes of Bible History," 1886; "The Voices of the Psalms," 1890. Dr. Walsh was Vice-Chancellor's prizeman; Biblical Greek Prize; Divinity prizeman; Theological Society's Gold Medalist of Dublin University. He married, in 1861, Clara, daughter of Samuel Ridley, Esq., Muswell Hill, London; secondly, in 1879, Annie Frances,

daughter of Rev. J. W. Hackett, A.M., Incumbent of St. James's, Bray, co. Dublin.

**WALSH, The Most Rev. Dr. William J.**, Roman Catholic Archbishop of Dublin, and Primate of Ireland, was born in Dublin in 1841, and was educated at St. Laurence O'Toole's Seminary in that city, and afterwards at the Catholic University of Ireland, under the rectorship of Dr. Newman, and at Maynooth. He completed his academic course in 1861, but being too young to be ordained, he passed into the Dunboynes Establishment, where he spent three years in special ecclesiastical studies. During that period he became Assistant-Librarian at Maynooth College, and in 1867 he was appointed Professor of Theology. In 1878 he became Vice-President of the College, and on the death of Dr. Russell, in 1880, Dr. Walsh was unanimously chosen President by the Irish bishops. Acting for the bishops as trustees of the College, he gave evidence before the "Bessborough" Commission of 1869-70, explaining the refusal of the bishops, as tenants of the Duke of Leinster, to sign the "Leinster Lease," a form of agreement under which it was sought to induce tenants to "contract themselves out" of the protection of the Land Act of 1881. By this evidence on the transaction, which had resulted in the eviction of the bishops by the Duke of Leinster, Dr. Walsh exercised no little influence in the framing of the Land Act of 1881. In 1883, through his exertions, a Commission was appointed to inquire into the working of the Queen's Colleges of Ireland. For some time he was a Senator of the Royal University of Ireland, a position which he resigned in protest against the examination arrangements of that body. He became a Member of the Chapter of Dublin on the accession of Cardinal MacCabe to the archiepiscopal throne. On the death of that prelate in Feb., 1885, Dr. Walsh was elected Vicar Capitular; and in the June of the same year he was appointed to the See of Dublin. Since his appointment as Archbishop he has taken an active interest in the leading questions of the day in Ireland. He has warmly advocated an amicable settlement of the Land Question through the establishment of some system of arbitration for the settlement of disputes between landlords and tenants. He was a witness before the Parnell Special Commission of 1888-89, in connection with which he also had a prominent part in the exposure of the forger, Richard Pigott. But the principal subject of Dr. Walsh's public

action, outside the strictly religious sphere, has been the Irish education question: he has made many suggestions for its settlement, the keynote of his numerous letters and addresses on the subject being a demand for equality between Roman Catholics and Protestants in Ireland in the matter of educational endowments and privileges. During the last few years he has taken an active part in the settlement of trade disputes and strikes in Dublin: he opportunely intervened in the great strike on the Great Southern and Western Railway in 1890, and secured its amicable settlement, a public service for which he has received the honorary freedom of the city of Cork. His interest in the cause of temperance is warm and practical; in addition to a widespread temperance organisation in the diocese of Dublin, there has been created under his guidance a similar organisation throughout all the dioceses of his archiepiscopal province. Dr. Walsh has contributed many articles to the periodical press, especially to the *Contemporary Review*, the *Dublin Review*, and the *Irish Ecclesiastical Record*. He is also the author of several works on subjects of general public interest in Ireland, as well as on important branches of theological and scriptural science. Of his published works the principal are an ethical treatise on "Human Acts;" a "Harmony of the Gospel Narrative of the Passion;" "The Liturgical Music of the Office and Mass of the Day;" a "Grammar of Gregorian Music;" a "Plain Exposition of the Land Act of 1881;" a volume of "Addresses" on various subjects of general interest; "Addresses on the Irish University Question;" and his most recently published work, a "Statement of the Chief Grievances of the Catholics of Ireland in the Matter of Education, Primary, Intermediate, and University."

**WALSHAM**, Sir John, Bart., British Minister at Peking, born at Cheltenham in 1830, is the eldest son of Sir John James Walsham. He was educated at Trinity College, Cambridge, where he took the degree of M.A., and was for some time employed in the Audit Office, but was appointed to a clerkship in the Foreign Office in 1854. He was made Acting Consul in Mexico in 1859, Secretary of Legation in 1861, and Chargé d'Affaires in 1868. In 1866 he was transferred as Second Secretary to Madrid; was appointed to the Hague in 1870, and promoted to be Secretary of Legation in Peking, Oct., 1878, but did not proceed. From 1875 to 1878 he was Acting Chargé

d'Affaires in Madrid, and then went to Berlin as Secretary of Embassy. In 1883 he was transferred to Paris, and acted as Minister Plenipotentiary during the absence of the ambassador. Since Oct., 1885, he has been Envoy to China, and also to the King of Corea.

**WALSHE**, Professor Walter Hayle, M.D., LL.D., born in Dublin in 1816, eldest son of William Walshe, Barrister-at-Law, was educated in Paris and in Edinburgh, where he graduated M.D. He is Emeritus Professor of Medicine in University College, London, having for thirteen years filled that chair, which he resigned in 1862; and Consulting Physician to three London Hospitals. He has written "Practical Treatise on the Lungs," 1th edit., 1871; "Nature and Treatment of Cancer," 1846; "Diseases of the Heart and Great Vessels," 4th edit., 1878; "Dramatic Singing, Physiologically Estimated," 1881; "Physiology versus Metaphysics in Relation to Mind," 1881; "The Colloquial Faculty for Languages, and the Nature of Genius," 2nd edit., 1886; &c. He is a Fellow of the Royal College of Physicians, London, and an Associate of foreign medical and scientific societies at Copenhagen, Paris, London, Athens, and elsewhere.

**WALTER**, John, eldest son of the late Mr. John Walter, of Bearwood, Berks, some time member for that county, born in London in 1818, was educated at Eton, graduated in honours at Exeter College, Oxford, took his M.A. degree in 1843, and was called to the Bar at Lincoln's Inn in 1847. He was an unsuccessful candidate in the Liberal-Conservative interest for Nottingham in 1843; was returned in Aug., 1817, the day after his father's death, and continued to represent that borough till April, 1859, when he was elected for Berks. He was defeated at the general election in July, 1865, but was again elected in 1868, 1871, and 1880. After the dissolution of 1885, Mr. Walter did not offer himself for re-election. The name which Mr. Walter bears is intimately associated with the history of what Burke called "The Fourth Estate," his grandfather having published the first number of the *Times*, Jan. 1, 1788. His father raised that journal to eminence, and by his energy in inducing men of talent to contribute to its columns, rendered it a great organ of free opinions and popular knowledge; and, in spite of many obstacles, first brought the steam-engine to the aid and service of the newspaper press. Mr. Walter himself built the new office of

the *Times* in Printing House Square, and also the magnificent house at Bearwood.

**WANAMAKER**, The Hon. John, American statesman, was born at Philadelphia, July 11, 1838. He attended the public schools for a few years, but at the age of thirteen, on the death of his father, was obliged to enter business. By 1861 he had saved money enough to make a start on his own account, and he then opened a clothing store in partnership with his brother-in-law, under the firm-name of Wanamaker & Brown. The business proved profitable, and in course of time other departments were added, until it has become the largest general retail store in the United States. Since the death of Mr. Brown, in 1868, the vast establishment has been conducted by Mr. Wanamaker under his own name alone. Mr. Wanamaker is actively interested in the Sunday-schools of the city of his birth and residence, and has the reputation of contributing liberally to charities. He is an earnest Republican in politics, and since the beginning of the present administration (March, 1889) has held the Cabinet office of Postmaster-General.

**WANKLYN**, James Alfred, M.R.C.S., London, 1850, an eminent chemist, was born at Ashton-under-Lyuo, in the year 1834. He studied chemistry under Bunsen at Heidelberg, and became Demonstrator of Chemistry in the University of Edinburgh in 1859, was Professor of Chemistry at the London Institution from 1863 to 1870, and Lecturer on Chemistry and Physics at St. George's Hospital from 1877 to 1880. He has held office as Public Analyst for the county of Buckingham, and for the boroughs of Buckingham, Peterborough, Shrewsbury, and High Wycombe. In 1868 he prepared propionic acid by the action of carbonic acid on sodium-ethyl, being the first example of the artificial production of an organic substance directly from carbonic acid. In 1861, in conjunction with Dr. Lyon Playfair, he communicated to the Royal Society of Edinburgh a paper "On a mode of taking the density of vapours of volatile liquids at temperatures below the boiling point." Subsequently he pursued, conjointly with Dr. Emil Brlenmeyer, a series of researches which, besides settling the formula of mannite and the relation of the sugar group to the alcoholic series, afforded one of the earliest complete studies of isomerism among the alcohols. In 1867, he prepared propione, by the action of carbonic oxide on sodium-ethyl,

and, together with the late Mr. E. T. Chapman and Mr. Miles H. Smith, invented the well-known Ammonia process of Water Analysis. Some years later, conjointly with Mr. W. J. Cooper, he brought out the moist combustion process. In 1871, he conducted for the Government an investigation into the quality of the milk supplied to the London workhouses. Conjointly with Mr. W. J. Cooper, he made periodical analyses of the London Water Supply, which were regularly published by the late Government's Water Examiner in his official returns. Mr. Wanklyn is the author of five text-books for Chemists and Medical Officers of Health, viz.: a "Treatise on Water Analysis;" a "Treatise on Milk Analysis," 1873; a "Treatise on Tea, Coffee, and Cocoa," 1871; "Bread Analysis," 1881; and "Air Analysis," 1880, the two last-named books being the joint production of Mr. W. J. Cooper and himself. He is also the author of "The Gas Engineer's Chemical Manual," 1886. In 1860, he was elected a corresponding member of the Royal Bavarian Academy of Sciences. He was also elected an honorary member of the University of Edinburgh Chemical Society; but he belongs to none of the English scientific societies.

**WARD**, Adolphus William, LL.D., Litt.D., born at Hampstead, Dec. 2, 1837, was educated in Germany (where his father held consular and diplomatic appointments), and at Bury St. Edmunds Grammar School. In 1854, he entered at Peterhouse, Cambridge, of which college he became a Fellow in 1860, having graduated in the Classical Tripos of the previous year. In 1866 he was appointed Professor of History and English Literature at Owens College, Manchester. He held various examinerships in the Universities of Cambridge and London, and was, in 1870, created an hon. LL.D. of Glasgow, and in 1883 a Litt.D. of Cambridge. He took an active part in the movement for the foundation of the Victoria University, Manchester, 1880; and afterwards successively held, in the new University, the offices of Chairman of the General Board of Studies, and of Vice-Chancellor. In Dec., 1883, he was appointed Principal of Owens College. Dr. Ward is the English translator of Curtius' "History of Greece," 5 vols., 1868-73; and author of the following works: "A History of English Dramatic Literature to the Death of Queen Anne," 2 vols., 1875; "The House of Austria in the Thirty Years' War," 1869; "Chaucer," 1880; and "Dickens," 1882, in *Moxley's*

"English Men of Letters" series. He edited the Globe edition of "Pope's Poetical Works," 1869; and the Clarendon Press edition of Marlowe's "Doctor Faustus" and Greene's "Friar Bacon," 1878; second edition, 1887; and has contributed to the Dictionary of National Biography, the Encyclopædia Britannica, the *Quarterly*, *Edinburgh*, and *English Historical Reviews*, Herbert's *Encyclopædie der neueren Geschichte*, the *Saturday Review*, the *Manchester Guardian*, and other journals. In 1879 he married his cousin, Adelaide Laura Lancaster.

WARD, Mrs. Herbert D., née Elizabeth Stuart Phelps, American writer, was born at Andover, Massachusetts, Aug. 13, 1811. Most of her life has been devoted to benevolent work in her native town, to the advancement of women and to temperance and kindred topics. In 1876 she delivered a course of lectures before the Students of Boston University. She began to write for the press at the age of thirteen, and her contributions to periodicals during the past twenty-five years have been very numerous. In addition to these she has published "Ellen's Idol," 1864; "Up Hill," 1865; "The Tiny Series," 4 vols., 1866-69; "The Gypsy Series," 4 vols., 1866-69; "Mercy Gliddon's Work," 1866; "I Don't Know How," 1867; "The Gates Ajar," 1868; "Men, Women and Ghosts," 1869; "Hedged In," 1870; "The Silent Partner," 1870; "The Trotty Book," 1870; "Trotty's Wedding Tour," 1873; "What to Wear," 1873; "The Good Ahn Series," 1874; "Poetic Studies," poems, 1875; "The Story of Avis," 1877; "My Cousin and I," 1879; "Old Maid's Paradise," 1879; "Sealed Orders," 1879; "Friends, a Duet," 1881; "Beyond the Gates," 1883; "Dr. Zay," 1884; "Burglars in Paradise," 1886; "Little Poems for Little People," 1886; "The Madonna of the Tube," 1886; "The Gates Between," 1887; "Jack the Fisherman," 1887; "A Lost Winter," poem, 1889; and "The Struggle for Immortality," 1889. In 1889 she was married to Herbert D. Ward, and, in conjunction with him, she published in 1890 "The Master of the Magicians."

WARD, Professor H. Marshall, M.A., F.R.S., F.L.S., Professor of Botany in the Forestry School, Royal Indian Engineering College, Coopers Hill, is the eldest son of Francis Marshall Ward, Esq., and was born in 1854, and educated at the Owens College, Manchester, and at Christ's College, Cambridge. He commenced his scientific career as a

field-botanist, after the model of the older school of naturalists, his studies being incited by his early life having been spent in the country; about 1870 he came under the influence of Darwin's writings and teachings, and in 1871 he entered more formally on a scientific career by attending Professor Huxley's Biology course at South Kensington. His success there, and in the subsequent course in Laboratory Botany then being organised by Mr. Threlknot Dyer, led to his proceeding to the Owens College, and afterwards to Cambridge. Since that period he has been distinguished especially as a Cryptogamic and Physiological Botanist, and Pathologist, a career for which his early training in experimental science, and in habits of observation in the country, have helped to fit him. In 1875 he was sent to the Owens College, Manchester, and obtained distinctions under Professors Roscoe, Gungee, and Williamson. In 1876 he gained an entrance Scholarship in Natural Science at Christ's College, Cambridge, by open competition, and remained a scholar of that College until 1879, when he took his degree, having obtained First-Class Honours in the Natural Sciences Tripos for that year. Meanwhile he had assisted in the teaching of Botany at South Kensington, and at the Owens College, and had delivered a course of lectures on Botany at Newnham College, Cambridge. Besides coming under the influence of the late F. M. Balfour and others at Cambridge, he had also studied in Germany during vacation, and especially in the laboratories of Professor Sachs of Würzburg; he had also published the results of original investigations into the Embryology of Angiospermous flowering plants, the researches having been carried out in the laboratory at Würzburg and in the Jodrell laboratory at Kew. Immediately after taking his degree in 1879, Mr. Ward was appointed by the Colonial Government to proceed to Ceylon on a scientific mission, to investigate and report upon the causes of the Coffee Leaf disease, which was then devastating that island; this investigation occupied two years, and he returned to England in 1882, having meanwhile published several important Reports and Memoirs on his discoveries connected with the parasitic Fungus which caused that disease, and the measures necessary to combat its ravages, as well as on other botanical subjects. During his travels in the tropics he also made observations and collected material and notes for subsequent publications; some of the

principal were on the structure and morphology of *Asterium*, and of *Meliola*, and other tropical Fungi, and especially of the curious epiphyte *Strigula*, an Epiphyllous Lichen. On his return in 1882 he was forthwith made a Berkeley Fellow of the Owens College, Victoria University, and in 1883 he was appointed Assistant Lecturer in Botany in that University; and in the same year he was also elected to a Fellowship at Christ's College, Cambridge; and in 1885 he was appointed to the official position he now holds as Professor of Botany in the then newly founded Forestry School at Coopers Hill. Professor Marshall Ward is a Fellow of the Royal Society, and has served on the Council of the Linnean Society, and on the Scientific Committee of the Horticultural Society, of both which Societies he is also a Fellow. He is the Recorder of Section D of the British Association; and is an Examiner in Botany in the University of London, and in the University of Edinburgh. He has also examined in Botany for the Natural Sciences Tripos and other examinations in the University of Cambridge, and for the Civil Service Commissioners, and the Science and Art Department. Professor Marshall Ward is the author of numerous scientific memoirs read before the Royal Society and the Linnean Society, and published in the "*Philosophical Transactions*," and the "*Proceedings*," of the Royal Society, or in the "*Transactions*," and the "*Journal*," of the Linnean Society, and in the "*Annals of Botany*," the "*Quarterly Journal of Microscopical Science*," *Nature*, and elsewhere. These memoirs comprise investigations into the embryology, and physiology and pathology of plants, the biology of Fungi and other Cryptogams, the nature of parasitism, fermentation, and other subjects connected with the diseases of plants; the earlier of these researches were made in the laboratories at Kew and Würzburg, and in those of the late Professor De Bary at Strasburg, and of the Owens College, while the later ones have been made in his laboratory at Coopers Hill. Of these, the following are the more important:—"The Structure and Life-history of *Butyloma Ranunculi*," "Histology and Physiology of Fruits and Seeds of *Rhannus*" (with Mr. Dunlop); "Tubercular swellings on the roots of *Vicia Faba*," "The tubercles on the Roots of *Leguminosæ*," "A Lily disease," and papers on the potato-disease and on the Rust of Wheat. In addition to these more special memoirs, he is the author of the following books:—"Timber and some of its Diseases" (Nature Series), and

"The Diseases of Plants" (Romance of Science Series). He also translated Sach's "*Lectures on the Physiology of Plants*," for the Oxford Clarendon Press, and wrote the article "*Schizomycetes*," in the *Encyclopædia Britannica*, and has been a frequent contributor to the pages of *Nature*, the *Gardeners' Chronicle*, the *Journal of Botany*, and other periodicals. Professor Marshall Ward married, in 1883, the daughter of the late Francis Kingdom, Esq., of Exeter.

WARD, John Quincy Adams, American sculptor, was born at Urbana, Ohio, June 29, 1830. In 1850 he entered the studio of the late H. K. Brown, an eminent sculptor, where he remained six years. In 1861 he opened a studio in New York, where he modelled his "*Indian Hunter*," "*The Good Samaritan*," Commodore M. C. Perry, with reliefs, "*The Freedman*," and many busts and small works. In 1869 he built a studio in Forty-ninth Street, New York, where he made the "*Citizen Soldier*," and statues of Shakespeare, Gen. Reynolds, Gen. Washington, Gen. Israel Putnam, an equestrian statue of Gen. Thomas, Gen. Daniel Morgan and Lafayette. He built a larger studio in 1882, where he has made the colossal statue of Washington for the New York Subtreasury building, a colossal statue of President Garfield, with three typical figures on the pedestal; "*The Pilgrim*," a statue of Henry Ward Beecher, with accessory statues, a seated statue of Horace Greeley, &c. He visited Europe in 1872, and again in 1887. For three years he was Vice-President, and for one term President, of the National Academy of Design.

WARD, Mary Augusta, or as the author of "*Robert Elsmere*" prefers to give her name on the title-page of her books, Mrs. Humphry Ward, is a granddaughter of Dr. Thomas Arnold, of Rugby, the historian of Rome. Matthew Arnold was his eldest son. The second son, another Thomas Arnold, the father of Mrs. Ward, at one time held an educational position in Tasmania. There he married the granddaughter of Governor Sorell, and there, at Hobart, several of his children were born, among them (in 1851) his eldest daughter, Mary Augusta. Mrs. Ward, who at that time devoted much attention to early Spanish literature and history, contributed a large number of articles on Spanish subjects to the "*Dictionary of Christian Biography*," edited by Dr. William Smith and Dr. Wace. She also, up to 1885, wrote many critical articles for *Macmillan's Magazine*.

Her first volume was a child's story—"Milly and Olly," 1881, illustrated by Mrs. Alma Tadema. Her first novel was "Miss Bretherton," 1881, which was favourably received but made no particular noise in the literary world. The story is a mere sketch by the side of the later novel. Mrs. Ward's next volume was the translation (1885), itself a work of fine art, of that very remarkable book, Amiel's "Journal In Time." In Feb., 1888, she published her novel of "Robert Elsmere," which was widely read and much discussed. In five months it passed, in the three volume form, through seven editions; and since that time over 60,000 copies of the one volume edition have been sold in this country, and about half-a-million in America, the sale in this latter case consisting largely of course of pirated editions. It has been translated into German, Dutch, and Danish. In the spring of 1890 Mrs. Ward took part in founding a scheme known as University Hall. University Hall has been much misunderstood. It is in reality a settlement among the poor, combined with a lecturing and teaching system devoted to the interests of modern theism and to a free and historical treatment of the Bible. The new settlement was opened to residents in October, 1890, and in November a meeting, inaugurating the work of the hall, was held at the Portman Rooms, at which Dr. Martineau, Mr. Stopford Brooke, Mrs. Ward, and others were the speakers. The address delivered by Mrs. Ward was afterwards reprinted in pamphlet form. The settlement has now eleven or twelve Residents, and the lectures on biblical criticism are well attended. Mrs. Ward remains the Honorary Secretary of it. She was married in 1872 to Mr. Thomas Humphry Ward, M.A., formerly a tutor and Fellow of Brasenose College, Oxford (see following memoir).

**WARD, Thomas Humphry, M.A.**, is a son of the late Rev. Henry Ward, formerly Vicar of St. Barnabas, King Square, E.C., and was born at Hull in 1815. He was educated at Merchant Taylors' School, and at Brasenose College, Oxford, where he graduated (1st class Final Classical School) in Mich. Term, 1838. Before this he had been a candidate for the Civil Service of India, and in 1836 was placed first in the Open Competition. He resigned, however, without proceeding to India, and in Feb. 1839, was elected Fellow of Brasenose, of which College he was Tutor from 1870 to 1880. He then engaged in literary work in London. In 1880-1, with the aid of

the principal critical writers of the day, he brought out "The English Poets: Selections with Critical Introductions" (1 vols.); in 1884 he published "Humphry Sandwith, a Memoir;" in 1885 he edited "Men of the Reign;" and, in 1887, the 12th edition of "Men of the Time." In 1886, with the help of various writers on Art, he brought out, "English Art in the Public Galleries of London," a work sumptuously illustrated with 120 photogravures; and in 1887 he published "The Reign of Queen Victoria: a Survey of Fifty Years of Progress." In this work he had the assistance of Mr. Matthew Arnold, Prof. Huxley, Lord Wolsley, Sir Henry Sumner Maine, and other experts. It should be added that as an undergraduate, he was (with the late Edward Nolan and R. S. Copleston, now Bishop of Colombo) joint author of "The Oxford Spectator." Mr. Humphrey Ward is art critic on the staff of the *Times*. In 1872 he married the eldest daughter of Mr. Thomas Arnold, Mary Augusta, the authoress of "Robert Elsmere" [q.v.].

**WARE, The Right Rev. Henry, D.D.**, Bishop Suffragan of Barrow-in-Furness, was born in London in 1830, and is the youngest son of Martin Ware, Esq., of Russell Square, London, and Telford House, Farnham, Surrey. He was educated at Trinity College, Cambridge; B.A. (Wrangler and First Class in Classics), 1853; D.D., 1889; Fellow of Trinity College, Cambridge, 1855-63; Vicar of Kirkby Lonsdale, 1862-84; Proctor in Convocation from 1867; Canon of Carlisle, 1879-83; and again 1888; Bishop Suffragan of Barrow-in-Furness (Diocese of Carlisle) 1889.

**WARINGTON, Robert, F.R.S., V.P.C.S., F.I.C., &c.**, eldest son of Robert Warington, F.R.S., was born in London Aug. 22, 1838, and educated at home. He has pursued chemistry from his boyhood; has held appointments, first as Teacher of Chemistry at the Royal Agricultural College, Cirencester; and, since 1867, as an Analytical and Research Chemist under Sir J. B. James, F.R.S.; is the author of numerous papers describing original investigations in Analytical and Agricultural Chemistry; the most important of these have been on Tartaric and Citric Acid; on the absorptive power of soil; on nitrification; and on the composition of rain, drainage, and well-waters. He is the author of a small manual of Agricultural Chemistry, "The Chemistry of the Farm," which has a large circulation.

**WARNER, Charles Dudley, L.F.D.**,

D.C.L., American writer and journalist, was born at Plainfield, Massachusetts, Sept. 12, 1820. He graduated at Hamilton College in 1851; studied law and was admitted to the Bar in 1856. He practised law until 1860, when he began journalism and became editor of the *Hartford (Conn.) Press* which in 1867 was absorbed by the *Courant*, of which he has ever since been an owner. He has travelled in Europe and the East and over his own country; and for the last few years, in addition to his editorial duties in *Hartford*, has conducted the "Editor's drawer" in *Harper's Magazine*. He has contributed to the *Atlantic*, *Century*, *Harper's*, and other leading magazines, and has published "My Summer in a Garden," 1871; "Saunterings," and "Back-Log Studies," 1872; "Baddeck and That Sort of Thing," 1874; "My Winter on the Nile among the Mummies and Moslems," 1876; "Being a Boy," and "In the Levant," 1877; "In the Wilderness," 1878; "Captain John Smith," and "Washington Irving," 1881; "Roundabout Journey," 1883; "Their Pilgrimage," 1886; "On Horseback," 1888; "South and West and Comments on Canada," and "A Little Journey in the World," 1889; and, in conjunction with S. L. Clemens (Mark Twain), "The Gilded Age," 1873.

**WARRE**, The Rev. Edmond, D.D., Head Master of Eton College, was born in 1837, and was educated at Eton and Balliol College, Oxford, of which he was a scholar. He obtained a First Class in Classical Moderations in 1856, and in the final Classical Schools in 1859. He was elected Fellow of All Souls in the same year, and retained his Fellowship three years. In 1860 he went to Eton as Assistant Master, a post which he held under Drs. Goodford, Balston, and Hornby, until the resignation of the last named in 1884. At that date, Mr. Warre was designated by general opinion as the most likely successor to the vacant post for which his services and his great popularity at Eton seemed specially to qualify him. He was accordingly elected Head Master by the governing body, and shortly afterwards he took his degree of D.D. at Oxford. He became one of Her Majesty's Honorary Chaplains in 1885.

**WARREN**, Sir Charles, late Chief Commissioner of the Metropolitan Police, is the son of the late Major-General Sir Charles Warren, and was educated at Cheltenham College, Sandhurst, and at Woolwich. He entered the Royal Engineers in 1857; became Captain in 1869;

Major and Lieut.-Colonel in 1878, and Colonel in 1882. From 1867 to 1870 he conducted a series of excavations in Palestine, chiefly round the walls of the enclosure of the Temple of Jerusalem; and wrote "Underground Jerusalem," 1876; "The Temple or the Tomb," 1880; and, in conjunction with Captain Conder, "Jerusalem," 1884. In 1876 he was Special Commissioner to settle the boundary of the Orange Free State; and, in the following year, to settle the Land Question of West Griqualand. He commanded the Diamond Field Horse during the Gaike War of 1878, and the Field Force in Bechnanaland during the same year. During the Zulu War he organised a volunteer force for the assistance of the Transvaal and Natal; he, acting in the capacity of Commander-in-Chief and Administrator of Griqualand West. Major Warren returned to England in 1880, and was appointed Instructor of Surveying at Chatham; and in 1882 he went to Egypt, and was engaged in special duty in restoring in the desert the authority of the Khedive, and bringing to justice the murderers of Professor Palmer's party. From 1884-5, Colonel Warren was commander of the Field Force in Bechnanaland; and in 1886 he was commander of the forces at Suakin; and subsequently in the same year Chief Commissioner of the Metropolitan Police, an office which he resigned in 1888.

**WATERHOUSE**, Alfred, R.A., was born July 19, 1830, at Liverpool. He studied architecture in Manchester, where he began to practice his profession, after travelling, chiefly in Italy. His first considerable work was the Manchester Assize Courts, the result of a hardly-contested competition. In that city he has also been the architect of the County Gaol, the Owens College, the National Provincial Bank of England, and the Town Hall, the result of another competition. In Liverpool, his works comprise the London and North Western Hotel; the Seamen's Orphanage; the Turner Memorial Home; the New Royal Infirmary, and University College; in London, the Natural History Museum; the Prudential Assurance Company's Office in Holborn; the New University Club; the New St. Paul's School; the Central Institution of the City and Guilds of London Institute; the National Liberal Club; the New Weigh House Chapel. Balliol College at Oxford, Caius and Pembroke at Cambridge, have been partly rebuilt from his designs. At Leeds the Yorkshire College of Science has been erected from his designs. The Hotel Métropole, Brighton, is also an

example of his work. Among mansions may be mentioned Heythrop, Oxon, Eaton Hall, Cheshire, and Iwerne Minster, Dorset, as his most conspicuous works. Mr. Waterhouse was honoured by receiving a grand prize for architecture at the Paris Exhibition of 1867, and a "Rappel" at that of 1878. He is a Member of the Royal and Imperial Academy of Vienna; an Associate of the Académie Royale des Sciences, des Lettres et des Beaux-Arts de Belgique; also an Associate of the Royal Academy of Arts at Brussels, Antwerp, Milan and Berlin. He was elected an Associate of the Royal Academy of Arts, England, Jan. 16, 1878, and became a full member on June 4, 1885. He received the Royal Gold Medal of the Royal Institute of British Architects in 1878; and has filled the President's chair of the same body during 1888, 1889, and 1890. He is a member of the Organising Committee of the Imperial Institute, and is also one of those composing the Westminster Abbey Commission.

**WATERLOW, Sir Sydney Hedley, Bart.,** was educated at the Grammar School, Southwark, and at the age of fourteen was apprenticed to the late Mr. Thomas Harrison, Government printer; at eighteen he was placed in charge of the Cabinet Printing Press at the Foreign Office, Downing Street, and at twenty he went abroad, and was engaged in the well-known establishment of Messrs. Galignani. In 1844 he joined his father and brothers in business at London Wall, and for the next twenty years devoted himself to the extensive business of the firm now known as Waterlow & Sons, Ltd. In 1855 he was elected for the Ward of Broad Street in the Common Council, and while a member of the Police Committee devised the scheme of over-house telegraph wires for the use of the police. In 1863 he was elected Alderman for the Ward of Langbourn, and in the same year took an active part in promoting the scheme for Artisans' Dwellings. In 1866-67 he served the office of Sheriff of London and Middlesex, and received the honour of knighthood. In the following year he agreed to contest the county of Dumfries in the Liberal interest, and greatly astonished the Conservative party by being returned at the head of the poll for a county which had been held by them uncontested for eighty years. In 1870 Sir Sydney was appointed on the Royal Commission for inquiry into Friendly and Benefit Building Societies, and took an active part in establishing such societies throughout the kingdom on a satisfactory

footing. In 1872 he was elected Lord Mayor of London, and appointed to the Royal Judicature Commission; in the same year he instituted the now annual Hospital Sunday Fund, of which he is the Vice-President, and the Queen, in recognition of his many services to commerce and philanthropy, created him a baronet. In the following year he was elected treasurer of St. Bartholomew's Hospital, and since then has discharged the duties of his office in a manner that has conferred lasting benefit on the Institution. In 1874, at the general election, he unsuccessfully contested Maidstone, but lost the seat in 1880, and was elected for Gravesend, which he continued to represent until the general election of 1885. In 1881-2 he worked on the Committee on Artisans' and Labourers' Dwellings, a subject in which he has always taken a keen interest. After resigning his Alderman's gown in 1883, Sir Sydney made a tour round the world. His services to the working classes of England are well known, and have gained the appreciation which they deserve. Sir Sydney is also treasurer of the "City and Guilds of London Institute for the Advancement of Technical Education." A member of the Royal Commission for the Exhibition of 1881. In 1849 he gave to the "London County Council" his estate at Highbury, comprising buildings and about 20 acres of land for the use of the public as a Park for ever; it is now known as Waterlow Park.

**WATHERSTON, Edward James, Goldsmith,** born in 1830, is principally known for his persistent advocacy of the remission of the plate duties, abolished in 1890; and for his unwearying exertions, together with the late Mr. Edmund James Smith, to effect the purchase of the interests of the Metropolitan Water Companies (1878-80). He is a Pioneer in the causes of Technical Education and Free Libraries; was lately Captain (F.O.C.) in the Queen's Westminster Rifle Volunteers. He is a member of the National Liberal Club; Member of the Society of Arts, 1877; Liveryman of the Goldsmiths' Company, 1864; Secretary of the Economic Section of the Social Science Association, 1877. Mr. Watherston is the author of "Taxation of Silver Plate," "Our Railways: should they be private or National Property?" "Our Railways; Rates and Fares," "Our Iron Highways," "The Progress of British Commerce," "Elementary Education at Home and Abroad," "Technical Education," "The Industrial Employment of Women in

France, compared with England," "The Industrial Employment of Women, Abroad and at Home," "French Silk Manufactures, and the Industrial Employment of Women," "Societies of Commercial Geography," "The Essence of Art; is it genius or ingenuity?" "Manual or some form of Technical Instruction, a necessary element of a Compulsory system of Education," "Gems and Precious Stones," &c.

**WATKIN, Sir Edward William, Bart., M.P.**, is the eldest son of the late Mr. Absalom Watkin, who was born in London, but settled in Manchester, in 1800, and carried on business as a merchant in that town, from 1800 till his death in 1831. His son, Mr. Edward William Watkin, was first employed in his father's counting-house (ultimately becoming a partner), until the year 1815, when he was appointed to the Secretaryship of the Trent Valley Railway. This led to his joining the London and North-Western Co., and to his various positions as General Manager, and afterwards as a Director and Chairman of the Manchester, Sheffield, and Lincolnshire Railway, and President of the Grand Trunk Railway of Canada; Chairman of the South Eastern Railway, and Director of the Great Western and Great Eastern Companies. In 1839-40 he became one of the directors of the Manchester Athenæum, and was one of the secretaries of the committee which was organised to extricate the institution from its pecuniary embarrassments. He suggested and carried out the great literary soirées of that institution, which were held in the Free Trade Hall, and presided over by Mr. Charles Dickens, Mr. B. Disraeli, and Serjeant Talfourd, in the years 1843, 1844, and 1845 respectively. In 1843 he wrote a pamphlet entitled "A Plea for Public Parks," and became one of the honorary secretaries of the committee which followed, through whose efforts the three existing parks (viz., the "Queen's," "Peel," and "Philip's") were obtained for Manchester and Salford. In 1843, he and a few other members of the Manchester Athenæum started the "Saturday half holiday" in Manchester, which resulted in the general closing of the warehouses for business at two p.m. every Saturday. In 1845, Mr. Watkin was one of the originators of the *Manchester Examiner* newspaper. In 1861 he undertook a private mission to Canada, at the desire of the Duke of Newcastle, then Secretary of State for the Colonies, with the object of bringing the five British Provinces into union, and the establish-

ment of a connection between Canada and the Atlantic, by an independent railway system, which he successfully accomplished. Mr. Watkin was first elected to Parliament in 1857, but was afterwards unseated. He was returned to Parliament, unopposed, for Stockport, in 1864, and again returned at the head of the poll in 1865. He was defeated, however, by a narrow majority in 1868, and contested East Cheshire unsuccessfully in 1869. Whilst in Parliament, in 1866-67, he obtained, as the Chairman of two Select Committees, important alterations in the laws affecting railways, and especially the change in the law of limited liability, which enabled companies to reduce their capital by mere resolution, and without winding up. In 1868 he received the honour of knighthood. Sir E. Watkin was again returned to Parliament at the general election of Feb., 1874, for the united boroughs of Hythe and Folkestone, and was returned unopposed, for the same borough, at the general election of 1880. In that year he was created a baronet. He was High Sheriff of Cheshire, 1871. He has done much to improve the harbours of Boulogne and Calais, so as to establish fixed services by large steamers to increase the comfort of the transit, and to have already reduced the time between London and Paris to seven hours: this movement is progressing. The proposed tunnel under the Channel to connect England and France is an enterprise with which he has been connected in conjunction with the late Michel Chevalier, M. Léon Say, and other eminent French and English public men. Assuming the experiment to succeed, Mr. Watkin has recommended Mr. Gladstone to approach the European and American powers with a view to the complete neutralisation of the work, believing that this would do away with the military alarms on the question raised of late years. At present the works near Shakspeare Cliff, Dover, are kept in repair and ventilation, but Government has not yet shown any desire to give the sanction necessary for their completion. It is understood that Sir Edward has investigated the question of connecting the south coast of Scotland and the north coast of Ireland by a submarine tunnel. He has advocated the extension of harbour and other public works as a means of extending employment and augmenting the trading capacity of the country in competition with foreign nations. In 1885, and again in 1886, Sir E. Watkin was returned for the Hythe division of Kent.

**WATKINS, The Venerable Henry William, M.A.** of Oxford, London, and Durham, and Honorary D.D. of Durham, was born in 1844, and educated at King's College, London, of which he is a Fellow and a member of Council, and at Balliol College, Oxford, of which he was sometime a Scholar. After a distinguished University career, he graduated at London and Oxford, and was ordained in 1871 to the curacy of Pluckley, Kent, on the nomination of Dr. Plumpton, late Dean of Wells. In 1873, he was presented to the Vicarage of Much Wenlock, in Shropshire, and quitted the living two years later to become Censor, Chaplain, and Lecturer on the Greek Testament and on Hebrew, at King's College, London. Shortly afterwards he was appointed first Professor of Logic and Moral Philosophy in the same College. In 1878, Dr. Watkins was elected to the Wardenship of St. Augustine's College, Canterbury, by the Archbishops of Canterbury and York, and the Bishop of London; and while there, he accepted the work of the poor and unwendowed parish of St. Gregory the Great. Soon after Dr. Lightfoot was consecrated to the Bishopric of Durham in 1879, Dr. Watkins was appointed one of his examining chaplains; and, in 1880, was collated to the Archdeaconry of Northumberland with a Canonry in Durham Cathedral. On the division of the See, in 1882, he was transferred to the newly-constituted Archdeaconry of Auckland; and, a few months later, on the death of Archdeacon Prest, to that of Durham. On his first arrival in Durham, he accepted a Professorship of Hebrew in the University, and found leisure to devote some of his energies to the restoration of the parish of All Saints at Newcastle-upon-Tyne, where he laboured as Senior Curate, at a nominal salary, among one of the most neglected and degraded of populations. On the election of Bishop Westcott to the See of Durham, the Archdeacon was again appointed Examining Chaplain. Archdeacon Watkins has contributed several papers at Church Congress Meetings at Sheffield, Swansea, Derby, Wolverhampton, and Manchester, on "Science and Religion," on "The Church and Democracy," on "Elasticity of Worship," and other subjects, which have been published separately, and he has also delivered several Charges as Archdeacon of Northumberland and Durham. Besides these, Archdeacon Watkins has contributed to Dr. William Smith's "Dictionaries of the Bible and of Christian Biography;" and wrote a Commentary

on the Gospel according to St. John, for Bishop Ellicot's "New Testament for English Readers." He was appointed Bampton Lecturer at Oxford for the year 1890, and delivered the course on "Modern Criticism Considered in its Relation to the Fourth Gospel." The Archdeacon was married in 1883 to the elder daughter of Sir Henry Thompson, a lady who is well known both as an artist and as a philanthropist, and who is the author of "The Public Picture Galleries of Europe," a work which has passed through several editions.

**WATKINSON, The Rev. William L.,** Wesleyan Minister, was born at Hull, Aug. 30, 1838. Entered the Ministry 1858, and has travelled in the Ministry in Nottingham, Manchester, Bolton, Harrogate, London, and in other towns. He is the author of the Farnley Lecture "On the Influence of Secularism on Character," delivered in 1887 (now in the 8th edit.); "Mistaken Signs;" "The Beginning of the Christian Life;" "The Programme of the Christian Life;" "Noon-day addresses," delivered in Manchester and Leeds; and various other works.

**WATSON, John Dawson, R.W.S.,** was born May 20, 1832, at Sedburgh, in the West Riding of Yorkshire, was educated at the Edward VI. Grammar School at Sedburgh, entered the School of Design at Manchester in 1847, came to London in 1851, and became a pupil of Alexander Davis Cooper, and a student of the Royal Academy. He exhibited his first picture, "The Wounded Cavalier," at the Royal Institution, Manchester, in 1851. He exhibited at the Royal Academy for the first time in 1853, "An Artist's Studio," and has continued to exhibit to the present time, his principal works being—"Thinking it Out;" "The Poisoned Cup," which obtained a medal at the Vienna Exhibition, 1873; "The Student;" "The Parting;" "Saved;" "Black to Move;" and "Women's Work." In 1860 he illustrated for Messrs. Routledge their Christmas edition of "The Pilgrim's Progress," followed by "Robinson Crusoe," in 1873, and contributed wood-drawings to most of the illustrated books, papers, and magazines of the time. In 1865 he was elected an Associate of the Society of Painters in Water Colours, and a Member of the same Society in 1870; and, some years afterwards, a Member of the Royal Society of Painters in Water Colours of Belgium. His principal works have been, however, in oil, which have been exhibited in the Royal Academy. "Corporal Trim;"

"Only been with a Few Friends;" "The Gleaner;" "An Awkward Pupil," "The Yooman's Wedding," which is the most popular of his pictures. Painters have been particularly pleased by his pictures of moonlight, one more especially which was exhibited in the Society of British Artists. He has painted many decorative pictures; his last and best in this direction are a series of large pictures executed for Colonel Henry Platt, of Llanfairfechan, North Wales.

**WATSON, John Forbes** (commonly known as Dr. Forbes-Watson). M.A., M.D., LL.D., of the University of Aberdeen, a Member of the Royal College of Surgeons of England, a Fellow of the Linnean and the Chemical Societies, and a Commander of the Order of Francis Joseph of Austria, was born in Scotland in 1827. His father was a successful Aberdeenshire farmer, and he was in training to follow his father's occupation, but the abolition of the corn laws having frightened the farmers throughout the country, it was decided that he should enter the medical profession, with the view of ultimately obtaining an appointment in the Hon. East India Company's Service. On the completion of his medical studies at Gt'y's, and in Paris, Dr. Forbes-Watson received a commission in the Bombay Army Medical Service; and, after serving with the artillery at Ahmednuggur, and with the Sind Horse at Khairpur (now Jacobabad), was appointed Assistant-Surgeon to the Jansetjee Hospital, and Lecturer on Physiology in the Grant Medical College; and, for a time, acted also as Professor of Medicine and Lecturer on Clinical Medicine in it. He returned to England, on sick leave, in 1853; and on his recovery, having in the interim spent some time as a student at the School of Mines, Jermyn Street, and in investigating the sanitary application of charcoal, a pamphlet on which was published by him in 1855, he was appointed by the Court of Directors to conduct an investigation into the nutritive value of the food-grains of India; the result of which formed the basis of public dietaries in India. In 1858 Dr. Forbes-Watson was, by the Secretary of State, appointed Reporter on the Products of India, and Director of the India Museum, offices which he held till the breaking up of the India Museum at the end of 1879. Dr. Forbes-Watson has published various works on an "Industrial Survey of India," and on the Natural Products and Resources of the Empire, besides two sets of sample books, prepared at the India Museum, showing

upwards of 1400 specimens of Indian fabrics, and 140 large photo-chromolithographic plates; also "The People of India," in eight vols., with upwards of 400 photographs, published in conjunction with Sir John Kaye. In addition to the numerous illustrations required for some of the above-named works, the whole of the illustrations for Fergusson's "Tree and Serpent Worship," Cole's "Archæology of Kashmir and Multa," Burgess's numerous reports on the "Archæology of India," Breck's "Nilagiri Tribes," Carter's "Leprosy in India," and likewise the great Sanscrit grammar, "Mahabhashya," consisting of 4700 pages (all reproduced in fac-simile) with a number of large maps (in relief) of India, were all prepared in the photographic branch established by Dr. Forbes-Watson in connection with his department. He was Chief Commissioner for India, and Director of the Indian Department of the London International Exhibition of 1882; of that of Paris in 1887; and of Vienna in 1873; and also of the series of annual International Exhibitions at South Kensington in 1870, 1871, and 1872. In 1871-75 he submitted to the Government a proposal for the establishment of a centrally situated India Museum and Library in connection with an Indian Institute, having for one of its objects the promotion of Oriental studies in England with the view of training candidates for the Civil Service of India. His plea for an Imperial Museum for India and the Colonies was warmly supported by the Royal Colonial Institute and all the chief seats of commerce throughout the country, and, unquestionably, was the origin of the Imperial Institute, the building for which is now in the course of erection at South Kensington. Dr. Forbes-Watson, after his retirement at the end of 1879, spent some time in India; and, since his return to England, has been engaged in preparing for publication the results of investigations undertaken during the earlier periods of his career.

**WATSON, The Rev. Henry William**, D.Sc., F.R.S., was born in London, Feb. 25, 1827, and is the son of the late Thomas Watson, Esq., R.N. He was educated at King's College, London, and obtained a Mathematical Scholarship there on its first establishment, and entered Trinity College, Cambridge, in 1846; was elected Scholar thereof in 1848; and took his B.A. degree in 1850; being Second Wrangler and Smith's prizeman. He was elected Fellow of Trinity College, and appointed Assistant

Tutor thereof in 1851; and was appointed Second Master of the City of London School, 1854; Mathematical Lecturer at King's College, London, 1856; Assistant Master of Harrow School, 1857; and was presented to the Rectory of Berkswell, near Coventry, 1865. Honored as Moderator and Examiner in the Cambridge Mathematical Tripos 1860 and 1861 respectively, and as Additional Examiner in the year 1877. For many years he has acted as Assistant Examiner to the Civil Service Commissioners; and has been occasional Examiner for the degree of D.Sc. in the University of London. He is the author of "A Treatise on Geometry," in Longman's text-books of Science Series, 1871; "A Treatise on the Kinetic Theory of Gases," published by the Clarendon Press, Oxford, 1876; and sundry Mathematical and Physical papers in the *Philosophical Magazine* and the *Quarterly Journal of Mathematics*, and elsewhere. He is joint author of "Watson and Burbury's Treatise on Generalised Coordinates applied to the Kinetics of a Material System;" "Watson and Burbury's Electricity and Magnetism," part 1, Electrostatics, 1883; part 2, Magnetism and Electrodynamics, 1889; Article "Molecule" in the ninth edition of the *Encyclopædia Britannica*. He was appointed in 1879 a representative governor for the University of Cambridge, of King Edward VIth's School, Birmingham, and was joint founder of the Birmingham Philosophical Society in 1879, and President of the same, 1880 and 1881. The Rev. H. W. Watson was elected Fellow of the Royal Society in 1881.

WATSON, Thomas Henry, architect, born Nov. 1, 1839, obtained three silver medals in 1860 at the Royal Academy of Arts, the Gold Medal in 1861. He was elected an Associate of the Royal Institute of British Architects in 1862; was awarded the Travelling Studentship of the Royal Academy 1868, and the Soane Medallion of the Royal Institute of British Architects 1861. He graduated at the Institute in the Class of Distinction 1866, was President of the Architectural Association in 1871, was elected District Surveyor of St. George's, Hanover Square, North, in 1875, and Fellow of the Royal Institute of British Architects in 1877. Has carried out numerous works in London and many country houses. Among them may be mentioned North Court and other buildings, Somershill, Kent, the seat of Sir Julian Goldsmid, Bart., M.P.; Rickmansworth Park, the seat of J. W. Birch, Esq.; Newton Park, Somerset, for Earl Temple; Crowe

Hall, Bath, and works to the Villa Aurelia, Rome.

WATSON (Lord), The Right Hon. William Watson, is the son of the Rev. Thomas Watson, minister of Covington, Lanarkshire, where he was born in 1828. He was educated at the Universities of Glasgow and Edinburgh, and was admitted an advocate at the Scotch Bar in 1851. He was elected Dean of the Faculty of Advocates in 1875. In Nov., 1876, he was elected M.P., in the Conservative interest, for the Universities of Glasgow and Aberdeen. Mr. Watson was Solicitor-General for Scotland from July, 1874, till Oct., 1876, when he was appointed Lord Advocate. In the latter year he was created an LL.D. of Edinburgh. He was sworn of the Privy Council, and appointed a member of the Committee of Council on Education in Scotland, April 2, 1878. He continued to represent the Universities of Glasgow and Aberdeen till April, 1880, when he was appointed a Lord Justice of Appeal, and made a Peer for life, under the provisions of the Act of 1876, as Lord Watson of Thankerton, in the county of Lanark.

WATTERSON, Henry, American journalist and statesman, was born in Washington City, Feb. 16, 1840. He was educated by private tutors, and began his career as an editorial writer on the press of the national capital; but his professional work was interrupted by the Civil War, in which he served on the Confederate side. After the war, he was chosen to succeed the celebrated George D. Prentice, the founder and editor of the *Louisville Journal*, and, in conjunction with W. N. Haldeman, the founder of the *Louisville Courier*, he made a consolidation of all the newspapers of that city, into the *Courier-Journal*, which, under his management, has become one of the foremost American newspapers. He is a recognised authority in the Democratic party, although for many years he had to contend against the prejudices of a great majority of his party associates. He successfully opposed the reactionary movement of the Southern extremists against the reconstructive amendments to the Constitution, and of the Western extremists as to the national currency. He led what was called "The New Departure" of the Democrats in 1872, making one of a group of journalists who, in that year, became famous as "The Quadrilateral," his colleagues being Whitelaw Reid, Samuel Bowles, and Murat Halstead, and their objective

point—the election of Horace Greeley to the Presidency. He was chief among the friends of the late Samuel J. Tilden, and presided over the National Democratic Convention, which nominated him for President. He has sat in each succeeding National Democratic Convention for the State of Kentucky, acting in those of 1880 and 1888 as Chairman of the Platform Committee, and exercising a decisive influence in shaping the party policy. He was the first prominent Democrat to identify himself with Free Trade ideas and to demand of Congress "a tariff for revenue only," which is now the Democratic battle-cry, and for fifteen years has been regarded as the embodiment of tariff reform in the United States. He has steadily refused office, but in the political crisis of 1876-77 he accepted a seat in Congress, serving with distinction and declining a re-election. He is a constant public speaker and lecturer, a voluminous contributor on economic subjects to the reviews, and an active and familiar figure in the councils of his party. He is the author of many tracts and pamphlets, and a volume of sketches, entitled "Oddities of Southern Life and Character," 1882. He has travelled extensively, and has in the press (1890) a collection of foreign letters.

**WATTS, George Frederick, R.A.,** painter, born in London in 1820, first exhibited at the Academy in 1837. In addition to portraits, he made some historical attempts such as "Isabella finding Lorenzo dead," from Boccaccio, in 1840, and a scene from "Cymbeline," in 1842. At Westminster Hall, in 1843, his cartoon of "Carnotus led in triumph through the Streets of Rome," obtained one of the three highest class prizes of £300, and created sanguine hopes for his future career. Having spent three years in Italy, he again obtained, in 1847, the highest honours at the competition in Westminster Hall. His two colossal oil-pictures, "Ehoh," and "Alfred inciting the Saxons to prevent the Landing of the Danes," which secured for him one of the three highest class prizes of £300, were, with the pictures of Pickersgill and Cross, purchased by the Commissioners. The latter is in one of the committee-rooms of the new Parliament Houses. Mr. Watts exhibited his "Paolo and Francesca," and "Orlando pursuing the Fata Morgana," at the British Institution, in 1848, and his full-length portrait of Lady Holland, at the Royal Academy in the same year. "Life's Illusions," a picture of the class

of "Fata Morgana," exhibited in 1849, was followed in 1850 by "The Good Samaritan," painted in honour of Thomas Wright, of Manchester, and presented by the artist to the Town Hall of Manchester. For the Houses of Parliament Mr. Watts has executed one of the frescoes in the Poets' Hall, "St. George overcomes the Dragon," from Spenser finished in 1853, and he has painted in fresco the west end of the new hall at Lincoln's Inn. For some time he has exhibited regularly at the Royal Academy and Grosvenor Gallery. His principal productions have been portraits and ideal or mythological subjects, such as the well-known "Love and Death," "Endymion," "Orpheus and Eurydice," "Daphne," and (1886) "Hope." In 1882 an exhibition of Mr. Watts' works was held at the Grosvenor Gallery. Mr. Watts has painted for his own house a number of portraits of the most eminent of his contemporaries in public life, literature and art; and these he is understood to have bequeathed to the nation. He executed a portrait of Lord Tennyson, in 1890. In 1886 Mr. Watts married Miss Fraser-Tytler.

**WAY, The Hon. Samuel James,** Chief Justice of South Australia, Judge of the Vice-Admiralty Court, Chancellor of the University of Adelaide, and in 1890 appointed Lieut.-Governor of S. Australia, is the son of the Rev. James Way, and was born at Portsmouth, April 11, 1836. He arrived in South Australia, March 1, 1853; was privately educated. He was called to the South Australian Bar, March 23, 1861; appointed Q.C., Sept. 12, 1871; elected to the House of Assembly, Feb. 10, 1875; appointed Attorney-General, June 3, 1875; appointed Chief Justice, March 18, 1876; elected Vice-Chancellor of the University of Adelaide, April 28, 1876; and Chancellor, Jan. 26, 1888. The Hon. S. J. Way has administered the Government of South Australia five times—in 1877, 1878, 1879, 1888, 1889; is a member of the Executive Council; author of the "Report of the Commission on the Destitute Act, 1881," published in Adelaide, 1885 (an elaborate treatise on Poor Relief in South Australia), and other official publications.

**WEATHERS, The Most Rev. William, D.D.,** a Roman Catholic prelate, born in 1814, was educated at St. Edmund's College, Old Hall Green, where he was ordained priest in 1838; and became professor, vice-president, and finally president in 1851, which office he continued to hold until 1869, when he was removed to Hammersmith to become the first

President of St. Thomas's Theological Seminary. Dr. Weathers was the theologian nominated by the English Bishops to assist in Rome at the preparations for the Vatican Council. He was made a domestic prelate by the Pope in 1888; and in 1872 was appointed Bishop of Amycla, *i.p.i.*, and nominated Bishop Auxiliary for the diocese of Westminster.

**WEBBER, The Right Rev. William Thomas Thornhill, D.D., Bishop of Brisbane,** is the son of the late William Webber, surgeon, of Norwich, by Eliza, daughter of the late Sir Isaac (?) Preston, Bart. He was born in Upper Grosvenor Street, Grosvenor Square, London, Jan. 30, 1837, and educated first at Tonbridge School, and afterwards at Norwich under the late John Woolley, D.C.L. (who was subsequently head of Sydney University), and at Pembroke College, Oxford. (B.A. 1859, M.A. 1862, D.D. *honoris causa*, 1885.) He was ordained by the Bishop of London (Dr. Tait), deacon, 1860, and priest, 1861. He was assistant curate at Chiswick from 1860 to 1864, when he was put in charge of the newly constituted district and parish of St. John the Evangelist, Red Lion Square, Holborn, which he held up to 1885. Here he built the noble church in Red Lion Square, together with clergy-house attached, and schools with accommodation for 700 children in three departments. The site, church, clergy-house, schools, &c., cost £49,000. This large sum of money was collected and administered by Mr. Webber, in the course of an exceedingly busy life of public usefulness. He was one of the Governors of Sion College, 1882-85, and represented Finsbury on the London School Board, 1882-85; was Chairman of the Local Managers of the Board Schools, 1877-85, and Guardian of Holborn Union, 1874-83. He was also connected very prominently during these years with the Charity Organisation Society, the Working Men's Club and Institute Union, the Girls' and the Young Men's Friendly Societies, and many other institutions and societies. On the resignation of Bishop Hale he was appointed to the vacant See of Brisbane, and was consecrated in St. Paul's Cathedral by the Archbishop of Canterbury (Dr. Benson), on St. Barnabas' Day, 1885. When the Bishop took charge of the diocese in 1885 there were but 33 clergy and 30 churches; these, as the result of five years' work, have been increased to 67 clergy and 75 churches.

**WEBSTER, Augusta,** daughter of the

late Vice-Admiral George Davies, published her first book, "Blanche Lisle and other Poems," in 1860, under the name of Cecil Home. After her marriage with Mr. Thomas Webster, Fellow of Trinity College, Cambridge, she published under the same name, "Lesley's Guardians," a novel; and "Lilian Gray," a poem, 1861. Under her own name she has since published translations into English verse of the "Prometheus Bound," of *Æschylus*, 1866; and the "Medea" of Euripides, 1868; "Dramatic Studies," 1868; "A Woman Sold, and other Poems," 1867; "Portraits," 1870; "The Auspicious Day: a Drama," 1872; "Yu-Po-Ya's Lute," a Chinese tale in English verse, 1874; "Disguises," a Drama, and "A Housewife's Opinions" (being reprints of some of her articles in the *Examiner*, to which she was a regular contributor during the years 1876-78), 1879; "A Book of Rhyme," 1881; "In a Day," a drama, 1882; "Daffodil and the Croix-aux-caneaux," 1884, and "The Sentence," a drama, 1887. The *Athenæum* describes Mrs. Webster as follows:—"Undoubtedly the most considerable poet among Englishwomen since Mrs. Browning." In 1879, Mrs. Webster was elected on the London School Board for the Chelsea division; and she was again returned in 1885, but was defeated in 1888.

**WEBSTER, Sir Richard Everard, (J.C.), M.P., Attorney-General,** second son of the late Thomas Webster, Esq., (J.C.), was born Dec. 22, 1812. He received his education at King's College and Charterhouse Schools and at Trinity College, Cambridge, where he gained a Foundation Scholarship, and graduated in both the Mathematical and Classical Tripos. He was called to the Bar at Lincoln's Inn in 1836, and joined the south-eastern (then homo) circuit. He was afterwards appointed to the ancient but honorary offices of Tutor and Postman in the Court of Exchequer at Westminster. He was made Queen's Counsel in 1878, and is believed to be the only man who has for many years past received that honour at so early an age. He has been extensively engaged in most of the heavy commercial and railway cases of the day, and, besides having a large general practice, he has appeared in numerous appeal cases in the House of Lords. He is one of the Governors of the Charterhouse. He contested Bewdley at the election of 1880. In June, 1885, he was appointed Attorney-General in the first Government of Lord Salisbury, not having up to that date been in Parliament. From July to Nov., 1885, he represented Lancaster, and at

the general election of 1885 he successfully stood for the Isle of Wight, defeating Mr. Ashley, the former Liberal member, by a majority of 436. In 1886 he was again returned by a majority of 1,258. He married in the year 1872, Louisa Mary, the only daughter of the late William Calthrop, Esq., M.D., of Withern, in the county of Lincoln; she died in the year 1877.

**WEDMORE, Frederick**, was born at Richmond Hill, Clifton, July 9, 1844, being the son of Mr. Thomas Wedmore, a merchant and magistrate of Bristol. He was educated privately in England and on the Continent, and, resolved on the profession of journalism, he entered the office of a Bristol newspaper before he was nineteen. He remained there three years, and subsequently came to London, writing for various newspapers and magazines. His novels of "A Snapt Gold Ring" and "Two Girls," were published in 1871 and 1874. Thenceforward devoting himself very considerably to the study of pictorial and dramatic art, Mr. Wedmore travelled and lived for some time abroad, chiefly in France, and subsequently became known as a writer on the Arts. His "Studies in English Art"—which has passed through several editions—appeared in 1876, and it was followed by the "Masters of Genre Printing," 1880, and by "Four Masters of Etching," 1883. Mr. Wedmore did much towards making known in England the work of the great etcher, Meryon, previously almost unknown. In 1877 there appeared, reprinted from *Temple Bar*, "Pastorals of France," thus far Mr. Wedmore's single completed work of poetical prose fiction. In 1889 there was published his "Life of Balzac." Mr. Wedmore has for several years held the posts of Art critic of the *Standard*, and Dramatic critic of *The Academy*, and he has also written in the *Nineteenth Century*, and the *Fortnightly Review*. In the autumn of 1885 he visited the United States, and lectured at Harvard College, and the Johns Hopkins University, Baltimore.

**WEIR, Harrison William**, born at Lewes, May 5, 1824, at an early age showed a great inclination for drawing animals and birds, and the study of natural history. He was, in 1837, articled to Mr. George Baxter, to learn designing on wood, colour-printing, and wood-engraving. This proving quite a different kind of work to what it was represented, he used means to have his articles cancelled, but having in vain endeavoured to get

released from his engagement, he of necessity served his time; thus seven years of his life, as far as the work of an artist was concerned, were entirely wasted, and therefore he, in his profession, is self-taught. He was elected a member of the new Society of Painters in Water-Colours in Feb. 1849, and some time before exhibited his first picture, the "Dead Shot," at the British Institution. He also exhibited in Suffolk Street, and at the Royal Academy, his pictures of animals, birds, domestic poultry, fruit, &c., being much sought after. Among his best are, "Startled," "The Forester," "A Servant of all Work," with several of birds singing; "The Christmas Carol"—a robin, published by the *Illustrated London News*. Mr. Weir's first wood drawings appeared in the *Illustrated London News*, also *The Pictorial Times*; he was one of the original staff of the *Field*, and also the *Graphic*, and now of *Black and White*. He has been connected, either by his pencil, pen, or both, with over one hundred and twenty books, his best known being "Routledge's Natural History," "Poultry Book," "Funny Dogs with Funny Tales," "The Adventures of a Bear," also those of "A Dog," and "A Cat." His later works, which are written by himself as well as illustrated, are, "Everyday in the Country," "Animal Stories, Old and New," "Bird Stories, Old and New," but what he considers his chief book is, "Our Cats, and All About Them," a quite original production, and one that will last as a work of reference, the standard of excellence being given in it, as laid down by Mr. Harrison Weir. For judging at shows he also gives rules for breeding cats; among others the tortoise-shell Tom, which has proved successful. He has furnished illustrations for the *British Workman*, *The Cottager*, *Band of Hope Review*, the *Children's Friend*, *Chatterbox*, *Little Folks*, *Poultry and Fanciers' Gazette*, and numerous others; he has laboured to improve children's books and books for the poorer classes. He is a Fellow of the Royal Horticultural Society, and has been a Member of the Fruit Committee some years, having himself been awarded Silver Medals for excellence in fruit growing. He has paid considerable attention to the management and varieties of poultry and pigeons, and has gained several cups and other prizes, besides acting as judge at poultry shows for over thirty years. He has also acted as judge of cage birds at the large shows for the same period. He established the first Cat Show at the Crystal Palace, which he intended should induce the owners of cats, through the medium of

winning prizes, to take more interest in the breeding and welfare of their cats. The exhibition has so far attained its objects as to have enhanced the pecuniary value of the cat. One curious fact remains to be told, and that is, although he has planned and carried out such a large amount of work during his career of half a century, he has during nearly the whole time been an invalid, his nervous prostration often lasting many days, and for the last thirty years he has not been a day without pain. At 23 years of age he married the eldest daughter of J. F. Herring, the well-known horse painter.

**WELD**, His Excellency Sir Frederick Aloysius, G.C.M.G., third and only surviving son of Humphrey Weld, of Chideock Manor, Dorset, and the Hon. Christina Maria, daughter of Charles, Lord Clifford of Chudleigh, and of Hon. M. Eleonora, daughter of Henry, Lord Arundell of Wardour. Frederick Aloysius was born May 9, 1823, and was educated at Stonyhurst and Friburg, Switzerland. He emigrated to New Zealand in 1843-44; became a Member of the Executive Council, 1854; and Minister for Native Affairs, 1860. In 1861 he was entrusted with the formation of a Ministry, the Governor requesting him "in the name of Her Majesty to assist him in saving the colony in this great crisis" of threatening bankruptcy and actual war. The policy he announced was accepted by the Secretary of State, and honourably commented upon in both Houses of the British Parliament. Mr. Weld obtained great influence over the natives of his district; he was the first to explore certain uninhabited districts of the Middle Islands; for reports of these expeditions, see the *New Zealand Government Gazette*, 1851. He was appointed Governor of Western Australia, April, 1869; Governor of Tasmania, Sept., 1874; Governor of the Straits Settlements, Singapore dependencies, and Malay Native States, 1880-87, when he retired. He is the author of several papers and pamphlets, "Hints to Intending Sheep Farmers in New Zealand," which has passed through two or three editions; "On the great Volcanic Eruption of Mauna Loa, Sandwich Islands, 1855, and Ascent of that Mountain," published in the *Journal of the Royal Geological Society*, and more at large in a lecture entitled "Notes on New Zealand Affairs," London, 1860, &c. Sir Frederick A. Weld, then Mr. Weld, introduced the self-reliant policy into New Zealand, dispensing with the aid of British troops, which, whilst

costing the English ratepayers about two-and-a-half millions a year, embittered the relations between the mother country and the colony, and was entailing heavy burthens and imminent bankruptcy in the latter. He believed in using small bodies of men trained to bush-fighting, in making roads, and in removing any real grievances that might exist. In Western Australia he commenced railway and telegraphic communication on a large scale, established an educational system, which still works, and sent out exploring parties into the interior of the country, his aim being to connect Western Australia (hitherto isolated) with the rest of the continent and the world. The revenue largely increased during the term of his administration, though Imperial expenditure in the colony almost ceased. Tasmania made gradual progress during his term of office, but Tasmania was under responsible ministerial government. In the Straits, Sir Frederick travelled much in the interior of the country hitherto unvisited by high officials. Very great progress was made, many native states voluntarily submitted themselves to British influence, and asked for British administration. Sir Frederick Weld was also sent by the Foreign Office on a special mission to Borneo, and recommended a protectorate, which has since been established.

**WELLDON**, The Rev. James Edward Cowell, son of the late Rev. E. J. Welldon, was born April 25, 1851, educated at Eton, and obtained the Newcastle Scholarship there in 1873. He was Scholar, and afterwards Fellow, of King's College, Cambridge; Bell Scholar in 1874; Browne's Medallist in 1875 and 1876; Craven Scholar in 1870; Senior Classic and Senior Chancellor's Medallist in 1877. After living some time abroad he was appointed Lecturer, and subsequently Tutor, of King's College, Cambridge. He became Master of Dulwich College in 1883, and Head Master of Harrow School in 1885. He is Honorary Chaplain to the Queen; Member of the Royal Commission on a Teaching University for London; and has several times been Select Preacher at Oxford and Cambridge; and Speaker at various Church Congresses. He is the author of "Translation of Aristotle's Politics" and of his "Rhetoric;" "Sermons preached to Harrow Boys;" and "The Spiritual Life and other Sermons."

**WELLS**, Henry Tanworth, R.A., was born in London in Dec. 1828. His first practice in art was as a miniature painter.

When only seventeen years of age he exhibited at the Royal Academy a portrait of "Master Arthur Prinsep," a brother of Mr. Valentine Prinsep, the painter. Steadily, if at first slowly, the young artist advanced in this difficult branch of art. From the year in which he first exhibited till 1866 he never ceased to be represented as a miniaturist on the walls of the Academy; and down to 1860 he usually exhibited eight works annually—the largest number allowed. In this long series were a portrait of Princess Mary of Cambridge, painted for Her Majesty, 1853; a group of the painter himself and his wife in tourist costume, 1860; together with full lengths of the Duchess of Sutherland, and Frances Countess of Waldegrave. In the Academy Exhibition of 1867 he made his first appearance as an oil-painter. A prominent place was awarded in 1865 to his "Preparing a Tableau Vivant"—a portrait group of three sisters; and he also contributed a landscape entitled "Outskirt of a Farmyard at Twilight." In 1866 he painted his large picture of "Volunteers at a Firing Point," and in May that year he was elected A.R.A. Since that time he has been a constant exhibitor of portrait pictures, some of which are large compositions; as "The Rifle Range at Wimbledon," 1867; "The Earl and Countess Spencer and their Friends at Wimbledon," 1868; "Letters and News at the Loch Side," 1868; "Lord Chancellor Hatfield, with his Attendants in Procession through the House of Lords," painted on a large scale for the Fishmongers' Company; "Lord Chancellor Selborne," for the Mercers' Company; a large hunt-picture, entitled "A November Morning at Bird-sall House, Yorkshire," 1875; "Mr. Robert Jardine, with Greyhounds," 1876; "The Old Stonebreaker," and the "Laurel Walk," 1876. In 1880 he exhibited his large painting of "Victoria Regina," representing the Queen in the early morning of June 20, 1837, receiving news of the death of William IV., and the homage of Archbishop Howley and the Lord Chamberlain. In 1882 was exhibited "Friends at Yewden," a group of Academicians (including the painter himself) and other friends, painted for the collection of Mr. G. C. Schwabe. This was followed by two subjects of labour, "Loading at a Quarry," 1884; and "Quarrymen of Purbeck," 1885. In 1887 appeared his largest canvas, "The Queen and her Judges," representing the ceremonial of the opening of the Royal Courts of Justice. Mr. Wells was elected a Royal Academician in June, 1870. He married Joanna Mary

Boyce, an accomplished artist, who died in 1861.

**WELLS, Sir Thomas Spencer, Bart., M.D.**, is the eldest son of the late Mr. William Wells, of St. Alban's Hertfordshire, by Harriet, daughter of the late Mr. William Wright of East Sheen, Richmond, Surrey. He was born in 1818 at St. Alban's, and was educated at Trinity College, Dublin. He gained his first medical experience in the Infirmary and School of Medicine at Leeds, and subsequently studied in the Anatomical School at Dublin, and at St. Thomas's Hospital. He was admitted a member of the Royal College of Surgeons in 1841, and in 1844 was elected one of the honorary fellows created by the new charter. Having become an assistant Surgeon in the Navy, he saw some active service, both afloat and ashore, before and during the Crimean war; and he was sent out in 1854-5, under the auspices of Mr. Sydney Herbert, as chief surgeon of auxiliary hospitals at Smyrna, and at Renkioi on the Dardanelles. Returning to England at the close of the Russian war, he revived the operation with which his name is chiefly associated—namely, ovariectomy, and became Surgeon to the Samaritan Hospital for Women. He was President of the College of Surgeons in 1882-83, and delivered the Hunterian Oration 1882. He is a Fellow of the Royal Medical and Chirurgical Society, and surgeon to Her Majesty's Household, and at the third centenary of the University of Leyden he had conferred upon him the degree of an honorary M.D. Her Majesty, in April, 1883, conferred upon him the honour of a baronetcy in acknowledgment "of the distinguished services which he has rendered to the medical profession and to humanity." Sir Spencer Wells is the author of several important surgical works, especially on those branches of operative surgery to which he has specially devoted himself. Mr. Wells married, in 1853, Elizabeth, daughter of the late Mr. James Wright, solicitor, of New-Inn, London, and of Sydenham, Kent. His son (Arthur Spencer) was educated at Wellington College, and Trinity College, Cambridge.

**WELLWOOD, Lord, The Honourable Henry James Moncreiff**, is the eldest son of Lord Moncreiff of Tallhale (1st Baron), and was born in Edinburgh on April 24, 1840. He was educated at the Edinburgh Academy; and subsequently at Harrow, and Trinity College, Cambridge; where,

in 1861, he graduated B.A., LL.B. (1st class Law honours). He was called to the Scottish Bar in 1863; held the office of Advocate-Depute 1865-66; and again 1868-74; and 1880-81. In 1881 he was appointed Sheriff of the counties of Renfrew and Dute; which office he held till November 1888, when he was appointed a Senator of the College of Justice (a Lord of Session) under the title of Lord Wellwood. Lord Wellwood is a Liberal Unionist in politics. He is the author of a work on "Revision in Criminal Cases," 1877. He married first, on April 3, 1866, Susan Wilhelmine, third daughter of Sir William H. Dick Cunyngnam, Bart., of Prestonfield (she died in 1869); and, secondly, on March 26, 1873, Millicent Julia, daughter of Colonel F. D. Fryer, of Moulton Paddocks, Newmarket. She died in 1881.

**WEMYSS** (Earl of), The Right Hon. Francis Wemyss Charteris Douglas, eldest son of Francis Wemyss Charteris Douglas, eighth Earl of Wemyss, was born in 1818, and educated at Eton and Christ Church, Oxford (B.A., 1841). In the same year he was returned to the House of Commons for the Eastern division of Gloucestershire, which he represented until 1846, when he resigned his seat, having abandoned the support of the protective Corn Laws, and became a convert to the Free Trade measures of Sir R. Peel. In Aug., 1847, he was returned as a Liberal Conservative for Haddingtonshire, which he continued to represent until his succession to the peerage; was a Lord of the Treasury under the Aberdeen ministry, 1852-55, retiring with the Peelite party in Feb. of that year from the administration of Lord Palmerston. As Lord Elcho, he took a very conspicuous part in the Volunteer movement, and he is an authority on various questions connected with the national defence and armaments. He is Colonel of the London Scottish Volunteers, and, as Chairman of the Council of the National Rifle Association, he frequently presided over the Wimbledon Rifle Meetings. He has been a Deputy-Lieutenant of Haddingtonshire since 1846. He succeeded to the Earldom of Wemyss on the death of his father, Jan. 1, 1883. His lordship is the author of "Letters on Military Organisation," 1871.

**WENLOCK**, His Excellency Lord, was appointed Governor of Madras, in succession to Lord Connemara, 1890.

**WERE**, The Right Rev. Edward Ash, D.D., Bishop Suffragan of Derby, was

born at Clifton, Bristol, Nov. 14, 1846, and is the youngest son of Thomas Bonville Were, Esq., and Frances Anne Were, daughter of William Wright, Esq., of Clifton. He was educated at Rugby, under Dr. Temple, from 1860 to 1865; gained the 2nd Exhibition in 1865; entered at New College, Oxford, 1865; took first class in Classical Moderations, 1867; and second class in Final School of Lit. Hum., 1869; B.A., 1870; M.A., 1872; Hon. D.D., 1889; was Assistant Master at Winchester College, from 1870 to 1880; Vicar of North Bradley, Wilts, from 1880 to 1885; Examining and Private Chaplain to the Bishop of Southwell, from 1885 to 1889; Vicar of St. Werburgh's, Derby, 1889; consecrated, in Westminster Abbey, Nov. 1, 1890, Bishop Suffragan of Derby for the diocese of Southwell.

**WEST**, Sir Algernon, K.C.B., son of Martin West, Esq., and Lady Maria West, was born April 1, 1832, was educated at Eton, and was appointed Private Secretary to Sir Charles Wood and the Duke of Somerset at the Admiralty, and Private Secretary to Sir Charles Wood and the Marquis of Ripon at the India Office. He was also Private Secretary to the Right Hon. W. E. Gladstone when Prime Minister in 1868; was Deputy Director of Indian Military Funds; appointed Commissioner of Inland Revenue in 1873; served on a Royal Commission on the Legal Departments; was appointed Deputy-Chairman of the Board of Inland Revenue in 1877; and Chairman of the Board in 1881. Sir Algernon West was formerly a Gentleman Usher of Her Majesty's Privy Chamber; and is J.P. for Middlesex. He married Mary, daughter of Hon. George and Lady Caroline Barrington; and was created a C.B. in 1880, and K.C.B. in 1886.

**WEST**, The Hon. Sir Lionel Sackville. *See* SACKVILLE, BARON.

**WESTCOTT**, The Right Rev. Brooke Foss, D.D., D.C.L., Bishop of Durham, Regius Professor of Divinity in the University of Cambridge, was born near Birmingham, in Jan. 1823, and was educated at Trinity College, Cambridge, of which he was successively Scholar and Fellow, and where he took his B.A. degree in Jan., 1848, as 23rd Wrangler in Mathematical honours, and was bracketed first (with Dr. Scott of Wootton Bassett) in the First Class of the Classical Tripos, and was second Chancellor's Medallist. His university career was more than ordinarily distinguished, as he obtained the Battie University Scholarship in 1846; carried

off Sir William Browne's medals for the Greek Ode in 1846, and again in the following year; and obtained the Bachelor's Prize for Latin Essay in 1847, and again in 1849. He obtained the Norrisian Prize in 1850, and was ordained deacon and priest in the following year by the Bishop of Manchester. He was elected Fellow of his college in 1849, and proceeded M.A. in 1851, B.D. in 1865, and D.D. in 1870. Dr. Westcott received from Oxford University the honorary degree of D.C.L. in 1881, and that of D.D. from Edinburgh University at its Tercentenary Commemoration in 1883. He held an Assistant-Mastership in Harrow School from 1852 to 1869, under Dr. Vaughan and Dr. Montagu Butler. In 1868 he was appointed Examining Chaplain to the Bishop of Peterborough, and was promoted to a canonry of Peterborough Cathedral in 1869, when he left Harrow. He was elected Regius Professor of Divinity at Cambridge, Nov. 1, 1870, on the retirement of Dr. Jeremie. Dr. Westcott was nominated honorary chaplain to the Queen in 1875, and a chaplain in ordinary in 1879. In May, 1881, was published, under the title "The New Testament in Greek," the result of the 28 years joint labour of Drs. Westcott and Hort upon the Greek text; volume (I., containing the introduction, was published at a later date. On Oct. 21, 1882, he was elected to a fellowship at King's College, Cambridge. Dr. Westcott resigned his residentiary canonry at Peterborough in May, 1883; he was appointed one of the Archbishop of Canterbury's chaplains in the following month, and in October of the same year he was nominated to the canonry of Westminster, vacated by Canon Barry, then Bishop Designate of Sydney, Australia. In March, 1890, he was nominated to the Bishopric of Durham, in succession to his friend, Bishop Lightfoot, and consecrated to the see on May 1. He was one of the Company for the Revision of the authorised version of the New Testament. He sat on the late Ecclesiastical Courts Commission, and took a considerable share in the drawing up of the report. Dr. Westcott has published "Commentaries upon the Gospel of St. John" (reprinted from the "Speaker's Commentary"), upon the Greek Text of the Epistles of St. John and upon the Epistle to the Hebrews. "The Paragraph Psalter," arranged by him for the use of choirs, was published in 1879. His theological works further include "An Introduction to the Study of the Gospels," "The History of the Canon of the New Testament," "The Gospel of the Resurrection," "The Bible in the Church,"

"A History of the English Bible," "The Historic Faith, being Short Lectures on the Apostles' Creed," "The Revelation of the Risen Lord," "The Revelation of the Father," "Christus Consummator," "Social Aspects of Christianity," and contributions to Smith's "Dictionary of the Bible," and "Dictionary of Christian Biography."

WESTLAKE, John, Q.C., LL.D. was born at Lostwithiel, Cornwall, Feb. 1, 1828, and entered Trinity College, Cambridge, where he graduated B.A. 1850, being sixth Wrangler, and sixth in the first class of the classical tripos. He was Fellow of his college, 1851-60, and was called to the Bar at Lincoln's Inn, 1851; became Q.C. 1874, and a Bencher of Lincoln's Inn; Honorary LL.D., Edinburgh, 1877. In 1885 he was elected Liberal M.P. for the Romford division of Essex, but was defeated in 1886 when he stood as a Unionist. Mr. Westlake has published "A Treatise on Private International Law, or the Conflict of Laws," 1858, 2nd ed., entirely re-written, 1880, 3rd ed., 1890; also many contributions to periodicals and transactions. He was one of the founders and editors of the *Revue de Droit International et de Législation Comparée*, published at Brussels; a member of the Institute of International Law, and one of its Vice-presidents at the Munich meeting, 1883; Foreign Secretary of the National Association for the Promotion of Social Science, and President of its Jurisprudence Department at the Birmingham meeting, 1884; and has been Professor of International Law in the University of Cambridge, in succession to Sir H. S. Maine, from 1888. Mr. Westlake married, in 1864, Alice, daughter of Thomas Hare, Esq., author of a "Treatise on Representation." Mrs. Westlake was a member of the London School Board from 1876 to 1888.

WESTMINSTER, The Dean of. See BRADLEY, THE VERY REV. G. G.

WESTWOOD, John Obadiah, M.A., F.L.S., Hon. Pres. Entomol. Society, &c., entomologist, son of the late Mr. Westwood, of Sheffield, born in that town in 1805, and educated at Lichfield, was appointed, in 1861, to the Professorship of Zoology founded at Oxford by the munificence of the late Rev. F. W. Hopley. In 1855 the Royal Society awarded him one of the Royal Medals for his scientific works, and in 1860 he was elected to fill the place of the illustrious Humboldt, as a Corresponding Member of the Entomological Society at Paris. He has written

"Introduction to the Modern Classification of Insects," "Entomologist's Text Book," published in 1838; "British Butterflies and their Transformations," in 1811; "Arcana Entomologica," "British Moths and their Transformations," and "Palmographia Sacra Pictoria," in 1845; "Cabinet of Oriental Entomology," in 1818, "Illuminated Illustrations of the Bible," in 1849, and other more recent palmographical and entomological works.

**WHEATLEY, Henry Benjamin**, was born at Chelsea on May 2, 1838, and is the posthumous son of Mr. Benjamin Wheatley, book auctioneer, of 191, Piccadilly, London. He was educated privately, and was clerk to the Royal Society from 1861 to 1879, when he was appointed Assistant Secretary to the Society of Arts, a position which he still holds. He was one of those who, under the lead of Dr. F. J. Furnivall, founded the Early English Text Society in 1864. He acted as Hon. Secretary from the foundation until 1872, and edited some of the publications of the Society. He published in 1862 a little book on "Anagrams," &c.; in 1870 "Round about Piccadilly and Pall Mall;" in 1880 "Samuel Pepys and the World he lived in;" and in 1880 "Remarkable Bindings in the British Museum." In 1881 he edited "Wraxall's Historical and Posthumous Memoirs" (5 vols. 8vo). He wrote as the first publication of the Index Society (1879) a pamphlet under the title of "What is an Index." He is general editor of the Book-Lovers' Library, for which series he has written "How to form a Library" (1886), "How to Catalogue a Library," and "The Dedication of Books to Patron and Friend" (1887). He has read papers before the Philological, New Shakspeare and Folk Lore Societies, and the Society of Arts, which have been printed in their Transactions. He was appointed Inspector of the Cambridge University Library by the Library Syndicate in the years 1877, 1878, 1879, and 1882, and reported to the Syndicate on the condition of the Library. Mr. Wheatley is at present engaged on a new edition of "Cunningham's London," 3 vols., and a new edition, with additions from the original MS. of "Pepys' Diary."

**WHIPPLE, George Mathews, B.Sc.** (London), F.R.A.S., Fellow Royal Meteorological Society, Member Physical Society, London, was born at Teddington, Middlesex, Sept. 15, 1812, and is the son of George Whipple, of Plymouth, Devon, schoolmaster. He was educated at Queen Elizabeth's Grammar School, Kingston-

on-Thames, Dr. Williams' private School, Richmond, Surrey, and King's College, London. He graduated at the London University in 1871. Mr. Whipple entered the Kew Observatory, as Junior Assistant, Jan. 1, 1858; became Chief Assistant, Nov., 1863; was appointed Superintendent Oct., 1876; held additional appointments of Assistant Examiner in Natural Philosophy, London University, 1876 to 1881; and, for Sound, Light, and Heat, in the Science and Art Department, 1879 to 1882 and 1884 to 1889. He was Foreign Secretary to the Royal Meteorological Society 1884 and 1885. He was also for many years Member of the Council of the Society, and holds a similar appointment in the Physical Society of London and the Richmond Athenaeum, a local Literary and Scientific Society, of which he was one of the founders. His contributions to Scientific Geography, and Horology.

**WHISTLER, James Abbott McNeill**, President of the Society of British Artists, born, of American parentage, in 1835, and educated in the Military Academy at West Point on the Hudson, U.S.A. In 1857 he came to Europe, and entered the studio of Gleyre, in Paris. He began his artistic life as an etcher; and probably by his etchings, numbering between two and three hundred, he will be best remembered. But his paintings, especially his portraits, that of Señor Saragatze, for instance, have elicited the warmest admiration.

**WHITAKER, William, B.A.** (London), F.R.S., F.G.S., Assoc. Inst. C.E., was born in London May 1, 1836, and educated at St. Alban's Grammar School, and at University College, London. He was appointed to the Geological Survey, April 1, 1857; and has written many Geological Survey Memoirs, notably "The Geology of the London Basin," 1872; and "The Geology of London, and of Part of the Thames Valley," 2 vols., 1880; also many papers in the Quarterly Journal of the Geological Society, and in other scientific publications, ranging from 1860 to 1890. Mr. Whitaker was Murchison Medallist of the Geological Society, 1886; and editor of the *Geological Record* for several years. He is hon. member of the Geol. Assoc. and of various local societies.

**WHITE, The Hon. Andrew Dickson**, American educator, was born at Homer, New York, Nov. 7, 1832. He graduated at Yale in 1853, and then travelled in

Europe until 1856, when he returned to the United States and, after studying history for a year at Yale, became, in 1857, Professor of History and English Literature in the University of Michigan. This position he resigned in 1862 on account of ill-health. From 1863 to 1866 he was a member of the State Senate of New York. In 1867 he was chosen the first President of Cornell University (Ithaca, N.Y.), and he remained there until the condition of his health compelled him to retire in 1885. He visited Europe in 1867-68 for the purpose of examining into the organization of schools of agriculture and technology and of purchasing books and supplies for Cornell. In 1871 he was appointed one of the U.S. Commission on Santa Domingo, and in the same year was Chairman of the N.Y. State Republican Convention. From 1870 to 1881 he was the American minister to Germany, and in 1884 was elected a Regent of the Smithsonian Institution in place of the late Asa Gray. President White gave very largely of his own means to Cornell University, and endowed the school of history and political science in that institution with his own valuable library, comprising 30,000 vols. and 10,000 pamphlets. Besides contributions to periodicals he has written "Outlines of a course of Lectures on History," 1861; "A Word from the Northwest," 1863; "Syllabus of Lectures on Modern History," 1870; "The Warfare of Science," 1876; "Paper Money Inflation in France," 1876; "The New Germany," 1882; "On Studies in General History and in the History of Civilization," 1885; "A History of the Doctrine of Cornets," 1886; and "European Schools of History and Politics," 1887. He at present resides at Syracuse, New York.

WHITE, The Rev. Edward, was born in London, May 11, 1819, and educated at Mill Hill Grammar School and Glasgow College, where he gained the first honours in the Logic Class. His first settlement in the Congregational ministry was at Hereford, where he remained ten years; he then removed to London, and became minister of St. Paul's Chapel, Hawley Road, Kentish Town, where he has remained for thirty-five years. From 1869 to 1884 he was editor of the *Christian Spectator*, and he has published the following books: "The Mystery of Growth," "The Minor Moralities of Life," and "Life in Christ." It is by the last named that he is chiefly known: it has been translated into French and Danish, and has had a very wide circulation in all English-speaking countries. The lead-

ing idea of the work is a revival of a doctrine prevalent in the Ante-Nicene Church that man's soul is not necessarily immortal, and therefore it must cease to exist unless renewed in eternal life through the work of redemption in Christ. Mr. White was chosen Merchants' Lecturer on an ancient Nonconformist foundation in 1880, and Chairman of the Congregational Union in England and Wales in 1886, and, in the same year, Professor of Homiletics in New College, London.

WHITE, Walter, author, was born at Reading, Berks, April 23, 1811; educated at two local private schools, and at the age of 14 began to learn his father's trade of cabinet-making. To this he afterwards added the Study of French and German and became proficient in both languages. In 1834 he sailed to New York, whence he returned in 1839. In April, 1844, he was chosen to fill the post of Clerk to the Royal Society. In 1861 he was appointed Assistant Secretary and Librarian, and continued therein until 1883, when, in consequence of failing strength, he resigned the appointment. Mr. White began his "Holiday Walks" in 1851, with a month's tramp in Holland, a narrative of which was published in *Chambers's Journal*, under the title of "Notes from the Netherlands." These were followed by a series of books: "To Switzerland and back," 1854; "A Londoner's Walk to the Land's End," 1855; "On foot through the Tyrol," 1856; "A July Holiday in Saxony, Bohemia, and Silesia," 1857; "A month in Yorkshire," 1858; "Northumberland and the Border," 1859; "All round the Wrekin," 1860; "Eastern England from the Thames to the Humber," 2 vols. 1865; and "Holidays in the Tyrol," 1876. Besides these Mr. White has published a few ballads, "The Prisoner and his Dream," "The Great Exhibition, 1851," "Erebus and Terror," and a volume, "Rhymes," in 1873.

WHITE, Sir William Arthur, K.C.M.G., son of the late Arthur White, Esq., of the consular and colonial service, was born in 1824, and educated at King William's College, Isle of Man, and at Trinity College, Cambridge. He entered the diplomatic service in 1857 as Clerk to the Consulate-General at Warsaw; was promoted to be Consul at Dantzic in November, 1864, and represented French interests at Dantzic during the war between France and Germany in 1870 and 1871. In 1875 he went to Serbia as Agent and Consul-General, and was summoned to Constantinople during the Con-

ference held there in December, 1876, and January, 1877. Transferred to Bucharest in 1878, he was promoted to be Envoy Extraordinary and Minister Plenipotentiary to Roumania. He served in the same capacity at Constantinople during the absence of the Ambassador in April, 1885, and conducted in a most able manner the Conferences called for settlement of the Serbo-Bulgarian difficulty. Soon afterwards he returned to Bucharest, and Sir E. Thornton (who had been appointed to succeed Lord Dufferin at Constantinople) came to his post; but in Oct. 1886, on the reopening of the Bulgarian question, leave of absence was granted to the latter, and Sir W. White returned as Ambassador. He was created K.C.M.G. March 16, 1885.

**WHITE, William Henry, F.R.S., &c.**, was born at Devonport, Feb. 2, 1845, and educated at the Royal School of Naval Architecture, South Kensington, when that institution was under the direction of the Lords of the Council, the Admiralty supporting it. He graduated at the head of the list of students in 1867, and received the highest diploma as naval architect (Fellow of Royal School of Naval Architecture); was at once appointed to the Constructive Department at the Admiralty, where he remained until 1883, rising through the various grades to the rank of Chief Constructor. He was appointed Professor of Naval Architecture at the Royal School in 1870, and held that position there and at the Royal Naval College, concurrently with his Admiralty appointment, until 1881. He resigned his position in the Admiralty in March, 1883, receiving a special letter of thanks from the Lords Commissioners for past services. From 1883 to Oct. 1885, he was engaged in the organisation and direction of the shipbuilding department of the Elswick Works of Sir William Armstrong & Co. During that period he designed and built a number of war-ships for foreign navies, with speeds exceeding any previously attained. He was invited by the Admiralty, in 1885, to assume the office of Director of Naval Construction, which he now holds, in conjunction with that of Assistant Controller of the Navy. He is the professional chief of the Royal Corps of Naval Constructors. During the period 1885-89 Mr. White had responsible charge of the construction of the battle-ships and cruisers, included under the special Programme which Lord Northbrook introduced in 1885, in addition to which he designed and constructed several new types of cruisers, amongst which are the *Blake* and *Blenheim*, the largest

and swiftest cruisers yet laid down. At the present time, the seven cruisers building for Australian service under the Imperial Defence Act of 1888, and the seventy battle-ships and cruisers building under the Naval Defence Act of 1889, at an estimated cost of twenty-one millions sterling, are all being constructed from designs prepared by Mr. White. He is a Fellow of the Royal Societies of London and Edinburgh, Vice-President of the Institution of Naval Architects, Member of the Institution of Civil Engineers, Member of Council of the Institution of Mechanical Engineers, Member of the Iron and Steel Institute, and of the Royal United Service Institution, honorary member of the North-East Coast Institution of Engineers and Shipbuilders. Mr. White is the author of a "Manual of Naval Architecture," which has become a standard work, and has been translated into German and Italian, and officially approved as a text-book for the English, German, Italian, and other navies; also, of a "Treatise on Shipbuilding," and of numerous memoirs and papers on the science and practice of shipbuilding, either published separately, or appearing in the "Proceedings" of the societies of which he is a member.

**WHITEHEAD, Sir James, Bart., J.P., F.R.S.A.**, of Highfield House, Catford Bridge, Kent, is the younger son of the late Mr. James Whitehead, of Apploby, Westmoreland. He was born in 1831, and was educated at the Apploby Grammar School, at that time one of the leading schools of the North. He was engaged for many years in the Bradford trade, in the City of London. In 1879 he was largely instrumental in founding the Rowland Hill Benevolent Fund for Aged and Distressed Post Office Servants, of which he is a trustee. For many years he has taken an active part in political matters, his views being those of an advanced Liberal; and in 1880, amongst other constituencies, he was unanimously invited to contest the Western Division of Kent. At that time, however, he declined to stand, his health being so precarious as to necessitate a prolonged voyage; and in 1881 he retired from business. In 1882 a requisition signed by nearly all the electors of the Ward of Cheap was presented to him, and he was elected Alderman of that ward without a contest. In 1884-5 he served the office of Sheriff of London and Middlesex, and was decorated by the King of the Belgians with the Knight Officership of the Order of Leopold, on his visit to Brussels in connection with the Congo Free State.

In the same year the King of Servia invested him with the Knight Commandership of the Order of Takovo for assistance given to the Servian Minister in this country, and for his warm advocacy of a Balkan Federation. In 1885 he was Master of the Fannmakers' Company. He is one of Her Majesty's Lieutenants for the City of London; a Deputy-Lieutenant for the county of Westmoreland; and a Justice of the Peace for Kent, Westmoreland, and the County of London. He was for some time Chairman of the Visiting Justices of Holloway Prison, and one of the Visitors of the City of London Asylum, at Stone. He is a Governor of Queen Anne's Bounty, and of Christ's Hospital, St. Bartholomew's, Bethlehem, and other hospitals. He is a Fellow of the Society of Antiquaries, and of the Royal Historical, the Royal Statistical, and other learned societies. In 1884 he was induced to become the Liberal candidate for North Westmoreland; and after the Re-distribution Bill in 1885, and again in 1890, he contested that constituency; on each occasion suffering defeat by a small majority at the hands of the Hon. Wm. Lowther. He is an extensive traveller, having visited most of the countries of Europe, the United States, Canada, Australia, New Zealand, and other British Colonies and dependencies, and is an ardent educationist, especially in regard to technical, agricultural, and higher commercial education. In Sept., 1888, he was elected Lord Mayor of London. On Nov. 9, he abolished the "circus" element, substituted a "state procession" for a "show," and instead thereof entertained 10,000 poor people. On the same evening his speech in favour of strengthening the Navy largely influenced the decisions of the Government in their proposals to that end. On the departure from England of Mr. Phelps, the American Minister, he gave a farewell banquet of great splendour to distinguished representatives of law, science, art and literature. When the Freedom of the City was conferred upon the Marquis of Dufferin and Ava, and later upon Prince George of Wales, he gave banquets in their honour. He induced the Corporation to entertain the Shah on his visit to England, and was subsequently decorated with the Persian order of the Lion and the Sun. In connection with the Paris Exhibition, he raised a fund and sent over seventy-five representative artisans to examine and report on the various exhibits connected with their respective crafts, for the instruction of their fellow-workmen and the improvement of English trade. He also visited

Paris by special invitation, and was entertained by both the President of the Republic and the President of the Municipal Council of Paris. In return he himself gave a grand banquet to the Prime Minister and other distinguished Frenchmen. For his services in connection with the French Exhibition, he was at the end of the year decorated with the Commandership of the Legion of Honour. Arising out of this visit to Paris was the fund which he inaugurated for sending poor persons bitten by rabid animals to the Pasteur Institute, and for acknowledging in a practical form the gratuitous services of M. Pasteur to Englishmen. In recognition of his services to the Royal Agricultural Society, when acting as Chairman of the London Committee, he was presented with the Society's Gold Medal; and for his efforts towards the restoration of orchards in our homesteads and cottage gardens, and education in fruit growing, he was presented with the Freedom of the Fruiterers' Company, and was immediately advanced to the office of Master which he now occupies. For the famine in China he raised a larger sum than was ever collected for sufferers in any foreign country, with the exception of the fund organised after the capitulation of Paris; and, as a mark of appreciation, he received a magnificent Tablet of Honour from the Viceroy of the two Kiang provinces of China. As chairman, he established and organised a penny-a-week collection in London factories, shops, workshops, and warehouses in aid of the Hospital Saturday Fund, from which a permanent increase of £50,000 or more is expected in the income of the hospitals. To meet the deficiency in the equipment of the Metropolitan Volunteers, he raised another fund, was enabled to award to all the Metropolitan Regiments sums sufficient to complete their equipment and pay off all debts which had been incurred by them in the purchase of accoutrements. In July, 1889, he established a powerful Association to watch over the interests of Agriculture and Commerce in the revision of Railway Rates. When in Sept., 1889, the prolonged Dock Strike had dislocated the trade of London, he formed a small Committee of Mediators which was ultimately enabled to bring the conflict to a close. In addition to these more noticeable features, his mayoralty was distinguished by an extraordinary activity in educational, philanthropic, and other meetings of public utility, by an unusual number of banquets and entertainments; and by an entire abstention from political

controversy. At the end of his year he was created a baronet on the recommendation of Lord Salisbury, not, as has often happened, in connection with a royal visit, but "for highly valuable services during an eventful mayoralty." In 1880 he was further decorated by the King of Servia with the Grand Cordon of St. Sava for his efforts in the cause of education. In Jan., 1890, he retired from his candidature in North Westmoreland; but in March he was induced to accept a unanimous invitation to contest Leicester at the next election. Since April, 1890, he has been Sheriff of the New County of London, in succession to Mr. Alfred de Rothschild, and in May of the present year, he organised and carried through a large *Conversazione* and exhibition in the Guildhall, at which the Prince of Wales was present, in celebration of the Jubilee of Penny Postage and in aid of the Rowland Hill Benevolent Fund. In 1880, he married Mary M. Hinds, the fourth daughter of the late Mr. Thomas Hinds, of Bank House, St. Neot's, Hants.

**WHITEHOUSE**, Frederic Cope, fourth son of the Right Rev. A. J. Whitehouse, D.D. (Oxon.), LL.D. (Cantab.), second Bishop of Illinois; born in New York, Nov. 9, 1812, educated at Columbia College, New York, graduated with highest honours; studied in France, Germany and Italy; called to the Bar 1870. He has been known as Cope Whitehouse, since 1881, from researches relating chiefly to the credibility of the Greek historians, the scientific knowledge of the ancient world and the Semitic traditions associated with the name of Joseph. He discovered the Kaiyan depression in the Egyptian desert, established its identity with the lost lake Meris of the Ptolemaic maps, and drew plans for its restoration, claiming it as the missing factor in Egyptian prosperity, and, by putting Goshen to the south of Memphis, explains in a new and material sense the Semitic traditions, Hebrew and Arabic. Numerous papers by him, or relating to his works, have been published (see catalogue of British Museum), in various European languages including Greek, and in Arabic. He is member of many learned societies, and was created Commander of the Osmanieh, 1888, for his services to Egyptology and exertions on behalf of the better control of the Nile.

**WHITMAN**, Walt (from Holland and English immigration-stock, son of Walter Whitman, farmer and carpenter),

was born May 31, 1810, about thirty miles from New York City, at West Hills, Suffolk co., New York. He removed very early to Brooklyn and New York cities, where he grew up through boyhood and young manhood; had a plain education in the public schools; learned the trade of printer; and edited newspapers. He then went off for two years on a working and journeying tour through nearly everyone of the Middle, Southern and Western States, and (during the Mexican War of 1848-9) to Louisiana and Texas. Returning leisurely, up the Mississippi and Northern lakes, back to New York City, he lived and worked there till 1862, when he left for Washington, and the front of the Civil War. His intense and continued personal occupation day and night for over two years following in nursing the army wounded and sick, Northern and Southern alike, resulted in a severe prostration and paralysis at the end of the contest, from which he has suffered ever since, though his mind remains unimpaired and he still writes. He is author of "Leaves of Grass," a book of poems; "Specimen Days and Collect," a prose autobiography and notes of the war-hospitals and a collection of various essays; and "November Boughs," an old-age compilation, only yet, perhaps, partly completed. It remains to be said that Mr. Whitman is perceptibly of Quaker stamp, has been and is of buoyant spirits and robust physique, and still lives (May, 1890) at Camden, New York.

**WHITNEY**, Mrs. Adeline D. (Train), American writer, was born at Boston, Sept. 15, 1821; and has published "Mother Goose for Grown Folks," 1860 (2nd edit., enlarged, 1882); "Boys at Choquasset," 1862; "Faith (Hartney's Girlhood)," 1863; "The Gayworthies," 1865; "Leslie Goldthwaite," 1866; "Patience Strong's Outings," 1868; "Hitherto," 1869; "We Girls," 1870; "Real Folks," 1871; "Pensies" (poems), 1872; "Other Girls," 1873; "Sights and Insights," 1876; "Just How: a Key to the Cook-Books," 1878; "Odd or Even?" 1880; "Bonnyborough," 1885; "Holly-Tide" (poems), and "Homespun Yarns" (collected stories), 1886; "Daffodils" (poems), 1887; "Bird-Talk" (poems), 1887; and "Ascotnoy Street," 1890. She was married to Seth D. Whitney, in 1843, and has since resided at Milton, Massachusetts.

**WHITNEY**, The Hon. William Collins, American statesman, was born at Con-

way, Massachusetts, July 5, 1811. A.B. (Yale Coll.), 1803. He studied law at the Harvard Law School and began its practice in 1805 in New York City where he still resides. From 1875 to 1882 he was Corporation Counsel of New York, and from 1885 to 1889 was in the Cabinet of President Cleveland as Secretary of the Navy.

**WHITNEY, William Dwight, Ph.D., LL.D., Litt.D.,** American philologist, was born at Northampton, Massachusetts, Feb. 9, 1827. He graduated at Williams College in 1845, and for the three following years filled a clerkship in a banking house, devoting his leisure to the study of languages. From 1849-50 he studied at Yale, and then went abroad and studied at the Universities of Berlin and Tübingen. Returning to the United States he was appointed Professor of Sanskrit at Yale in 1854, and in 1870 was made also Professor of Comparative Philology in the same institution, both which positions he still holds. He was elected a member of the American Oriental Society in 1849; was its librarian from 1855-73; its Corresponding Secretary from 1857-84; and since then has been its President. He has been a voluminous contributor to its Journal, writing more than half of the contents of vols. vi.-xii. In 1865 he became a member of the National Academy of Sciences, and in 1869, was chosen the first President of the American Philological Association. He is a correspondent of the Berlin, Turin, Rome, and St. Petersburg Academies, the Institut de France, and is a foreign knight of the Prussian order "Pour le Mérite," and, in addition, is a member of many other scientific societies both at home and abroad. The degree of Ph.D. was conferred upon him by the University of Breslau in 1861; that of LL.D. by Williams College in 1868, William and Mary in 1869, Harvard in 1876, and the University of Edinburgh in 1889; that of J.U.D. by St. Andrews in 1874; and that of Litt.D. by Columbia in 1886. Professor Whitney has written for the *North American Review*, the *New Englander*, and similar periodicals, various articles for Encyclopædias, and has contributed largely to the "Transactions" of societies with which he is connected. He has published besides, "Language, and the Study of Language," 1867; "Compendious German Grammar," 1869; "German Reader in Prose and Verse," 1870; "Oriental and Linguistic Studies," 1873-75; "Life and Growth of Language," 1876; "Essentials of English Grammar," 1877; "Sanskrit Grammar," 1879;

"Practical French Grammar," 1886; and "Practical French," taken from his larger Grammar, 1887. He was a contributor to the great Sanskrit Dictionary of Bohtlingk and Roth (7 vols., St. Petersburg, 1853-67), and now for some years has been editor-in-chief of "The Century Dictionary of the English Language," of which the first volume was published at New York in 1889.

**WHITTIER, John Greenleaf,** American poet, was born at Haverhill, Mass., Dec. 17, 1807. Until the age of nineteen, he worked on a farm and occasionally as a shoemaker, getting only such scanty education as a brief attendance at the neighbouring district school afforded. In 1826 he entered the Haverhill Academy, where he remained for portions of two years, about twelve months in all. The publication in local papers of some youthful poems having attracted attention to him, he went to Boston in 1829, as editor of a newspaper, the *American Manufacturer*, and in the following year became editor of the *New England Weekly Review*, published at Hartford, Connecticut; but in 1832 returned to Haverhill to edit the *Haverhill Gazette*, and work upon his farm. He remained there till 1836, being twice a representative in the Legislature of the State. In 1836 he became one of the secretaries of the American Anti-Slavery Society, and soon after removed to Philadelphia, where he edited for four years the *Pennsylvania Freeman*, an anti-slavery paper. In 1840 he returned to Massachusetts, and settled at Amesbury, where he has since resided, being for some years corresponding editor of the *National Era*, published at Washington. Mr. Whittier's works are, "Legends of New England, in Prose and Verse," 1831; "Moll Pitcher," a poem, 1833; "Mogg Megone," a poem, 1836; "Ballads," 1838; "Lays of My Home, and other Poems," 1843; "The Stranger in Lervill," prose essays, 1845; "Supernaturalism in New England," 1847; "Leaves from Margaret Smith's Journal," 1849; "The Voices of Freedom," 1849; "Old Portraits and Modern Sketches," 1850; "Songs of Labour, and other Poems," 1850; "The Chapel of the Hermits, and other Poems," 1853; "A Sabbath Verse," 1853; "Literary Recreations and Miscellanies," 1854; "The Panorama," 1856; "Home Ballads and Poems," 1860; "In War Time, and other Poems," 1863; "National Lyrics," 2 vols., 1865-66; "Snowbound: a Winter Idyl," 1866; "The Tent on the Beach," 1867; "Among the Hills, and other Poems," 1866; "Ballads of New Eng-

land," 1870; "Miriam, and other Poems," 1870; "Child Life," 1870; "The Pennsylvania Pilgrims, and other Poems," 1872; "Child Life, in Prose," 1873; "Hazel Blossoms," 1874; "Mabel Martin," 1875; "Centennial Hymn," 1876; "River Path," 1877; "The Vision of Echara, and other Poems," 1878; "The King's Missive, and other Poems," 1881; "Bay of Seven Islands, and other Poems," 1883; "Early Poems," 1881; "Jack in the Pulpit," 1884; "Poems of Nature," 1885; and "St. Gregory's Guest, and Recent Poems," 1886. Besides these, various fine illustrated editions of some of his shorter poems have been published separately. In 1875 he published a collection of poetry, under the title of "Songs of Three Centuries." A final edition of his works revised by himself was published in 1889-90 (7 vols.).

**WHYMPER, Edward**, artist, author, and traveller, second son of the well-known engraver and water-colour painter, was born in London, April 27, 1810, and educated at Clarendon House School, and under private tuition. He was trained as a draughtsman on wood, but preferring native to sedentary employment, undertook a series of journeys which eventually changed the course of his life. In 1861 he ascended Mont Pelvoux (then reputed to be the highest mountain in France), and discovered from its summit another mountain 500 feet higher—the Pointe des Écrins—which is the loftiest of the French Alps, and was subsequently ascended by Mr. Whympcr in 1861. Between the years 1861-5, in a series of expeditions remarkable for boldness and success, he ascended one peak after another of mountains till then reputed to be inaccessible. These expeditions culminated in the ascent of the Matterhorn (14,780 feet), July 14, 1865, on which occasion his companions, the Rev. Charles Hudson, Mr. Hadow, and Lord Francis Douglas, and one of the guides, lost their lives. In 1867 he travelled in N. W. Greenland with the intention of exploring its fossiliferous deposits, and, if possible, of penetrating into its interior. This journey was characterised by Sir Roderick Murchison as "truly the *ne plus ultra* of British geographical adventure on the part of an individual!" No account of it has been published, although upon it Mr. Whympcr obtained cones of magnolia, and the fruits of other trees, which demonstrated the former existence of luxuriant vegetation in these high northern latitudes. This fine collection of fossil plants was

described by Professor Heer in the Transactions of the Royal Society in 1869 and the first set was secured for the British Museum, where a selection is now exhibited. In 1871 Mr. Whympcr published an account of his Alpine journeys, under the title "Scrambles amongst the Alps in the Years 1860-69," London, 1871. In recognition of the value of this work, its author received from the King of Italy the decoration of Chevalier of the Order of SS. Maurice and Lazarus. In May, 1872, he again left Copenhagen for North Greenland, and spent the season among the mountains, returning on Nov. 9 to Denmark, bringing back from this, his second exploring journey in Greenland, rich collections, among them fine specimens of fossil wood. In the years 1870-80, Mr. Whympcr travelled in the Republic of Ecuador, exploring, ascending, and measuring the Great Andes on and near the Equator. (On that journey he made the first ascent of Chimborazo (20,517 feet), Sincolagua, Antisna, Cayumba and Cotoacachi. Large zoological collections were made, which are now in course of description. The rocks obtained in that journey were described by Professor Bonney in the "Proceedings" of the Royal Society, 1884.

**WICKHAM, The Rev. Edward Charles**, M.A., son of Rev. Edward Wickham, for many years master of an important school at Brook Green, Hammersmith, afterwards Vicar of Preston (Lancashire), was born Dec. 7, 1831, and educated at Winchester College and at New College, Oxford (B.A. 1856, M.A. 1859). He won the Chancellor's Prizes for Latin Verse 1856, Latin Essay 1857, and was elected Fellow of New College 1851. After being ordained, he went as Assistant Master to Winchester, 1857-1859; and afterwards became Tutor of New College, Oxford, 1859-1873; Whitehall Prebendary, 1872, 1873; Select Prebendary in the University of Oxford, 1865-6, 1884-5; Master of Wellington College, 1873. He is the editor of "Horace" in the Clarendon Press series; and married Dec. 27, 1873, Agnes, eldest daughter of the Right Hon. W. E. Gladstone, M.P.

**WIEDEMANN, Professor Gustav Heinrich**, born in Berlin, Oct. 2, 1826, where he has studied physics and chemistry since 1844; in 1850 he established himself as private teacher of physics; in 1854 he became Professor-in-ordinary of physics at the University of Basel; 1863 at the Carolinum Technical Academy at Brunswick;

1866 Professor at the Technical Academy at Karlsruhe; 1871 Professor of physical chemistry; and 1887 Professor of physics at the University of Leipzig. His researches mostly concern the science of electricity and magnetism. Among other things they touch upon the relation between the transmission of heat and electricity, electric endosmose, the relation between the mechanical and magnetic condition of bodies, as well as the dependence of the latter on chemical combination. He wrote "*Lehro von Galvanismus und Electro-magnetismus*," 2 vols., 1860-61; and "*Die Lehre von der Electricität*," 4 vols., 1882-1885. Since 1877 Professor Wiedemann has edited the *Annalen der Physik und Chemie*, founded in 1790, and continued by Gilbert and Poggendorff.

**WILBERFORCE**, The Right Rev. Ernest Roland, D.D., Bishop of Newcastle, is the third surviving son of the late Right Rev. Samuel Wilberforce, successively Bishop of Oxford and of Winchester, by Emily, eldest daughter and heiress of the late Rev. John Sargent of Lavington House, near Petworth, Sussex. His lordship was born at Brighthelm, in the Isle of Wight, Jan. 22, 1840, and educated at Harrow, and at Exeter College, Oxford (B.A. 1864, M.A. 1867, D.D. 1882). He was ordained deacon in 1861 by his father, as Curate of Cuddesdon, Oxfordshire; and was admitted with priest's orders by him in the following year. In 1866 he was appointed Rector of Middleton Stony, Oxfordshire; but he resigned the living in 1869, and became domestic Chaplain to his father. He was appointed, by Mr. Gladstone, Vicar of Seaford, near Liverpool, in 1873; and was nominated to a Canonry in Winchester Cathedral, with mission work attached to it, in 1878. He held the post of Sub-Almoner to Her Majesty from 1871 till 1882, when he was appointed first Bishop of the newly created See of Newcastle-on-Tyne. His lordship married first in 1863, Frances, daughter of Sir Charles Anderson, Bart. (she died 1870), and secondly in 1871 Emily, only daughter of the late Very Rev. George Henry Connor, Dean of Windsor, and has issue, by his second marriage, a son and three daughters.

**WILDE**, Henry, F.R.S., was born at Manchester, Jan. 19, 1833. His tastes led him in early life to engage in electro-mechanical pursuits, and enabled him, in 1858-1864, to make some improvements in lightning conductors and electric telegraphs, for which he obtained several patents. In 1864 he made the discovery

that quantities of magnetism and electricity, indefinitely small, will induce quantities of these forces indefinitely great. To demonstrate this principle he constructed, in 1865, an electro-magnetic induction machine, or "Dynamo," as the machine is now known in commerce, the electro-magnet of which was excited by an initial amount of magnetism sufficient only to sustain a weight of forty pounds, while the electro-magnet was excited to a degree estimated to sustain a weight of 25 tons. The electric current generated from this machine fused a rod of platinum two feet long and one-fourth of an inch in diameter, and produced from carbon points a powerful electric light for the first time from an electro-magnet excited entirely by magneto-electricity. (Proceedings of the Royal Society, 1866; Philosophical Transactions, 1867.) In 1869 he discovered the property of the alternating current to control and render synchronous the rotations of the armatures of a number of magneto-electric or "dynamo" machines, by which their united effect can be obtained without the use of mechanical gearing. (Philosophical Magazine 1870.) Through his various inventions he successfully applied his discoveries to the production and employment of the electric search light in the Royal Navy, as a protection against torpedoes and for other purposes, in which branch of the service, after lengthened trials at Spithead in 1871-75, it was definitely adopted. His methods of producing, regulating and projecting electric light have also been utilized in the navigation of the Suez Canal during the night, by which the carrying capacity of the canal has been nearly doubled. He has also largely applied his discoveries and inventions for generating electricity to the electro-deposition of metals from their solutions (1867-1880), which have superseded the voltaic battery in the electro-plating industries of Birmingham, Sheffield, and the United States, to the great advantage of the health and comfort of the operatives employed therein. In 1876 he solved, for the first time, the problem of the economic production of electro-coppered iron rollers used for calico printing as a substitute for solid copper rollers. In 1878 he discovered some definite quantitative relations subsisting between astronomical and chemical phenomena, which revealed some remarkable multiple relations among the atomic weights of the natural groups of elements. The new atomic relations also bear a much closer resemblance to homologous series in organic chemistry than had hitherto been observed, and just as Liebig predicted

the existence of the homologous series of unides, and the properties of their compounds ten years before they were actually discovered, so the missing members of homologous series of elements have also been predicted. (Proceedings and Memoirs of the Manchester Literary and Philosophical Society, 1878—1886). Mr. Wilde has also made other contributions to theoretical and experimental physics, in the *Philosophical Magazine* and in the Proceedings and Memoirs of the Manchester Literary and Philosophical Society. On the expiration of the several patents for his inventions relating to the generation of electricity he retired from the exercise of his profession of "Electrical Engineer," which style and title he was the first to adopt. He takes an active interest in the advancement of science and the higher education, and has given substantial aid to institutions for the promotion of these objects. For his discovery of the indefinite increase of the magnetic and electric forces from quantities indefinitely small, the Executive Council of the International Inventions Exhibition, London, 1885, awarded him a Gold Medal, although not an exhibitor. He was elected a Fellow of the Royal Society in 1880, and is a Governor of the Owens College, Manchester.

**WILDE, Oscar**, was born in Dublin in 1856, and is the son of Sir William R. Wilde, M.D., Surgeon-Oculist to Her Majesty, Antiquarian, Statistician, and man of letters; and of Jane Francesca, Lady Wilde, known as a poetess, and woman of letters. Oscar Wilde was educated at Portora Royal School, Enniskillen; proceeded to Trinity College, Dublin, of which he was Scholar; and, on having obtained the Berkeley Gold Medal for Greek, went to Oxford in 1874. He obtained first Demyship at Magdalen College; a First Class in Moderations, 1876; and a First Class in Greats; and Newdigate Prize for English poetry, 1878. He came to London, 1879, and was the originator of the Aesthetic movement. He published a volume of Poems in 1880; proceeded to America in 1881, where he delivered over 200 lectures on Art. His drama of "Vera" was produced in New York in 1882; "The Happy Prince and Other Fairy Tales" was published in 1888. He is also a contributor of critical articles to the *Nineteenth Century*, the *Fortnightly Review*, the *Pall Mall Gazette*, the *Saturday Review*, *Athenaeum*, *English Illustrated Magazine*, *Macmillan's Magazine*, and *Blackwood's Magazine*, in which appeared a curious new theory about

Shakespeare's Sonnets. He also wrote "Dorian Gray," a novel of modern life, which appeared in *Lippincott's Magazine*. He has travelled a great deal in Greece and Italy. Mr. Oscar Wilde married, in 1884, Constance, daughter of Horace Lloyd, Esq., Q.C. Issue:—Cyril, born 1885; Vivian, born 1886.

**WILHELMINA, Hélène Pauline Marie** (Queen of the Netherlands), the only child of King William III., by Queen Emma, his second wife, was born at La Haye on Aug. 31, 1880, and succeeded to the throne, on the death of her father, on Nov. 23, 1890; her mother having, shortly before, in consequence of the King's illness, been appointed Queen Regent.

**WILKINSON, The Right Rev. George Howard**, Bishop of Truro, was educated at Oriel College, Oxford (B.A. 1855; M.A. 1859). He was curate of Kensington, 1857-59; perpetual curate of Seaham Harbour, 1859-63, and of Auckland, Durham, 1863-67. In 1867 he was appointed incumbent of St. Peter's, Great Windmill Street, London; and in 1870 he became vicar of St. Peter's, Eaton Square. He was also an honorary canon of Truro Cathedral, and examining chaplain to the bishop of that diocese. He was select preacher at Oxford 1870-81. In Jan., 1883, he was appointed to the See of Truro, which had become vacant by the promotion of Dr. Benson to the Archbishopric of Canterbury; and he was consecrated by the new Primate, in St. Paul's Cathedral, on April 25. He is the author of several works on devotional and other religious subjects.

**WILKINSON, James John Garth**, F.R.G.S., eldest son of James John Wilkinson, of Durham, born in Acton Street, Gray's Inn Lane, London, in 1812, was educated at a private school at Mill Hill, and Totteridge, Herts. He translated "Swedenborg's Animal Kingdom," 1843-4, and has written "Swedenborg, a Biography," 1849; "The Human Body and its Connection with Man," 1851; "The Ministry of Health," about 1856; "Unlicensed Medicine," a pamphlet; "Improvisations from the Spirit," 1857; "On the Cure, Arrest, and Isolation of Smallpox, by a new Method; and on the Local Treatment of Erysipelas, and all Internal Inflammations; with a Postscript on Medical Freedom," 1864; and a pamphlet, "On Social Health," 1865; also, "Human Sciences, Good and Evil, and its Works," and "Divine Revelation and its Works and Sciences," 1876; "The

Greater Origins and Issues of Life and Death," 1885; "Revelation, Mythology, Correspondences," 1887; "Omnes according to Herosus: a Study in the Church of the Ancients," 1888; "The Soul is Form and doth the Body Make: Chapters in Psychology," 1890.

**WILKINSON, The Right Rev. Thomas, D.D.,** Roman Catholic Bishop of Hexham and Newcastle. He is the son of George Hutton Wilkinson, Esq., Recorder of Newcastle, and its first County Court Judge, who married Miss Elizabeth Jane Pearson, heiress of Harperley Park, a large estate in the county of Durham. He was born at Harperley on April 3, 1825. His early education was in the house of the Rector of Ovingham, on the river Tyne, and at the age of thirteen he went to Harrow. Having finished his studies there he spent four years at the University of Durham. His intention then was to take orders in the Church of England, and he joined a community of young men preparing for orders at the church of St. Saviour's in Leeds. After many doubts as to his religious position, unsatisfied by the arguments of Dr. Pusey and others whom he consulted, he, with several of his companions at St. Saviour's, was received into the Roman Catholic Church on Dec. 20, 1846. After a course of theological studies at Oscott, he was ordained priest at Ushaw College, near Durham, on Dec. 23, 1848. From that time till 1871 he led an uneventful life of constant toil among a mining population, first at Wolsingham, then at Crook, both places in the immediate neighbourhood of his father's estate. In 1865 he was elected Canon of the Chapter of Hexham. At length in 1871, owing to the constant labours of his missionary life, his health broke down, and he was compelled to seek absolute rest. In 1887, his health having been partially restored, he was again brought to the front. Dr. Bewick, Bishop of Hexham and Newcastle, had died in 1886, and Provost Consitt, the Vicar Capitular or administrator of the Diocese during the vacancy, in July, 1887. In the election of a successor to the latter, the unanimous choice of the Chapter fell on Canon Wilkinson, who from that time governed the diocese till the arrival of the new Bishop, Dr. O'Callaghan, in March, 1888, becoming then Vicar-General and Provost of the Chapter. In consequence of the feeble health of Dr. O'Callaghan, Provost Wilkinson was, in May, 1888, appointed by the Pope, Bishop-Auxiliary with administrative powers, and was consecrated at Ushaw College on July 25. On the re-

signation of Dr. O'Callaghan he was made Bishop of Hexham and Newcastle, and was enthroned in his Cathedral Church at Newcastle on February 18, 1890.

**WILKS, Samuel, M.D., LL.D., F.R.S.,** born at Camberwell, June 2, 1824, was educated at University College, London. He was created M.D. of the London University in 1850; became a Fellow of the Royal College of Physicians in 1856; a Fellow of the Royal Society in 1870; Physician to Guy's Hospital and Lecturer on Medicine; President of the Pathological Society; a Member of the Senate of the University of London, and of the General Medical Council; Vice-President of the Royal College of Physicians; and Physician to the Duke and Duchess of Connaught. Dr. Wilks is the author of "Lectures on Pathological Anatomy," and "Lectures on Diseases of the Nervous System." He was formerly editor of the "Guy's Hospital Reports." He was member of the Medical Commission on the Contagious Diseases Act, 1868; a member of the Royal Commission on Contagious Diseases Act, 1871; was formerly Examiner in Medicine at the Royal College of Surgeons and at the University of London. Dr. Wilks has contributed papers on Alcoholism and Vivisection to the *Contemporary Review* and the *Nineteenth Century*. He delivered the Harveian Oration at the Royal College of Physicians, June 20, 1879.

**WILLARD, Miss Frances Elizabeth,** was born Sept. 28, 1839, at Churchville, near Rochester, New York, and is the daughter of the Hon. Josiah F. and Mary Thompson Hill Willard. She is a graduate of the North Western University, Chicago; and took the degree of A.M. from Syracuse University. In 1862 she was Professor of Natural Science at the North West Female College, Evanston, Ill.; 1866-67 she was Preceptress Genesee in the Wesleyan Seminary, Leima, New York; 1868 to 1870 (about two years and a half) travelled abroad—studying French, German, Italian and the History of the Fine Arts; visited nearly every European Capital; went to Greece, Egypt, and Palestine; 1871, was President of the Women's College of North Western University, and Professor of *Æsthetics* in the University; 1874, Corresponding Secretary of the National Woman's Christian Temperance Union; 1877, was associated with D. L. Moody in revival work in Boston; 1878, President of the Women's Christian Temperance Union of Illinois, and editor of the *Chicago Daily Post*; 1879, President

of the National Women's Christian Temperance Union, the largest society ever organized, conducted and controlled exclusively by women. In 1880 she was President of the American Commission which placed the portrait of Mrs. President Hayes in the White House as a testimonial to her example as a total abstainer. She made the tour of the Southern States in 1883, and founded, and everywhere introduced, the Women's Christian Temperance Union, for the cause of Gospel Temperance, Total Abstinence, the Prohibition of the sale of Alcoholic Drinks, and the Ballot for Women. She travelled thirty thousand miles that year in the United States, visiting every State and Territory, accompanied by her private secretary, Miss Anna A. Gordon of Boston. Miss Willard gave to the National Women's Christian Temperance Union its motto: "For God and Home and Native Land," and classified its forty departments of work under the heads of Preventive, Educational, Evangelistic, Social, Legal and Organizing. In 1884 she helped to establish the Prohibition (of intoxicating drinks) Party and was a member of its executive committee, which nominated Governor John P. St. John of Kansas for President of the United States of the National Prohibitory Convention, Pittsburgh, Pa. In 1887 Miss Willard was elected President of the Women's Council of the United States, formed from confederated societies of women; and in the same year she was elected to the general conference of the Methodist Episcopal Church, which represents 100 annual conferences and two million church members; and in 1889 she was elected to the Biennial conference of the same church. She is the originator of the great petition against the alcohol and opium trade (two million names being secured), which is to be presented to all governments by a commission of women. She is likewise the authoress of the "Home Protection Movement," to give women in America the ballot on all temperance questions and of the following works:—"Nineteen Beautiful Years," 1863; "Hints and Helps in Temperance Work," 1875; "Women and Temperance," 1883; "How to Win," 1886; "Woman in the Pulpit," 1888; "Glimpses of Fifty Years: The Autobiography of an American Woman." The first edition of this work consisted of fifty thousand copies. Miss Willard was one of the Directors of Woman's Temperance Publishing House, Chicago; this house printed one hundred and twenty million pages of temperance

literature in 1889, employs five editors, 150 hands, and is conducted solely by women. She is the chief contributor to *The Union Signal*, Chicago, the official organ of the National Women's Christian Union. She is associated with Joseph Cook as editor of *Our Day* (Boston). She is one of the Board of Directors of the Women's National Temperance Hospital, Chicago; and the Women's Temperance Temple, Chicago; which latter cost over one million dollars, and the chief room in which is called Willard Hall. Her birthday (Sept. 28) is celebrated by Children's Temperance Societies throughout the United States as a "Harvest Home." Miss Willard is also at the head of the Social Purity (white corps) work of the World's and National Women's Christian Temperance Union, which has secured from the National and State Legislatures laws for the better protection of women, and works for the scientific education of the people in habits of personal purity.

**WILLIAM II.**, Frederick William Victor Albert, King of Prussia and Emperor of Germany, is the grandson of Her Majesty the Queen of England, being the son of the Empress Frederick. He was born in Berlin, Jan. 27, 1859; was educated at Cussel, and passed through the ordinary discipline of that establishment until 1877, when he entered the University of Bonn. He succeeded to the throne on the death of his father, the late Emperor Frederick, June 15, 1888. His Majesty was married in Berlin, Feb. 27, 1881, to Augusta Victoria, Duchesse de Schleswig-Holstein-Sonderbourg-Augustenburg, a niece of Prince Christian, and has six children. In Aug., 1889, and again in 1890, the Emperor paid a visit to the Queen at Osborne. On his return to Berlin in 1889 he received visits from the King of Sweden, the King of Denmark, the King of Italy, the Emperor of Austria, and the Czar of Russia. Subsequently he visited Athens to be present at the marriage of his sister, the Princess Sophia to the Crown Prince of Greece; thence he proceeded to Constantinople on a visit to the Sultan.

**WILLIAMS, Charles**, was born at Coleraine, Ireland, May 4, 1838, of a family originally of Worcestershire and Penrhyn. He was educated at Belfast Academy under Dr. Bryce, and at Greenwich under Dr. Goodwin, and was appointed leader-writer and reviewer on the *Burning Herald* in 1859. He became special correspondent of the *Standard* in Oct., 1859, and was senior special correspondent of

that journal till Jan. 1, 1870, when he accepted the editorship of the *Evening Standard*, but he resigned in 1872 to resume his old post. He retired from the *Standard* in 1874, in consequence of a change of management. Mr. Williams saw some service while young in South and Central America, and he accompanied the head quarters of the army of the Loire at the beginning of the second phase of the Franco-German war, and was one of the first two correspondents in Strasburg after the fall of that city in 1870. In 1877 he went to Armenia as correspondent on the staff of Ghazi Mukhtar Pasha, and published an account of his experience in a work entitled "The Armenian Campaign: a Diary of the Campaign of 1877 in Armenia and Kurdistan," London, 1878. He served afterwards in the ranks of special correspondents at the defence, by Mukhtar Pasha, of the lines of Constantinople, and was with the head quarters of General Skobeleff at the moment when the Treaty of San Stefano was signed. He subsequently went through the task of recording the phases of the Berlin Congress, and in Nov., 1878, proceeded to Afghanistan, where he visited Candahar, and wrote some "Notes on Frontier Transport in India." He was the only English correspondent with the Bulgarians under Prince Alexander in the 1885 campaign against Serbia. He accompanied the Soudan expedition, and attracted some attention by an attack on Sir Charles Wilson for his conduct of the force told off to advance upon Khartoum. Among his other works are a short treatise on "England's Defences," and some reprints on ecclesiastical questions, besides articles and stories in *Temple Bar*, and other periodicals. He was for a time the managing editor of the *Evening News*.

**WILLIAMS, The Right Rev. James William, D.D.,** Bishop of Quebec, was born at Overton, Hampshire, Sept. 15, 1825. He was educated at Crewkerne school and at Pembroke College, Oxford, where he graduated B.A., taking classical honours in 1851, and proceeded M.A. Having been ordained, he held curacies in Bucks and Somerset, and went to Canada in 1857, to organize a school in connection with Bishop's College, Lennoxville, in which he held the post of Rector of the school and Professor of Belles Lettres. In 1868 he was consecrated fourth bishop of Quebec, when the degree of D.D. was conferred upon him.

**WILLIAMS, The Hon. Roland Vaughan, B.A.,** Judge of the Court of Queen's Bench,

is a son of the late Right Hon. Sir Edward Vaughan Williams, formerly one of the Judges of the Court of Common Pleas, and was born in 1838. He was educated at Oxford, where he graduated B.A., and was called to the Bar at Lincoln's Inn in Michaelmas Term, 1864, when he chose the South-Eastern (then the Home) Circuit, also practising as a special pleader, and at the Surrey Sessions. He received the honour of silk in 1880. Mr. Williams married, in 1865, Laura S., youngest daughter of the late Mr. Edmund Lomax, of Netley, Surrey.

**WILLIAMS, William Mattieu, F.R.A.S., F.C.S.,** was born in London, Feb. 6, 1820; and, to use his own expression, was "wretchedly educated during early boyhood, in three characteristic specimens of the 'Academy for Young Gentlemen,' which prevailed at the period—crammed therein with the contents of 'Carpenter's Spelling Book,' 'Walkingame's Arithmetic,' 'Lindley Murray's Grammar,' 'Goldsmith's Geography,' and the 'Eton Latin Grammar,' he was sufficiently disgusted with the latter to start afresh in a better way, and entered the London Mechanics' Institution in 1834, when Dr. Birkbeck was President, Lord Brougham, Sir Francis Burdett, Joseph Hume, Bishop Thirlwall, and other good men and true were its active working supporters." He there attended all the public lectures and joined the classes for Mathematics, Chemistry, Natural Philosophy, Phrenology, Literary Composition, French, &c.; and ultimately became Lecturer in some of the classes, and member of the Committee of Management. In 1841 he entered the University of Edinburgh to supplement the above, and travelled on foot through a considerable part of Europe with the same object. He was Master of the Williams' Secular School in Edinburgh from 1851 to 1863; Professor of Experimental Physics and Chemistry in the Birmingham and Midland Institute from 1854 to 1863; and subsequently engaged in business, in literary work and in lecturing. He is the author of "The Fuel of the Sun;" "Through Norway with a Knapsack;" "Through Norway with Ladies;" "A Simple Treatise on Heat;" "Sciences in Short Chapters;" "The Chemistry of Cookery;" "The Philosophy of Clothing;" "The Chemistry of Iron and Steel Making;" "Short Hand for Everybody;" the Canton Lectures on "Iron and Steel;" on "Mathematical Instruments;" and on "The Scientific Basis of Cookery;" also "Science Notes" in the *Gentleman's Magazine* from 1880 to 1889;

and various essays and other contributions to Magazines, Newspapers, and the "Transactions" of learned societies. He has now retired from business, lecturing, &c., and is engaged in completing scientific work which has been many years in hand.

**WILLIAMSON, Professor Alexander William, Ph.D., F.R.S., LL.D.,** Dublin and Edinburgh, born May 1, 1824, was educated chiefly in his father's house, by masters in London, Paris, and Dijon; and for a very short time at Kensington Grammar School, and at foreign schools. From the age of seventeen he studied in the Universities of Heidelberg and Gießen, under Gmelin and Liebig. At Gießen he published his first chemical researches. He afterwards spent three years in Paris studying the higher mathematics. In 1849 he was appointed Professor of Practical Chemistry in University College, London; and in 1855, Professor of Chemistry in the same college, while still retaining the chair of Practical Chemistry. Soon after his first appointment at University College, Professor Williamson published his researches on "Etherification and the Constitution of Salts." The result of those researches had a considerable influence on the theories of chemical action, and they have since been adopted by the chief English and foreign chemists. For those important and successful labours the Royal Medal of the Royal Society was awarded to him in 1862. He has twice been President of the Chemical Society. In 1873 he was elected President of the British Association for the Advancement of Science. The same year he was elected Foreign Secretary of the Royal Society, a Corresponding Member of the French Academy, and a Fellow of the Berlin Chemical Society. In 1874 he was elected Treasurer of the British Association, on the retirement of Mr. Spottiswoode. In Nov., 1875, the Royal Academy of Science at Berlin elected him a corresponding member of the Section of Physics and Mathematics, and he was appointed member of the Senate of the University of London. In April, 1876, he was appointed Chief Gas Examiner to the City of London. The University of Dublin conferred on him the honorary degree of LL.D. in 1878. The University of Edinburgh has conferred on him the degree of LL.D. since. Professor Williamson took an active part in promoting the establishment of degrees of science at the University of London; and for some years held, conjointly with the late Professor Wm. Allen Miller, the office of Ex-

aminer in Chemistry. He is also a corresponding member of the *Reale Accademia dei Lincei* in Rome, and of the Royal Society of Science at Göttingen. He has lately taken an active part in promoting the formation of a Teaching University in London. In 1887, he resigned his professorship at University College, and was elected Emeritus Professor. In 1889 he resigned his post of Foreign Secretary to the Royal Society. He has written "Chemistry for Students," various papers on "Etherification;" "The Development of Difference the Basis of Unity," being the inaugural lecture to the Faculty of Arts at University College on his appointment there in 1849; "On the Atomic Theory;" "The Composition of the Gases evolved by the Bath Spring called King's Bath;" a paper "On a New Method of Gas Analysis," jointly with W. J. Russell, Ph.D.; "On the Unit Volume of Gases;" "On the Classification of the Elements in Relation to their Atomicities;" "Experimental Science the Basis of General Education;" "A Plan for Pure Science;" "Address to the British Association" at Bradford, 1873. He married, in 1855, the third daughter of Professor T. Hewitt Key, F.R.S., of University College.

**WILLIAMSON, Benjamin, A.M., F.R.S.,** Professor of Natural Philosophy in the University of Dublin, was born in 1827, at Cork; educated at Kilkenny College and Trinity College, Dublin, where he graduated in 1848 as First Senior Moderator in Mathematics and Mathematical Physics. He was elected Fellow of Trinity College, in 1852, and appointed a College Tutor in 1858. In 1871 he published "A Treatise on the Differential Calculus," which reached, in 1889, a 7th edition. In 1872, he produced a companion volume on the "Integral Calculus," of which the 5th edition was published in 1888. In 1891, in conjunction with F. A. Threlton, F.T.C.D., he brought out a "Treatise on Dynamics," of which a 2nd edition appeared in 1899. Mr. Williamson was elected a Fellow of the Royal Society in 1879; and, in 1884, was appointed to the Professorship of Natural Philosophy in his University. Mr. Williamson contributed several articles to the 9th edition of the "Encyclopædia Britannica," of which may be mentioned those on the "Infinitesimal Calculus," "Calculus of Variations," "Variable Complex," and "MacLaurin." He also contributed articles to the *Quarterly Journal of Mathematics*, *Hermathena*, as well as to other scientific journals.

**WILLIAMSON**, Professor William G., biologist and geologist, LL.D., F.R.S., was born at Scarborough on Nov. 21, 1816; his father was for some time head-gardener to the then Earl of Mulgrave at Lyth Castle near Whitby. Having laboured indefatigably in exploring the Geology and Zoology of the coast of Yorkshire, and made a rich collection of its fossils and recent shells, he was, in 1828, appointed Curator of the well-known Museum of the Literary and Philosophical Society of Scarborough, amongst the collections of which much of his son's early youth was beneficially spent. He was destined for the medical profession, but, in 1835, accepted the Curatorship of the Museum of the Manchester Natural History Society. Whilst at Scarborough he contributed to the Geological Society of London the first of three memoirs on the "Vertical Distribution of the Organic Remains in the Strata of the Yorkshire Coast," and one to the Zoological Society of London on the "Birds of the Yorkshire Coast," as well as published a description of the well-known Tumulus and its contents, then recently opened on Gristhorpe Cliff. On reaching Manchester, his attention was at once directed to the local geology, and soon resulted in the publication, in the *Philosophical Magazine*, of a memoir on the Remarkable Limestones of Ardwick which occupied the uppermost part of the carboniferous strata in that neighbourhood. In 1838 he resumed his medical studies, first in the Manchester Medical School, Pine Street, and afterwards in the University College of London; and in Jan., 1841, commenced as a medical practitioner in Manchester. Soon after that, he began a series of investigations amongst the Recent Foraminifera, the results of which were a succession of memoirs on their minute organisation, culminating, in 1848, in the publication, by the Ray Society, of his monograph on the Recent Foraminifera of Great Britain, and in a memoir on the minute organisms found in the marine mud of the Levant. This latter memoir contained the first announcement of the existence in some of the deeper seas of what is now known as the Foraminiferous Ooze. The study of some histological features of human bones and teeth led to an examination of the scales and bones of recent and fossil fishes. Two memoirs on these subjects were published in the *Philosophical Transactions* of the Royal Society, in which he announced his conclusion that the scales and dermal teeth of fishes were the homologues of the oral teeth of the mammalia, the latter being but the

relics of the dermal system so extensively developed in fishes. The publication of these two memoirs led to his election as a F.R.S. In 1851, the Owens College of Manchester began its career; when Mr. Williamson was elected its first Professor of Biology and Geology. As the institution expanded, this too-comprehensive chair was divided, and for many years past his academic labours have been confined to the Professorship of Botany. Circumstances then drew his attention to the Carboniferous Plants of Lancashire and Yorkshire. The result of these later studies has been the publication, in the *Philosophical Transactions*, of seventeen memoirs, "On the Organisation of the Fossil Plants of the Coal Measures." On receiving the sixth of this series, the Royal Society recognised them by awarding him their Royal Medal. The Wollaston Gold Medal of the Geological Society was awarded to Dr. Williamson in 1890. Dr. Williamson has been President, and now is Senior Vice-President of the Literary and Philosophical Society of Manchester. The University of Edinburgh conferred upon him the degree of LL.D. The Göttingen Academy of Sciences elected him one of its foreign members, and the Royal Society of Sweden elected him to the place left vacant by the death of Asa Gray.

**WILLS**, The Hon. Sir Alfred, a Judge of the Queen's Bench Division, was born in 1828; entered the Middle Temple, by which Inn he was called to the Bar in 1851; was made Q.C. in 1872; and appointed Judge in 1884. He was made President of the Railway Commission in 1898.

**WILLS**, William Gorman, born in 1828, in Kilkenny co., Ireland, kept all his terms at Trinity College, Dublin, but did not graduate. He studied at an early age at the Royal Irish Academy as an art student. Mr. Wills is chiefly known as a dramatist, his principal plays being "The Man o' Airie," 1866; "Hinko," 1871; "Charles the First," 1872; "Eugene Aram," 1873; and "Mary Queen o' Scots: or, the Catholic Queen and the Protestant Reformer," 1874; "Buckingham," 1875. About that period Mr. Wills resumed the practice of his other art, portrait-painting, having had a large number of sitters, and among them the Princess Louise and the infant Princess Victoria. Among Mr. Wills's more recent contributions to dramatic literature is "Jane Shore," 1876, produced at the Princess's Theatre, where it ran for five con-

seventive months. It was then played in the provinces till Dec., 1877, when it was again reproduced at the Princess's. "England in the Days of Charles II.," 1877; "Ninon," which ran for more than three months. It was followed by "Olivia;" "Nell Gwynne;" and "Vanderdecken," 1878, a poetical drama written by Mr. Wills, in conjunction with Mr. Percy Fitzgerald, and based on the legend of the Flying Dutchman. "William and Susan," 1880; "Juanna," and "Sodgomoor," 1881; "Clandian," 1885. In conjunction with Mr. Sydney Grundy Mr. Wills wrote "Madame Pompadour." Mr. Wills has also written several novels, the best known being "The Wife's Evidence" and "Notice to Quit," both which have been republished in America.

**WILSON, Sir Charles Rivers, K.C.M.G., C.B.**, was born in London, Feb. 19, 1831, and educated at Eton, and Balliol College, Oxford. He was appointed Clerk in the Treasury in Feb., 1856; was Private Secretary consecutively to Mr. James Wilson and Mr. George Alexander Hamilton, Secretaries of the Treasury; Acting Private Secretary to Mr. Disraeli, when Chancellor of the Exchequer, from Aug., 1867, to Feb., 1868; Private Secretary to Mr. Lowe, Chancellor of the Exchequer, from Dec., 1868, to April, 1873; and was appointed Comptroller-General of the National Debt Office in April, 1873. Mr. Wilson represented (with the late Professor Graham) Her Majesty's Government at the International Coinage Commission in 1867, and acted as Secretary to the Royal Commission appointed to examine the question of an International Coinage in 1868. On the return of Mr. Cave to England from his Financial Mission to Egypt, Mr. Rivers Wilson, at the request of the Khedive, went to Egypt in March, 1876, with the view of his acceptance of a financial post in that country; but after the issue of the decree of May 7, 1876, by which an arbitrary readjustment of the Public Debt of Egypt was proposed, he returned to England, and resumed his post at the National Debt Office. On July 29, 1876, he was appointed one of the British Government Administrators of the Suez Canal Company; on Jan. 22, 1877, he was appointed a Royal Commissioner for the Paris Exhibition of 1878; on March 30, 1878, he was appointed Vice-President, and in the absence of M. de Lesseps acted as President of an International Commission of Inquiry, instituted by the Khedive, at the instigation of the foreign governments, to examine the resources of

Egypt, and propose measures for remedying the financial disorder in that country. The Report of the Commission, Aug. 19, 1878, traced the whole of the mischief to the system of personal administration by the Viceroy, and proposed that His Highness should surrender his estates and those of his family to make good the deficit in the revenue, and pay the large floating debt of the country. The immediate consequence of the presentation of their Report was an acceptance by the Khedive of all its conclusions, and a formal announcement to Mr. Rivers Wilson of the determination of His Highness to abandon his actual system of government for one more in conformity with European experience, and to govern in future by means of a responsible ministry. The formation of the new cabinet was entrusted to Nubar Pasha, who offered to Mr. Rivers Wilson the Post of Finance Minister. With the consent of Her Majesty's Government, Mr. Rivers Wilson accepted this position (Sept., 1878) until Jan. 1, 1881, when he would have been at liberty to return to his office of Comptroller-General of the National Debt Office. In April, 1879, however, the Khedive struck the blow he had long been meditating. He dismissed Mr. Rivers Wilson and M. de Blignières; and soon afterwards Mr. Rivers Wilson was recalled by the English Government in order to resume his duties at the National Debt Office. He was created a K.C.M.G. in Jan., 1880. On April 5 in that year the new Khedive, Tewfik Pasha, signed a decree appointing Sir Rivers Wilson President of the International Commission of Liquidation. In Oct., 1880, he received the royal licence and authority to accept and wear the insignia of the First Class of the Turkish Order of the Medjidieh. In May, 1881, Sir Rivers Wilson was appointed a Royal Commissioner for the negotiation of a Treaty of Commerce with France; and in March, 1885, he was one of the delegates who assembled in Paris for drawing up an Act relative to the navigation of the Suez Canal.

**WILSON, Sir Charles William, K.C.B., K.C.M.G., C.B. (civ.), D.C.L. (Oxon), LL.D. (Edin.), F.R.S., F.R.G.S., &c.**, a Colonel in the Royal Engineers, was born in March, 1836, and entered the Royal Engineers in 1855. After passing through the usual grades, he became Colonel in 1883. Before that date, however, he had gained distinction of a special kind, first as Secretary to the North American Boundary Commission, then for his surveys of Jerusalem and

the Sinaitic Desert, then by his work in connection with the Palestine exploration fund, then as Director of the Topographical Department of the War Office, then by his organization of the Intelligence Department, in which he served as Assistant Adjutant-General, then as Director of the Survey of Ireland, then as British Commissioner on the Servian Boundary Commission, and then as Consul-General appointed in pursuance of the Anglo-Turkish Convention in Asia Minor, a post which he held from 1879 to 1882. He served in the Egyptian Expedition of 1882, for which he obtained a Medal and a Bronze Star; and was afterwards attached to Lord Dufferin's Special Mission in Egypt. When the Soudan Expedition was sent out, Sir Charles Wilson was appointed Chief of the Intelligence Department. He was present at the actions of Abu Klea and Gubat, and when Sir Herbert Stewart received his fatal wound, the command of the Desert Column devolved upon Sir Charles Wilson. He led the advance to the Nile, fought the action at Metemma, and commanded the force in its attempt to reach Khartoum and to rescue General Gordon; the story of which he has told in his book "From Korti to Khartoum." For his services he was thanked by Government, and in 1886 was made a K.C.B. He is now Director-General of the Ordnance Survey of the United Kingdom.

WILSON, Sir Daniel, LL.D., F.R.S.E., President of the University of Toronto, Canada, was born in Edinburgh, Jan. 5, 1816, and is an elder brother of Professor George Wilson, the eminent chemist. He was educated at the University of Edinburgh. In 1847 he published "Memorials of Edinburgh in the Olden Time," 2 vols., 4to, illustrated from his own drawings, of which a revised edition in now (1890) in the press. In 1851 appeared his great work, "The Archaeology and Prehistoric Annals of Scotland," with about 200 illustrations drawn by himself. This work, thoroughly revised and greatly enlarged by him, was published in 2 vols., 8vo., in 1863. In 1862 he issued his "Prehistoric Man: Researches into the Origin of Civilization in the Old and the New World," 2 vols., and in 1866 and 1876 enlarged editions of the same work. His latest works are "Chatterton: a Biographical Study," 1869; "Caliban; or, the Missing Link," 1873; "Spring Wild Flowers," 1875; a reprint, with additions, of an earlier volume of poems bearing the same title; "Reminiscences of Old Edinburgh," 1878;

"Anthropology," 1885; and "William Nelson, a Memoir," 1890. He has been Secretary to the Society of Antiquaries of Scotland, and a Fellow of that Society, when in 1853 he was appointed Professor of History and English Literature in University College, Toronto; and in 1881 succeeded Dr. McCaul in the Presidency of the institution. The growth and prosperity of the University is largely due to his efforts. He was for four years editor of the Journal of the Canadian Institute, and in 1859 and 1860 was President of the Institute. In 1882, he was named, by His Excellency the Marquis of Lorne, a Vice-President of the Literature Section of the Royal Society of Canada, and in 1885 was elected its President. In 1848, Her Majesty conferred on him the honour of knighthood.

WILSON, George Fergusson, F.R.S., F.C.S., descended from old Scotch families, was born at Wandsworth Common, March 25, 1822, and was educated at private schools, at Wandsworth, and at Streatham. He has made many useful inventions which have been patented, some of which still hold their own, but the invention for which he is best known is the distillation of glycerine. Before this invention, glycerine, even that sold at very high prices, was so impure as to be for most purposes comparatively useless; by distillation in a current of super-heated steam, Mr. G. F. Wilson obtained for the first time pure glycerine, now of the greatest value. On Nov. 30, 1851, a short paper by him "On the value of steam in the decomposition of neutral fatty bodies," was read before the Royal Society, and printed in the proceedings; and at the meeting of the British Association in Glasgow, in 1855, he read a paper on distilled glycerine, which concluded with a prophecy that "Pure glycerine will yet take its place among the most valued of modern products; and produced, as it will be, in great quantities, it will be recognised in the arts as well as in medicine as a new, real blessing to mankind." Mr. G. F. Wilson has long been known in the Horticultural World for his orchard house cultivation; and from exhibiting lilies, for which, between 1867 and 1885, he received twenty-five first-class certificates. He filled many posts in the Royal Horticultural Society; and was for a time Treasurer; member of the Expenses Committee; Chairman of the Fruit and afterwards of the Floral Committee; and member of the Scientific Committee. Mr. G. F. Wilson became a member of the Society of Arts in 1846, and was eight

years on the Council; he lectured twice before the Society. He was made a Fellow of the Royal Society in 1855, of the Chemical Society in 1855, of the Linnean in 1875, and of the Institute of Chemistry at its commencement. He became a member of the Athenæum Club in 1867.

**WILSON, Miss Hilda**, was born in Monmouth, in 1860. From infancy music was ever in attendance upon her, her father being a Professor of the art. Possessing considerable talent, Mr. Wilson's services were held in such request as to necessitate his removal to the cathedral city of Gloucester; and the change of residence afforded his young daughter many more educational privileges, as far at least as art was concerned, than her birth-place could by any possibility have furnished. The Choral Society where, as time advanced, she could take part in rehearsing choruses of the great masters, opened up a way for her first appearance in public, for at one of its concerts, Hilda Wilson, a girl of fourteen years of age, first sang before a general audience. The promise of childhood was realised, for her success was great and decided. Friends and patrons began to declare that ere long she would be found amongst the great singers of the triennial festival. To prepare for such an honour, she came in 1879 to London to study at the Royal Academy of Music, where she was instructed in the art of singing by Mr. William Shakespeare. A year after she was permitted to enter upon public duties, and consequently was enabled to accept the offer of an engagement as one of the contralto soloists at the Gloucester Festival of 1880. Returning to the Academy, she prosecuted her studies with so much zeal as to win the "Westmoreland Scholarship," two years in succession, besides obtaining the "Parcay-Rosa Gold Medal," together with the silver and bronze Medals awarded at annual examinations of the institution. Upon leaving in 1882, she was elected an "Associate" of the Academy. In 1883 Miss Wilson again sang as second contralto at the Gloucester Festival; and in the year following, served in the same capacity at the Worcester "Music Meeting." In 1887 she was, however, engaged as principal contralto at the Norwich Festival, and during the past year appeared as leading contralto at the Lincoln, Gloucester, and Leeds festivals.

**WILSON, The Rev. J. M.**, Head Master of Clifton College, was born in 1836. His father, the Rev. E. Wilson, who was

a double first-class at Cambridge in 1825, and a Fellow of St. John's, was for many years Vicar of Noston, Lincoln, and honorary Canon of Lincoln. Mr. Wilson was educated at King William's College, Isle of Man and at Sedburgh Grammar School, and went up to St. John's College, Cambridge, in 1855. He was bracketed for the 2nd Ball Scholarship in 1856, with Henry Sidgwick, who was afterwards Senior Classic. He took his degree in 1859, as Senior Wrangler. He was appointed by Dr. Temple to the post of Natural Science Master at Rugby, and in that capacity, and subsequently as Senior Mathematical Master, he worked at Rugby for twenty years. During those years he was an occasional contributor to the Geological and Astronomical Societies' journals, and founded the Temple Observatory at Rugby. His chief Astronomical work is one in which he was associated with two other amateurs, the "Handbook of Double Stars." In 1870 he was offered the Headmastership of Clifton College, vacant by the resignation of Dr. Percival. Since that time he has been more before the world as the Head Master of a large and very active school, and as a preacher and writer than as a scientific man. A volume of his school sermons has been published by Macmillan; also volumes of Essays and Addresses and Contributions to Religious Thought. He is understood to have taken much interest in Bristol, in its religious and philanthropic and educational work. He is Chaplain to the present Bishop of London.

**WINCHESTER, Bishop of.** See THURGOOD, THE RIGHT REV. ANTHONY WILSON.

**WINDTHORST, Ludwig**, the Political leader of the German Catholic party in Prussia, was born Jan., 17, 1812. He attended the "Carolinum" in Osnabrück, and continued his studies at Göttingen and Heidelberg. He became an advocate, and then auditor and presiding member of the Consistory at Osnabrück; afterwards, "Ober-Appellationsrath" in Kalbe; from 1868 to 1865 he was Minister of Justice at Hanover; and finally, he was nominated Chief Syndic of the Crown in Kalbe. From 1849 to 1860, he was a member of the Assembly of the Estates of the Realm, and in 1851 President of the Second Chamber of the same. He became a member of the Constituent and the regular Reichstag; and since 1867 he has been a member of the Prussian House of Deputies, boldly upholding the Catholic cause in Germany, in spite of powerful opposition.

**WINMARLEIGH** (*Lord*), *The Right Hon.* John Wilson-Patten, is the eldest son of the late Thomas Wilson-Patten, Esq., of Bank Hall, M.P., who assumed the additional surname of Wilson on succeeding to the estates of Dr. Wilson, Bishop of Sodor and Man. He was born in 1802, and received his education at Eton, together with the late Earls of Derby and Carlisle, Lord Halifax, the Right Hon. Spencer Walpole, and others who have taken a prominent part in public affairs. From Eton he proceeded to Magdalen College, Oxford, and on leaving the University he spent three years on the Continent, visiting most of the countries of Europe. In 1830 he was elected, without opposition, one of the Knights of the Shire in the Conservative interest, for the whole county of Lancaster, as the colleague of Lord Stanley, afterwards thirteenth Earl of Derby. He voted for the second reading of the Reform Bill in 1831, but not having been able to pledge himself to all its details he retired at the general election of that year. However, he was re-elected in 1832 for the Northern Division of the county (comprising the present Northern and North-Eastern Division) as the colleague of the late Earl of Derby (the fourteenth Earl). He continued to be one of the representatives of the old Northern Division of Lancashire without opposition till 1838; on the county being again sub-divided he was elected for the present Northern Division, and remained one of its representatives till 1874, when he was called to the House of Peers. Thus for forty-two years Colonel Wilson-Patten represented North Lancashire in the House of Commons, where he acquired great popularity and a high reputation for skill in debate. While in the Lower House he filled the offices of Chairman of Committees of the whole House, from Nov., 1852, till April, 1853; Chancellor of the Duchy of Lancaster from June, 1857, to Sept., 1868; and Chief Secretary of Ireland from the last date to December following. The services rendered by him to the Conservative party were rewarded by his elevation to the peerage in March, 1871, when, on the recommendation of Mr. Disraeli, he was created Baron Winmarleigh. From 1812 to 1872 he was Colonel of the 3rd Royal Lancashire Militia, and he continues to be its honorary Colonel. He accompanied the regiment to Gibraltar at the time of the Crimean War, and on his return to England he was appointed one of Her Majesty's Aides-de-Camp. His Lordship has acted as Vice-Lieutenant of Lancashire, and he has taken an active inter-

est in most of the agricultural, commercial, and manufacturing questions which have been brought forward in the present half century.

**WINTER**, John Strange. *See* STANNARD, MRS. ARTHUR.

**WOLF**, Rudolf, Astronomer, was born at Zurich, Switzerland, on July 17, 1816, and became Professor at the Swiss Polytechnic and Director of the Zurich Observatory. He is widely known for his work upon Solar spots. The following are among his principal works:—"Neue Untersuchungen ueber die Periode der Sonnentlecken und ihrer Bedeutung," 1852; "Geschichte der Astronomie," 1877; "Geschichte der Vermessungen in der Schweiz," 1879; "Handbuch der Astronomie, ihre Geschichte und Litteratur," 1890; and his "Astronomische Mittheilungen," 1856-90.

**WOLFF**, *The Right Hon. Sir Henry* Drummond, K.C.B., G.C.M.G., M.P., P.C., is the eldest son of that eminent missionary and traveller the late Rev. Dr. Joseph Wolff, vicar of Islo-Brewers, Somersetshire, by Lady Georgiana Mary Walpole, daughter of Horatio, second Earl of Orford, of the present creation. He was born at Malta, Oct. 12, 1830, and was educated at Rugby under Dr. Tait, and on the Continent; he entered the Foreign Office in 1846, and was made a permanent clerk in 1849. He was an Attaché at Florence in 1852-58, during part of which time he was acting Chargé d'Affaires. In July, 1856, he was attached to the late Earl of Westmoreland's special mission to Belgium. In 1858 he was appointed Assistant Private Secretary to the Earl of Malmesbury, and afterwards to Sir Edward Bulwer Lytton, and the following year was promoted to an assistant clerkship in the Foreign Office. In the same year he was appointed a Companion of the Order of St. Michael and St. George, and also Secretary to the Lord High Commissioner of the Ionian Islands. In that and the two following years he sat as a member of several Commissions of inquiry into the civil administration, taxation, and education of the Ionian Islands and their inhabitants, and in 1862, was a commissioner to represent the interests of those islands at the Great Exhibition of that year. He was nominated a K.C.M.G. in 1862, and retired on a pension in June, 1864, on the cessation of the British Protectorate over the Ionian Islands. In 1874 he was elected M.P. for Christchurch in the Conservative interest. He was a

member of the Royal Commission on Copyright. In 1878 he was appointed Her Majesty's Commissioner in Eastern Roumelia to represent Great Britain in the preparation of an autonomous constitution for that province. For this service he was appointed a K.C.B., having previously been in succession C.M.G., K.C.M.G., and G.C.M.G. At the election of 1880 he was elected M.P. for Portsmouth. As such he was one of the active group known as the Fourth Party. In June, 1883, he was sworn a Privy Councillor, and in the August following appointed Envoy Extraordinary and Minister Plenipotentiary to the Sultan of Turkey, on a special mission with particular reference to the affairs of Egypt, and High Commissioner in Egypt on Nov. 2. In 1888 Sir Henry Drummond Wolff was appointed Ambassador to Teheran. He accompanied the Shah on his recent visit to England, and returned to Teheran in Oct., 1899. He is J.P. for Hampshire and Mildsex, and a Fellow of the Royal Geographical Society and the Royal Colonial Institute; is the author of a work on "The Residence of the First Napoleon at Elba," of a translation of a work by M. de Lesseps, on "The Suez Canal," and of the "Letters of Menmon," on the same subject, of "The Mother Country and the Colonies," and other pamphlets and articles. He married the only daughter of the late Mr. Sholto Douglas.

**WOLSELEY** (Viscount), General Sir Garnet Joseph, K.P., G.C.B., G.C.M.G., D.C.L., LL.D., son of Major G. J. Wolseley, of the 25th Regiment of Foot, was born at Golden Bridge House, near Dublin, June 4, 1833, and was educated at a private school and under tutors. He entered the army as Ensign in March, 1852; became a Captain in Jan., 1855; Major of the 90th Foot in March, 1858; Lieut.-Col. in the army in April, 1859; and Colonel in June, 1865. He served with the 80th Foot, in the Burmese War of 1852-53, where he was severely wounded, and for which he received a Medal. Afterwards he achieved distinction in the Crimea, where he served with the 90th Light Infantry. At the siege of Sebastopol he was severely wounded, after which he received the Legion of Honour, and the fifth class of the Turkish Order of the Medjidieh. He was also at the siege and capture of Lucknow, and the defence of Alumbagh, when he was made brevet Lieut.-Col. and mentioned with commendation in dispatches. In 1860 he served on the staff of the Quartermaster-General throughout

the Chinese campaign, for which he received a Medal and two Claspings. He was appointed Deputy Quartermaster-General in Canada in Oct., 1867, and commanded the expedition to the Red River; was nominated a Knight Commander of the Order of St. Michael and George in 1870; and was Assistant Adjutant-General at headquarters in 1871. He was appointed in Aug., 1873, to command the troops on the Gold Coast during the Ashantee War, with the local rank of Major-General. On Sept. 12, 1873, he and his staff embarked at Liverpool for the West Coast of Africa. After defeating the enemy, Sir Garnet Wolseley, on Feb. 5, entered Coomassie, and received the submission of the King. The success of the expedition justified the confidence which had been reposed in the Commander-in-Chief. On his return to England Sir Garnet Wolseley received the thanks of Parliament and a grant of £25,000 for his "courage, energy, and perseverance," in the conduct of the Ashantee War; was created a K.C.B.; and was presented with the freedom of the City of London and a splendid sword of the value of 100 guineas, Oct. 22, 1874. He was appointed to command the auxiliary forces in April, 1874. At the commencement of the following year he was despatched to Natal to administer the government of that colony and to advise upon several important points connected with the management of native affairs and the best form of defensive organization. On Oct. 2, 1875, he landed at Portsmouth, accompanied by his staff, on his return from the Cape of Good Hope. He remained in command of the auxiliary forces till Nov., 1876, when he was nominated a member of the Council of India. On July 12, 1878, he was appointed the Administrator of the Island of Cyprus, under the style of Her Majesty's High Commissioner and Commander-in-Chief in the same island. In June, 1879, he was sent to South Africa, as Governor and High Commissioner of Natal and the Transvaal, to reorganise the affairs of Zululand, and on that occasion conducted the operations against Sikukuni, whose stronghold he destroyed. Returning in May, 1880, he was appointed Quartermaster-General at the headquarters of the army, and in April, 1882, succeeded Sir Charles Ellie as Adjutant-General of the army. He was Commander-in-Chief of the Expeditionary Force sent to Egypt in 1882; received the thanks of Parliament; and was gazetted (Nov. 20) Baron Wolseley of Cairo, and of Wolseley, in the county of Stafford. For his services in Egypt, he received from the Khedive, Tewfik

Pacha, the grand cordon of the Osmanieh. He was also promoted to the rank of General in 1882. On the 12th of May, 1883, he was appointed to the Hon. Colonelcy of the 23rd Middlesex V.B. (now the 2nd V.B. Royal Fusiliers), in succession to Sir Charles Russell, B.C., deceased. He was made D.C.L. of Oxford, and LL.D. of Cambridge. In June, 1883, the University of Dublin conferred upon him the honorary degree of LL.D. In 1884-85 he was Commander-in-Chief in Egypt, and conducted the operations undertaken for the relief of Khartoum, for which services he received the thanks of both Houses of Parliament, was made K.P., and raised to the dignity of Viscount Wolsley, of Wolsley, in the county of Stafford. He has just retired from being Adjutant-General to the Forces, and is succeeded by Sir Redvers Buller; Lord Wolsley having been appointed Commander-in-Chief of the Forces in Ireland. Lord Wolsley is the author of "Narrative of the War with China in 1860, to which is added the Account of a Short Residence with the Tai-Ping Rebels at Nankin, and a Voyage thence to Hankou," 1862; "The Soldier's Pocket Book for Field Service," 1869, 2nd edit., 1871; now edit., 1882; "The System of Field Manœuvres best adapted for enabling our Troops to meet a Continental Army," printed in "Essays Written for the Wellington Prize," 1872; "France as a Military Power in 1870 and 1878" in the *Nineteenth Century*, Jan., 1878.

WOOD, General Sir Hy. Evelyn, F.C., K.C.B., G.C.M.G., is the youngest son of the late Rev. Sir John Page Wood, Bart., of Rivenhall, some time vicar of Cressing, Essex, and rector of St. Peter's, Cornhill, by Emma Caroline, youngest daughter of Mr. Sturgeson, of Croft West, Cornwall, a captain, R.N., and an admiral in the Portuguese service. He was born at Cressing in Feb., 1838, entered the Navy in 1852, served with distinction as aide-de-camp to Captain Sir William Peel, in command of the Naval Brigade in the Crimea (1854-55). At the unsuccessful assault on the Redan (June 18, 1855), while carrying one of the scaling-ladders, he was severely wounded; he was mentioned with praise in Lord Raglan's despatches. He obtained the Crimean Medal with two clasps, the 5th class of the Order of the Medjidieh, and a Turkish Medal; and was made a Knight of the Legion of Honour. He next entered the army as cornet 13th Light Dragoons; was promoted to the rank of lieutenant in 1859; captain in 17th Lancers in 1861; and major

in 1862. In the Indian campaign of 1858 he served as a brigade-major, and was present at the actions of Rajghur, Sindwaho, Kharce, and Baroda, for which he gained a Medal, and was twice mentioned in despatches. In 1859 and 1860 he commanded the 1st Regiment of Boatswain's Irregular Horse, and received the thanks of the Indian Government for his pursuit of the Rebels in the Seronge jungle; he also won the Victoria Cross for valour. He raised the 2nd Regiment of Central India Horse. In Sept., 1873, being a lieutenant-colonel 90th Infantry, he accompanied Major-General Sir Garnet Wolseley to the Ashantee War, and organised a native force, which he commanded, with other troops, in the affairs of Essaman, and on the road from Mansu to the river Prah, following the retreat of the Ashantee army from the coast. Lieutenant-Colonel Wood afterwards commanded the right wing of the army in the battles of Amonful (wounded) and Ordahsu and the capture of Coomassie. For these services he was several times mentioned in despatches, and was nominated a C.B. (1871), promoted to the brevet rank of colonel, and received the Medal with Clasp. Having distinguished himself in both the naval and the military services of the country, he joined the Hon. Society of the Middle Temple in April, 1870, and was called to the Bar in Easter Term, 1874, shortly after his return from the Ashantee War. He served throughout the Zulu war of 1879 in command of No. 4 column. As political agent he raised a contingent of 1,000 friendly Zulus, known as "Wood's Irregulars." Two days after the British reverse at Isandlwana he surprised and defeated a force of several thousands of the enemy, and then maintained an advanced position in the enemy's country, for which he was specially commended by the High Commissioner. He defeated the Zulus in the action of Kambula on March 29, and in April was made brigadier-general. He led the advance to Ulundi with a flying column, and was present in the engagement there on July 4. On his return to England he was received by the Queen in person, and was created a K.C.B. (Sept., 1879). On Nov. 1, 1879, the Bar of England entertained him at a banquet in the hall of the Middle Temple; he was given a sword of honour by the county of Essex, and was made J.P. for the county. He served in the Transvaal war of 1880-81, with the local rank of major-general; was nominated one of Her Majesty's Commissioners for settling the Transvaal territory in April, 1881; created G.C.M.G.; and was re-

appointed to command the troops in the Chatham district in 1880. He commanded the 2nd brigade, 2nd division, in the expedition to Egypt in 1882, and for his distinguished services received the thanks of Parliament. In Dec., 1882, he was appointed Commander-in-Chief of the Egyptian Army, ranking as chief of the Pachas, or Sirdar. He commanded the line of communication in the Nile Expedition 1881-5, Grand Cordon of the Medjidieh, Khedive's Star, and Medals. He commanded the Eastern District from April 1, 1886, to Dec., 1889. Sir Evelyn Wood has been commanding the Aldershot District from Jan. 1, 1889.

**WOOD, Professor John, F.R.S.**, born at Bradford, was educated at a private school, and at King's College, London, on leaving which he was apprenticed to the Senior Surgeon of the Bradford Infirmary. In 1846 he entered King's College Hospital, gaining four scholarships and two Gold Medals, and becoming House Surgeon in 1850. He was then appointed Surgeon to the Lincoln's Inn Infirmary. After being Demonstrator of Anatomy, and Professor of Surgery and Clinical Surgery, at King's College, he gained successively the posts of Examiner to the Universities of London and Cambridge, and to the Royal College of Physicians, Professor of Surgery at King's College, 1871, Examiner to the Royal College of Surgeons, and to the conjoint Board of Examiners at the Royal Colleges of Physicians and Surgeons (of which he was one of the Council, and subsequently Vice-President), and in 1885 Hunterian Professor of Surgery and Pathology. Professor Wood has published a large number of lectures, articles, and papers on medical subjects. He is now Emeritus Professor of Clinical Surgery at King's College Hospital.

**WOODALL, William, M.P.**, was born in 1832, and educated at Liverpool. He is sole surviving partner in the Washington China Works, at Burslem, and is Chairman of the Sneyd Colliery. Was first elected to Parliament as member for Stoke-on-Trent at the general election of 1880, and represented that constituency until the dissolution of 1885, when he was returned for Hanley, being again returned unopposed in 1886 as a Gladstone Liberal. Mr. Woodall was for 12 years Chairman of the Burslem School Board, and is still Chairman of the Free Library, the School of Art, and the Endowed Schools in that town; was a member of the Royal Commission on Technical Education, and in Mr. Gladstone's government of 1885 was

appointed Surveyor-General of Ordnance. He is an ardent advocate of Women's Suffrage, and of Disestablishment. Mr. Woodall is also one of the Trustees of the Savage Club.

**WOODFORD, Charles Morris**, was born at Gravesend, Kent, Oct. 30, 1852; and is the son of Henry Pack Woodford, of Gravesend. He was educated at Tonbridge School, 1864-70; was elected a Fellow of the Royal Geographical Society in 1885; a Fellow of the Royal Geographical Society of Australasia (N. S. Wales Branch) in 1888; Member of the Council in 1890; a Fellow of the Linnean Society of New South Wales in 1889; Corresponding Member of Zoological Society in 1889; and was awarded the Gill Memorial by the Royal Geographical Society in 1890, for "Three expeditions to the Solomon Islands, and the important additions made to our topographical knowledge and natural history of the islands." His works published are: a paper on the "Exploration of the Solomon Islands," read before the Royal Geographical Society, March 26, 1888, published in the "Proceedings" of the Society, June, 1888; a paper on "A Third Visit to the Solomon Islands," read before the Royal Geographical Society, April, 1890, published in the "Proceedings," July, 1890; "General Remarks on the Zoology of Solomon Islands, and Notes on Branchley's Megapode," published in the "Proceedings" of the Zoological Society, May 1, 1888; and a book entitled, "A Naturalist among the Head Hunters," 1890.

**WOODHULL, Mrs. Victoria Claffin.** See MARTIN, MRS. JOHN BRIDGEMAN.

**WOODS, Sir Albert William, K.C.M.G., C.B., F.S.A.**, was born in 1816, and is a son of Sir William Woods, who filled the office of Garter King-of-Arms from 1838 until his death in 1842. He entered the College of Arms as Portcullis Pursuivant in 1834, was appointed Lancaster Herald in 1841, and became Registrar of the College in April, 1860. He was advanced to the office of Garter Principal King-of-Arms, Oct. 25, 1869, in succession to Sir Charles George Young deceased, and received the honour of knighthood on the 11th of the following month. He was attached to the missions for investing the King of Denmark, the King of the Belgians, and the Emperor of Austria with the Order of the Garter, and, as Garter, was joint plenipotentiary for investing the King of Italy, the King of Spain, and the King of Saxony. Sir A.

W. Woods holds the office of Registrar and Secretary to the Order of the Bath, Registrar to the Order of the Star of India, King-of-Arms to that of St. Michael and St. George, and Registrar to that of the Indian Empire.

**WOODS, Henry, A.R.A.**, born April 23, 1817, at Warrington, in Lancashire, is eldest son of the late Mr. William Woods, of that town, was educated at the local grammar school, entered the Warrington School of Art as a pupil at nine years of age, and remained there until he went to London, in the winter of 1861, having obtained a "National Scholarship" in the Art Training Schools at South Kensington. Mr. Woods held that scholarship for three years, working in the Antique and Life Schools, and at the Study of Stained Glass. When he left South Kensington, the latter study was not proceeded with, but he began to illustrate for various periodicals, painting during the greater part of his time. When the *Graphic* started, Mr. Woods was one of the first members of its staff. His first picture exhibited at the Royal Academy was a little landscape at the first exhibition held at Burlington House. Since then he has been a regular exhibitor. His first pictures of any importance were Thames subjects—"Going Home," "Hay-makers," &c. In 1870 Mr. Woods first went to Venice, and joined the group of artists who have made modern Venetian subjects so popular; his earliest pictures of everyday Venetian life were, "A Venetian Ferry" (purchased for the Cape Town Gallery); "Street Trading in Venice;" "A Gondolier's Courtship;" "The Ducal Courtyard;" and "Preparing for the Festa." He was elected Associate of the Royal Academy in 1882. Since then Mr. Woods has painted, "Bargaining for an Old Master," "Preparations for First Communion," "Il Mio Traghetto," "Cupid's Spell," "Choosing a Summer Gown," "The Water-wheels of Savassa," &c. In the Royal Academy, 1890, Mr. Woods exhibited "On the Riva of the Giudecca;" "In the Shade of the Sanola San Rocco;" and "La Promessa Sposa." Mr. Woods is a resident in Venice.

**WOODWARD, Henry, LL.D., F.R.S., F.G.S., F.Z.S., F.R.M.S., V.P. Pal. Soc.**, Keeper of the Department of Geology, British Museum (Natural History), is the sixth son of the late Samuel Woodward, of Norwich, author of "The Geology of Norfolk," 1833; a "Synoptical Table of British Organic Remains," 1830; &c. His eldest brother Mr. B. B. Woodward,

B.A. Lond., F.S.A., was for some years Librarian to Her Majesty at Windsor Castle. His second brother, Dr. S. P. Woodward, F.G.S., for seventeen years in the Department of Geology, British Museum, was a geologist and naturalist of eminence, and author of a "Manual of the Mollusca" (1851-56), which has reached a sale of upwards of 12,000 copies. The subject of the present notice was born at Norwich, Nov. 24, 1832. His father died when he was only five years of age. Henry Woodward was educated at the Norwich Grammar School, and at the Grammar School, Botesdale, Suffolk. Thence, in 1846, he went to reside with his brother, Dr. S. P. Woodward, at that time Professor of Natural History at the Royal Agricultural College, Cirencester, where he entered as an out-door student at the College, and worked diligently for three years. There he imbibed that knowledge of geology and love of natural history which, inherited from his father, needed only opportunity and encouragement to develop. In January, 1858, Prof. Owen, the Superintendent of the Natural History Departments in the British Museum, wrote offering him a junior assistant's post in the Geological Department, under Mr. G. R. Waterhouse, where his brother, Dr. S. P. Woodward, was already a senior assistant. His ready acceptance of this small post evinced his anxiety to take up geology as a profession, and he entered on his new duties with alacrity. In 1859 he was made a second class assistant; in 1865 a first class; and in 1867 he entered the first class upper section, a proof that his services met with favourable official recognition. In the spring of 1860 he accepted an invitation to join Mr. Robert MacAndrew, F.R.S., on a dredging expedition to the south coast of Spain and the Mediterranean; and at Malaga and Gibraltar he made excellent zoological and geological collections. In 1863 he again joined MacAndrew in a dredging expedition along the north coast of the Spanish Peninsula from Bilbao to Coruna. Excursions were also made into the interior to Vittoria, Burgos, &c. In 1864 Mr. Woodward commenced, and still continues to edit the *Geological Magazine*, a monthly journal of Geology, now in its twenty-eighth year. Dr. Woodward's contributions to scientific literature number over 200; he has also published a monograph on the "Fossil Merostomata," and one on "Carboniferous Trilobites," in the volumes of the Paleontographical Society; a Catalogue of British Fossil Crustacea, published by the Trustees of the British Museum; articles on "Mollusca"

and "Crustacea," in Cassell's Natural History; and on "Crustaceen," in the *Encyclopædia Britannica*. In 1873-74 Mr. Woodward was elected President of the Geologists' Association, and a Vice-President of the Geological Society of London, 1887-88. In 1873 he was elected a Fellow of the Royal Society, and in 1878 the University of St. Andrews conferred upon him the honorary degree of LL.D. On the 23rd June, 1880, on the retirement of Mr. George R. Waterhouse, the Principal Trustees of the British Museum appointed Dr. Henry Woodward Keeper of the Department of Geology, in which he had served as an assistant for twenty-two years; a promotion which has been received with satisfaction among scientific men generally. In 1857 Mr. Woodward married Ellen Sophia, only child of M. F. Page, Esq., of Norwich, by whom he has two sons and five daughters. Dr. Woodward's eldest son, H. P. Woodward, F.G.S., is now Government Geologist for Western Australia, and the younger, M. F. Woodward, is Demonstrator in Biology in the Royal College of Science (formerly the Royal School of Mines), South Kensington.

**WOOLLEY, Celia Parker**, American writer, was born at Toledo, Ohio, in 1848. When she was quite young her parents removed to Coldwater, Mich., where, excepting a few months spent at the Lake Erie Seminary (Painesville, Ohio), she was educated, graduating from the Coldwater Seminary in 1866. Her literary career began with occasional contributions to periodicals. For eight years she was the Chicago correspondent of the *Christian Register* (a Boston Unitarian weekly); in 1884 *Lippincott's* published her first short story, and a few others have followed in the same magazine. Her first novel was issued in 1887, and was received with great favour. It was brought out under the title of "Love and Theology," a name changed in later editions to "Rachel Armstrong." She has since (1889) published another, entitled "A Girl Graduate." In 1868 she was married to Dr. J. H. Woolley, and in 1876 went to Chicago, where she has since resided.

**WOOLNER, Thomas, R.A.**, was born at Hadleigh, in Suffolk, Dec. 17, 1826, and received his education in private schools at Ipswich, Wymesham, and London. When thirteen years of age he evinced a talent for sculpture, and was placed in the studio of William Behnes, under whose able guidance he studied with great diligence for six years, acquiring remarkable skill as a sculptor, and be-

coming an accomplished draughtsman. His first models were of a poetical and historical character. "Eleonor sucking the Poison from Prince Edward's Wound" was exhibited at the Royal Academy, 1843, and a life-size group of "The Death of Boudicca" in Westminster Hall. The latter attracted particular attention, and was regarded as a work of great promise in the inventive or ideal style of sculpture. Following up this success, Mr. Woolner exhibited figures of "Puck" and of "Titania with her Indian Boy" at the British Institution, and an "Eros and Euphrosyne" and "The Rainbow" at the Royal Academy in 1848. Two years later, in conjunction with Mr. Millais, Mr. Holman Hunt, and Mr. Dante Gabriel Rossetti, he took a leading part in establishing *The Germ*, a short-lived periodical, in which the ideas of those artists who were afterwards called "Pre-Raphaelites" first found expression. Mr. Woolner's contributions consisted of a number of graceful poems, two of which, with others from his pen, were afterwards published in a volume, entitled "My Beautiful Lady," that appeared in 1863, and reached a third edition in 1866, and a fourth in 1887. Mr. Woolner went to Australia in 1862, and during a residence of nearly two years there he modelled a number of characteristic likenesses in medallion. On his return to this country his first important production was a life-size statue of Lord Bacon, for the new Museum at Oxford. Among his subsequent works are statues of John Robert Godley, for Canterbury, New Zealand; Lord Macaulay, for Trinity College, Cambridge; William III., for the Houses of Parliament; Sir Bartle Frere, for Bombay; Dr. Whewell, for Cambridge; Lord Lawrence, for Calcutta; and Lord Palmerston, for Palace Yard; busts of Tennyson, Carlyle, Dr. Newman, Mr. Darwin, Ralph Brooke, Sir William Fairbairn, Professor Sedgwick, Sir William Hooker, Richard Golden, Charles Dickens, Canon Kingsley, Mr. Gladstone, Viscount Sandon, Mr. W. Fuller Maitland, Professor Lushington (for the University of Glasgow), Mr. John Simon (for the College of Surgeons), and Professor Huxley; also "Eloise with the Shield of Sir Lancelot," "Ophelia," "In Memoriam," a poetical group, "Virgil bewailing the Banishment of Coriolanus," "Guinevere," and "Achilles and Pallas shouting from the Trenches," the latter being his diploma work exhibited at the Royal Academy in 1878; "Lady Godiva Unrobing." Mr. Woolner was afterwards engaged on a colossal statue in bronze of Captain Cook, for the Government of

New South Wales, to be erected in Hyde Park, Sydney, overlooking Sydney Harbour. In 1871, Mr. Woolner was elected an Associate of the Royal Academy, and in Dec., 1871, he received the final honour of being nominated a Royal Academician. On the death of Mr. Henry Weekes, in 1877, he was appointed to succeed him as Professor of Sculpture in the Royal Academy. He resigned that professorship in Jan., 1879. His statue of Lord Chief Justice Whitehead was erected in the Hall of the Four Courts, Dublin, in 1880. Mr. Woolner has since executed the recumbent statue of Lord Frederick Cavendish, now in Cartmel Priory Church, and the Monument to Sir Edwin Landseer, in the Crypt of St. Paul's Cathedral. He is now engaged on a recumbent statue of the late Bishop Jackson, for St. Paul's; a bronze statue of Sir Stamford Raffles, for Singapore; and a bronze statue of the late Bishop Fraser, for Manchester. In 1881 he published the poem of "Pygmalion;" 1881, "Silence;" and 1886, "Threshing;" and in 1887, "Nelly Dale." His last work is a bust of Sir Thomas Elder, in the Royal Academy Exhibition, 1890.

**WOOLSON, Constance Fenimore**, an American writer and grandniece of James Fenimore Cooper, was born at Claremont, New Hampshire, in 1818. While she was quite young her family removed to Cleveland, Ohio, and she was educated at a young ladies' seminary in that city and in New York. Her father died in 1830, and in 1873 she and her mother went to the Southern States, where they remained until the death of Mrs. Woolson in 1879, when the daughter came to England and has since resided in Europe, mainly in Italy. Miss Woolson's literary career began with some contributions to periodicals published about the time her father died. Her writings, most of which first appeared in magazines, comprise "Castle Nowhere," 1875; "Rodman the Keeper," 1880; "Anne," 1882; "For the Major," 1883; "East Angels," 1886; and "Jupiter Lights," 1889.

**WORCESTER, Bishop of.** See FEROWNE, THE RIGHT REV. JOHN JAMES STEWART.

**WORDSWORTH, The Right Rev. Charles, D.D. and D.C.L., Bishop of St. Andrews, Dunkeld, and Dunblane**, second son of the late Dr. Christopher Wordsworth (many years Master of Trinity College, Cambridge), and nephew of the celebrated poet, born in 1806, was educated at Harrow and at Christ Church, Oxford, where he obtained, among other distinctions, two Chancellor's prizes, that for Latin

verse in 1827, and for the Latin essay in 1831, and was placed in the first class of Literæ Humaniores, when he took the degree of B.A. in 1830. In reward for the first of these distinctions he was appointed to a studentship by the Dean. He was no less distinguished for athletic exercises, being, in 1829, one of the Oxford eight, and also one of the Oxford eleven, and successful in both encounters with the sister University. After taking his B.A. degree, he remained at Christ Church for two or three years as a private tutor, and had among his pupils the late Duke of Newcastle, the Right Hon. W. E. Gladstone, Cardinal Manning, and other celebrated men. In 1835 he was elected Second Master of Winchester College, an office which up to that time had never been conferred on any one not educated at Winchester. On account of weak health, he resigned in 1845, and accepted in 1848 the appointment of first Warden of Trinity College, Glenalmond, Perthshire, which he held for seven years. In 1852 he was elected Bishop of the united dioceses of St. Andrews, Dunkeld, and Dunblane, and at the installation of the late Earl of Derby as Chancellor, in 1853, was admitted to the honorary degree of D.C.L. by the University of Oxford. In 1854 he resigned the Wardenship of Glenalmond, and has since devoted himself exclusively to the duties of the episcopate, taking an active part in the affairs of the Scottish Church. He was one of the New Testament Company for the Revision of the Authorised Version of the Bible. The published works of the Bishop of St. Andrews are chiefly of a theological character. There are, however, some exceptions; among which must be mentioned his "Græcæ Grammaticæ Rudimenta," published in 1839, and now in the nineteenth edition; "The College of St. Mary Winton," an illustrated work, in 1848; a volume "On Shakespeare's Knowledge and Use of the Bible," in 1854, 3rd edition, 1880; "Shakespeare's Historical Plays, Roman and English," 3 vols., 1883; and "A Greek Primer," in 1870. His other publications are, "Christian Boyhood at a Public School," 1846; "Catechesis, or Christian Instruction," 4th (enlarged) edition, 1864; a "Letter to the Right Hon. W. E. Gladstone on Religious Liberty;" and numerous sermons, charges, and pamphlets. His elaborate judicial "Opinions" on the cases of the Bishop of Brechin and the Rev. P. Cheyne, and his "Notes on the Eucharistic Controversy" (the last printed for the use of his clergy and private circulation only), are a powerful vindication of the

doctrines hold by the Anglican Church. He has made various appeals to the Presbyterian community in Scotland in the form of lectures, &c., on behalf of unity among Christians; among which may be specified "A United Church for the United Kingdom, advocated in a Tercentenary Discourse on the Scottish Reformation," together with Proofs and Illustrations, designed to form a "Manual of Reformation Facts and Principles," in 1860; and "The Outlines of the Christian Ministry delineated and brought to the Test of Reason, Holy Scripture, History, and Experience; with a view to the Reconciliation of Existing Differences concerning it, especially between Presbyterians and Episcopalians," 1872. He has also published "A Discourse on Scottish Church History from the Reformation to the Present Time," 1881; and "Remarks on Bishop Lightfoot's Essay on the Christian Ministry," 2nd edition, 1884. In 1885, he received the honorary degree of D.D. from the University of Edinburgh, on occasion of the grand Tercentenary Festival, and also from the University of St. Andrews in the same year. In 1886, a series of his various Charges and Addresses on the subject of Reconciliation between Episcopalians and Presbyterians, appeared under the title of "Public Appeals on Behalf of Christian Unity," 2 vols. 12mo. That he has kept up his classical scholarship to the last is shown by his "Anni Christiani cum ad Clerum pertinent Latini reddita," 1880; and by his "Series Collectarum, cum Selectis Hymnis Psalmisque," also in Latin verse, 1890. In Dec., 1890, the Bishop published the Memoir of his long and useful life.

**WORDSWORTH, The Right Rev. John, D.D.,** Bishop of Salisbury, nephew of the above, and oldest son of the late Right Rev. Christopher Wordsworth, D.D., Bishop of Lincoln, was born at Harrow, Sept. 21, 1813, and educated at Ipswich, Winchester School and at New College, Oxford, where he graduated in 1835. In 1836 he became a Master at Wellington College, and in 1837 was elected Fellow, and in 1838 Tutor, of Brasenose College, Oxford. He was appointed Prebendary of Lincoln in 1870, Select Preacher at Oxford, 1876; Hampton Lecturer, 1881; Oriel Professor of the Interpretation of Holy Scripture, 1888; and Canon of Rochester in the same year. On the death of Dr. Moberly in 1885 he was appointed Bishop of Salisbury. Dr. Wordsworth is the author of several articles in the "Dictionary of Christian Biography," and of "Kemble College and the Present

University Crisis," 1869; "Lectures Introductory to a History of Latin Literature," 1870; "Fragments and Specimens of Early Latin," 1874; "University Sermons on Gospel Subjects," 1878; "The Church and the Universities: a Letter to C. S. Roundell, Esq., M.P.," 1880; "The One Religion" (Bampton Lectures), 1881; "Old Latin Biblical Texts," No. 1, 1883; "Pastoral Letter to the Diocese of Sarum," 1885, &c. He was also joint editor of "Studia Biblica," (Oxford, 1885. He has been long engaged on a critical edition of the "Latin New Testament of St. Jerome" (The Vulgate), the first part of which was published at Oxford in 1889 with the assistance of Rev. H. J. White; and the second part in 1890.

**WORMS, The Right Hon. Baron Henry De, P.C., F.R.S., M.P.** for East Toxteth Division of Liverpool, third son of the late Baron De Worms, of Park Crescent, W., was born in London, Oct. 20, 1840; and educated in Paris and at King's College, London, of which he is a Fellow. He was called to the Bar at the Inner Temple in June, 1863, and practised as a Barrister for about three years. In 1880 he became member for Greenwich, and from that time he took an active part in the debates in the House, especially those relating to Foreign Affairs. He directed attention to the then imperfect administration of the Royal Patriotic Fund, and made certain recommendations which were afterwards embodied in an Act of Parliament. Mr. Gladstone, in acknowledgment of the services thus rendered, made the Baron a Royal Commissioner of the Patriotic Fund. At the general election of 1885, consequent upon alterations caused by the Redistribution Bill, he withdrew from Greenwich, and successfully contested East Toxteth, for which constituency he was returned unopposed in 1890. In both Lord Salisbury's Governments, he has held the office of Parliamentary Secretary to the Board of Trade. He was appointed Under-Secretary of State for the Colonies in Jan., 1888; President of the International Conference on Sugar Bounties in 1887-88; and British Plenipotentiary, in which capacity he signed the Treaty on behalf of Great Britain for the abolition of the Bounties. In Jan., 1889, he became a member of the Privy Council, and in the same year was elected a Fellow of the Royal Society. He is the author of "The Earth and its Mechanism;" "England's Policy in the East;" and "The Austro-Hungarian Empire," the latter being an exposition of Count Beust's policy; and edited the

"Memoirs of Count Boust," to which he wrote the preface.

**WORTHY, Charles**, is the eldest son of the late Rev. Charles Worthy, Vicar of Ashburton with Buckland, who died in 1870, and of Elizabeth, his wife, first cousin of the late Charles Richardson, LL.D., the Lexicographer (see "Men of the Time," sixth edition). He was born at Snayle Tower, Exeter, Dec. 28, 1840; educated at Exeter Grammar School, and by private tuition; was appointed to a commission in the 82nd Regiment in 1858, and proceeded to India in the following year. His health failing him Mr. Worthy retired from the service in 1861, and turned his attention to the History and Antiquities of Devonshire, his native county. From 1871 he has been a constant contributor of periodical articles on these and similar subjects, both to the Public Press and to the Transactions of the Devonshire Association. In 1875 he published "Ashburton and its Neighbourhood," "The Antiquities and History of Fourteen Parishes on the Borders of Dartmoor," fcap., 4to; "The Manor of Winkleigh, the Ancient Seat of the Honour of Gloucester," 8vo, 1876; "Local Guide to Ashburton and Dartmoor," 1879; "Mémair of Walter Stapledon, Bishop of Exeter (1308)," "Notes on Hideford and the House of Granville" (Reprinted from Transactions of the Devonshire Association, 1876 and 1881). He was conditor with the late Stephen Tucker on the *Somerset Herald*, from 1870-1882. His first volume of "Devonshire Parishes," "The Antiquities, Heraldry, and Family History of Twenty-eight Parishes in the Archdeaconry of Totnes," appeared in 1887. In the following year he published an epitome of English armory under the title of "Practical Heraldry;" vol. 2 of "Devonshire Parishes" appeared in 1889. He also revised the last edition of Murray's "Hand-book for Devonshire," 1887; and printed a pamphlet on "The Life of Lord Idlesleigh, with a Genealogical History of the Northcott Family," Jan. 1887, which ran to a second edition within three days.

**WRATISLAW, The Rev. Albert Henry**, M.A., born in 1821, and educated at Rugby School, and then at Christ's College, Cambridge, of which he was successively Scholar, Fellow, and Tutor, graduated B.A. in 1844, taking high honours. He was elected Head Master of the Grammar School, Felstead, in 1852, and of Bury School on the resignation of Dr. Donaldson in 1855. In 1879 he resigned the

Head Mastership of Bury, and accepted the Vicarage of Manorbier, near Tenby, in Pembrokeshire. This he resigned from ill health in 1887 and now resides at Stoke Newington. He has written "Lyra Czecho-Slovanska, Bohemian Poems, translated," published in 1849; "Queen's Court Manuscript, with other Bohemian Poems, translated," in 1852; "Ellisian Greek Exercises," in 1855; "Barabbas the Scape-goat and other Sermon and Dissertations," in 1859; "Notes and Dissertations on Scripture," in 1863; "Plea for Rugby School," in 1864; "The Adventures of Baron Wratislaw of Mitrowitz in his Sojourn and Captivity at Constantinople, at the end of the sixteenth century;" and "The Diary of an Embassy from King George of Bohemia to Louis XI. of France, in 1461," both translated from the Bohemian-Slavonic; "Life, Legend, and Canonization of St. John Nepomucen," 1873; school-books, pamphlets, and magazine articles; "Lectures on the Native Literature of Bohemia in the 14th century," 1878 (these were delivered before the University of Oxford); "Life of John Huss," 1882, published by the Society for Promoting Christian Knowledge; "Sixty Folk-Tales from exclusively Slavonic sources," 1889.

**WRENFORDSLEY, The Hon. Sir Henry Thomas, Knight**, was educated in France, and having been called to the English Bar, practised for some years on the old Norfolk Circuit. He contested the City of Peterborough, in the Conservative interest, in 1868; and again, in 1874, but without success. In 1876, he was appointed acting Deputy County Court Judge for the Metropolitan districts of Marylebone, Brompton, and Brentford. In 1877, he became Puisne Judge in the Colony of Mauritius; and, in June, 1878, he left the Bench, and became Procureur-General. Before leaving the colony, he received a vote of thanks from the Legislative Council in respect of his public services in connection with the passing of the Labour Law, and reforms introduced into the judicial administration of the colony. In 1880, he was appointed to the Chief Justiceship of Western Australia, and received the Dormant Commission from the Crown to administer, in case of need, the Government of that Colony. He was appointed Delegate to represent the colony at the Intercolonial Conference held at Sydney in 1881; and subsequently, he administered the Government from February to June 1883. During that period, he organised and started the first Expedition to the Kimberley, or northern district, and named

the first town "Derby," by permission of the Secretary of State. A further expedition also was despatched for the purpose of extending the telegraph system about 900 miles further north. He received the honour of Knighthood and several public addresses before leaving the colony. In 1883, Sir Henry proceeded in H.M.S. *Diamond*, to Fiji, as Chief Justice of that Colony and also held the appointment of Judicial Commissioner for the Western Pacific. In 1884, he left Fiji on leave, in consequence of bad health. Before leaving the colony, he was entertained by the leading merchants and others at the largest banquet ever given in that part of the Pacific. Subsequently, and by permission of the Secretary of State for the Colonies, he became acting Puisne Judge in the Colony of Tasmania. In consequence of the action of the Colonial Office in having filled up his appointment in Fiji, Sir Henry was called to the Bar of Victoria and became a Queen's Counsel. In 1888, he was invited by the Government of Victoria to act as a Judge of the Supreme Court in the absence of one of the Judges, for which duty he received the thanks of the Colonial Government. In 1890 he was appointed by the Secretary of State, acting Chief Justice of Western Australia, and he held that appointment at the time when that colony received a new Act of Constitution, and became for the first time a responsible Government Colony. Sir Henry has thus served the Crown as a Judge of the Supreme Court in five of Her Majesty's Colonies; viz., Mauritius, Western Australia, Fiji, Tasmania, Victoria, and again in Western Australia, besides having held the appointments of Procurator-General in Mauritius, and Deputy Governor in Western Australia.

**WRIGHT, The Hon. Robert Samuel, M.A., B.C.L.**, was educated at Balliol College, Oxford, where he had a distinguished career. He took a First Class in Classical Moderations in 1859, and in Literæ Humaniores in 1860. In 1859-62 he gained three University prizes, the Latin verse prize, the English essay, and the Arnold essay; he was elected to a Fellowship at Oriol, of which he is now an honorary Fellow, and he gained the Craven scholarship in 1861. He was called to the Bar at the Inner Temple in June, 1865, and joined the Northern Circuit. He has held the office of common law junior counsel to the Treasury for several years. He succeeded the late Baron Huddleston, as one of the Justices of the High Court in Dec., 1890.

**WYNDHAM, Charles**, was born in 1811, and was educated for the medical profession. He went to America in 1862, and made his first appearance as an actor at Washington with John Wilkes Booth (the assassin of President Lincoln), playing Orléans to his Hamlet, and subsequently, Clavis to his Claude Melnotte. On the termination of his engagement he returned to the army, in which he had already served as a surgeon, and was concerned in some engagements that took place in the Civil War. He was attached to the 19th Army Corps, having at one time the medical charge of a brigade, and at another, charge of a regiment. On returning to England he went to Liverpool, to the Old Amphitheatre, where his success was such, that it led to a highly remunerative engagement of several months' duration. In May, 1868, he made his first London appearance as Sir Arthur Lascelles in "All that Glitters is not Gold." He returned to America in 1869, and appeared with distinction at Wallack's Theatre as Charles Surface in "The School for Scandal." Coming home again, he re-appeared at the St. James's Theatre in 1872, then under Mr. Stephen Pisko's management, as Rabagas. A provincial tour followed this engagement, and in 1873 he played "the lord" at the Royalty, appearing there notably in the character which he revived in 1886 in "Wild Oats." A version of Mr. Bronson Howard's comedy "Sartoga," called "Brighton," was produced at the Court Theatre in 1874, with Mr. Wyndham in the principal character. In 1875 he went to Berlin and produced a version of "Brighton" in German. From 1876 the Criterion Theatre, under Mr. Wyndham's management, was distinguished by pieces of lively character until, in 1886, he made trial of old comedy. In the year 1887, another visit to Germany was paid, embracing the cities of Berlin, Frankfurt and Leipzig, during which "David Garrick" in German, under the title of "Anf Ehrenwort," was played, and proved such a success that an invitation from the Emperor of Russia extended the tour to St. Petersburg and Moscow. On the occasion of his performance in the Russian capital, Mr. Wyndham was presented by the Czar with a magnificent sapphire and ruby ring in recognition of the pleasure which his acting had afforded His Majesty. Two years later another tour to America followed, when Boston, New York, Chicago, Cincinnati, Baltimore, Washington and Philadelphia were visited, the repertoire including such plays as "David Garrick," "The Candi-

date," "Wild Oats," "Still Waters Run Deep," and an eccentric comedy, written specially for Mr. Wyndham by F. C. Burnand, editor of London *Punch*, and entitled "The Headless Man," when fresh laurels were gathered, resulting in a cordial invitation on the part of the American public to revisit the United States at no very distant date. The latest characterisation, with which Mr. Wyndham has identified himself, is Young Marlow, in "She Stoops to Conquer."

## Y.

YATES, Edmund Hodgson, son of the well-known actor, who was lessee of the Adelphi, was born in July 1831, and was for some years Chief of the Missing Letter Department in the Post-Office. He has written "My Haunts and their Frequenter," published in 1854; "After Office Hours," in 1861; "Broken to Harness," a Story, in 1861; "Business of Pleasure," "Pages in Waiting," and "Running the Gauntlet, a Novel," in 1865, and "Kissing the Rod," and "Land at Last, a Novel," in 1866. In conjunction with the late Mr. F. E. Smiedley, he wrote "Mirth and Mote, by Two Merry Men," published in 1854; in conjunction with the late Mr. K. B. Brough, edited "Our Miscellany," which appeared in 1857-8; prepared a condensed edition of "The Life and Correspondence of C. Mathews the elder," published in 1860; and a "Mémorial of Albert Smith and Mont Blanc." Mr. Yates, who has written some dramas, and was the theatrical critic of the *Daily News* for six years, edited the *Temple Bar Magazine*, in which his novel "Broken to Harness" appeared as a serial in 1861-5; was the first editor of *Tinsley's Magazine*; and a constant contributor to *All the Year Round*, in which his novel "Black Sheep" was the leading serial story in 1866-7. His later novels are "Wrecked in Port," 1869; "Dr. Wainwright's Patient," and "Nobody's Fortune," 1871; "The Yellow Flag," 1873; and "The Impending Sword," 1874. In May, 1872, Mr. Yates retired from the Post-Office in order to devote himself exclusively to literature. In the course of that year he went on a lecturing tour in the United States, and in May, 1873, he was appointed London representative of the *New York Herald*, which post he resigned in July, 1874, when he established *The World*, "a journal for men and women," which has a wide circulation, and of which he still remains sole proprietor and editor. In Nov., 1884, Mr. Yates published two

volumes of "Personal Reminiscences and Experiences," an autobiography, which has gone through four editions. Mr. Yates was in 1884 indicted for having published in *The World* a libel on the Earl of Lonsdale, for which, as editor, he was responsible; he was sentenced by the Lord Chief Justice to four months' imprisonment as a first-class misdemeanant, but was released before two months had expired.

YEAMES, William Frederick, R.A., was born in Dec., 1835, at Taganrog, on the Sea of Azoff, South Russia, of which port his father, Mr. William Yeames, was Her Britannic Majesty's Consul. The family belonged originally to the county of Norfolk. During the years 1842 and 1843 he travelled with his family through Italy. After returning to Russia and spending the winter at Odessa, the family went to Dresden, and there remained till the spring of 1848 when it removed to London. Mr. Yeames received his first instruction in art from Mr. George Scharf, who taught him drawing and anatomy. The young artist also practised drawing from casts in the studio of Mr. J. Sherwood Westmacott. In 1852 Mr. Yeames left England, in order to advance his art-education in Italy; and studied at Florence, first for two years under the direction of Professor Pollastrini, of the Florence Academy, afterwards under Signor Raffaello Buonajuti. Subsequently he spent eighteen months in Rome, and at last, in 1858, he returned to England. In 1859 he exhibited at the Royal Academy a portrait and "The Staunch Friends," a subject-picture of a jester and monkey. In 1861 he was represented there by works entitled "Il Sonetto," with illustrative lines from "Petrarch," and "The Toilet," in 1862 by "Rescued," a boy saved from drowning; in 1863 by "The Meeting of Sir Thomas More with his Daughter after his Sentence to Death," in 1864 by "La Reine Malheureuse," Queen Henrietta Maria taking refuge from the fire of the Parliament ships in Burlington Bay; in 1865 by "Arming the Young Knight," and in 1866 by "Queen Elizabeth receiving the French Ambassadors after the News of the Massacre of St. Bartholomew." In June, 1866, he was elected an Associate of the Royal Academy. Since then he has exhibited "The Dawn of the Reformation," 1867; "The Chimney Corner," and "Lady Jane Grey in the Tower," 1868; "The Fugitive Jacobite" and "Alarming Footsteps," 1869; "Maunday Thursday," and "Love's Young Dream," 1870;

"Dr. Harvey and the Children of Charles I.," 1871; "The Old Parish-ioner," 1872; "The Path of Roses," 1873; "The Appeal to the Podestà," "Flowers for Hall and Bower," and "The Christening," 1874; "Pour los Pauvres" and "The Suitor," 1875; "La Contadinella," "The Last Bit of Scandal," and "Campo dei SS. Apostoli, Venice," 1876; "Waking" and "Amy Robsart," 1877; "Whom Did You Last See Your Father?" 1878; "La Bigolante: Venetian Water-Carrier," his diploma work, deposited on his election as an Academician, 1879; "The Finishing Touch; Green-Room at Private Theatricals," 1880; "Here We Go Round The Mul-berry Bush" and "Il Dolce far Niente," 1881; "The March Past," "Prince Arthur and Hubert," and "Welcome as Flowers in Spring," 1882; "Tender Thoughts," 1883; and "St. Christopher," 1887. Mr. Yeames was elected a Royal Academician, June 19, 1878.

YEO, Gerald F., M.D., F.R.S., F.R.C.S., second son of Henry Yeo, Esq., J.P. of Howth, was born in Dublin in 1845, educated at Trinity College, Dublin; graduated in the Dublin University as Moderator in Natural Science in 1866, and in 1867 took the M.B. and M.Ch. degrees. In 1866 an Essay by him on Renal Disease was awarded the Gold Medal of the Dublin Pathological Society. He then studied for a year in each of the Great Schools of Paris, Berlin, and Vienna; and on his return to Ireland in 1870 he was appointed Demonstrator of Anatomy in the Medical School of Trinity College. He then took the M.D. and Sanitary degree, and also the qualification of the Colleges of Physicians and Surgeons in Ireland. He taught Physiology in the Carmichael School of Medicine for two years, and then left Ireland; as in 1875, he was appointed Professor of Physiology in King's College, London. In 1877 he was made Assistant Surgeon to King's College Hospital, and became a Fellow of the Royal College of Surgeons of England. While in Dublin he published in the Local Medical Journals, numerous papers, chiefly of a pathological nature. Since coming to London his works—with the exception of a paper on Cerebral Surgery and a report on Bovine Pleuro-pneumonia, have been almost exclusively physiological. Some of his researches were communicated to the Royal Society and have appeared in the Transactions and Proceedings of that body; but the greater part of his contributions was published in the *Journal of Physiology*. He is the author of a well-

known "Manual of Physiology for the Use of Students of Medicine." He has held the post of Examiner in the Universities of Oxford, Cambridge, and London, the Royal College of Surgeons of England, and the Royal Veterinary College. He acted as Honorary Secretary of the Physiological Society from its foundation in 1875 until 1880. It is a strange coincidence that the only two medical men of the same surname in England should both be at King's College, London; but Mr. Gerald Yeo is not in any way related to Dr. Isaac Burney Yeo.

YEO, Professor I. Burney, M.D., descended from an ancient Cornish family already settled in Cornwall in the reign of Edward III., was born at Stonehouse, Devonshire, and educated privately, until, in 1858, he became a student in King's College, London, where he rapidly distinguished himself, and obtained three scholarships in succession and other distinctions. At the Doctor of Medicine's examination, in the London University, he obtained the number of marks qualifying for the Gold Medal. In 1866 he was appointed Resident Medical Tutor in King's College; this post he resigned in 1871 and began practice in Mayfair, having about that time been elected one of the Physicians to the Brompton as well as to King's College Hospitals. He was elected Fellow of the Royal College of Physicians (1876), Hon. Fellow and Professor of Clinical Therapeutics in King's College, London (1885), and Physician to King's College Hospital. Dr. Yeo has contributed largely to medical literature, and has furnished numerous lectures, commentaries, &c., to the *Lancet*, *British Medical Journal*, &c. He is the translator of Oertel's "Respiratory Therapeutics" in Ziemssen's Handbook of General Therapeutics, and of articles in Ziemssen's "Cyclopaedia of Practical Medicine." He has written much on the treatment of disease. He is the author of a work on "Consumption" (1882), and of a manual on "Climate and Health Resorts" (new edit. 1890); also of a Manual on "Food in Health and Disease." He has also contributed several articles to the *Fortnightly* and *Contemporary reviews*, and to the *Nineteenth Century*.

YONGE, Charles Duke, M.A., son of the Rev. Charles Yonge, Lower Master of Eton College, born in Nov. 1812, was educated at Eton and at Oxford, where he graduated B.A. in 1835, taking a first-class degree. In 1866 he was appointed Regius Professor of Modern History and English Literature in the Queen's College,

Belfast, where he has been very successful in promoting the study of History; and in 1882 he was elected a Fellow of the Royal University. He has been a very voluminous author of both classical and historical works, many of which are often referred to by continental writers, and have a large circulation in the United States. His chief works are an "English and Greek Lexicon," 1849, the companion to Liddell and Scott's Greek and English Lexicon; "Gradus ad Parnassum, with Dictionary of Epithets," 1850; "School Phraseological English-Latin and Latin-English Dictionary," two parts, 1855-56; "History of England to the Peace of Paris, 1856," in 1857, 2nd edit., 1871; short parallel lives of Epaminondas, Gustavus Adolphus, Philip, and Frederick the Great, in imitation of Plutarch's method, 1858; "Life of the Duke of Wellington," in two volumes, 1860; a school edition of Virgil, with English notes, 1861; "History of the British Navy," in three volumes, 1863; "English-Greek Lexicon, abridged," 1864; "History of France under the Bourbons, A.D. 1589-1830," in four volumes, in 1866; "The Life and Times of Lord Liverpool," in three volumes, in 1868, and a "Life of Marie Antoinette," in two volumes, in 1876; "Three Centuries of Modern History," 1872; "History of the English Revolution of 1688," in 1874; a Constitutional History of England, 1760-1860," a sequel to Hallam's, 1883, and "Our Great Naval Commanders," 1884, etc.

**YONGE, Charlotte Mary**, only daughter of the late W. C. Yonge, Esq., of Otterbourne, Hants, a magistrate for Hampshire, was born in 1823. She is the authoress of several works of fiction, in which the plot is made to enforce, in a plain and sober manner, the doctrines of what is called the High-Church school of opinion. Her best known works are, "The Hair of Redclyffe," "Heartsease," "Dynevour Terrace," "The Daisy Chain," "The Young Stepmother; or, a Chronicle of Mistakes," "Hopes and Fears; or Scenes from the Life of a Spinster," "The Lances of Lynwood," "The Little Duke," "Clever Women of the Family," "Prince and the Page: a Story of the Last Crusade," and "Dove in the Eagle's Nest." Most of these have gone through several editions, and have been reprinted in a cheap form. It has been stated in the public papers, that she gave £2,000, the profits of her "Daisy Chain," for the building of a Missionary College at Auckland, New Zealand, and devoted a great portion of the proceeds of "The

Hair of Redclyffe" to the fitting out of the missionary schooner *Southern Cross*, for the use of Bishop Selwyn. Miss Yonge has also published "Marie Thérèse de Lamourons," a biography abridged from the French; "The Kings of England," "Landmarks of History, Ancient, Middle Ages, and Modern," forming a compendium of Universal History for young people; "History of Christian Names and their Derivation," 1863; "The Story of English Missionary Workers," in "Macmillan's Sunday Library," 1871; "Lady Hester," 1873; "Life of John Coleridge Patteson, Missionary Bishop of the Melanesian Islands," 2 vols., 1873; "Stories of English History," 1874; "Stories of Greek History for the Little Ones," 1876; "Aunt Charlotte's German History for the Little Ones," 1877; "Aunt Charlotte's Roman History for the Little Ones," 1877; "Unknown to History; a Story of the Captivity of Mary of Scotland," a novel, 2 vols., 1882; "Stray Pearls; Memoirs of Margaret de Ribbaumont, Viscountess of Bellaise," 2 vols., 1883; "The Two Sides of the Shield," and "Nuttie's Father," 1885, and "The Reputed Changeling," 1890.

**YORK, Archbishop of.** See **MAGEE, THE MOST REV. WILLIAM CONNOR.**

**YOUNG, Sir Allen**, arctic navigator, formerly commanded a ship in the merchant service, and among the many officers of that service who did good work and gained credit at Balaklava during the Russian war, there was no commander whose services were more warmly acknowledged by the late Lord Lyons than were those of Captain Allen Young. Subsequently he volunteered and filled a responsible position on board Lady Franklin's little ship, the *Fox*, in McClintock's memorable voyage (1857-60), when the problem of the fate of Franklin and his companions was solved. As an officer of the Royal Naval Reserve his commission bears date from the first creation of the force. In 1875, principally at his own expense, he made in his yacht, the *Pandora*, a gallant though unsuccessful attempt to accomplish the North-West Passage, and to throw some further light on the proceedings of the lost expedition under Franklin, by a search for their records on King William's Land. Again, in 1876, he refitted the *Pandora* for a second attempt, with the same objects in view; but the Admiralty, having been unexpectedly called upon to communicate with the dépôts of the Government Expedition in Smith's Sound,

Captain Young readily responded to an invitation to fulfil that important duty, which he did at no small risk, and in a manner which was deemed thoroughly satisfactory. In recognition of this service the Queen conferred upon him the honour of knighthood, March 12, 1877. An account of the "Two Voyages of the *Pandora* in 1875 and 1876" was published in London in 1879.

**YOUNG, Sir Frederick, K.C.M.G.**, was born in the year 1817, and is the son of the late Mr. George Frederick Young, who represented the shipping interests in the House of Commons as a member for Tyne-mouth, from 1832 to 1838, and afterwards sat for Scarborough from 1851 to 1852. He had for his grandfather, on the paternal side, Vice-Admiral William Young, who commanded the line-of-battle ship *Foudroyant*, a stately craft carrying 98 guns, in the days when men-of-war were still picturesque, if not so destructive as they are now, and when our naval commanders relied more upon the pluck of their men than upon the metal of their armament. This gallant admiral was appointed by Lord Keith its naval commander, to superintend the disembarkation of the troops which formed the Egyptian Expedition in March, 1801, and in his cabin died Sir Ralph Abercrombie, who received his mortal wound at the battle of Alexandria. Sir Frederick's mother was of Kentish origin, being Mary, daughter of Mr. John Abbott, of Canterbury. The first work of public utility which calls for notice in this sketch, is one which redounds to the credit of both Sir Frederick and his father. The project of obtaining Victoria Park, and, after rescuing it from the possible spoliation of the speculative builder, throwing it open as a place of popular recreation, originated with Mr. George Frederick Young, who was the author of the scheme. Sir Frederick (then Mr.) Young was asked to act as Honorary Secretary and Treasurer to the Committee then formed to prosecute the scheme. It was not accomplished in a day. Mr. Young, Sen., drew up a memorial for presentation to the Queen, and the matter being undertaken with spirit, it roused such interest that the young secretary soon obtained 30,000 signatures, and the memorial was presented in due course. The agitation thus begun was kept alive for three or four years, constant communications passing between the promoters, Lord Duncannon, and prominent Government officials, until, at last, vested interests were satisfied, the delays of red-tape surmounted, and Victoria Park, as a

magnificent open space for the recreation of overcrowded East Londoners, was thrown open to the people. Sir Frederick was also chiefly instrumental in securing Epping Forest for the public, and the domain was made for ever secure from the land-grabber by being placed under the guardianship of the Corporation of the City of London. He was actively engaged in the establishing of the People's Palace, and has taken a benevolent interest in the Emigration Question. In 1860 he embodied his views upon that subject, in a pamphlet entitled, "Transplantation;" and in the following year was elected Chairman of the National Colonial Emigration League. Imperial Federation, of which he was one of the earliest advocates, has likewise largely engaged his attention, and received his support. He is the author of several works relating to the Colonies generally, including, among others, "Reasons for Promoting the Cultivation of New Zealand Flax;" "Transplantation: the True System of Emigration;" "Long Ago and Now;" "New Zealand: Past, Present, and Future;" "England and her Colonies at the Paris Exhibition;" "On the Political Relations of Mother Countries and Colonies;" "An Address on Imperial Federation;" and "Emigration to the Colonies;" and was editor of an important work entitled "Imperial Federation." His latest work is "A Winter Tour in South Africa." Sir Frederick Young derives his title from the fact that his services on behalf of Colonial matters has caused him to be created a Knight Commander of the Most Honourable Order of St. Michael and St. George. He is also on the Commission of the Peace for Middlesex, Westminster, the County of London, and the Liberty of the Tower, and a Deputy-Lieutenant of the Tower Hamlets. He married, in 1845, Cecilia, daughter of Mr. Thomas Drane, of Torquay, but she died in 1873.

**YOUNG, The Right Hon. George**, a Scotch Lord of Session with the courtesy title of Lord Young, eldest son of the late Alexander Young, Esq., of Nonesfield, co. Kirkcubright, born in 1819 and educated at Edinburgh, was called to the Scotch Bar in 1840, appointed Solicitor-General for Scotland in 1852, and retired in 1860. On the return of Mr. Gladstone to power in 1868, he again became Solicitor-General for Scotland, and in Oct., 1869, he was appointed Lord Advocate in the place of the Right Hon. J. Moncrieff. Mr. Young was Sheriff of Inverness-shire from 1853 till 1860, and

of Berwick and Haddington from 1860 till 1862. In April, 1865, on the retirement of Sir W. Dunbar, Bart., he was elected member in the Liberal interest for the borough of Wigton, and was again returned in 1865 and 1868. He was defeated at the general election of Feb., 1874, but in the same month he was, on Mr. Gladstone's recommendation, created a Lord of Session and one of the Lords of Justiciary in Scotland.

## Z.

**ZANARDELLI, Giuseppe**, an Italian statesman, was born in 1826, in Brescia. He became a student in the Ghislieri College at Pavia, and took his degree as Doctor of Law in 1848. He enrolled himself in the legion of students which was formed at that time, and took part in the war of independence. Returning to Brescia after August, 1848, he there prepared the rising which took place in March, 1849. He escaped, and in consequence of the amnesty granted by the Austrian Government, subsequently returned to Brescia, where, from 1851 to 1859, he lived as a private teacher of jurisprudence. When Lombardy became free, in 1860, Zanardelli sat in the Piedmontese Legislature in several Parliaments for Isco. In 1866 he became *commissario regio* of the Province of Bolluno, under the Ministry of Ricasoli. In 1869 he sat on the commission of inquiry into the tobacco Regia. At the Lombard Bar, Zanardelli enjoyed a very high reputation as an advocate. After the Ministerial crisis of 1876, he became Minister of Public Works in the first Depretis Cabinet, which portfolio he resigned in Nov., 1877, in consequence of differences with Depretis, which made it impossible for him to sign, as Minister of Public Works, the Railway Convention arranged by the latter. He was appointed to the Home Office in the Cairoli Ministry in March, 1878, and went into opposition on its fall.

**ZANZIBAR, Sultan of.** See SAID, SEYYID ALI.

**ZELLER, Eduard**, German theological and philosophical writer, was born at Kleinbottwar in Württemberg, Jan. 22, 1814, and studied at Tübingen and Berlin. In 1847 he became Professor of Theology at Bern, in 1849 at Marburg, and in 1862 Professor of Philosophy at Heidelberg, and subsequently in Berlin, where he has since remained. His principal works are: "Platonic Studies," 1839; "The History

of Greek Philosophy," 4th edit. 1876; "Critical Study of the History of the Apostles," 1854; "State and Church," 1872; "Strauss, his Life and Writings," 1874; and his chief work "The History of German Philosophy since Leibnitz," 1873. Several sections of his "History of Greek Philosophy," which is still the standard work on the subject, and widely used in the English Universities, have been translated into English by the late Miss S. F. Alleyne.

**ZENKER, Dr. Wilhelm**, was born in Berlin, May 2, 1829, and educated wholly in that city, where also he obtained the degree of Doctor of Philosophy in 1850. He was for many years a teacher of natural science, but has now retired. He has written many memoirs on very various subjects of which may be quoted "De natura sexuali generis Cypridis," 1850; "Memoir on the Depression in Northern Africa found by Gerh. Rohlfs," in the *Zeitschrift für Erdkunde*, 1872; "Der Vennadurchgang, 1874," 1874; "Meteorologischer Kalender," 1886; "Die Vertheilung der Wärme auf der Erdoberfläche," 1888.

**ZETLAND, The Right Hon. the Earl of.** See VICEROY OF IRELAND.

**ZIMMERMANN, Agnes**, was born at Cologne on July 5, 1847; at four years of age she came to England, and after studying under her father and one or two private masters, was entered at nine years of age as a student at the Royal Academy of Music, where Cipriani Potter was her master at the piano, and Dr. Steggall taught her harmony. On Cipriani Potter's retirement, in 1860, Herr Ernst Pauer became the young student's piano master, and she then began to study composition under Professor Macfarren. She continued to work hard, and while yet a pupil composed several works, instrumental and vocal, which were performed at the Royal Academy Students' Concerts. In 1860 she obtained the King's Scholarship, and the same honour fell to her in 1862; in the following year she won the Silver Medal, and on Dec. 5, she made what may be fairly termed her first appearance, at a Crystal Palace concert. In 1864, Miss Zimmermann went to Germany, where she played at the Leipzig Gewandhaus Concerts, before the Court of Hanover, and elsewhere. Returning to England, she grew rapidly in public favour. In 1879, 1880, 1881, 1882 and 1886 Miss Zimmermann played at many public concerts in Germany—at Hamburg, Düsseldorf,

Brunswick, Berlin, Frankfurt, Leipzig, Halle, &c., as well as privately to the Courts at Dresden, Berlin, Darmstadt and Brussels. For many seasons she has regularly taken part in the Monday and Saturday Popular Concerts, and has played in most of the provincial cities and at the principal places in Scotland. Miss Zimmermann's own compositions are well known to musicians, and her editions of Beethoven's and Mozart's Sonatas are standard works among students. She is now engaged on an edition of Schumann's works, the first volume of which was published in 1890.

**ZIMMERN, Helen**, was born in the free Hanse Town of Hamburg, March 25, 1846, but has lived in England since 1850, and is a naturalized British subject. She is the author of "Stories in Precious Stones," 1873; "Schopenhauer, his Life and Philosophy," 1876; "Gotthold Ephraim Lessing, his Life and his Works," 1878; "Half Hours with Foreign Novelists," 1880; "Tales from the Edda," illustrated by Kate Greenaway, 1882; and a paraphrase of the Persian poet, Firdusi, issued under the title of "The Epic of Kings," and illustrated with etchings by Alma-Tadema, R.A., 1882; "Life of Maria Edgeworth," 1883; "The Hanse Towns," 1889. She also writes much for periodicals and for English, American, German, and Italian newspapers.

**ZOLA, Emile**, a French writer, born in Paris April 2, 1840, passed his infancy in Provence with his father, the originator of the canal which bears his name at Aix. He then studied in the Lycée Saint-Louis in Paris, and obtained employment in the well-known publishing firm of Hachette & Co. He gave up that situation about 1865, in order to devote his attention exclusively to literature. He has been an industrious contributor to the newspaper press, and has written the following works of fiction:—"Contes à Ninon," 1863; "La Confession de Claude," 1865; "Le Vœu d'une Morte," 1866; "Les Mystères de Marseille," "Thérèse Raquin," "Manet," a biographical and critical study, 1867; "Madeleine Féral," 1868; a series of political, social, and physiological studies, entitled, "Les Rougon-Macquart, Histoire naturelle et sociale d'une famille sous le second Empire," which has been called

his "Human Comedy;" the earlier volumes are entitled respectively "La Fortune des Rougon," "Le Curé," "Le Ventre de Paris," "La Conquête de Plassans," "La Faute de l'Abbé Mouret," "Son Excellence Eugène Rougon," and "L'Assommoir" (1871-77.) The last-named volume created a great sensation, and has passed through many editions. M. Zola has since written a novel, entitled, "Une Page d'Amour," 1878; "Le Bouton de Rose," a three-act comedy played at the Palais Royal in 1878; "Nana," 1880; "Pot Bouille," 1882. His later works are:—"La Joie de Vivre," "Au Bonheur des Dames," "Germinal." All these belong to the "Rougon-Macquart" series. In 1888 M. Zola was appointed a Knight of the Legion of Honour.

**ZORRILLA, Manuel Ruiz**, was born in Castile, in 1831. He was a Madrid hurister and a deputy in the Cortes, when the share he took in the June revolt, 1866, earned him a condemnation, and he was compelled to seek refuge beyond the French frontier. In the Provisional Government of Admiral Topeta, after the revolution of 1868, he was Minister of Public Works, and caused much discontent when he ordered that church property should be taken into the custody of the State. He was Law Minister to Marshal Serrano in 1869, and, as President of the Parliament, advocated the Duke of Aosta's candidature to the throne. This advocacy was successful and on the accession of the Duke under the title of Amadeo I., Zorrilla was his righthand man. For his services he received, almost alone among non-royal personages, the famous order of the Annunziata, which ranks with the Golden Fleece and the Garter. When Amadeo abdicated, Zorrilla went to Portugal with him. He went back to Spain, but having allied himself openly with the Republicans, his position grew intolerable under King Alfonso, and in consequence he left the country. Since that time he has professed extreme Republican opinions, and is supposed to have been at the bottom of every conspiracy that has disturbed the peace of Spain. He lives in England, France, or Switzerland, according to the needs of the moment, and his intrigues are a perpetual source of anxiety to every Spanish Government in turn.

# NECROLOGY.

The following are the dates of publication of the various editions of this work :—

|                  |                  |                   |
|------------------|------------------|-------------------|
